RESOURCE CONTAINER

TRAIN, Interreg Italy-Slovenia

Technology park Ljubljana Ltd.

The Resource Container is an online educational tool, which pools together scientific, entrepreneurial and technology transfer knowledge produced by partners through activities of project TRAIN in Slovenia and Friuli Venezia Giulia (Italy). It's aim is to develop competences of researchers and companies to boost the technology transfer process and promote the results of project TRAIN in the programme area. It was developed by Technology park Ljubljana Ltd. in collaboration with project partners related to work package 3.3.3 (Resource Container).

The main topics include:

- Scientific and research reports

- Biotech and bioinformatics innovation systems in Slovenia and Friuli-Venezia Giulia (Italy)

- Global market trends

- Technology transfer process

- Supplementary chapters

The Resource container can be accessed in full at the following link (at the bottom of the page).
