Development Fund

Our future energy supply:

- CO2 neutral, safe, reliable and affordable

- Energy as an economic opportunity

- Energy as a spatial challenge
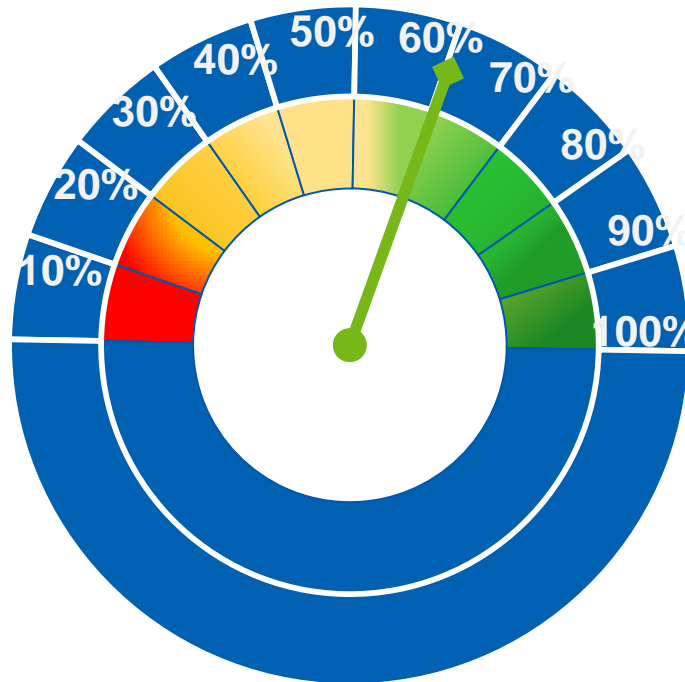

What are our ambitions?
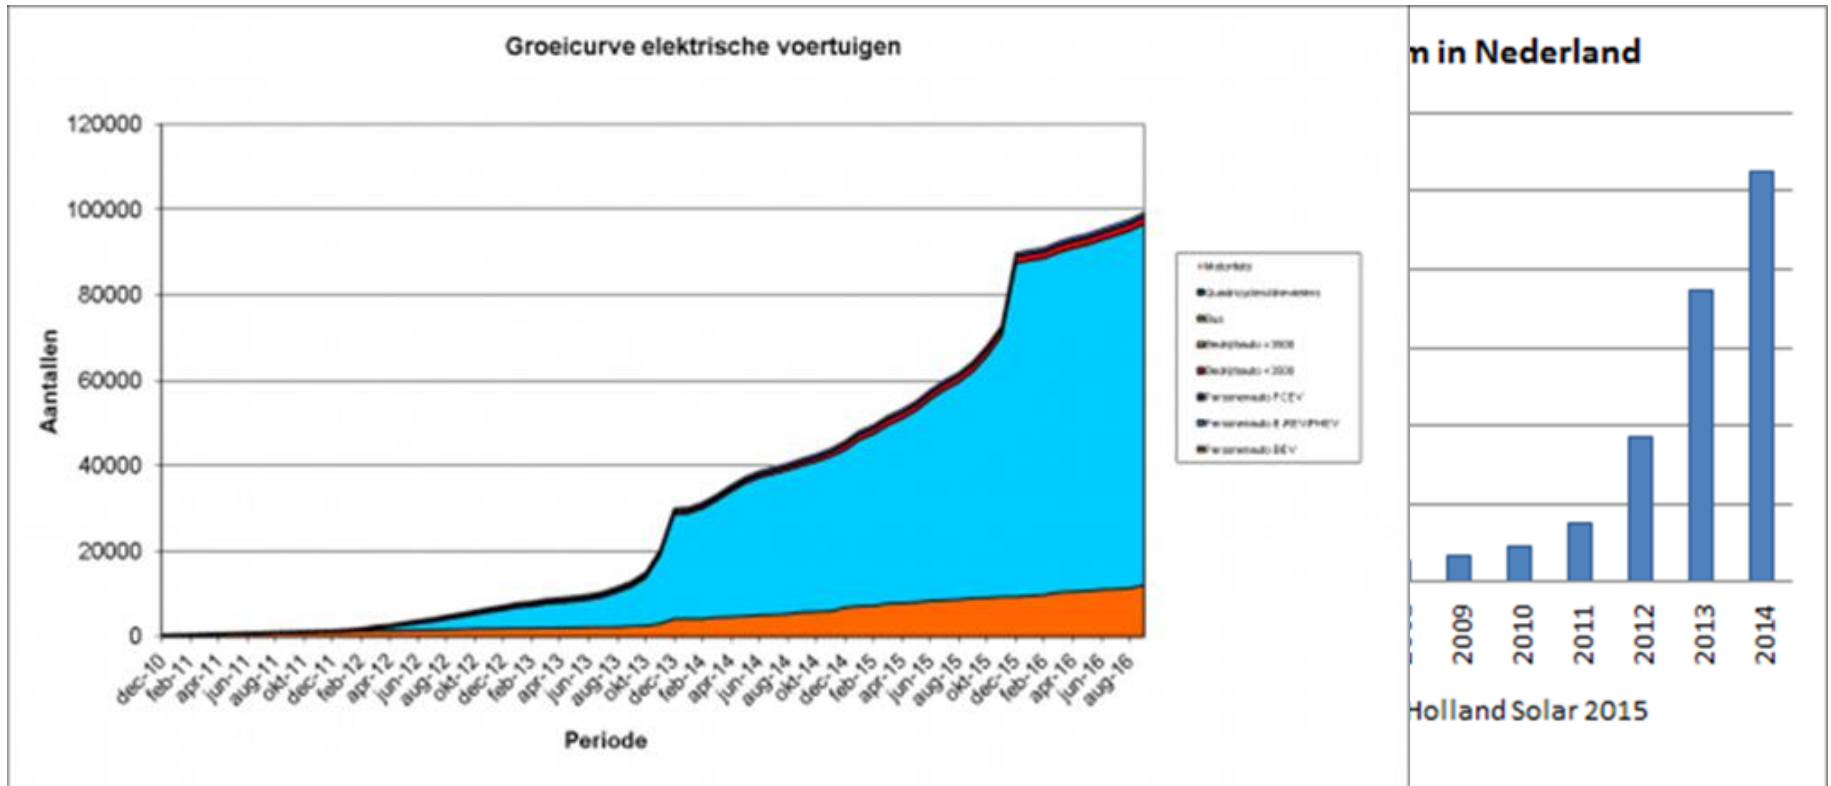

EU 2020 goals

Goals of Flevoland

– Energy neutral in 2020, excl. mobility

– Energy neutral in 2030, incl. mobility

Where are we standing?

# Increase in solar energy + EV's in the Netherlands

5

PROVINCIE FLEVOLAND

A solution for grid imbalances:
integrated and decentralised energy systems

Some examples from Flevoland:

Integration of solar energy and electric mobility:
a first impression of our ERDF project PowerParking

Energy transition is a matter of cooperation

How do we see our regional role?

- Integration of economic policy, energy policy, smart mobility policy and spatial planning;

- Promote public – private partnerships and enable initiatives of citizens

- Promote good practices (from local to European level)
