Technology Innovation Centre Međimurje (TICM)  
- daughter company

More than 50 implemented projects in 12 years

11 projects in progress

# Our Key Activities And Services

# About us

## ECONOMIC DEVELOPMENT

We invest a significant part of resources in supporting the development of the economy in Međimurje, through providing information to entrepreneurs, organising trainings for SMEs, creation of business plans and investment studies, preparing applications for national and EU support programmes and specialised services for innovative and technologically advanced enterprises.

## STRATEGIC PLANNING

We coordinate and prepare general and sector strategic documents important for regional development aimed towards a common vision. All projects implemented in the region covered by a specific strategy must be harmonised with the goals, priorities and measures defined therein. In such a way, the resources are focused on the best projects.

# About us

## AGRICULTURE AND RURAL DEVELOPMENT

We acknowledge the significance of agriculture, tourism and rural development in general for Međimurje and the wider region by providing information and consulting to farmers, NGOs and other stakeholders, providing consulting services to all interested beneficiaries, creation of investment studies and business plans and different development initiatives.

## HUMAN RESOURCE DEVELOPMENT

We prepare and implement projects aimed at strengthening human resources on the regional level, and provide significant support to county institutions and organisations whose activities extend to this field of work
