

eHealth SMEs For partnership

One objective of BaltCityPrevention is to foster the cooperation between Public Health Authorities and companies from the eHealth sector.

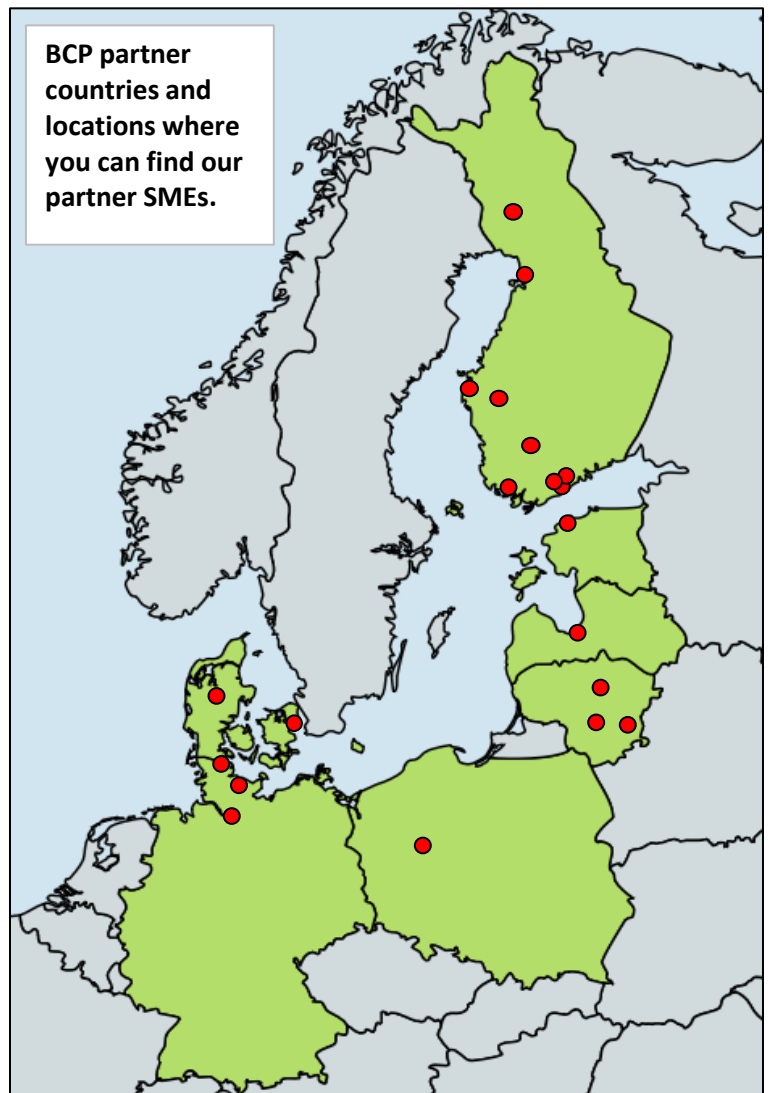

This catalogue is developed to map competencies and products of health IT SMEs in the Baltic Sea Region.

- One objective of BaltCityPrevention is to foster the cooperation between Public Health Authorities and companies from the eHealth sector. This catalogue is developed to map competencies and products of health IT SMEs in the Baltic Sea Region. The clusters operating especially in the eHealth sector are also welcome to join the Business Catalogue. The catalogue is updated throughout the project lifetime and accessible for all SMEs.
- The BaltCityPrevention business catalogue is easy to browse through. The companies are first listed in alphabetical order after countries (7 Baltic Sea Region countries). The list provides a brief explanation of the company's products and services and a direct link to the homepage. In the second list all the companies are listed in alphabetical order with more detailed background information.
