Environmental awareness of public authorities

Jana Sajdoková

CENIA, Czech Environmental Information Agency

17. 9. 2020

Environmental awareness of public authorities

- this topic is very underestimated
- practice shows us that is very needed
- Well – educated policy officers – giving the right example to the public
- The organisations itself should apply the basic principles of the EMS (if not EMAS directly)
- better implementation of the „green“ principles to the public procurements

Basic principles of the environmental protection and environmentally responsible behaviour

- Cooperation NGO Koniklec + MoE + CENIA
- Development of the textbook (134 pg)

The textbook is designed according to the scheme of influence - state - response

Influence - human activity (old ecological burdens, greenhouse gases, waste production, etc.)

Status - individual components of the environment (air, water, forest, landscape)

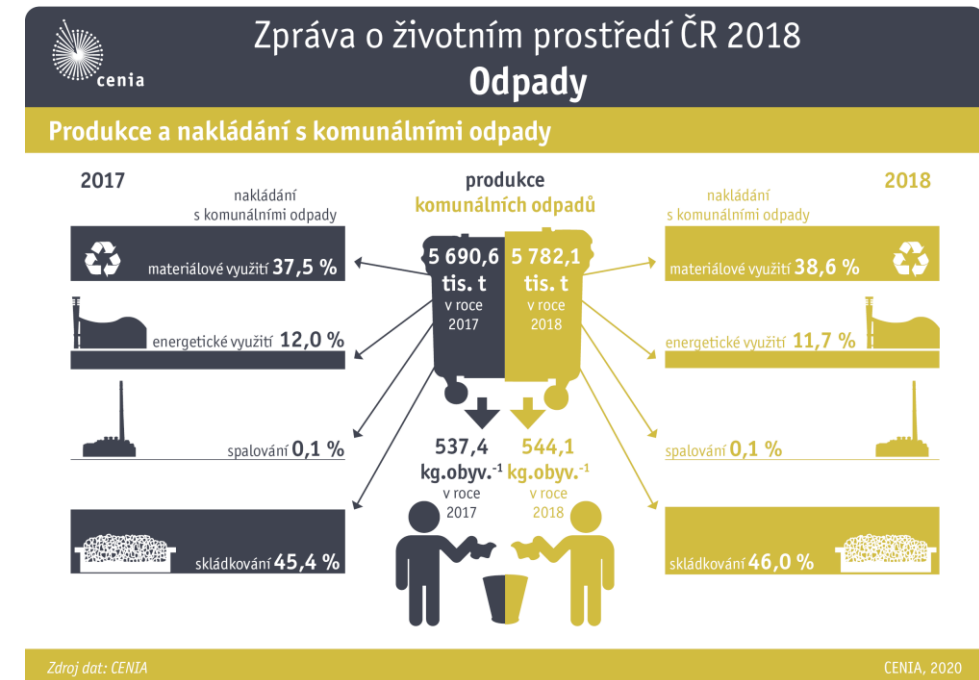

Response - such a reaction of society to changes that would mitigate or stop the impacts of human activity on the environment.

**ZÁKLADNÍ PRINCIPY
OCHRANY ŽIVOTNÍHO
PROSTŘEDÍ
A ENVIRONMENTÁLNĚ
ODPOVĚDNÉHO
CHOVÁNÍ**

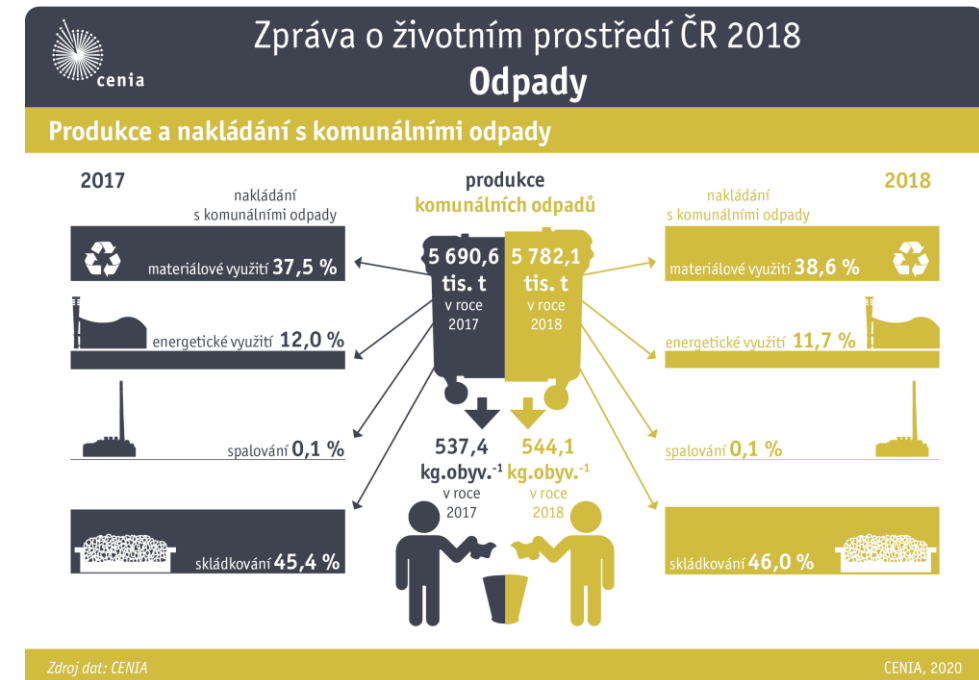

Basic principles of the environmental protection and environmentally responsible behaviour

- Development of the leaflets with the biggest highlights of the topic
- The leaflets also will contain the tips to methodology of the GPP

Basic principles of the environmental protection and environmentally responsible behaviour

- Actions:
- Target group: regional public officers
- Series of trainings
- Series of the supporting videos
- Webinars ...

Thank you very much!
