# Policy Learning Platform:

| During the reporting period, have you       | YES  |
|---|--|
| been requested to engage in any of the      |  |
| PLP services (e.g. expert helpdesk for      |  |
| policy advice, thematic workshops or        |  |
| webinars, good practice database,           |  |
| thematic publications)?                     |  |
|   |  |
| Could you describe any specific benefits    | The main benefit of the PLP service are the possibility to enlarge the good practice exchange with other |
| gained from using the PLP services (e.g.    | Interreg projects and to keep contact with other organizations active on this field.                     |
| cooperation with new organisations or       |  |
| with new projects, identification of        |  |
| interesting content for your own project?)  |  |
|   |  |
| Do you have any specific suggestions        | Further deepen the issue of circular economy business models.  |
| related to the PLP services (e.g. topics to |  |

| be covered, new services that could be |  |
|--|--|
| offered)?                              |  |
|  |  |

## **Result Indicators Update:**

| Result Indicator  | Target  | This semester update   |
|---|---|--|
| No of other policy instruments addressed by the project where measures inspired by the project will be implemented 100% of policy instruments addressed without structural funds link | 1   | DG Grow, none<br>ESIF funding  |
| Estimated amount of Structural Funds (from Growth & Jobs and/or ETC) influenced by the project (in EUR)   | Yet to be determine, for SUDs.  BASIS and ARLI funding is circa €6.6 million. | Further funding may be allocated through SUDS. Anticipate this information by November 2020    |
| Estimated amount of other funds influenced (in EUR)   |   | DG Grow influenced by CWA 2 million euros SYMBI pilot action circa 50K euro, influenced by CWA |

### **Territorial Impact**

If possible, please describe the effect of the policy instrument change in the territory (e.g. beneficiaries concerned, results achieved in terms of increased competitiveness or cleaner environment).

The BASIS and ARLI projects both received additional funding from ESIF and are delivering in region.

Through industrial symbiosis the project has delivered 203 business assists, assisted 30 new enterprises in the region, and assisted 53 business to create a new product or service in the region. The ARLI project has The ARLI (Alternative Raw Materials with Low Impact) programme, run by the University of Birmingham, aims to help SMEs develop innovative cost-effective products and processes, providing energy-efficiency gains and gaining added value from the use of raw and waste materials. The impact numbers have been requested from the programme.

#### **Self-defined Performance Indicators:**

| Policies | Self –defined performance indicators   | Target | This semester update  |
|----------|--|--------|---|
| 1        | 8218 tons (0.1 %) reduction in special waste annual production, in addition to 493.068 tons (6%) target of reduction included in WMP (§ 11), defined for 2020 (compared to 2010 production).     | 8,218  |   |
| 2        | 20% of SMEs benefiting from the instrument 3.4.2 that have increased their energy and resources savings  | 20     |   |
| 3        | Supporting the capacity of SMEs to grow in regional, national and international markets and to engage in innovation processes. Assisting businesses to grow. An extra 2% of SME will be assisted | 2      | 203 business assists<br>deliver by the<br>BASIS project. ARLI<br>number tbc |
| 4        | Number of SMEs participating in IS info days related to the opening of OP calls (20 companies per year)  | 40     |   |

| 5 | Resource efficiency and enhancing the competitiveness of small and medium-sized enterprises through the adoption of the Industrial Symbiosis approach, offering economic support to projects | €1,000,000 |  |
|---|--|------------|--|
