Hungarian Regional Action Plan Progress

Eszter Tanka

Project manager – IFKA

tanka@ifka.hu

24.02. Final Partner meeting

Action 1: CE-IS concept in calls

Background: emphasized need for legislation fostering circular economy initiatives

Action: analyzing the legislative background, making proposals & „circular” EDIOP calls

Pre-study as a starting point (TRIS)

Cost of action: 10 000 EUR

Funding source: IFKA’s other international project and own operational sources

Action 1: CE-IS concept in calls

1. TRIS proposal sent to the Ministry for Innovation and Technology – Department of Business Development

→ IFKA was invited to be a Steering Committee member of an OECD financed project to prepare the Hungarian circular economy strategy & action plan started January 2021

2.1 EDIOP 4.1.4-19 call: circa 88,8 million euro – closed in December 2020

Aim: to increase energy efficiency - **using biomass** (just one element – no info yet how many companies applied for this subtopic)

2.1 and 2.2: New Program for SMEs

Green concept – boosting energy and material efficiency

Green National Champions Program

Green National Champions Programme

Objectives:

- Developing the national green economy in a targeted, conscious way
- Making sustainable and ecofriendly products more competitive
- Promotion of clean technologies and industrial symbiosis (secondary raw materials)
- Increasing energy and material efficiency

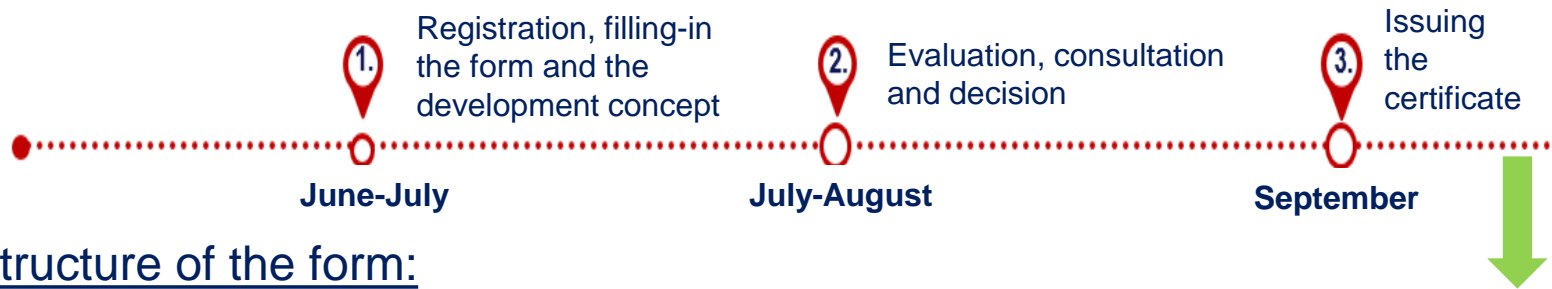

ZÖLD NEMZETI
BAJNOKOK

The process of the program

It is always linked to a determined call! – 1st phase EDIOP 1.2.11-20

Structure of the form:

1. Assessment of the company's current situation (50 point)
 - Basic data and general financial statistics
 - Past achievement
 - Strategic cooperations
 - Midterm strategic elements (employment policy, international markets)
 - Resource and energy efficient measures
2. Evaluation of the development concept (40 point)
3. Certifications /e.g.: ISO14001, 50001, EMAS, ecolabel (10 point)

Submission of applications to the Managing Authority

The certificate is a pre-condition for the submission!

The process of the program

The first phase: June – September 2020

I
Manufacturers contributing to energy efficient developments

Budget of the call: 29,8 million euros

II
Manufacturers contributing to water use efficiency developments

Nr. of filled-in forms: 131

Nr. of issued certificates: 54

Submitted application for MA, received support: 44

III
Electromobility related companies

Received support: 25,3 million euro

IV
Supporting companies using secondary raw materials (IS)

What is the future?

Topic	Call	Budget
I – IV.	VINOP	Under development, more than 166,66 million euros
V.	EDIOP 1.2.13-20	19,4 million euros
	VEKOP 1.2.7-20	8,4 million euros

Topics

Supporting companies using/producing secondary raw materials

IV

Modified

Manufacturers producing SUP substitutes

V

New category

Action 2: Green Public Procurement

Background: public authorities = major consumers (16% of GDP)

Action: analyzing the legislative background in Hungary, making a regional comparison, policy proposals and long term cooperation

Pre-study as a starting point (TRIS)

Cost of action: 20 000 EUR

Funding source: GREENIN project (GPPI focus), C-KIC project and others

GPP progress

GREENIN project (H2020 – international - GPPI focus) successfully implemented 1 year – until 2019 Oct

- 3 dissemination events held
- Design Option Paper prepared and sent to Hungarian stakeholders

Climate-KIC: CLIMEV-GPP project – Hungary-specific work from July 2019 – Dec 2019

thanks to TRIS project IFKA received - 2020:

GPP working group invitation to contribute to policy development (work is still on going, not widely communicated so far, the progress should be discussed with a larger audience approximately)

GPP progress 2021– Green Catalogue

Manufacturing companies

Solar panels systems

Complete heating, Cooling systems

Boiler system (including biomass boilers)

Lighting systems

Heat pump and heat recovery systems

Shading and shading structures

Insulation

Smart meters

Door and window structures

Energy storage products

Service providers

Installation and installation of energy efficiency systems (solar panels, smart meters..)

Construction sector

Education and trainings, company development

Energy audit and advising

Other, related companies

Action 3: Dissemination

Background: Cooperation and sharing of knowledge is essential

Action: different target groups

- IS concept through info days related to EU funds
- IS workshops for SMEs and regional clusters
- Join the most relevant nationwide circular economy initiatives – be an active promoter
- Environmental awareness within the population - Website for the citizens

Cost of action: 20 000 EUR

Funding source: IFKA's and HOI's other international projects and own operational sources
