Department

ARIEL

specific objectives per target groups

Small scale fisheries & aquaculture operators

Create new cooperation schemes with research, policies and other operators
Develop innovative technological solutions

Policy makers

Improve governance minimizing sectoral conflicts, favouring networking and co-management
Develop science-based policies

Research & Academia

Transfer in a more effective way the outcomes to stakeholders
Joint research agenda for Adriatic-Ionian area

Civil society

Increase the awareness and added value of SSFs and AQ products

ARIEL

the logic of intervention

FRAMEWORK ANALYSIS

- Identification and involvement of key players
- Regional and ADRION SWOTs delivery
- Best practices identification and capitalization
- Audit matrices preparation & submission to key players & consultation meetings for innovation needs discovery

PILOT ACTIONS

- Regional and cross-border training modules
- Capacity building meetings for policy makers
- Innovation brokering events for multi-actors grouping around core topics
- Pilot actions for innovation speed-up in 3 vessels/region and 2 farms/region
- Innovation Knowledge Community to aggregate and mobilize SSQ and AQ actors

TRANSFERRING OUTCOMES

- Strategic & operational guidelines to promote open/interactive innovation
- Memorandum of Understanding for cooperation and lines of actions towards the achievements of EUSAIR strategy
- Joint Research Agenda and Chart of Innovation Services

ARIEL

the expected results

- Establishment of transnational knowledge network among stakeholders involved in SSF and AQ to favor actors mobilization and aggregation on common challenges
- Identification of research, policies and socio-economic framework conditions for SSFs and AQ sustainable growth in ADRION areas
- Improved SSF and AQ actors' skills and knowledge
- Definition and application of technological and non-technological solutions fostering innovation up-taking
- Identification of common priorities for policy/research/market
- Co-management of shared fishing resources exploited by SSF to share power and responsibilities among stakeholders
- Harmonization and better coordination of SSF and AQ innovation policies and strategies
- Enhanced SSFs value chains
- New areas for investments

Increased capacity of key innovation actors of SSF and AQ to attract and develop innovation within regional system
