REBUS Renovation for Energy efficient BUildingS

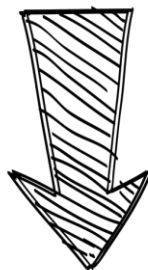

Sergio Gatteschi

ARRR – Lead Partner

10 November, 2020 | Final event

REBUS: our ambitious objective

Improve the capacity of public authorities in European regions to undertake efficient renovation works of their public building stock

Save energy and public resources!

REBUS: 8 great partners

Regional Agency for waste & resource management –
Lead Partner

City of Malmö (SE)

BORA 94 Borsod-Abaúj-Zemplén County Development
Agency Nonprofit LLC (HU)

PNEC - Association of Municipalities Polish Network
"Energie Cités" (PL)

Southeast Regional Development Agency (RO)

European Institute for Innovation (DE) - Advisory

Durham County Council (UK)

Region of Crete (EL)

REBUS: our approach

REBUS

supports local
authorities in
designing an

Energy Renovation Path (ERP)

To plan, implement
and monitor
renovation works in
public buildings

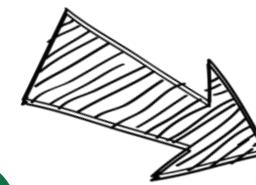

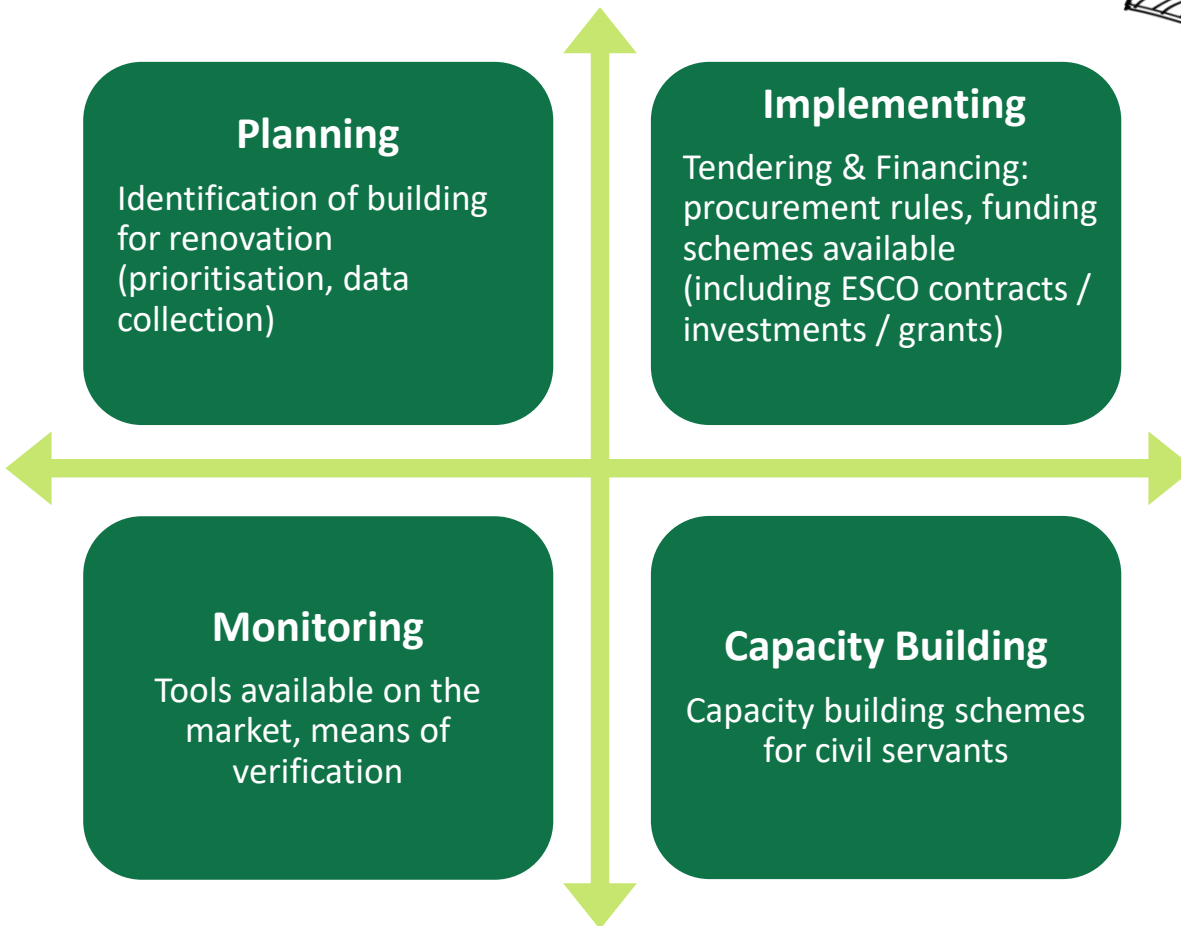

Tackling horizontal
theme of **capacity
building**

REBUS partners used interregional exchange to help public authorities improve key aspects of their energy policy:

- ✓ raise **awareness** on potential savings/ efficient use of resources;
- ✓ collect feedback and stream line data on **energy efficiency needs** in the public buildings;
- ✓ use this feedback to **select buildings** for renovation;
- ✓ draft **tenders** for renovation works that include energy efficiency baselines, targets and monitoring measures;
- ✓ **manage** the buildings in a more efficient way after renovation.

Energy Renovation Path - A step towards the EU Green Deal

Experiences on the 4 topics of the ERP
have been shared by partners and used to
draft the **Energy Renovation Path**

What made REBUS different?

REBUS partners developed and tested a ***new integrated approach to energy efficient renovation works in public buildings.***

REBUS provided Local and Regional authorities with a set of ***concrete measures*** that enabled them to take ***real steps*** towards reaching energy targets.

REBUS partners engaged their Managing Authorities in the path, as effective improvement in energy efficiency renovation of public buildings can only be achieved if concerted actions are taken into account in the ***programming agenda.***
