Improving cooperation in the area of orienteering

ICOR ER158

SUMMARY OF THE PROJECT

The aim of the project is to improve physical activity and health of people in the program area.

The project will establish a tradition of joint orienteering competitions in Russia and in Estonia by improving contacts between orienteers of two countries.

New orienteering maps will be created on the basis of the digitally scanned ground material (airborne laser scanning data, obtained from airplane). Additional equipment for orienteering will be purchased.

2 joint training camps and 2 competitions (1 in Estonia and 1 in Russia) with involvement of 30 participants from partner country will be organized for the first time. During competitions activities on cleaning up dumped waste in the forest are planned.
