This project has received funding from the European Union's Horizon 2020 research and innovation programme under Grant Agreement No.776811, Topic:H2020-SC5-2017

The Project is funded by the European Union

MIREU

The MIREU project aims to establish a network of mining and metallurgy regions across Europe. The main objective of the project is to identify ways to ensure the sustained and sustainable supply of mineral raw materials to the EU and to promote investment, innovation and growth in the sector.

The MIREU project will bring together European mining and metallurgy regions to work together on improving conditions for the responsible development and secure supply of raw materials in the EU. The regions will share their experiences and knowledge to help tackle the fundamental challenges of establishing and maintaining an extractive industry.

The current MIREU network comprises 17 regions from 14 European countries. Chile is also represented in the network.

objectives

- *Map synergies between mining and metallurgy regions*
- *Identify favourable conditions for raw material development*
- *Engage with stakeholders and raise public awareness about the need for minerals and the importance of a sustained supply within Europe*
- *Develop EU level Social License to Operate (SLO) Guidelines and an accompanying Toolkit*

30 Partners | 17 Regions | 15 Countries

REMIX

The REMIX project aims to connect EU regions through their raw materials and minerals production, metallurgy and common S3 objectives.

The INTERREG Europe Programme improves the implementation of regional development policies and programmes, in particular programmes for investment for growth and jobs and programmes that support the delivery of innovation by actors in regional innovation chains in the areas of smart specialisation and innovation opportunity.

REMIX seeks to improve regional strategies and their implementation, with the aim to enhance sustainability in mining and related industries to create a positive impact on sustainable development, growth and jobs, and new SME industries in the REMIX partner regions.

objectives

- *Develop a dialogue between regional and industrial policy making in the EU*
- *Involve RDI in regional development processes*
- *Raise awareness of the sustainability of the EU mining sector*
- *Increase the regional innovation capacity in mining and metallurgy*
