Executive Summary

The present deliverable T2.2.3 “Virtual Transnational Business Innovation & Entrepreneurship Center (e-platform)” is part of the activity T2.2: “Development of e-application of innovative ICT services” and it aims to present a general overview of the Virtual Transnational Business Innovation & Entrepreneurship Center (ViBIEC) platform, which is one of the main deliverable of the INNOVARGO Project.

The deliverable has five main parts:

- A general overview of ViBIEC, including the objectives, structure, and specifications of the platform (Chapter 1)
- A detailed presentation of the e-business tools incorporated in ViBIEC (Chapter 2)
- An overview of the e-networking capabilities of ViBIEC (Chapter 3)
- A brief presentation of the e-incubator module of the platform (Chapter 4)
- The detailed manual of ViBIEC (Chapter 5)

INNOVARGO Project focuses on the development of links and synergies between farmers, agro-food enterprises, Research Institutes and Public Authorities for the promotion of agro-food products’ extroversion, the development of agro-food companies’ internalization and the promotion of environmentally–friendly farming practices. To this end, the main outputs of the Project are a Transnational Cooperation Network in agro-food & tourism sector, as well as a Virtual Transnational Business Innovation & Entrepreneurship Center (ViBIEC).

The main goal of ViBIEC, in combinations with other project’s outputs, is to help the entrepreneurship development of the agro-food sector in the Adrion area and provide support for entrepreneurs. Also, ViBIEC aims to provide information relative to agro-food businesses, guidance in innovation and entrepreneurship activities, training in some major agro-food business topics, networking capabilities, as well a set of online business tools that may help all the aforementioned goals.

In concordance with the Project’s objectives, emphasis is given on extroversion and international agro-food co-operation. ViBIEC should not be considered as a simple online business platform, but rather as a digital ecosystem of innovation and entrepreneurship, which adopts a Quadruple Helix model.

While the Triple Helix model of knowledge production stresses three ‘helices’ that intertwine and, by this, generate an innovation system (academia/universities, industry, and state government), the Quadruple Helix model adds to the above stated helices a ‘fourth helix’ that is identify as the ‘media-based and culture-based public’. This fourth helix associates with ‘media’, ‘creative industries’, ‘culture’, ‘values’, ‘life styles’, ‘art’, and perhaps also the notion of the ‘creative class’. This should emphasize that a broader understanding of knowledge production and innovation application requires that also the public becomes more integrated into advanced innovation systems.

Quadruple Helix Innovation System Framework places a stronger focus on cooperation in innovation and, in particular, the dynamically intertwined processes of co-opetition, co-evolution, and co-specialization within and across regional and sectoral innovation ecosystems that could serve as the foundation for diverse smart specialization strategies and introduce a move towards systemic and user-centric innovation structures.

This Quadruple Helix Innovation System Framework puts innovation users at its heart and encourages the development of innovations that are pertinent for users (civil society). Users or citizens here own and drive the innovation processes. In this context, new innovative products, services and solutions are developed with the involvement of users in their role as lead users, co-developers and co-creators.

The main aim of ViBIEC is to offer support through e-incubators, e-business network platform, digital tools for the self-assessment of an SME's level of extroversion, as well as other consulting e-tools (e-learning, e-library, etc.) to agro-food companies. To achieve this, the main modules (parts) of ViBIEC include the following:

- e-business tools
- e-incubator
- e-library
- e-networking
- e-learning

The e-business tools module contains ten basic tools that users may download. These tools have been developed in rather simple format (MS Excel), and thus they have no strong usage requirements. A brief description and detailed instructions, including examples, are also available for these tools.

The e-business tools are grouped in three major categories:

- Self-Assessment Tools (Business readiness, Readiness for internationalization)
- Financial Tools (Break-even analysis, Loan amortization schedule, Startup cost calculator, Cash flows and financial forecasts)
- Business Tools (SWOT and PEST analysis, Business plan, Export price calculator, Business model canvas)

The e-incubator module aims to help agro-food companies to develop their business ideas. In particular, every user, during registration in the platform, may declare that he/she wishes to serve as mentor. At the same time, agro-food companies may input their business ideas in ViBIEC and request a feedback by mentors. In addition, all other modules of the platform may provide incubation support for new business ideas. For example, using the business model canvas, the business plan tool or the break-even analysis, agro-food SMEs may conduct a preliminary analysis about any new business idea. Similarly, using the e-networking module, agro-food SMEs may find potential partners, collaborations, etc. It should be noted that, based on the Quadruple Innovation Helix approach, universities and research institutions may also input their services or new research results in ViBIEC. Thus, agro-food companies may search, find and use these innovative research results.

On the other hand, the e-library module provides an online library with information, links, legislation, best practices, etc. in the agro-food sector. This module is based on the outputs of Deliverable T2.1.1 "Collection of primary and secondary data" and provides the following major information:

- Policies for agro-food clusters or cooperation networks
- Studies related to the agro-food sector
- Laws and regulations for exports/imports of agro-food products
- EU quality schemes for agro-food products (cultivation areas, production, trade, exports, etc.)
- Regulations for innovative agro-food companies

The registered users may enter more information about their business area, their products, and the services they provide. Moreover, the users are able to enter more information concerning them having the form of documents, media and contact details. This extra information supports the implementation of an e-networking system in which the registered users may search, find and be connected with, universities, research centers, service and technology providers, etc. This module is based on the outputs of Deliverable T2.1.1 "Collection of primary and secondary data" and provides the following major information:

- Trade fairs, trade shows and exhibitions for agro-food products
- Lists of agro-food clusters or cooperation networks
- Lists of exporters, importers, wholesalers of agro-food products

In addition, users may search, find, and connect with other registered users in the platform. These search capabilities are based on different users' characteristics (geographic area, business, area, type of user, products/services, etc.).

Also, the online forum is another important feature of ViBIEC that provides public or peer-to-peer (private) communication among registered users.

Finally, the e-learning modules offers a list of 50 topics related to the agro-food sector. Each topic includes a description of a concept, along with additional external sources. A list of comprehensive question is also included in the e-library module.

In order to provide a digital innovation and entrepreneurship ecosystem, ViBIEC support different user roles: Agro-food Business, Agro-food Cluster/Network, Business Support Organization, Academic/Research Organization, Local Public Organization, Other entities, Admin, Local Admin. Different rights may be assigned to the different user types.

Concluding, this deliverable finalized the Work Package T2: "WPT2: Development of innovative tools and services for the SMEs internalization". However, the included material will be constantly updated and enriched in order to support the capitalization activities of the Project, particularly the Transnational Cooperation Network.

1 Introduction

1.1 ViBIEC Approach

INNOVARGO Project focuses on the development of links and synergies between farmers, agro-food enterprises, Research Institutes and Public Authorities for the promotion of agro-food products' extroversion, the development of agro-food companies' internalization and the promotion of environmentally-friendly farming practices. To this end, the main outputs of the Project are:

- A Transnational Cooperation Network in agro-food & tourism sector, and
- A Virtual Transnational Business Innovation & Entrepreneurship Center (ViBIEC).

The main goal of ViBIEC, in combinations with other Project's outputs, is to help the entrepreneurship development of the agro-food sector in the Adrion area and provide support for entrepreneurs. Also, ViBIEC aims to provide information relative to agro-food businesses, guidance in innovation and entrepreneurship activities, training in some major agro-food business topics, networking capabilities, as well a set of online business tools that may help all the aforementioned goals.

It should be noted that, in concordance with the Project's objectives, emphasis is given on extroversion and international agro-food co-operation. ViBIEC should not be considered as a simple online business platform, but rather as a digital ecosystem of innovation and entrepreneurship, which adopts a Quadruple Helix model.

The Triple Helix model of knowledge production, developed by Henry Etzkowitz and Loet Leydesdorff (2000), stresses three 'helices' that intertwine and, by this, generate an innovation system: academia/universities, industry, and state government. They are inclined to speak of 'university-industry-government relations' and networks, also placing a particular emphasis on 'tri-lateral networks and hybrid organizations' where those helices overlap. The Triple Helix may be regarded as a 'core model' for innovation, resulting from interactions in knowledge production referring to universities (higher education), industries (economy), and governments (multilevel). The Triple Helix is being contextualized by the broader innovation model of the Quadruple Helix (government, university, industry, civil society), which is blending in features of the public, for example civil society and the media-based and culture-based public (Carayannis and Campbell, 2011).

Moreover, the components of the Triple Helix system are the institutional spheres of university, industry and government where the actors encompassed by these spheres are differentiated as follows (Carayannis and Rakhmatullin, 2014)

- a) R&D performers that can be found in university, which is a universal knowledge-producing and disseminating institution that encompasses both the arts and the sciences, and occasionally integrates and cross-fertilizes these apparently divergent modalities in interdisciplinary units.
- b) Non-R&D actors, such as those intervening in the context of design, production marketing, sales, technology adoption, incremental change, combining existing knowledge in new ways, interaction with users, acquisition of patents and licenses etc.
- c) Hybrid institutions synthesizing elements of academia, industry and government institutional design and/or support, which can be both R&D and non-R&D performers.

In extension of the Triple Helix model, Carayannis and Campbell (2009) suggest a 'Quadruple Helix Innovation System Framework'. Quadruple Helix, in this context, means to add to the above stated helices a 'fourth helix' that they identify as the 'media-based and culture-based public' (Figure 1). This fourth helix associates with 'media', 'creative industries', 'culture', 'values', 'life styles', 'art', and perhaps also the notion of the 'creative class'. This should emphasize that a broader understanding of knowledge production and innovation application requires that also the public becomes more integrated into advanced innovation systems (Carayannis and Campbell, 2011).

Figure 1. Quadruple Innovation Helix Model

Quadruple Helix Innovation System Framework places a stronger focus on cooperation in innovation and, in particular, the dynamically intertwined processes of co-opetition, co-evolution, and co-specialization within and across regional and sectoral innovation ecosystems (Carayannis, 2008; Carayannis and Campbell, 2009, 2012) that could serve as the foundation for diverse smart specialization strategies (and introduce a move towards systemic and user-centric innovation structures).

This Quadruple Helix Innovation System Framework puts innovation users at its heart and encourages the development of innovations that are pertinent for users (civil society). Users or citizens here own and drive the innovation processes. Arnkil et al. (2010) maintain that the degree of user involvement could be defined as inclusive of the 'design by users'. In line with this perspective, new innovative products, services and solutions are developed with the involvement of users in their role as lead users, co-developers and co-creators (see also Carayannis et al., 2018a, 2018b).

1.2 ViBIEC Objectives and Structure

The main aim of ViBIEC is to offer support through e-incubators, e-business network platform, digital tools for the self-assessment of an SME's level of extroversion, as well as other consulting e-tools (e-learning, e-library, etc.) to agro-food companies.

The main modules (parts) of ViBIEC are shown in Figure 2 and include the following:

- a) e-business tools
- b) e-incubator
- c) e-library
- d) e-networking
- e) e-learning

The e-business tools module contains ten basic tools that users may download. These tools have been developed in rather simple format (MS Excel), and thus they have no strong usage requirements. A brief description and detailed instructions, including examples, are also available for these tools.

The e-business tools are grouped in three major categories:

- Self-Assessment Tools
 - Business readiness
 - Readiness for internationalization
- Financial Tools
 - Break-even analysis

- Loan amortization schedule
- Startup cost calculator
- Cash flows and financial forecasts
- Business Tools
 - SWOT and PEST analysis
 - Business plan
 - Export price calculator
 - Business model canvas

Figure 2. ViBIEC structure

The e-incubator module aims to help agro-food companies to develop their business ideas. In particular, every user, during registration in the platform, may declare that he/she wishes to serve as mentor. At the same time, agro-food companies may input their business ideas in ViBIEC and request a feedback by mentors. In addition, all other modules of the platform may provide incubation support for new business ideas. For example, using the business model canvas, the business plan tool or the break-even analysis, agro-food SMEs may conduct a preliminary analysis about any new business idea. Similarly, using the e-networking module, agro-food SMEs may find potential partners, collaborations, etc. It should be noted that, based on the Quadruple Innovation Helix approach, universities and research institutions may also input their services or new research results in ViBIEC. Thus, agro-food companies may search, find and use these innovative research results.

On the other hand, the e-library module provides an online library with information, links, legislation, best practices, etc. in the agro-food sector. This module is based on the outputs of Deliverable T2.1.1 “Collection of primary and secondary data”, as shown in Figure 3. E-library provides the following major information:

- Policies for agro-food clusters or cooperation networks
- Studies related to the agro-food sector
- Laws and regulations for exports/imports of agro-food products
- EU quality schemes for agro-food products (cultivation areas, production, trade, exports, etc.)
- Regulations for innovative agro-food companies

It should be noted that this info can be constantly updated in ViBIEC.

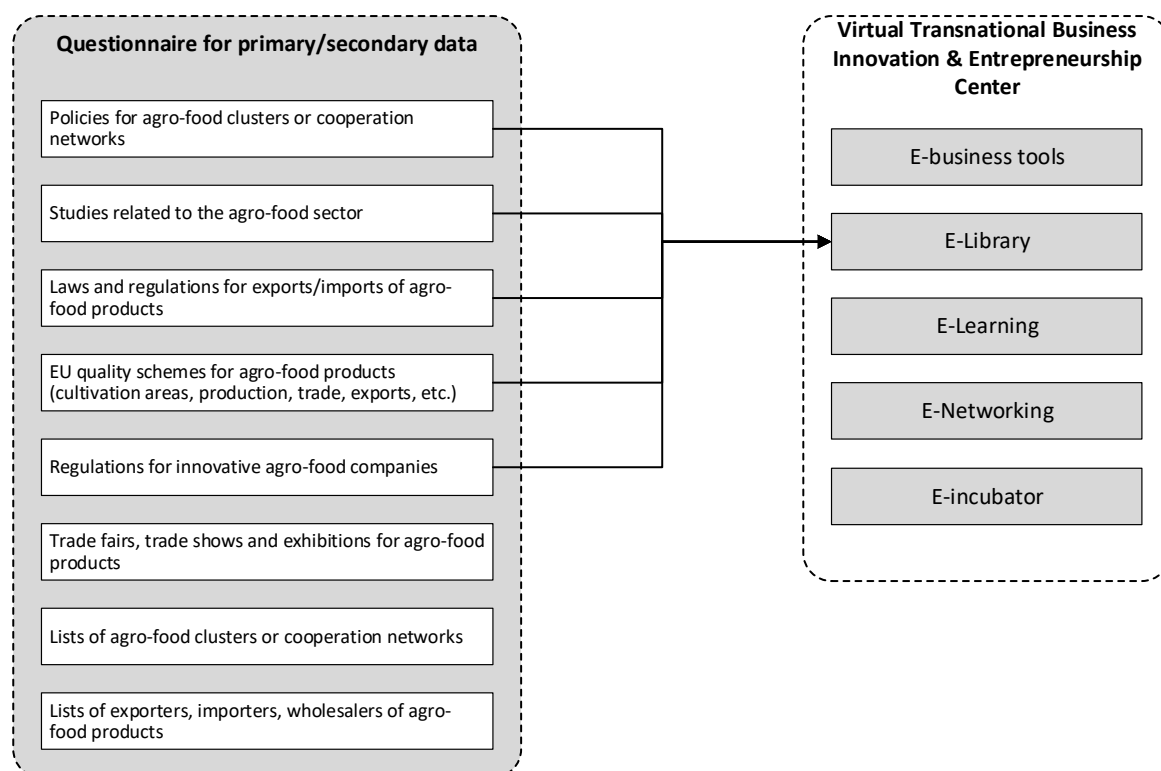

Figure 3. Methodology for integrating collected data in e-library

The registered users may enter more information about their business area, their products, and the services they provide. Moreover, the users are able to enter more information concerning them having the form of documents, media and contact details. This extra information supports the implementation of an e-networking system in which the registered users may search, find and be connected with, universities, research centers, service and technology providers, etc. This module is based on the outputs of Deliverable T2.1.1 “Collection of primary and secondary data”, as shown in Figure 4. E-networking provides the following major information:

- Trade fairs, trade shows and exhibitions for agro-food products
- Lists of agro-food clusters or cooperation networks
- Lists of exporters, importers, wholesalers of agro-food products

In addition, users may search, find, and connect with other registered users in the platform. These search capabilities are based on different users’ characteristics (geographic area, business, area, type of user, products/services, etc.).

Also, the online forum is another important feature of ViBIEC that provides public or peer-to-peer (private) communication among registered users.

Finally, the e-learning modules offers a list of 50 topics related to the agro-food sector. Each topic includes a description of a concept, along with additional external sources. A list of comprehensive question is also included in the e-library module.

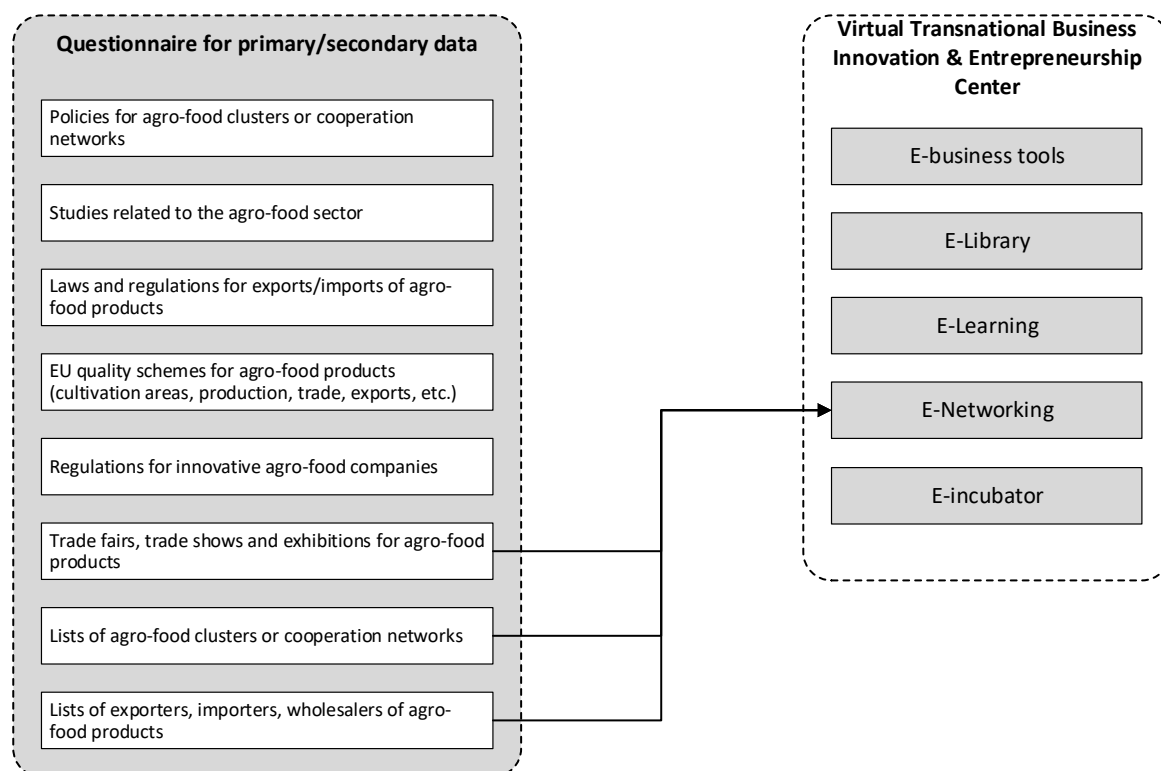

Figure 4. Methodology for integrating collected data in e-networking

Table 1. E-learning topics

1. Sustainable agriculture	26. Biodegradable food packaging
2. Agroecology	27. Bioplastics in packaging
3. Circular approach in agriculture	28. Biopolymers from renewable sources
4. Biodiversity	29. Glass packaging
5. Closed loop agriculture	30. Smart packaging
6. Organic agriculture	31. Reuse and refill concept
7. Sustainable water management in agriculture	32. Reforming CAP
8. Nutrients in waste water	33. Greening
9. Innovation in agriculture	34. Common food policy
10. Innovative agri-start ups	35. EU Quality Schemes
11. Fertilizers	36. Young farmers in EU
12. Biofertilizers	37. Sharing economy in agriculture
13. Fertilizing with biocarbon	38. Urban agriculture
14. By-products in agriculture and thier use	39. Indoor farming
15. Genetic engineering	40. Food donations
16. Nanotechnology	41. Food waste
17. Agroforestry	42. Agro-food clusters
18. Insects as a source of protein for food and feed	43. Cooperatives
19. Renewable energy in agriculture and agro-food sector	44. Short supply chains
20. Biomass in EU	45. Degradation and revitalisation of soil
21. Biogas in EU	46. Reuse of waste water in agriculture
22. Bio-waste in EU	47. Promotion of agricultural products
23. Precision/smart/digital farming	48. Diet changes
24. Digitalization in agriculture	49. Sustainable diet
25. Blockchain technology in agriculture	50. Agro-food sector and tourism

1.3 Specifications and User Roles

A multi-layer architecture has been adopted for the development of the platform. It also integrates RESTful API technologies with JSON implementation to support communication with third-party applications (e-learning, e-networking) and enable future development and integration into new subsystems online platform.

Specifically, ViBIEC includes the following sub-systems:

- Content Management System (CMS - Back Office)
- Sign up and Login system
- e-business tools system: self-assessment, financial and other business for agro-food SMEs
- e-incubator system: virtual enterprise environment for new business ideas
- e-library system: online library with information, links, legislation, best practices, etc.
- e-networking system: online library of stakeholders in the agro-food sector, including a forum with public and peer-to-peer communication
- e-learning system: a dynamic list of topics for agro-food SMEs in entrepreneurship, sustainability, innovation or extroversion.

The ViBIEC platform is available in <https://innovagro.green-projects.com.gr/>.

Through this CMS - Back Office the users were given the capability to manage the data found on the platform with a simple and practical way. Through the Back Office system, the management of all users is implemented along with the security infrastructure of the whole platform.

User Management

This entity refers to users, who have access to the platform. The users' entity is closely related to the security system. When a user is created, the rights' user profiles are also created that are user-specific. The user-specific rights profile enables users to facilitate or accelerate the execution of every-day operations.

Security

The platform provides a powerful security system, which is implemented through the user role model. This model provides total security to the subsystems and the model's management does not present significant difficulties to administrators. Administrators may create roles and assign access rights as well as simple tasks operation rights to them. Under the term simple tasks we define the operations that are executed in every screen and entail tasks such as Display, Data Process, Input, Update, Delete and Search. The operational rights are assigned on a form level. The administrator connects the users with roles, so that every user inherits the operational execution rights that are connected to the user's role. In addition, each user may be assigned more than one roles; as a result the security profile that originates from the combination of every role's rights is the final security profile of the user.

Apart from the simple tasks execution rights, which are derived from the roles that have been created, the platform provides access to special operations that are supported by the platform. In that case, the administrator defines each role's execution rights for these special operations.

The Security Subsystem provides the following characteristics:

- **User Authentication.** The system also provides a user access control circuit, in order to deny access to users that are not authorized. This circuit has been implemented through a special operation and login screen, in which the users enter their Username and Password.
- **User Authorization.** User authorization is the major key of the security subsystem. Among the authorization functions the rights which are provided through the roles are combined with the users who are related with these roles. So one is able to know exactly which functions will be executed by each user. User authorization protects the system as well as the data that the system manages from unauthorized use and it depicts the users' hierarchy as far as functions are concerned. User authorization is carried out after their authentication and during the user-system session.
- **Centralized User Management.** The security module enables centralized user roles and rights (user security profile) management. It is a horizontal functionality axis of the platform, which is extended to all the other subsystems.
- **Security Implementation per Tier.** Due to this characteristic, user authorization is confirmed in all the tiers. Starting from the Presentation Tier, on which only the functions that the user will be able to operate will be displayed, the Business Logic Tier will confirm the user's applications and then will run the necessary functions on the Data Base Tier.

The implementation of the security structure has been based on the Roles/Rights model starts with the recording of the system's Functions, which are grouped according to entities. (An entity is the description of an element that is stored in the system through its specific attributes and usually refers to a table of the Database). As a result, all the system's functions are recorded (e.g., the User entity, that represents a registered system user is described through the following characteristics: First name, Last name, User name, Password etc., and the Functions are: Create User, Update User, Delete User, etc.). Following, Roles are created in the system, which consist of Functions, and these Functions are connected to the system's users. Through this process the Functions that a user can perform upon entering the system arise (security profile).

The following users' roles are supported in the platform:

1. Agro-food Business
2. Agro-food Cluster/Network
3. Business Support Organisation
4. Academic/Research Organisation
5. Local Public Organisation
6. Other entities
7. Admin
8. Local Admin

For roles 1, 2, 3, 4, 5 and 6, during the registration, the user may select whether he/she wants to be Mentor or not, a characteristic that will play a specific role within the e-incubator system. More specifically, in the e-Incubator Forum (Users of Type (1) can create a business idea, which might be a new company, a business unit, a product or a service. Users of Types (2), (3), (4), (5) and (6) may view and comment on the idea if they are connected with the specific user of Type (1). Users of Types (2), (3), (4), (5) and (6) may be selected for connection with users of Type (1) only if they have chosen to act as Mentors.

The following rights will be assigned per users' type:

- Add (A)
- Edit (E)
- View (V)
- Request (R)
- Accept (Ac)

Table 2 presents an overview of rights for each different role in the platform.

1.4 Deliverable Info and Structure

Work Package T2: “WPT2: *Development of innovative tools and services for the SMEs internalization*” aims to the development of the aforementioned ViBIEC platform and includes two main activities:

- Activity T2.1: Information database and
- Activity T2.2: Development of e-application of innovative ICT services

ViBIEC offers support to SMEs of agro-food business in the participating regions/ countries, aiming at their growth and internalization. Other goals are to enhance the SME’s extroversion, their innovation capacity, their networking ability and also to promote the use of environmentally–friendly farming practices.

Throughout the WPT2 implementation, all partners have been involved in the collection of primary and secondary data (Activity T2.1), which have been used for the e-application of innovative ICT services development (Activity T2.2).

Activity T2.2 which refers to the development of ViBIEC and contains the following deliverables:

1. Deliverable T2.2.1 (e-library)
2. Deliverable T2.2.2 (e-learning)
3. Deliverable T2.2.3 (Virtual Transnational Business Innovation & Entrepreneurship Center - e-platform)

The present deliverable T2.2.3 “Virtual Transnational Business Innovation & Entrepreneurship Center (e-platform)” includes the following:

- A general overview of ViBIEC, including the objectives, structure, and specifications of the platform (Chapter 1)
- A detailed presentation of the e-business tools incorporated in ViBIEC (Chapter 2)
- An overview of the e-networking capabilities of ViBIEC (Chapter 3)
- A brief presentation of the e-incubator module of the platform (Chapter 4)
- The detailed manual of ViBIEC (Chapter 5)

2 E-business Tools

2.1 Self-Assessment Tools

2.1.1 Business readiness

Business Readiness Questionnaire is a tool that could be leveraged for the measurement of individuals' readiness for entrepreneurship. The questionnaire is based on the work proposed by Coduras et al. (2016). The user should response to questions referring to two different categories:

- The first category is used for the assessment of the user's readiness for entrepreneurship based on their entrepreneurial/managerial background.
- The second category evaluates user readiness by a psychological perspective, with the following subcategories:
 - External entrepreneurial influence
 - General psychological traits

Regarding the scoring system, in the first category the minimum score is 0, the maximum score is 300, while the average is 150 points, indicating that users scoring 150 points or higher tend to be ready to start entrepreneurial ventures when the entrepreneurial/managerial perspective is considered. In the second category there are 2 subcategories, one focusing to the external entrepreneurial influence while the other refers to the user's psychological traits in general. For the former, the minimum score is 0 points, the maximum is 4, with an average of 2 points, while for the latter the minimum score is 0 points, and the maximum is 510, with an average 255 points. For users managed to score the average (or higher) in each of the three categories an overall score indicating the overall readiness for entrepreneurship will be provided.

Finally, the user receives a normalized score between 0 and 100% on each of the three categories presented in a radar graph.

Example - Instructions

1. Download and open the file "Business_Readiness.xlsx".
2. Go to "Questionnaire" sheet and answer all the questions using the drop-down menus (**grey shaded cells**). A score will be automatically assigned to the response given.

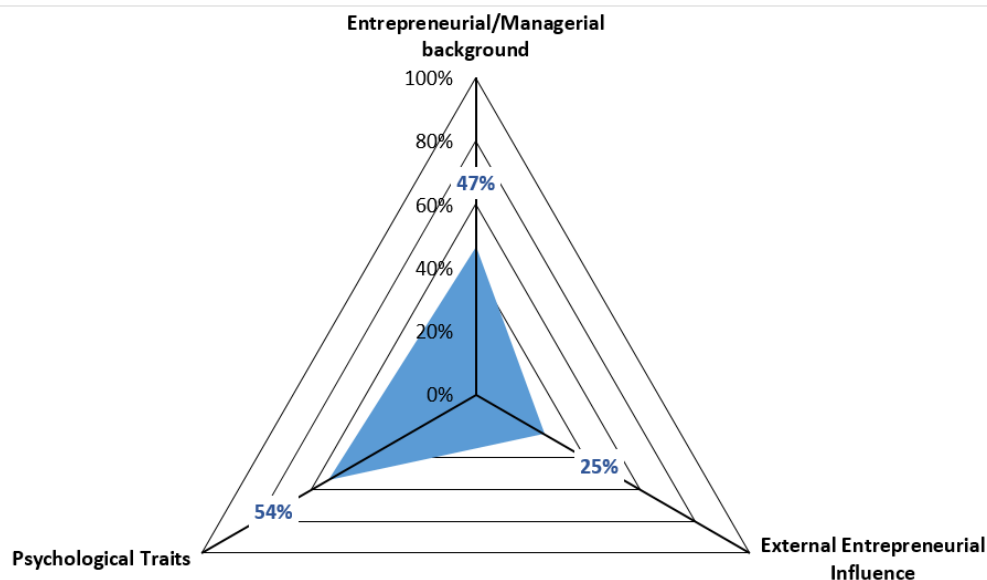

Part 1: Entrepreneurial/Managerial Background			
Please respond to the following questions by choosing one of the available answers (select from drop-down menu)			Score
1	Possession of economic, business management, business creation or similar education/training	Medium level	5
2	Years of experience in business management	None/Low level Medium level High/Very high level	5
3	Among the bellow jobs positions, you prefer	An option different from the previous	0
4	What is your level of satisfaction with your current job/ work situation?	High/Very high satisfaction	0
5	What is your level of self- realization associated with your current life situation?	High/Very high	0
6	In regards to the bellow options, what do you prefer?	Being completely /some economic dependent from others	0
7	Entrepreneurship attracts you as a career	Medium attraction	5

3. After answering all the questions, go to "Results" sheet.
4. Based on the answers given, the scores for each aspect of entrepreneurial readiness are provided including the relevant estimation.

Aggregated Results		
Dimension	Score	Readiness Estimation
Score in Entrepreneurial/Managerial background (out of 300)	140	<i>It is estimated that user is not ready for entrepreneurship in respect to entrepreneurial/managerial background</i>
Score in External Entrepreneurial Influence (out of 4)	1	<i>Low level of external entrepreneurial background</i>
Score in Psychological Traits (out of 510)	275	<i>It is estimated that user could be ready for entrepreneurship in respect to psychological traits dimension</i>
Overall Score in Entrepreneurial Readiness (out of 814)	416	

5. Given these results, the scores are normalized between 0 and 100% and a radar diagram is created in order to highlight the strengths and weakness of business readiness

Normalized Aggregated Results	
Dimension	Score (%)*
Score in Entrepreneurial/Managerial background	47%
Score in External Entrepreneurial Influence	25%
Score in Psychological Traits	54%
*100% represents the maximum score that the user can achieve in each of the respective categories	

2.1.2 Readiness for internationalization

The Readiness for Internationalization tool is based on the Chrome framework proposed by David and Cariou (2014). It is an International Qualification Framework that evaluates firm's readiness for internationalization.

It includes six major dimensions of internationalization:

1. The competencies of the managers assigned to the internationalization project,
2. The heritage of the SME within international markets,
3. The relationships the SME maintains abroad,
4. The offerings that the SME has earmarked for international markets,
5. The means at the disposal of the SME for carrying out its internationalization strategy, and
6. The engagement of the SME's management in the internationalization project.

These major dimensions are further divided in several more detailed qualification criteria, as shown in Table 3.

Table 3. Dimensions and criteria of internationalization

Dimensions	International Qualification Criteria
Competencies of Management	<ol style="list-style-type: none"> 1. Training in international business 2. Knowledge of foreign markets 3. Knowledge of foreign languages 4. Experience in international business
Heritage	<ol style="list-style-type: none"> 5. Prominence, recognition of the firm globally 6. Intellectual property held in certain countries 7. Presence in foreign markets 8. Lessons learned from the internationalization experience
Relationships	<ol style="list-style-type: none"> 9. Branches, foreign subsidiaries etc. 10. Established business relationships in certain countries 11. Internet presence of the SME abroad
Offerings	<ol style="list-style-type: none"> 12. Assets (strengths), handicaps (weaknesses) related to products, services or solutions pertaining to an international expansion (product advantages) 13. Adaptability of the SME's products, services or solutions with respect to new foreign markets 14. Adapted or adaptable pricing structure and financial modalities for foreign markets
Means	<ol style="list-style-type: none"> 15. Financial health of the SME 16. Access to financing or new capital 17. Available production (operational) capacity
Engagement	<ol style="list-style-type: none"> 18. Top management's availability to dedicate time to international activity 19. Top management's preparedness to invest in the international venture 20. Level of risk tolerance 21. Motivations, objectives, targets, scenarios and economic models pertaining to the internationalization project

The readiness evaluation for internationalization is based on a self-assessment approach: users rate their performance on each of the aforementioned criteria using a scale from 0 (worst performance) to 5 (best performance). Using these rates, an average score for each major dimension is calculated, along with a radar graph that present the strengths and weaknesses of a firm's readiness to access foreign markets. Finally, an overall score is calculated as the sum of the 21 qualification criteria and the following classification is provided:

1. "Passe-Partout" (score between 85 and 105)
2. "Mid-Level Pass" (score between 64 and 84)
3. "Entry-Level Pass" (score between 42 and 63)
4. "Impasse" (score below 42)

As shown, that a score of 42 points represents the threshold below which the firm should not expand its activities abroad.

Example - Instructions

1. Download and open the file “Readiness_for_Internalization_Questionnaire.xlsx”.
2. Go to “Questionnaire” sheet and answer all the questions by entering a number between 0 (worst performance) and 5 (best performance) (**grey shaded cells**). Any decimal number is acceptable, but it will be rounded to 1 decimal place.

Please rate your firm's performance on the following criteria using a scale from 0 (worst performance) to 5 (best performance). Any number with 1 demical place is acceptable.

1. Competencies of Management	
Criteria	Performance
1 Training in international business	5.0
2 Knowledge of foreign markets	3.0
3 Knowledge of foreign languages	2.5
4 Experience in international business	1.2
Score in Competencies of Management (out of 20):	
11.7	

2. Heritage	
Criteria	Performance
5 Prominence, recognition of the firm globally	1.5
6 Intellectual property held in certain countries	2.3
7 Presence in foreign markets	3.7
8 Lessons learned from the internationalization experience	4.6

3. After answering all the questions, go to “Results” sheet.
4. Based on the answers given, the average scores for each dimension are provided. Also, the overall score and classification for readiness for internationalization are given.

Aggregated Results	
Dimension	Average Score (between 0 and 5)
Competencies of Management	2.9
Heritage	3.0
Relationships	4.0
Offerings	2.2
Means	3.5
Engagement	3.0
Overall Score (out of 105)	
65	
Firm's category	
Mid-Level Pass	

5. Given the average scores per dimension, a radar diagram is created in order to highlight the strengths and weakness of readiness for internationalization.

2.2 Financial Tools

2.2.1 Break-even analysis

This tool allows the user to determine the break-even point, which is the production level by which total revenues (from a single product) equal total expenses. To determine the break-even point, the tool performs break-even analysis.

To apply break-even analysis, total revenues and expenses are required. The total expenses include the total fixed and variable costs per unit as described below:

- Fixed costs refer to costs, which do not change with changes in the number of units sold. Such costs are rent, wages, depreciation and amortization, etc.
- Variable costs refer to costs that change in proportion to the level of production. Such costs include costs of raw materials, shipping, packaging, etc.

Based on user-defined revenues per unit sold, variable costs per unit, total fixed costs and the number of units expected to be sold the tool calculates the break-even point, while a break-even analysis chart is extracted.

The tool provides also a profit estimation based on user's estimation for the expected number of units to be sold.

All calculations are based on euros.

Example - Instructions

1. Download and open the file "Break_even_Analysis.xlsx".
2. Go to the "Input Data" section of "Breakeven Analysis Input-Output" sheet and enter (in **grey shaded cells**) the values of revenue per unit sold, variable costs per unit, total fixed costs and

number of units expected to be sold. All monetary values should be provided in euros. All values are truncated to 2 decimal points, and should be non-negative numbers.

Input data			
	Data type	Value	Description
1	Revenue per unit sold	5,000.00 €	Expected revenue generated by selling 1 unit of product
2	Variable costs per unit	3,000.00 €	Costs that changes in proportion to production output; include costs of raw materials, shipping packaging, etc.
3	Total fixed costs	40.00 €	Include rent, wages, depreciation and amortization, etc.
4	Units sold	2000.00	Number of units expected to be sold

- After entering all data, go to the “Results” section of “Breakeven Analysis Input-Output” sheet, which is below the “Input Data” section.
- Based on the provided data the tool provides the break-even point in terms of units and sales. It also provides the profit estimate based on the number of units expected to be sold. In the specific example the user has to sell 40 units of product in order to break even.

Calculated variables	Value
Total revenue	10,000,000.00 €
Total variable costs	6,000,000.00 €
Unit contribution margin	2,000.00 €
Total contribution margin	4,000,000.00 €
Profit based on units expected to be sold	3,999,960.00 €
Break-even point in terms of units	0
Break-even point in terms of sales	100.00 €

- The tool provides also the chart of the break-even analysis.

2.2.2 Loan amortization schedule

This tool estimates the scheduled periodic loan payments and calculates the part of the payment that goes toward principal (the money that has been borrowed), and the part that goes toward interest. Moreover, it provides the ending balance and the cumulative interest for each period. The tool is based on the relevant accessible template provided by Microsoft Office.

Example - Instructions

1. Download and open the file "Loan_Amortization_Calculator.xlsx".
2. Go to the "Loan Schedule" sheet and enter (in **grey shaded cells**) the values of the loan amount, interest rate, loan term, number of payments per year and the start date of the loan. The tool can take also into account any optional extra payments, should you provide their value. All monetary values should be provided in euros. All values are truncated to 2 decimal points, and should be non-negative numbers.

ENTER VALUES	
Loan amount (euros)	10,000.00 €
Annual interest rate (%)	10.00%
Loan term (years)	2
Number of payments per year	12
Start date of loan	01-04-20
Optional extra payments	3,000.00 €

3. The tool provides the scheduled payment, the number of scheduled payments, the total interest amount, and also the actual number of payments and the total early payments, if optional extra payments have been introduced; see step 2 above.

LOAN INSIGHTS	
Scheduled payment	461.45 €
Scheduled number of payments	24
Actual number of payments	4
Total early payments	8,754.17 €
Total interest	165.54 €

4. The tool provides finally the loan amortization schedule.

PMT NO	PAYMENT DATE	BEGINNING BALANCE	SCHEDULED PAYMENT	EXTRA PAYMENT	TOTAL PAYMENT	PRINCIPAL	INTEREST	ENDING BALANCE	CUMULATIVE INTEREST
1	01-05-20	10,000.00 €	461.45 €	3,000.00 €	3,461.45 €	3,378.12 €	83.33 €	6,621.88 €	83.33 €
2	01-06-20	6,621.88 €	461.45 €	3,000.00 €	3,461.45 €	3,406.27 €	55.18 €	3,215.62 €	138.52 €
3	01-07-20	3,215.62 €	461.45 €	2,754.17 €	3,215.62 €	3,188.82 €	26.80 €	26.80 €	165.31 €
4	01-08-20	26.80 €	461.45 €	- €	26.80 €	26.57 €	0.22 €	- €	165.54 €

2.2.3 Startup cost calculator

The tool can be leveraged by users to estimate the expenses required for starting a business, as well as to examine alternative ways to raise the necessary funds.

With respect to expenses, costs may incur for the acquisition of *fixed* and *short-term assets*.

Fixed assets are long-term tangible pieces of property or equipment that a firm owns and uses in its operations to generate income. These assets are not expected to be consumed or converted into cash within a year, and may include:

- *Land*: The real estate/property minus buildings and equipment, which is designated by fixed spatial boundaries. It is not a depreciable asset.

- *Buildings*: Since the cost of real estate is divided in land and buildings, it is estimated that land account for about 20% of the real estate cost, while buildings account for the remaining 80%.
- *Leasehold improvements*: The enhancements paid for by a tenant to a leased space. Examples of leasehold improvements are interior walls and ceilings, electrical and plumbing additions, built-in cabinetry, carpeting and tiles.

Short-term assets on the other hand are assets used to facilitate *day-to-day operational expenses*, may be sold, converted to cash or liquidated within one fiscal year, and may include:

- *Pre-Opening Salaries and Wages*: Expenses incurred before the firm starts its commercial activity, such as salaries for employee training, etc.
- *Prepaid Insurance*: It is the portion of an insurance premium that has been paid in advance and has not expired as of the date of a company's balance sheet.
- *Starting Inventory*: The goods available for sale and the raw materials used to produce goods available for sale.
- *Legal and Accounting Fees*: Payments for lawyers, accountants, consultants, etc.
- *Utility Deposits*: These are charged by most utility (electricity, gas, water, etc.) companies prior to activating service.
- *Advertising and Promotions*: Expenses for marketing, website creation, etc.
- *Licenses*: If/when required in order for the firm to start its operation.

In case that a firm has already started to operate (firm is in its first year of operation), the *Working Capital* for the current month of operation, should be also considered. Working capital indicates company's liquidity and its short-term financial health. In this respect, the following items should also be considered:

- *Accounts receivable (AR)*: The balance of money due to firm for goods/services delivered or used, but not yet paid for by customers.
- *Accounts payable (AP)*: Amounts due to vendors or suppliers for goods/services, which have been received by the firm, but haven't been paid for yet.
- *Accrued expenses*: They refer to expenses that are recognized on the books before they have been paid. The expenses are recorded in the accounting period in which they have incurred, and represent the company's obligation to make future cash payments. Such expenses for example could be utilities used for the month but an invoice has not yet been received before the end of the period, wages that are incurred but payments have yet to be made to employees, etc.
- *Prepaid expenses*: Types of expenses resulting from a firm making advanced payments for goods or services to be received in the future.

With respect to the funding required for a firm to start operation, the following *funding* options should be considered:

- *Owners' Equity (Founders)*: How much money the owner(s) or founder(s) are going to invest to the firm.
- *Outside financing*: How much money outsiders such as VCs, angel investors, etc. are going to invest to the firm.
- *Debt financing*: In addition to equity, debt financing can also be leveraged including:
 - *Commercial Loan*: Loan needed to fund major capital expenditures or to cover operational costs.
 - *Commercial Mortgage*: Mortgage loan needed to make real estate purchase.
 - *Credit Card loan & Other bank debt*: Use of credit cards or other bank loans (such as vehicle loan) to support the aforementioned main funding sources.

It should be noted that the amount of *total source of funding* should be *equal* to the amount of *total required funds* for the funding status of the firm to be balanced.

Example - Instructions

1. Download and open the file “Startupd_Cost_Calculator.xlsx”.
2. Go to “Required Startup Funds” sheet and enter (in **grey shaded cells**) values for all the items provided. All monetary values should be provided in euros. All values are truncated to 2 decimal points, and should be non-negative numbers.
3. Enter values for the items of both fixed assets and short-term assets categories. In case that the firm has already started operation (active firm), enter the accounts receivable and payable, as well as the accrued and prepaid expenses, which apply, in the working capital calculator, so as to be considered in the calculations. Based on these data, the tool will calculate your total required funds

Please provide your firm's data using non-negative numbers. For monetary values the euro currency is used. All entered values are truncated to 2 decimal points.

Fixed Assets (long-term assets)	Amount
Land	1,000.00
Buildings	1,000.00
Leasehold Improvements	1,000.00
Machinery & Equipment	1,000.00
Furniture and Fixtures	1,000.00
Vehicles	1,000.00
Other	1,000.00
Total Fixed Assets	€ 7,000.00

Working Capital Calculator	
Cash	1,000.00
+ Accounts Receivable	
+ Prepaid Expenses	
- Accounts Payable	
- Accrued Expenses	
Total	€ 1,000.00

Short-term Assets (operating expenses)	Amount
Pre-Opening Salaries and Wages	
Prepaid Insurance Premiums	
Inventory (starting)	
Legal and Accounting Fees	
Rent Deposits	
Utility Deposits	
Supplies	
Advertising and Promotions	
Licenses	
Other Initial Start-Up Costs	
Working Capital (active firms)	€ 1,000.00
Total Short-term Assets	€ 1,000.00
Total Required Funds	€ 8,000.00

4. Enter values to the items representing different funding instruments. You have also the option to calculate the monthly loan payments in case of access to debt financing. To use this option you need to enter the loan rate (%) and the relevant loan term (months). Based on these data, as well as the total required funds calculated according to step 5 above, the tool provides information regarding your funding status (e.g. balanced, unbalanced).

Sources of Funding	Percentage	Totals	Loan Rate (%)	Loan Term (Months)	Monthly Payments
Owners Equity (Founders)	0.00%				
Outside financing	0.00%				
Debt Financing					
Commercial Loan	0.00%				#NUM!
Commercial Mortgage	0.00%				#NUM!
Credit Card Debt	0.00%				#NUM!
Other Bank Debt	0.00%				#NUM!
Total Sources of Funding	0.00%	€ -			#NUM!
Total Funding Needed		€ -	You are fully funded (Balanced)		

2.2.4 Cash flows and financial forecasts

This tool provides the financial projections for the first three years of a firm's operation. Specifically, it provides the balance sheets and the values of keys financial ratios. The tool is based on a relevant financial projection template (SCORE, 2015). Thorough information about the included items is provided on the Example - Instructions part below.

Example - Instructions

1. Download and open the file “Cash_Flows_and_Financial_Forecasts.xlsx”.
2. In all sheets, data are entered by the user only in the **grey shaded cells**.

- Go to “Required Start-up Funds” sheet and fill in the items provided. You can use the *Startup Cost Calculator Tool* description for guidance. It is denoted that the amount of total source of funding should be equal to the amount of total required funds for the funding status of the firm to be balanced.
- Go to “Wages” sheet and fill in the items provided. You should enter the monthly payments including the Payroll Taxes and Benefits (such as social security, other social insurance etc.) for each of the respective employees’ type. The estimated wages (including relevant expenses) for year 2 and year 3 are calculated based on the user provided relevant growth rates.

Types of employer	Estimated Payments (Monthly)	Estimated Payments (Annually) 1st Year	Growth rate (year 1 to 2)	Year 2	Growth rate (year 2 to 3)	Year 3
Owners /Founders	€ 10.00	€ 120.00	20.00%	€ 144.00	30.00%	€ 187.20
Employess (Full-time)	€ 222.00	€ 2,664.00	2.20%	€ 2,722.61	2.00%	€ 2,777.06
Employess (Part-time)	€ 2.00	€ 24.00	2.00%	€ 24.48	2.00%	€ 24.97
Independent Contractors	€ 2.00	€ 24.00	2.00%	€ 24.48	2.00%	€ 24.97
Total of Salaries & Wages plus Related Expenses	€ 236.00	€ 2,832.00		€ 2,915.57		€ 3,014.20

- Go to “Sales Forecast” sheet and fill in the items provided. The user should estimate the monthly sales for the first year of firm’s operation, for each product that has been included in the firm’s product line. If the firm produces only one product, Product A Table should only be used. The tool, however, provides tables for four products (product A-D). For each product, the Variable Costs (per unit), the Price (per unit) and the monthly unit sales are entered by the user, while the Gross Margin (per unit) is calculated by the tool. The user also enters the percentages for the rate of sales growth from years 1 to 2 and 2 to 3. With Variable Costs the tool refers to COGs, meaning the direct costs of producing the goods sold by the firm. COGs include the cost of materials, labor, shipping, etc.

Product A														
Variable Costs (per unit)	€	10.00												
Price (per unit)	€	20.00												
Gross Margin (per unit)	€	200.00												
Projected Unit Sales			M1	M2	M3	M4	M5	M6			M12	Annual Totals		
YEAR 1			10.00	10.00	10.00	10.00	10.00	10.00			0.00	10.00		
Growth rate (year 1 to 2)	25.00%													
YEAR 2			12.5	12.5	12.5	12.5	12.5	12.5			12.5	150		
Growth rate (year 2 to 3)	25.00%													
YEAR 3			15.625	15.625	15.625	15.625	15.625	15.625			625	187.5		
Revenues (projected)			Revenues (projected)				Revenues (projected)				Revenues (projected)			
Variable Costs			Variable Costs				Variable Costs				Variable Costs			
Total Margin			Total Margin				Total Margin				Total Margin			
YEAR 1			YEAR 2				YEAR 3							

The tool also provides the estimated total sales, variable costs and margins for the firm’s product line (if there is a group of products) for each of the first 3 years of operation.

YEAR 1	M1	M2	M3	M4	M5		M11	M12	Total
sales	800.00 €	800.00 €	800.00 €	800.00 €	800.00 €		800.00 €	800.00 €	9,600.00 €
Var.Costs	400.00 €	400.00 €	400.00 €	400.00 €	400.00 €		400.00 €	400.00 €	4,800.00 €
Margin	400.00 €	400.00 €	400.00 €	400.00 €	400.00 €		400.00 €	400.00 €	4,800.00 €

- Go to “Cash Receipts-Fixed Assets” sheet and fill in the items provided. In regards to *Accounts Receivable* (payment held by a business for goods supplied that customers have ordered but not paid for), the user should enter 100% in *Paid within 30 days* (for each year), if he owns a retail company. In other cases the user should consider some industry benchmarks, or a value of 100% to “*Paid between 30 and 60 days*” could be entered as an assumption.

Accounts Receivable (A/R) Days Sales Outstanding			
Percent of Collections	Year 1	Year 2	Year 3
Paid within 30 days	100.00%	100.00%	100.00%
Paid between 30 and 60 days	0.00%	0.00%	0.00%
Paid in more than 60 days	0.00%	0.00%	0.00%
Allowance for bad debt	0.00%	0.00%	0.00%
(should equal 100%)	100%	100%	100%

Concerning, *Accounts Payable* (amount owed by the firm to its vendors/suppliers for goods/services that have been already received), the specific amount could change in respect to *firm’s credit record, the suppliers etc.*, however 100% in “*Paid within 30 days*” could be entered as an assumption.

Accounts Payable (A/P)			
Percent of Disbursements	Year 1	Year 2	Year 3
Paid within 30 days	100.00%	100.00%	100.00%
Paid between 30 and 60 days	0.00%	0.00%	0.00%
Paid in more than 60 days	0.00%	0.00%	0.00%
(should equal 100%)	100%	100%	100%

For *Line of Credit Assumptions* the user should consider that in order to ensure that the firm has enough cash each month, a line of credit (LOC), typically, loan provided by a bank, might be necessary. The user should evaluate what the minimum amount in the bank account should be (*Desired Minimum Cash Balance*). If the operating cash balance is less than this specific amount, the firm could draw money from the loan. Since LOC is typically a loan, the bank (or other lender) sets an interest rate, which the user enters in the cell: *Line of Credit Interest Rate*.

Line of Credit Assumptions	
Desired Minimum Cash Balance	€ -
Line of Credit Interest Rate	8.00%

In respect to *Fixed Assets* the user should consider the monthly amount needed for the purchase of additional assets for the first year of operation (cells M2 to M12) and the relevant annual amounts for year 2 and 3.

Fixed Assets									
Fixed Assets	Asset's Depreciation (years)	M1	M2	M3	M11	M12	Annual Totals (Year 1)	Annual Totals (Year 2)	Annual Totals (Year 3)
Real Estate (Buildings)	10	€ 1,000.00	€ 1,000.00	€ 1,000.00	1.00	€ 1.00	€ 5,506.00	€ 500.00	€ 500.00
Leasehold Improvements	7	€ 900.00	€ 1,000.00	€ 1,000.00	1.00	€ 1.00	€ 5,406.00	€ 500.00	€ 500.00
Machinery & Equipment	7	€ 800.00	€ 1,000.00	€ 1,000.00	1.00	€ 1.00	€ 5,306.00	€ 500.00	€ 500.00
Furniture and Fixtures	5	€ 700.00	€ 1,000.00	€ 1,000.00	1.00	€ 1.00	€ 5,206.00	€ 500.00	€ 500.00
Vehicles	5	€ 600.00	€ 1,000.00	€ 1,000.00	1.00	€ 1.00	€ 5,106.00	€ 500.00	€ 500.00
Other	5	€ 500.00	€ 1,000.00	€ 1,000.00	1.00	€ 1.00	€ 5,006.00	€ 500.00	€ 500.00

Finally, the *Effective Income Tax Rate* and the *Amortization of Start-Up Costs* (e.g. amortization period could be 3 years) should be provided by the user (for each year).

Income Tax Assumptions	
Effective Income Tax Rate - Year 1	0.00%
Effective Income Tax Rate - Year 2	0.00%
Effective Income Tax Rate - Year 3	0.00%

Amortization of Start-Up Costs	
Amortization Period in Years	3

7. Go to "Total Fixed Operating Expenses" sheet and fill in the items provided. The user in this segment should enter the amount of the monthly Operating Expenses for the firm's first year of operation. Here some key points for the considered types of expenses:

- Commissions and Fees may for example include costs in respect to an employment agency. They do not however include commission paid, as part of a salary to an employee.
- Contract Labor (not included in payroll) may include costs related to hiring outside firm/services. It does not include the Independent contractor wages calculated on the "Wages" sheet of the tool.
- Insurance (other than health) may include costs in regards to liability insurance, while it does not include the costs considered in the employees' wages.
- Legal and Professional Services may include costs related to accounting, legal advice, tax preparation, etc.
- Licenses may include costs for any ongoing licenses besides those accounted in the "Required Start-up Funds" sheet of the tool.
- Office Expenses may include costs related to software, phones, internet, office equipment, etc.
- Rent or Lease - Other Business Property may include costs related to rented/leased office or storage space, or anything that does not fit in the Rent or Lease - Vehicles, Machinery, Equipment cost category.
- Supplies are items you need to purchase in order to produce your product/service.

- Miscellaneous include costs that cannot fit in any of the other listed expenses.

- Go to “Cash flows 1” & “Cash flows 2” sheets and fill in the items provided. The sheets provide the cash-flow projections for year 1, 2 and 3. In particular, the user could leverage the calculated net

cash flows (per month) and the ending cash balance. Moreover, the user should enter values for the following cells: *Additional Inventory*, *Owner's Distribution*, *Line of Credit Repayments* and *Dividends Paid*. For the first year of operation the values of *Owner's Distribution*, and *Dividends Paid* could be zero. The user could also leverage this worksheet to identify the point where positive cash flows will be achieved (if this achieved in the first 3 years of operation).

- Go to "Income Statement 1" & "Income Statement 2" sheets. Provide any additional data you have concerning expenses and taxes, and check the income statements for the first 3 years of operation. Specifically, the user could get relevant information for the EBITDA and the net income estimations.
- Go to "Balance Sheet" sheet. Based on data entered and/or calculated in other sheets of the tool, this one provides the balance sheets for the first 3 years of operation. In particular, the company's assets, liabilities and shareholders' equity for each fiscal year are provided. In equity items, the *Retained Earnings* refer to earnings that a company either reinvests in the firm or use to pay off debt. In regards to equity it is assumed that the firm only issues *common stocks* (securities that represent ownership in a firm). Moreover, it indicates if the balance sheets are on balance based on the following expression:

$$\text{Assets} = \text{Liabilities} + \text{Equity}$$
- Go to "Ratios" sheet. Based on data entered and/or calculated in other sheets of the tool, this one provides the values of financial ratios as a basis for a financial analysis. The user can also enter and use *Industry Norms* as benchmarks for the assessment of firm's performance. Table 4 provides a description of the key financial ratios used in the tool.

Table 4. Financial ratios used in cash flows and financial forecasts tool

Ratios	Description/Comment
Liquidity	
Current Ratio	-Liquidity ratio that measures a company's ability to pay short-term obligations. -A ratio under 1 indicates that the company's debts due in a year or less are greater than its assets.
Quick Ratio	-Indicator of a firm's short-term liquidity position. Measures a company's ability to meet its short-term obligations with its most liquid assets. -1 is considered to be the normal quick ratio.
Safety	
Debt to Equity Ratio (D/E)	-Indicates how much leverage a firm is using. -Capital-intensive industries tend to have a debt/equity ratio above 2, while services firms could have a ratio under 0.5.
Debt-Service Coverage Ratio	-Indicator of firm's ability to produce enough cash to cover its debt payments. - A value close to 1 (e.g. 1.1) for this ratio indicates that the firm is vulnerable. Lenders are usually looking for 1.25 or more.
Profitability	
Sales Growth	- % of increase (or decrease) in sales between the current year and the previous year.
COGS to Sales	-The percentage of sales used to pay for the COGS.
Gross Profit Margin	-Indicates the amount of profit made before deducting selling, general, and administrative costs.
SG&A to Sales	-Increases in the ratio of selling, general and administrative (SG&A) costs to sales are viewed as negative signals about future firm performance
Net Profit Margin	-Indicates how much profit comes from every dollar of sales. -Typically a 10% net profit margin is considered an average number (different for every industry).
Return on Equity (ROE)	-Determines the rate of return on your investment in the business. It measures how effectively the firm uses its assets to create profits. -It is assumed that a ratio less than 10% is not acceptable.
Return on Assets (ROA)	-Indicator of how well a company utilizes its assets. It denotes how profitable a company is relative to its total assets. - The higher the number, the more efficiently the firm manages its assets to generate profits.
Efficiency	
Days in Receivables	-The average number of days it takes to collect your account receivable (number of days of sales in receivables).
Accounts Receivable Turnover	- Firm's effectiveness in collecting its receivables or money owed by clients.
Days in Inventory	-Indicates the average number of days it will take to sell your inventory.
Inventory Turnover	-Indicates how many times a firm has sold and replaced inventory during a year The user should be analyze carefully the specific ratio, since A low turnover could imply weak sales and possibly excess inventory, while a high ratio could imply either strong sales or insufficient inventory.
Sales to Total Assets	-Indicates how much sales are generated per one dollar of assets. Shows how effectively firms are leveraging their assets to generate sales. - The higher the ratio, the more efficient the firm.

2.3 Business Tools

2.3.1 SWOT and PEST analysis

SWOT Analysis is a method used to evaluate the 'strengths', 'weaknesses', 'opportunities' and 'threats' involved in a firm. It is leveraged for the identification of business goals and the development of strategic plans.

Strengths & weaknesses include factors related to the internal environment of the firm, while opportunities & threats refer to issues related to firm's external environment.

For the assessment of firm's external environment the *PEST analysis* is provided for the user. PEST stands for *political, economic, social, and technological* developments and the specific tool can be leveraged for the identification and categorization of factors related to the 'OT part' of SWOT Analysis (opportunities & threats).

Bellow the descriptions of SWOT analysis and PEST analysis are presented. For both techniques, examples of factors for the user to consider are included.

Table 5. SWOT analysis

Strengths <ul style="list-style-type: none"> • Things your firm does well • Qualities that separate your firm from the competitors • Internal resources such as skilled, knowledgeable staff, etc. • Tangible assets such as intellectual property, proprietary technologies, capital etc. 	Weaknesses <ul style="list-style-type: none"> • Things your firm lacks • Things competitors do better than your firm does • Resource limitations • Unclear unique selling proposition
Opportunities <ul style="list-style-type: none"> • Underserved markets for specific products • Few competitors in your firm's area • Emerging need for your products/services • Media/press coverage of your firm 	Threats <ul style="list-style-type: none"> • Emerging competitors • Changing regulatory environment • Negative media coverage • Changing customers attitude towards your company

Table 6. PEST analysis

Political <ul style="list-style-type: none"> • Government policies • Policy on supporting specific industries • Trading policies • Regulatory bodies • Local legislation (current & future) • International legislation (current & future) • Funding, grants & government initiatives • Lobbying & pressure groups • Fiscal policy • Planning, permits, licensing 	Economic <ul style="list-style-type: none"> • Local economy • International economy • Economic trends & inflation • Exchange rates & Interest rates • Channels of distributions & access to markets • Corporate taxation & Product taxation • Market cycles • Seasonality (periodic fluctuations in your business area)
Social <ul style="list-style-type: none"> • Demographics • Psychographics & lifestyle • Social trends • Consumer preference/perception of products, brands, etc. • Consumer purchasing behavior • Effect of advertising & public relations • Ethical issues 	Technological <p>Technological factors, which have an effect on a firm's competitive position, such as:</p> <ul style="list-style-type: none"> • New materials & machinery • Effect of technology on product design, production, distribution, pricing and consumption • Innovations related to electronic & mechanical processes • New distribution channels (e.g. internet retailing)

Example- Instructions

1. Download and open the file “SWOT_and_PEST_Analysis.pdf”.
2. Implement PEST Analysis. Read the relevant descriptions and enter (in **grey shaded cells**) the factors that apply in your firm, based on its characteristics.
3. Based on the outcomes of PEST Analysis you can then identify the factors related to the firm’s external environment, meaning the Opportunities & Threats dimensions of the SWOT technique.
4. Implement SWOT Analysis. Read the relevant descriptions and enter (in **grey shaded cells**) the factors that apply in your firm, based on its characteristics.
5. Based on the outcomes of SWOT Analysis consider the following questions:
 - Which is the most effective way to use firm’s strengths in order to leverage the spotted opportunities?
 - Which is the most effective way to use firm’s strengths in order to mitigate the impact of potential threats?
 - Which is the most effective way to address the firm’s weaknesses that could be an obstacle for the exploitation of opportunities?
 - Which is the most effective way to address the weaknesses that could transform threats to firm’s failure?
6. The example that follows can be leveraged as a guide. The example is based on the work of Ahrendsen, Bielik and Horská (2016), where SWOT and PEST analyses were implemented for on an organic food firm.

PEST Analysis

Please provide the political, economic, social, and technological factors that have an effect on your firm's performance and competitive position

Political (e.g., government policies, trading policies, regulatory bodies, current and future national or international legislation, funding, grants and government initiatives, lobbying or pressure groups, fiscal policy, planning, permits, licensing)	Economic (e.g., local and international economy, economic trends and inflation, exchange rates, interest rates, distribution channels and access to markets, corporate and product taxation, market cycles, seasonality)
<ul style="list-style-type: none"> - Complicated procedure to obtain EU funds - Tax system and the high cost of maintenance workers - High labor costs 	<ul style="list-style-type: none"> - Weak economic situation in Slovakia and Europe - Economic trends - Increasing input prices
Social (e.g., demographics, psychographics and lifestyle, social trends, consumer preferences and perception of brands, consumer purchasing behavior, effect of advertising, public relations, ethical issues)	Technological (e.g., new materials and machinery, effect of technology on product design, production, distribution, pricing and consumption, innovations, new distribution channels)
<ul style="list-style-type: none"> - Diverse demographics - Fashion for healthy food - Increased awareness of nutrition importance - Improving standard of living 	<ul style="list-style-type: none"> - Modern technologies are in the market - Reducing costs through use of more efficient energy technologies

SWOT Analysis

Please write the strengths, weaknesses, opportunities, and threats of your firm

Strengths (e.g., things your firm does well, qualities that separate your firm from the competitors, internal resources such as skilled, knowledgeable staff, tangible assets such as intellectual property, proprietary technologies, capital etc.)	Weaknesses (e.g., things your firm lacks, things competitors do better than your firm does, resource limitations, unclear unique selling proposition)
<ul style="list-style-type: none"> - BIO production and good product - Vertically integrated and many distribution channels - Leader in market - Good location, knowledge, experience & brand 	<ul style="list-style-type: none"> - Small area of owned land (capacity) - Limited possibility to lease land (capacity) - Older equipment - Dependence on trade suppliers and weather
Opportunities (e.g., underserved markets for specific products, few competitors in your firm's area, emerging need for your products/services, media/press coverage of your firm)	Threats (e.g., emerging competitors, changing regulatory environment, negative media coverage, changing customers attitude towards your company)
<ul style="list-style-type: none"> - Healthy food in fashion (high demand) - Produce inputs locally and abroad - Obtain EU funds - New products / Export possibilities / Agro-tourism 	<ul style="list-style-type: none"> - Import of products from other countries at lower prices/variable input prices - New companies will start to grow bio spelt grain and wheat - Stronger legislation/law about controlling the production

2.3.2 Business plan

This tool could be leveraged for the documentation of firms' goals and the strategies that should be implemented to achieve them. It is a tool focusing on marketing, operational and financial planning, which is valuable for both new and established firms. For new firms, it could be supportive towards access to funding, while established firms could identify their progress. Specifically, it includes eight key items:

1. Products/Services and Market Analysis
2. Marketing Plan
3. Legal matters
4. Risk Analysis
5. Operating Plan
6. Human Resources Plan
7. Financial Plan
8. Future

The tool is developed based on a relevant business plan template by the State of Queensland (Queensland Government, 2013).

Example- Instructions

1. Download and open the file "Business_Plan.pdf".
2. Fill in every segment of each of the eight key items by providing your answers in the given spaces (**grey shaded cells**).
3. In case you used the "Business Model Canvas" and "SWOT and PEST Analyses" tools, you could use them as a guide to provide the relevant information in the "Products/Services and Market Analysis" and "Marketing Plan" sections.
4. The identification of firm's risks in the "Risk Analysis" item should be derived from the outcomes of the "SWOT and PEST Analyses" tool.
5. For the subsection "Machinery and Equipment" in the "Operating Plan" section, the information provided should be compatible with the relevant information introduced in the sheets "Required Start-up Funds", "Total Fixed Operating Expenses" and "Fixed Operating Expenses 2" of the "Cash Flows and Financial Forecasts" tool.
6. For the "Financial plan" item you could leverage the "Cash Flows and Financial Forecasts" tool. For example in the "Start-up costs" segment you could provide the relevant information provided in the "Required Start-up Funds" sheet.

An example page of the business plan tool is given in the next screenshot.

1. Product/Services and Market Analysis

1.1 Products/Services

Fill in the following information (firm's product line).

Product/Service	Brief description	Price

Describe the key features of your products/services.

Market position Where do your products/services fit in the market? Are they high-end, competitive or budget? How does this compare to your competitors?	
Value to customer How do your customers view your products/services? (e.g., convenience, quality, price or service)	
Growth potential What is the anticipated percentage growth of the product in the future? The answer should be compatible with the sales growth estimations included in the <i>Cash Flows and Financial Forecast</i> tool.	
Pricing Do you have a particular pricing strategy? If yes, why have you chosen the specific strategy?	

2.3.3 Export price calculator

With Export Price Calculator, users can estimate the export selling price of their products based on the selected *Incoterms*. Incoterms are the world's essential terms of trade for the sale of goods; they provide specific guidance to individuals participating in the import and export of global trade on a daily basis.

The calculator includes the following Incoterms:

- **Free On Board (FOB):** A contract that relieves the seller of responsibility, once the goods are shipped.
- **Cost, Insurance, and Freight (CIF):** An expense paid by a seller to cover the costs, insurance, and freight against the possibility of loss or damage to a buyer's order, while it is in transit to an export port named in the sales contract.
- **Delivered Duty Paid (DDP):** The agreement includes paying for shipping costs, export and import duties, insurance, and any other expenses incurred during shipping to an agreed-upon location in the buyer's country (maximum responsibility on the seller).

Example – Instructions

1. Download and open the file "Export_Price_Calculator.xlsx".
2. Go to "Export Price Calculator" sheet and enter (in **grey shaded cells**) the values of the costs provided. The values of customs duties and import taxes should be introduced as percentages of the total CIF value. All monetary values should be provided in euros. All values are truncated to 2 decimal points, and should be non-negative numbers.

Please provide your firm's data using non-negative numbers. For monetary values the euro currency is used. All entered values are truncated to 2 decimal points.

Types of Costs		Values	Types of Incoterms
1	Value of the goods (loaded on leaving the factory)	1,000.00 €	From the factory (EXW)
2	Cost of handling carriage before (from the factory to the port or to the airport)	100.00 €	
3	Fixed cost of export Customs formalities	200.00 €	
4	Handling costs (loading onto the airplane, the vessel or the truck in the case of groupage)	300.00 €	
Free on board / Free Carrier		1,600.00 €	FOB / FCA
5	Total cost of the main transport (by air, sea or land) including transport to the border of the EU	400.00 €	
6	Cost of insurance for the main transport	500.00 €	
Cost of the Insurance and Freight		2,500.00 €	CIF
7	Cost of handling on arrival at the (air)port or bulk-breaking platform	600.00 €	
Customs duties*		250.00 €	<div>Insert values as % of the total CIF</div> <div>10.00% Customs duties (%)</div> <div>15.00% Import taxes (%)</div>
Customs duties*		375.00 €	
8	Cost of import Customs formalities (flat rate)	700.00 €	
9	Cost of carriage after (from the port (airport) to the buyer)	800.00 €	

3. Given the specific values, the tool provides the export selling price (cost) in terms of the DDP Incoterm.

Delivered Duty Paid	5,225.00 €	DDP
----------------------------	-------------------	------------

2.3.4 Business model canvas

The Business Model Canvas (BMC) is a framework for the development of a new business model or for the structural representation of firm's existing business model. BMC was introduced by Osterwalder and Pigneur (2010) and has the form of a template. It includes the following nine 'building blocks':

1. *Key Partners*: The strategic relationships your business creates between other companies or people.

Who are your key partners? Who are your key suppliers? Which key resources are you acquiring from partners? Which key activities do partners perform?

Motivations for partnerships: optimization and economy, reduction of risk and uncertainty, acquisition of particular resources and activities

2. *Key activities*: Activities or tasks that are integral to operating your company.

What Key Activities do your Value Propositions require? Your Distribution Channels? Customer Relationships? Revenue Streams?

Categories: production, problem solving, platform/network

3. *Value Proposition*: The fundamental need that your company is trying to fulfill for its customers. Why your company exists.

What value do you deliver to the customer? Which one of our customer's problems are we helping to solve? What bundles of products and services are we offering to each customer segment? Which customer needs are we satisfying?

Characteristics: newness, performance, customization, "getting the job done", design, brand/status, price, cost reduction, risk reduction, accessibility, convenience/usability

4. *Customer Relationships*: The type of interactions your company has with its customers and the level of support it gives.

What type of relationship does each of your customer segments expect you to establish and maintain with them? Which ones have you established? How are they integrated with the rest of your business model? How costly are they?

5. *Customer Segments*: The different groups of customers that your company interacts with.

For whom are you creating value? Who are your most important customers? Is your customer base a mass market, niche market, segmented, diversified, multi-sided platform?

6. *Key Resources*: Assets that are required to operate and deliver your company's value proposition.

What key resources do your value propositions require? Your distribution channels? Customer relationships revenue streams?

Types of resources: physical, intellectual, human, financial

7. *Channels*: Different methods that your company uses to deliver its products and value proposition to customers.

Through which channels do your customer segments want to be reached? How are you reaching them now? How are your channels integrated? Which ones work best? Which ones are most cost-efficient? How are you integrating them with customer routines?

8. *Cost Structure*: How a company spends money on operations. The key costs and level of cost-focus for your company. What are the most important costs inherent in your business model? Which key resources are most expensive? Which key activities are most expensive?

Is your business more cost driven (leanest cost structure, low price value proposition, maximum automation, extensive outsourcing) or value driven (focused on value creation, premium value proposition)?

Sample characteristics: fixed costs (salaries, rents, utilities), variable costs, economies of scale, economies of scope

9. *Revenue Structure:* Your company's sources of cash flows.

For what value are your customers really willing to pay? For what do they currently pay? How are they currently paying? How would they prefer to pay? How much does each Revenue Stream contribute to overall revenues?

Types: asset sale, usage fee, subscription fees, lending/renting/leasing, licensing, brokerage fees, advertising

Fixed pricing: list price, product feature dependent, customer segment dependent, volume dependent

Dynamic pricing: negotiation (bargaining), yield management, real-time-market

Example - Instructions

1. Download and open the file "Business_Model_Canvas.pdf".
2. Fill out the nine elements of your business' Business Model (**grey shaded cells**).
3. An example of a completed Business Model Canvas for an agro-food company is given in the next page.

An example page of the BMC tool is given in the next screenshot.

Business Model Canvas

Please fill out the following nine elements of your business.

Key Partners <i>The strategic relationships your business creates between other companies or people.</i>	Key Activities <i>Activities or tasks that are integral to operating your company.</i>	Value Proposition <i>The fundamental need that your company is trying to fulfill for its customers. Why your company exists.</i>	Customer Relationships <i>The type of interactions your company has with its customers and the level of support it gives.</i>	Customer Segments <i>The different groups of customers that your company interacts with.</i>
Agro-food industries Suppliers Agri-business firms	Production Direct Sales	Cereal grains (malt) Low cost	Long-term relationship with agro-food industries and exporters	Agro-food industries Exporters
	Key Resources <i>Assets that are required to operate and deliver your company's value proposition.</i>		Channels <i>Different methods that your company uses to deliver its products and value proposition to customers.</i>	
	Quantity Established brand Equipment		Agro-food industries On-farm sales Off-farm sales Direct sales	
Cost Structure <i>How a company spends money on operations. The key costs and level of cost-focus for your company.</i>	Running costs Salaries Equipment Cost reduction via economies of scale		Revenue Structure <i>Your company's sources of cash flows</i>	Product sales Short supply chain Long supply chain

3 E-networking

The e-networking is a service that is provided within the ViBIEC platform and it is basically supported by three subareas of the e-platform: the Networking, the Transactors and the Forum.

3.1 Networking

The Networking sub-system of the ViBIEC platform provides useful information to the registered members regarding entities and events that enforce the networking among players of the agro-food sector, with special focus on innovations and new technologies that are developed at European and international level. The Networking consists of entities or events that belong to five different types/categories, namely: clusters, cooperation networks, exporters, importers and trades.

A unified set of information is provided for each one of the members of the e-network which includes the following specific fields:

- **Title:** The name of the entity
- **Country:** The country in which the member of the network operates or exists
- **City:** The exact place where the member is found
- **Type:** The category in which it falls (five types/categories)
- **Body:** The body which is responsible of the operation of the entity (optional)
- **Contact Info:** Telephones, emails, etc.
- **Description:** Some more information conceding the entity
- **Dates:** In case of events
- **Link:** The web address of the entity/event
- **Tags:** Keywords that are describing better each member or event

An overall number of 587 members/events are already included in the lists and their data are available to all registered users. The allocation of these members/events among the different categories is shown in Figure 5.

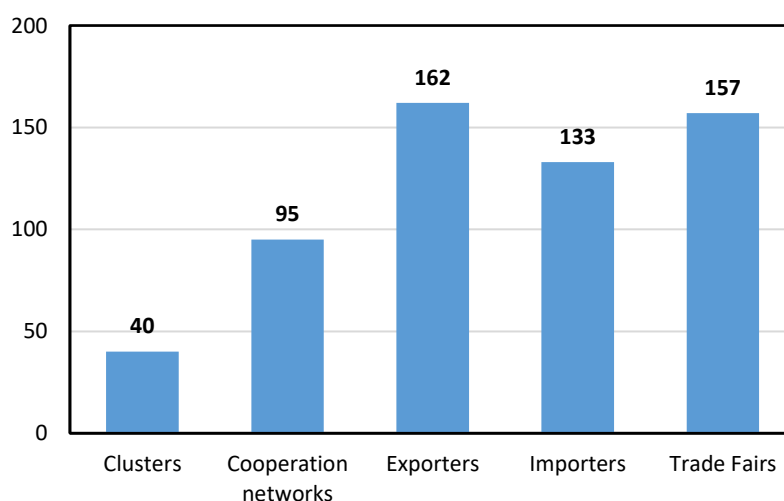

Figure 5. Networking database

Furthermore, the corresponding allocation among the different countries is as follows:

- Serbia: 287
- Slovenia: 149
- Italy: 64
- Greece: 53
- Albania: 34

The ViBIEC users may browse the full list of the members/events that are entered in the networking subsystem and see the detailed information of each one of them only after having been logged in. A full search form is provided to the users in order to be able to efficiently filter the total list according to specific criteria. The search form is shown at the right side of the screen when the user selects the button “Search” at the top of the screen.

The search criteria that are available to the user are the following:

- Title (text field)
- Type (selection list)
- Country (selection list)
- Tags (text field)
- Body (text field)

The results of the filtered data are presented to the user in the form of list of cards (one or two columns), or table of results. Figure 6 shows an example screenshot with search results in the form of list of cards with two columns.

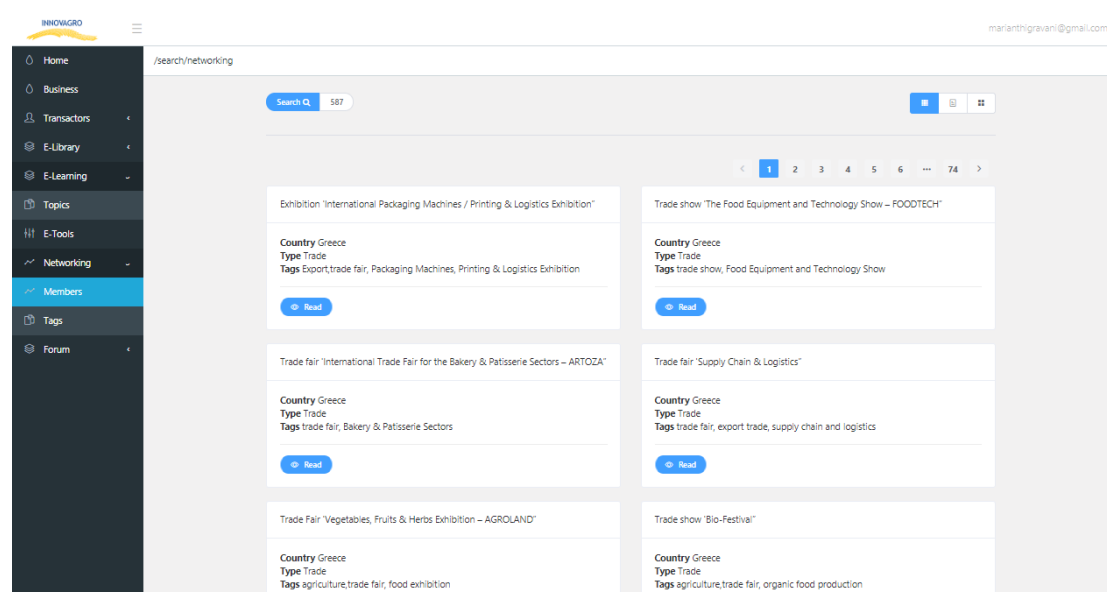

Figure 6. Search results in the form of list of cards (members)

By selecting the button “Read” on a card, the user may see the full available information concerning the specific entity or event, as shown in Figure 7.

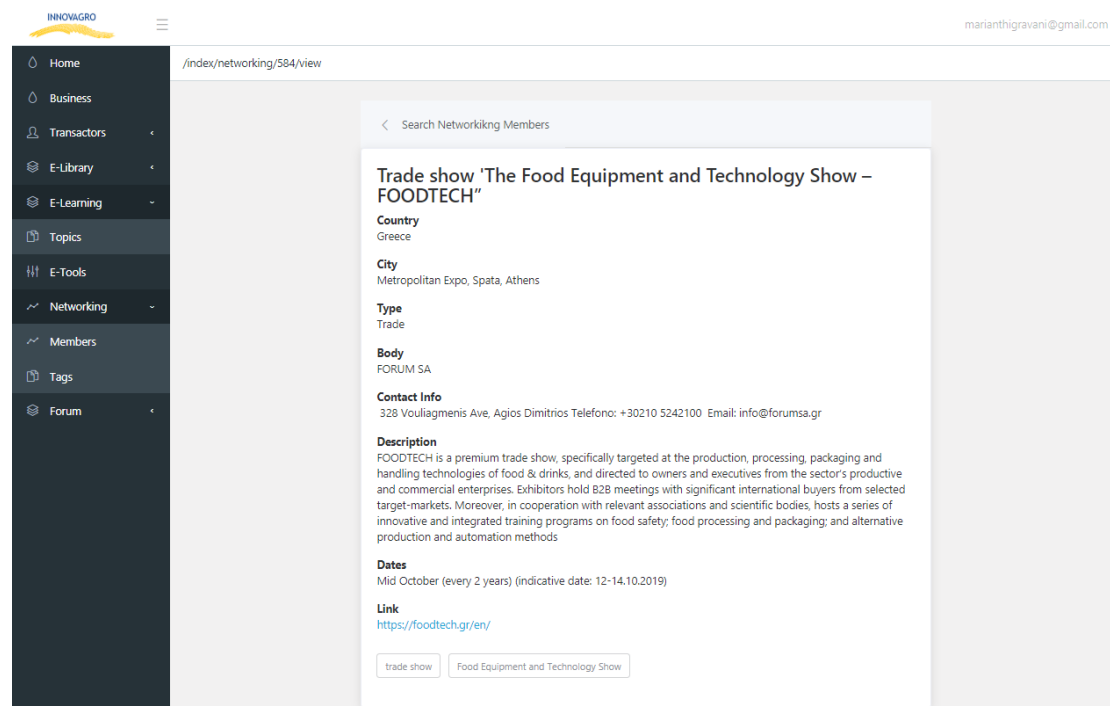

Figure 7. Detailed information of entities/events

3.2 Transactors

The e-networking operation is also supported through the area Transactors of the platform, in which a registered user may upload and make available to other registered users several information about its business profile. Depending on the business role which each user selects according to its operation in the agro-food sector, a set of information can be entered under its profile. The platform supports the following business roles:

1. Agro-food Business
2. Agro-food Cluster/Network
3. Business Support Organisation
4. Academic/Research Organisation
5. Local Public Organisation
6. Other entities

The information that can be included under the profile of each user is the following:

- **Entity Info:** Such as address, email, telephone, website, social media, etc.
- **Documents/Media:** Uploaded documents, photos and videos of the entity
- **Telephones:** More telephone numbers for specific operations of the entity for direct contacting
- **Products:** A list of products (following a tree-structure approach – type, category, family) in which the entity is interested
- **Services:** A list of services that the entity offers
- **Business:** Each entity that has the role “Agro-food Business” may describe one or more business ideas and upload relevant material. The business idea may fall under one of the following categories: Packaging, Logistics (Transport, Distribution), Production (cultivation, breeding, fishing), Processing, Wholesaler/Importer/Exporter, Retail, Support Services

The aforementioned information is available to registered users who may apply the following search criteria in order to find appropriate transactors:

- Title (text field)
- Type (selection list)
- Country (selection list)
- Tags (text field)
- Body (text field)
- Roles (selection list)
- Product (type, category, family) (selection lists)
- Country (selection list)
- District (selection list)
- Service Type (selection list)
- Business Status (selection list)
- Business Area (selection list)
- First Name / Surname (text fields)

The results of the filtered data are presented to the user in the form of list of cards (one or two columns), or table of results, as shown in Figure 8.

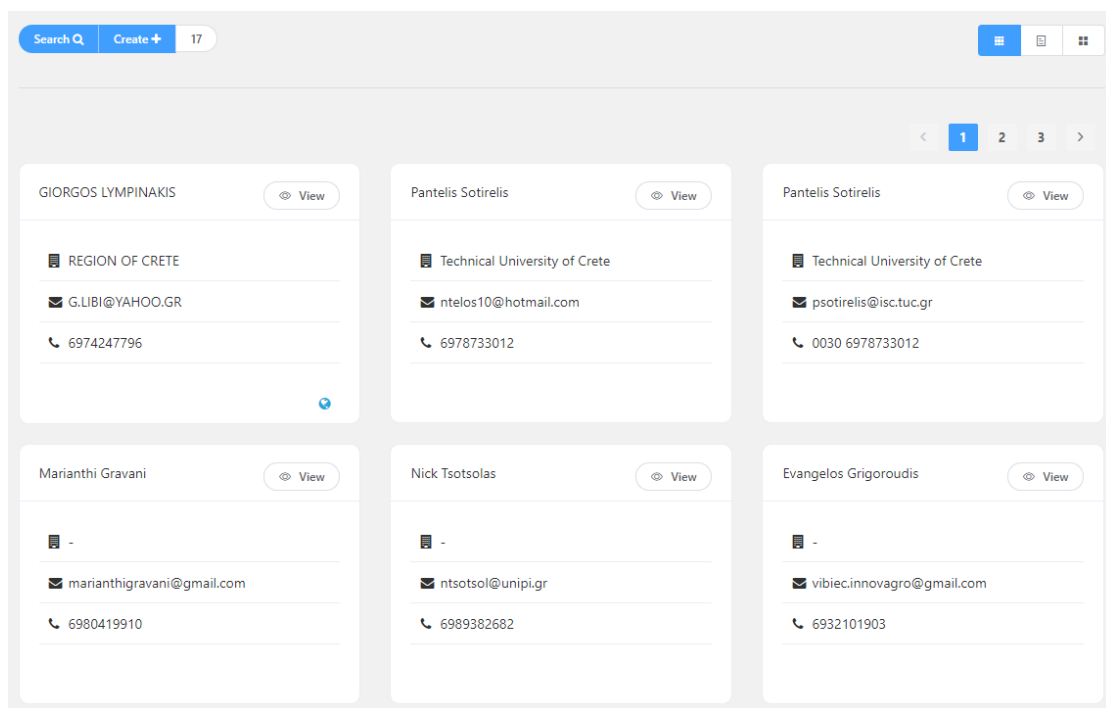

Figure 8. Search results in the form of list of cards (transactors)

By selecting the button “View” on a card, the user may see the full available information concerning the specific transactor, as shown in Figure 9.

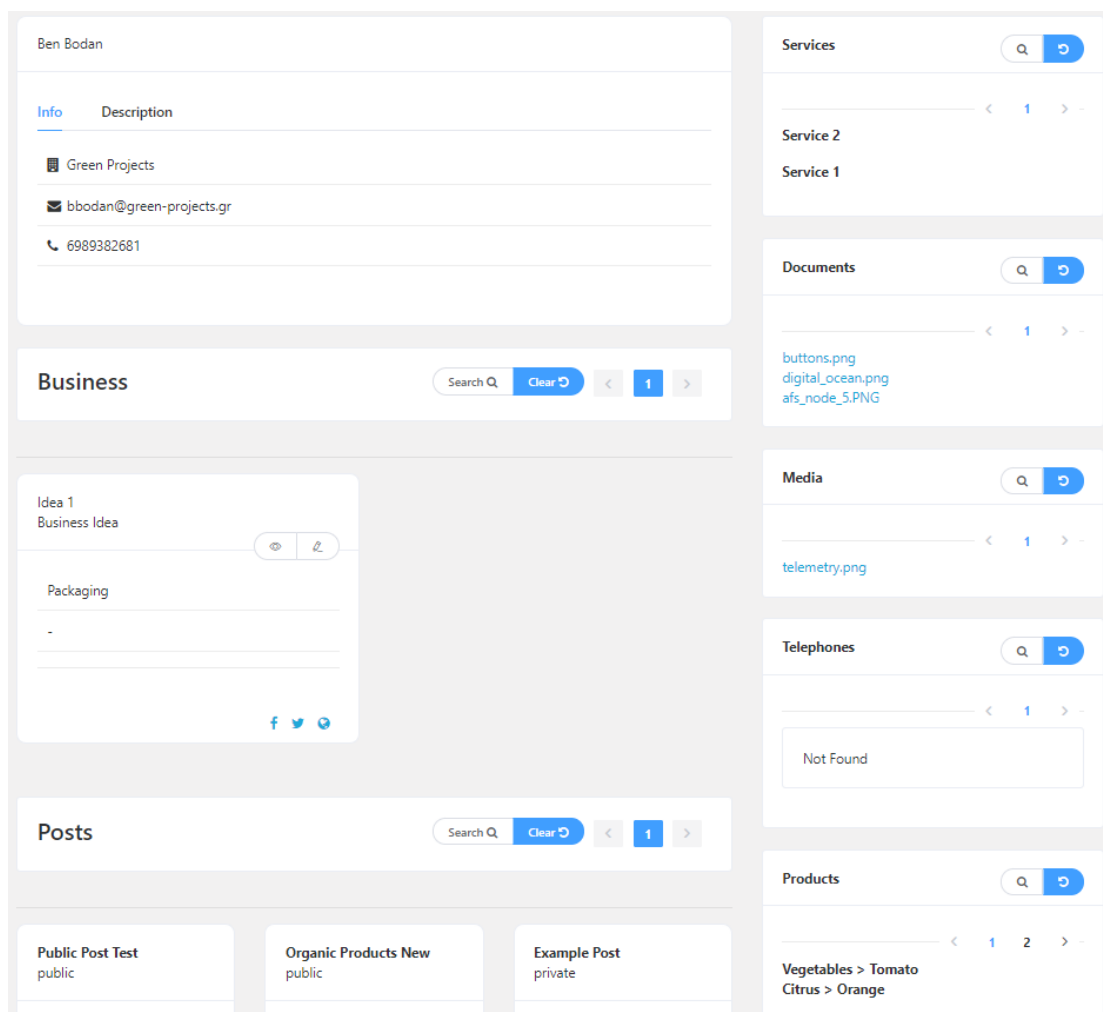

Figure 9. Detailed information of a transactor

3.3 Forum

The networking process is highly supported by the operation of the forum section within the platform. In this section all registered users may post public or private discussions and interact with other registered users for topics that are relevant to the agro-business sector.

The public posts are open to every registered user who can reply, while the private posts are tools for peer-to-peer discussions. The initiator of a private post may send requests to specific users (who have declared themselves as Mentors) asking them to participate to a specific discussion. When a mentor user is invited, he/she receives an email and he/she may accept the join request.

The initiator of the private post has the full picture of the sent requests and the received replies concerning these requests, as shown in Figure 10.

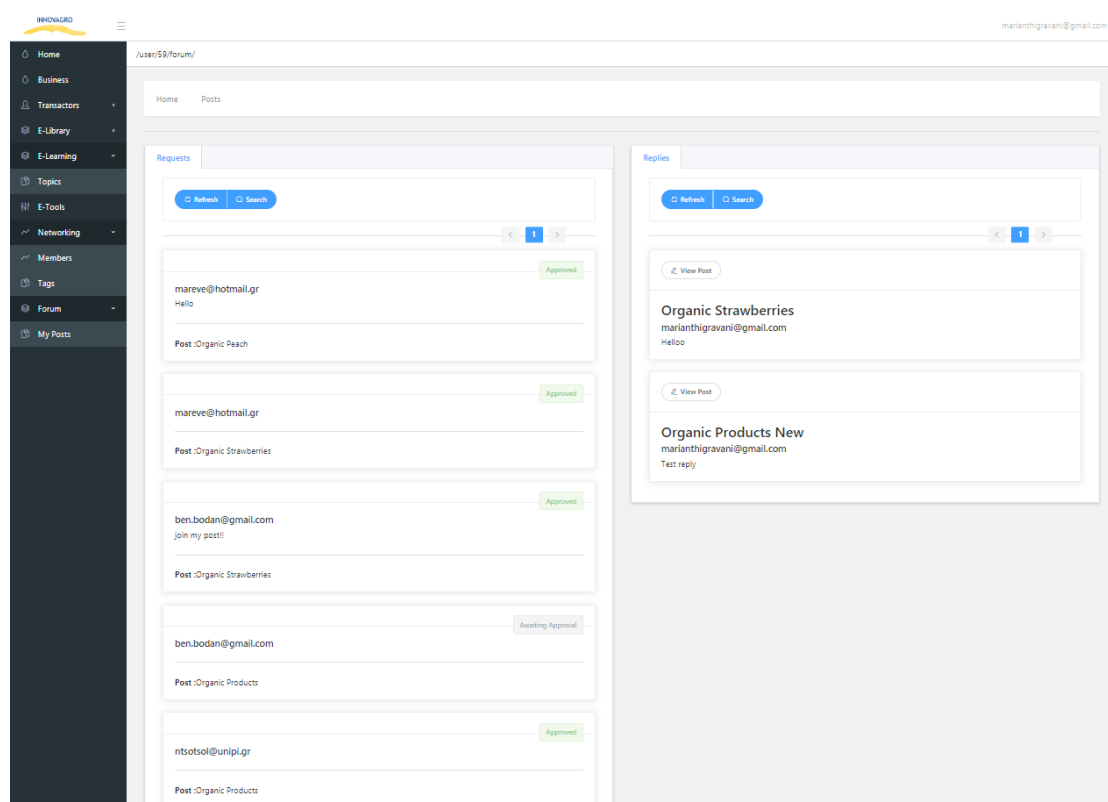

Figure 10. Requests and replies in private posts

The members participating to a peer-to-peer discussion receive emails each time a new reply is created. However, at any given time any of the connected users may deactivate this specific notification service.

4 E-incubator

The e-incubator is a service that is provided within the ViBIEC platform aiming in providing support to SMEs that operate in the agro-food sector. This support is offered through the provision of on-line tools, such as self-assessment questionnaires, business plans, financial evaluation tools, etc., as well as through the provision of added-value services, such as the e-learning modules and the e-library repository. Overall, the e-incubator service is basically supported by five subareas of the e-platform: the Business Idea, the Forum, the E-Learning, the E-Library and the E-Tools.

4.1 Business Idea

Each member who has the role “Agro-food Business” may describe one or more business ideas and upload relevant material. The business idea may fall under one of the following categories: Packaging, Logistics (Transport, Distribution), Production (cultivation, breeding, fishing, etc.), Processing, Wholesaler/Importer/Exporter, Retail, and Support Services.

In the subsystem “Business”, which is found within the profile section of a transactor, the user can create and edit his/her various business ideas and upload relevant material.

A unified set of information is provided for each business idea, which includes the following specific fields:

- **Title:** A descriptive name of the business idea
- **Website:** The website of the business idea (product or service)
- **Facebook/Twitter:** Links to the social media presence of the business idea
- **Status:** Selecting the status of the business idea among the following three choices: Business Idea, Established, Under establishment
- **Business Area:** Selection of the specific category under which this idea falls, as described above
- **Comments:** Any comment that can provide a clearer picture of the idea.

For each business idea the user may also upload documents, photos and videos.

The area business idea is somehow connected with the forum posts. Each member is able to have access only in business ideas where he has been invited through peer-to-peer posts and if he/she has accepted this invitation (Figure 11).

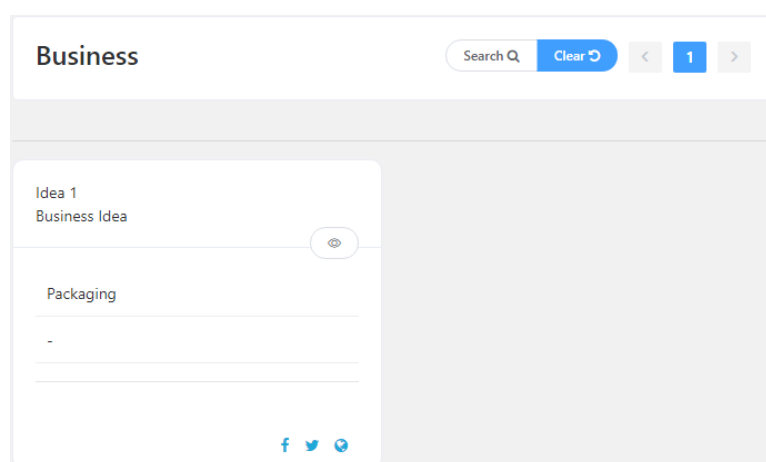

Figure 11. Business idea

From the sub-form posts the user may see his/her private posts, as well as the private posts where he/she has been invited. Within a private post a sharing of a business idea may occur. So, if a user would like to discuss one or more ideas with a registered member, who may act as mentor, he/she creates a private post in the Forum section, he/she connect his/her business idea with this specific peer-to-peer post and he/she invites the a mentor for discussion. Figure 12 shows the list of the posts for specific business ideas.

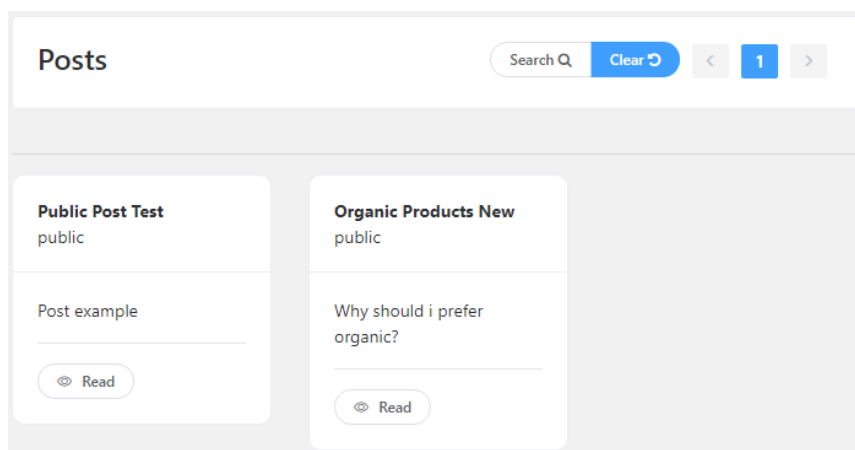

Figure 12. Posts for business ideas

If a business idea is communicated through a private post, this idea is shown within this peer-to-peer post and only invited members can see it, of course after accepting the corresponding invitation (Figure 13).

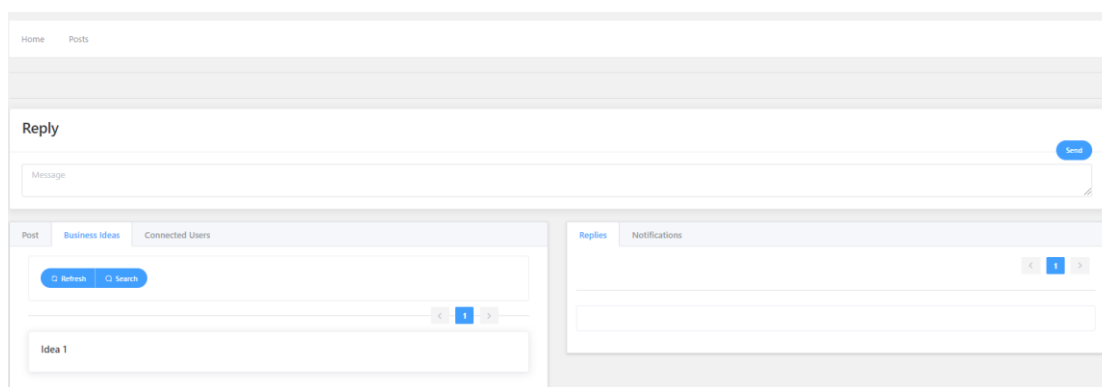

Figure 13. Private posts for business ideas

4.2 Forum

As already mentioned, the area business idea is somehow connected with the forum posts, because the communication of a business idea and the discussion on this idea, passes through the Forum subsystem. So, the e-incubator process is highly supported by the operation of the forum section within the platform. In this section all registered users may post public or private discussions and interact with other registered users for topics that are relevant to the agro-business sector.

The public posts are open to every registered user who can reply, while the private posts are tools for peer-to-peer discussions. The initiator of a private post may send requests to specific users (who have declared themselves as Mentors) asking them to participate to a specific discussion. When a mentor user is invited, he/she receives an email and he/she may accept the join request.

The initiator of the private post has the full picture of the sent requests and the received replies concerning these requests, as shown in Figure 14.

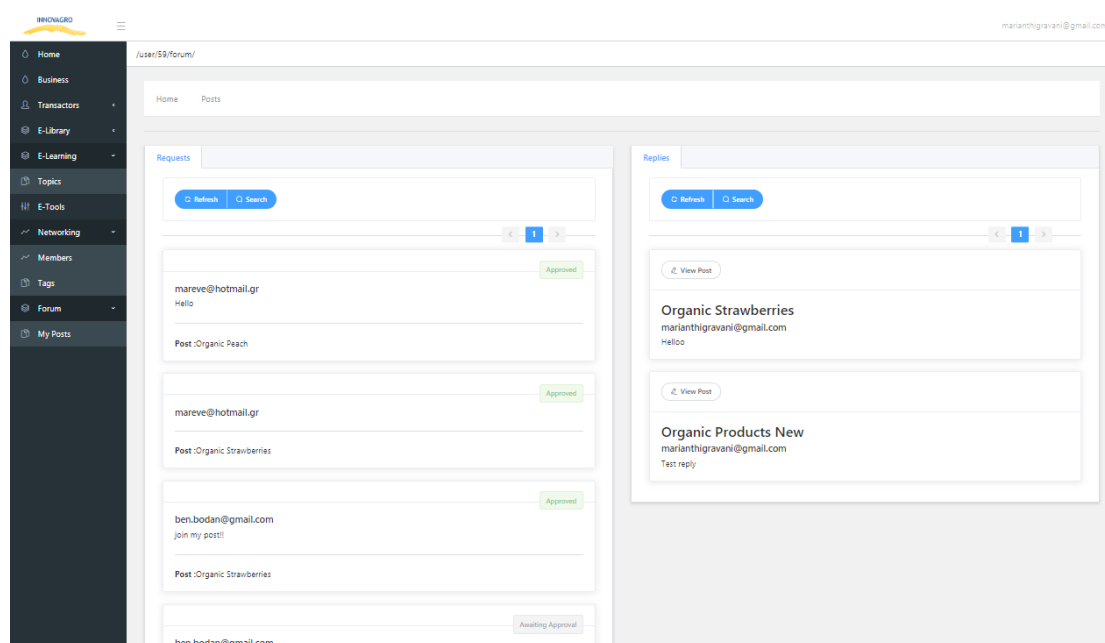

Figure 14. Requests and replies in private posts

The members participating to a peer-to-peer discussion receive emails each time a new reply is created. However, at any given time any of the connected users may deactivate this specific notification service.

4.3 E-learning

The E-Learning sub-system of ViBIEC platform provides a full set of 50 learning modules that intent to improve the skills of the members of the platform in the field of agro-food. Each learning module is consisted of one or more document or link (training material) and in most of the cases of one or more evaluation questions.

A unified set of information is provided for each one of the learning modules within the e-learning subsystem, which includes the following specific fields:

- **Title:** The name of the learning module
- **Category:** The category in which it falls. There are seven such categories:
 - Behaviour/Promotion/Education
 - Circularity
 - Digitalization/IT
 - Energy
 - Innovation/New products and technologies
 - Packaging

- Policies/structure/models/organization
- **Learning Objective:** A short description of the learning objective of the specific learning module
- **Tags:** Keywords that are describing better each learning module
- **Documents:** Training material as documents
- **Links:** Links to training material
- Questions: A set of comprehension questions regarding the specific learning module.

Figure 15 shows a screenshot presenting an overview of a training module.

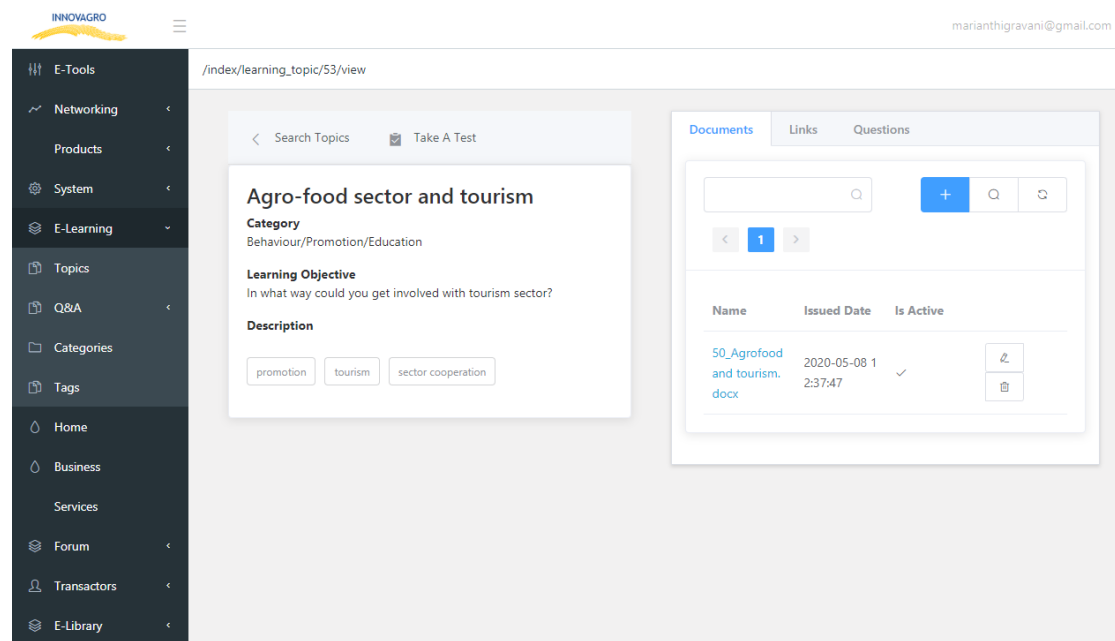

Figure 15. Overview of a training module

An overview of a comprehensive test for a particular learning topic is shown in Figure 16.

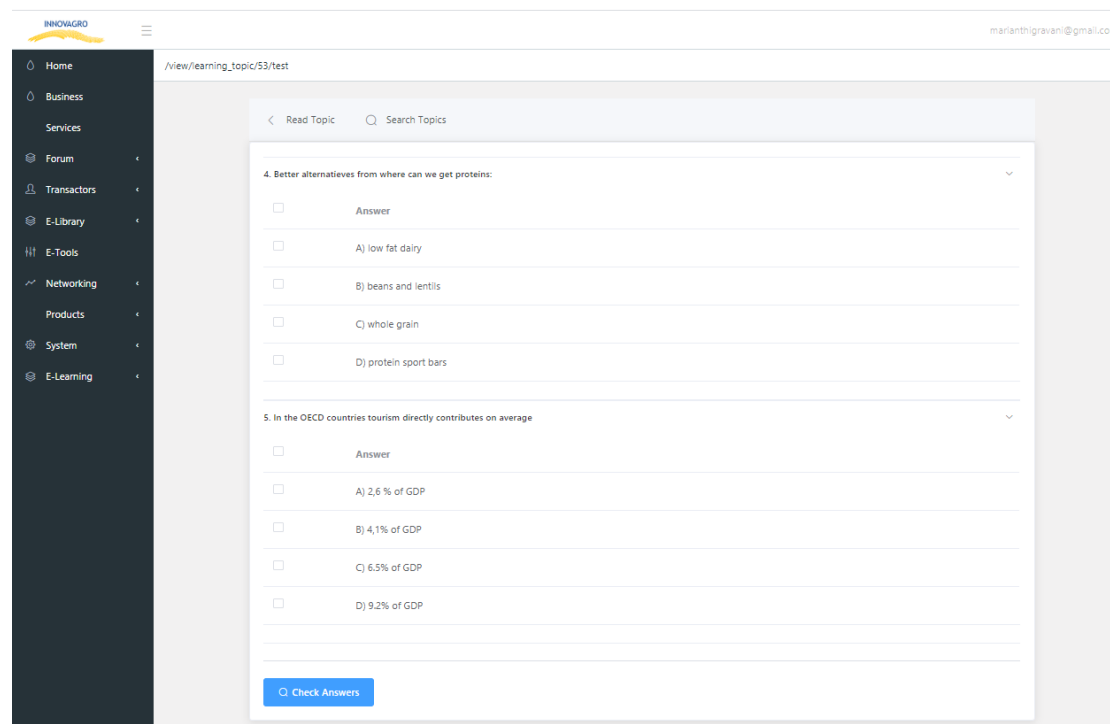

Figure 16. Overview of a comprehensive test

4.4 E-library

The e-library sub-system of the ViBIEC platform provides a full set of 144 items that intent to enrich the knowledge of the members of the platform in the field of agro-food. Each e-library item consists of one or more document or link (main material).

A unified set of information is provided for each one of the e-library items within the e-library subsystem, which includes the following specific fields:

- **Title:** The name of the learning module
- **Category:** The category in which it falls. There are four such categories:
 - Regulatory framework
 - Interreg program
 - Current policy
 - Studies
- **Country:** The country to which the item is referred to
- **Short Description:** A short description of the item
- **Description:** A more detailed description of the item
- **Tags:** Keywords that are describing better each e-library item
- **Documents:** E-library items as documents
- **Links:** Links to items

An overall number of 144 e-library items are already included in the lists and their data are available to all registered users. The allocation of these items among the different categories is as follows:

- Regulatory framework: 54
- Interreg program: 43
- Studies: 25
- Current policy: 22

Furthermore, the corresponding allocation among the different countries is as follows:

- Greece: 46
- Serbia: 33
- Slovenia: 32
- Italy: 25
- Albania: 7

The users of the platform may browse the full list of the e-library items that are entered in the platform and see the detailed information of each one of them only after having been logged in. A full search form is provided to the users in order to be able to efficiently filter the total list according to specific criteria. The search form is shown at the right side of the screen when the user selects the button “Search” at the top of the screen.

The search criteria that are available to the user are the following:

- Title (text field)
- Issuing Authority (text field)
- Type (text field)
- Category (selection list)
- Country (selection list)
- Tags (text field)

The results of the filtered data are presented to the user in the form of list of cards (one or two columns), or table of results. Figure 17 shows an example screenshot with search results in the form of list of cards with two columns

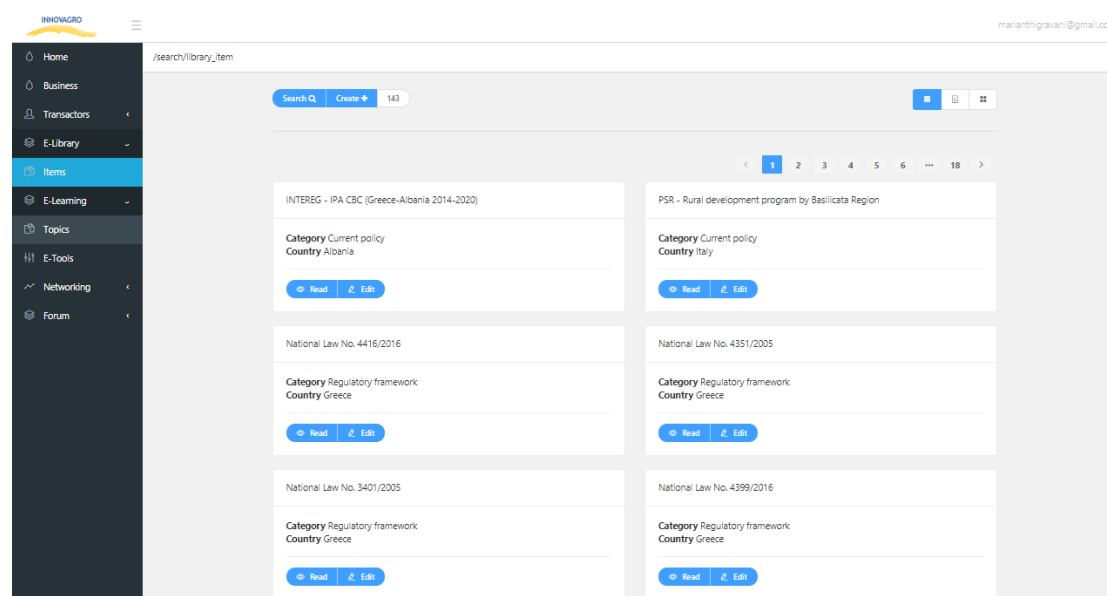

Figure 17. Search results in the form of list of cards (e-library items)

By selecting the button “Read” on a card the user may see the full available information concerning the specific e-library item, as shown in Figure 18.

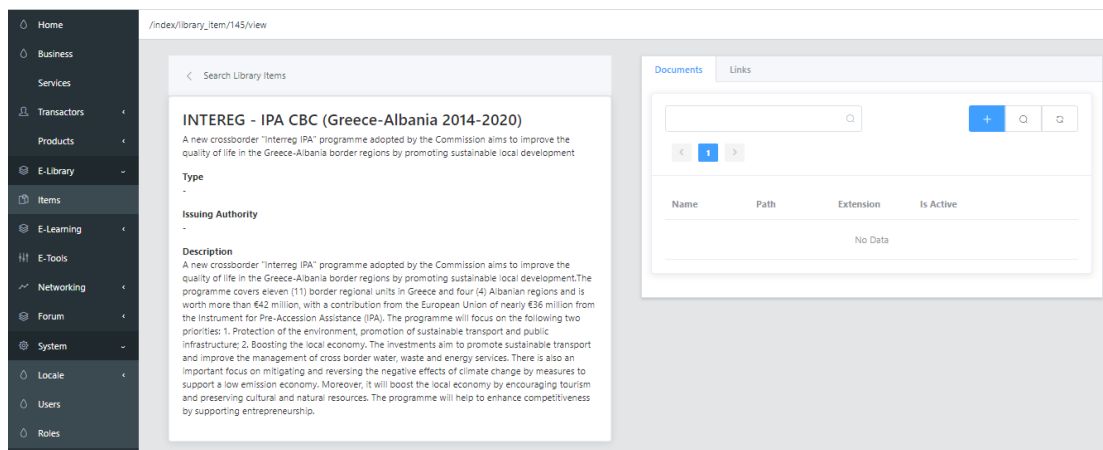

Figure 18. Detailed information of e-library items

4.5 E-tools

The e-tools sub-system of the ViBIEC platform provides a full set of 10 tools that support various needs of SMEs in the field of agro-food. Each e-tool item is consisted of at least two documents

A unified set of information is provided for each one of the e-tools modules within the e-tools subsystem, which includes the following specific fields:

- **Title:** The name of the e-tool
- **Category:** The category in which it falls. There are four such categories:
 - Business Development
 - Business Evaluation
 - Business Operation
 - Financial Planning
- **Description:** A description of the tool
- **Documents:** Training material as documents
- **Links:** Links to training material

An overall number of 10 e-tools items are already included in the lists and their data are available to all registered users. The allocation of these items among the different categories is shown in Figure 19.

Figure 19. Categories of e-tools

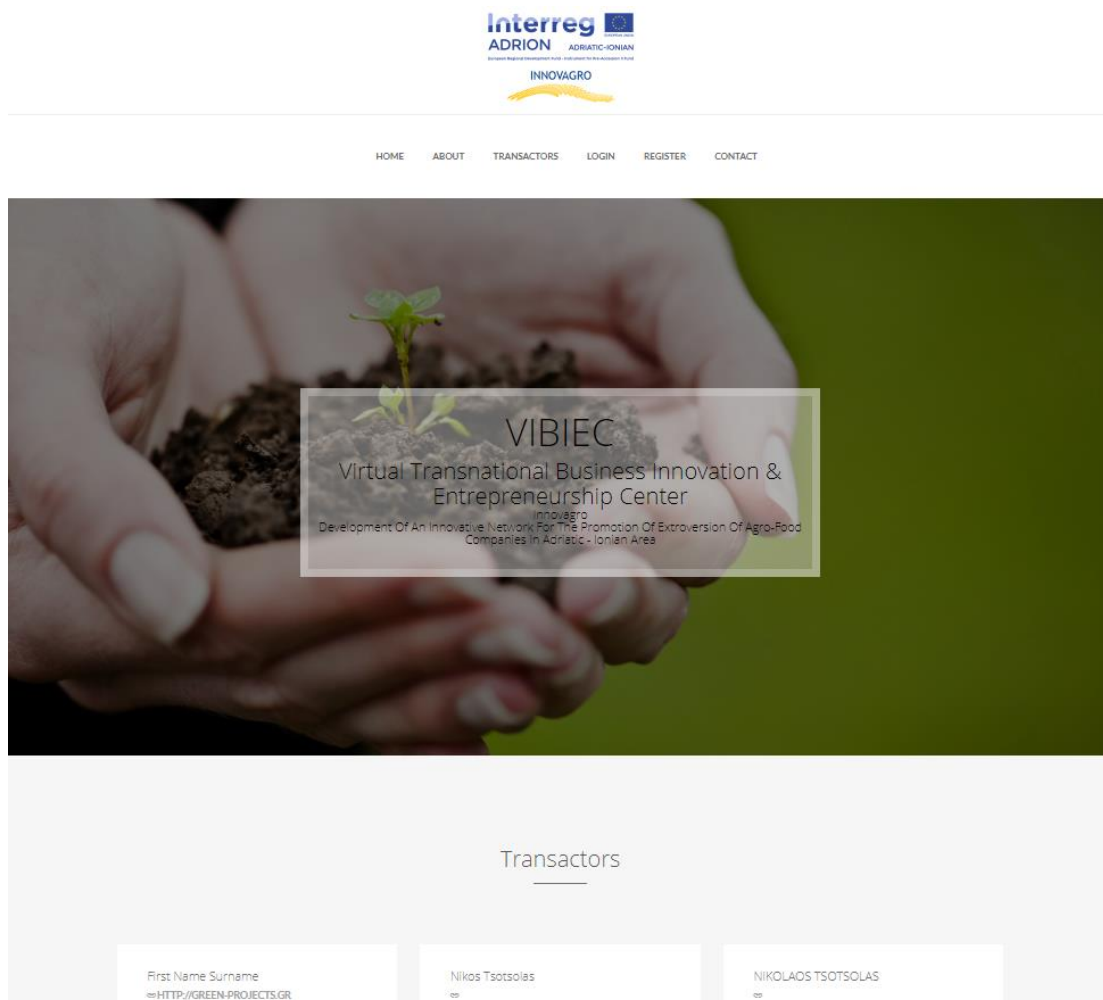

As analytically presented in previous chapters, currently there are 10 tools available in the e-tools subsystem:

- Self-Assessment Tools
 - Business readiness
 - Readiness for internationalization
- Financial Tools
 - Break-even analysis
 - Loan amortization schedule
 - Startup cost calculator
 - Cash flows and financial forecasts
- Business Tools
 - SWOT and PEST analysis
 - Business plan
 - Export price calculator
 - Business model canvas

5 Detailed Manual

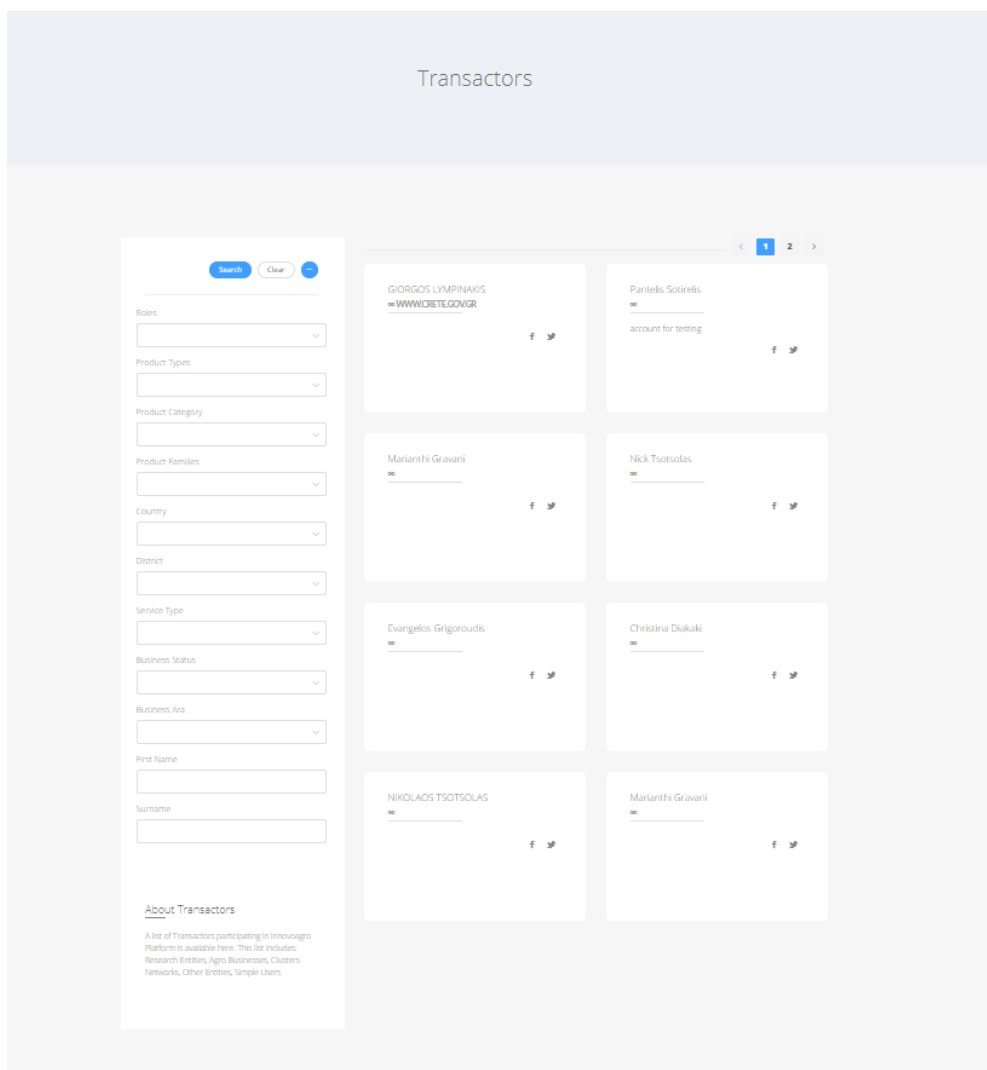

5.1 Introduction

5.1.1 Home page

5.1.2 About

From this option you can find a summary of the platform as well as the collaborating institutes.

5.1.4 Login

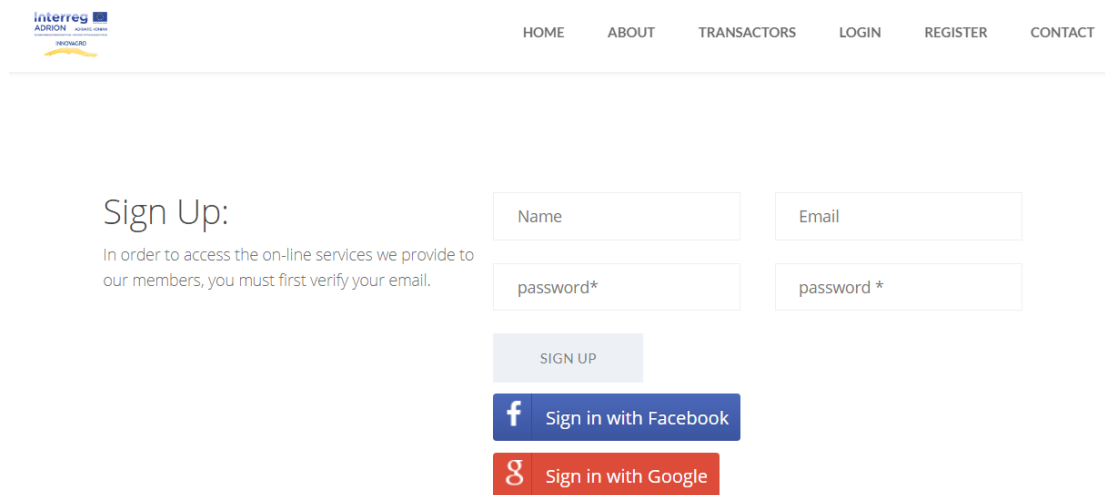

Fill out the required fields to log in. You are also able to log in via your facebook or gmail. If you are not a registered user click sign up and follow steps at section 5.1.5.

5.1.5 Register (sign-up)

The registration process is implemented through: <https://innovagro.green-projects.com.gr/>

You have three options to register on the system.

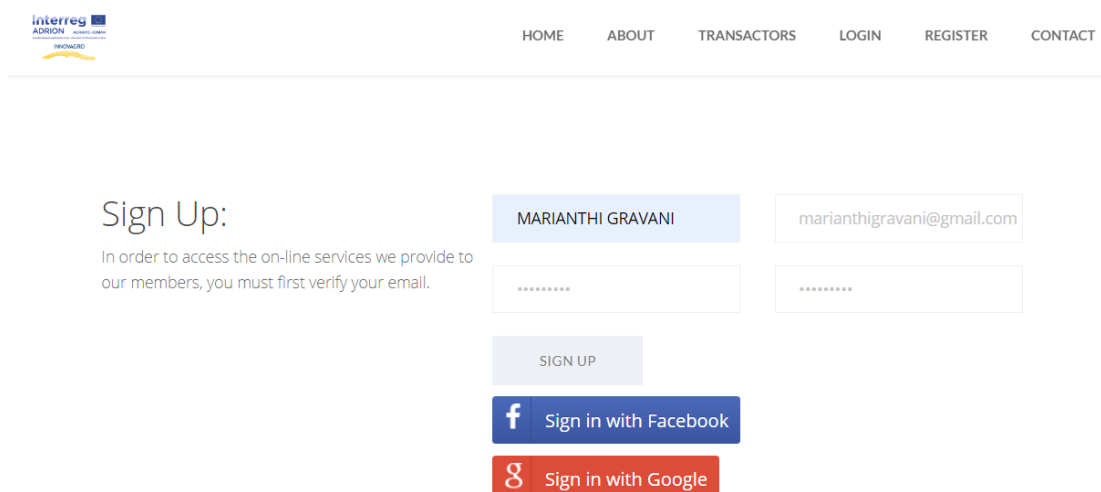

1. Register by creating an account.
2. Register via facebook.
3. Register with your gmail account.

The screenshot shows the 'Sign Up' section of the Innovagro website. It includes the Interreg ADRION logo and a navigation menu with links: HOME, ABOUT, TRANSACTORS, LOGIN, REGISTER, and CONTACT. The 'Sign Up' heading is followed by a note: 'In order to access the on-line services we provide to our members, you must first verify your email.' Below this are four input fields: 'Name', 'Email', 'password*', and 'password *'. A 'SIGN UP' button is positioned below the password fields. At the bottom, there are two social media login buttons: 'Sign in with Facebook' (with a Facebook 'f' icon) and 'Sign in with Google' (with a Google 'g' icon).

Register by creating an account

1. If you choose the registration by creating an account you should complete the required fields. These fields are your name, your email and password. Then, you should click on the option sign up, in order to continue the process.

This screenshot shows the same 'Sign Up' form as the previous one, but with sample data entered. The 'Name' field contains 'MARIANTHI GRAVANI', the 'Email' field contains 'marianthigravani@gmail.com', and the 'password' fields are filled with asterisks. The 'SIGN UP' button and the social media login options (Facebook and Google) are also visible at the bottom of the form.

- i. If your email address is already used it will display a message that this email is being used by another user.

Register

Sign Up:

In order to access the on-line services we provide to our members, you must first verify your email.

The email has already been taken.

- ii. If all the fields are correctly completed, the following message will appear on your screen:

Your Email Has Not Been Verified

In order to access the on-line services we provide our members through Innovagro, you must first verify your email

[BACK TO HOME](#)

2. Then, you should login at your email account and find the email which has been sent you by Innovagro. Click the option "I verify the Account".

Thanks for your request to sign up for Innovagro

A new email account marianthigravani@gmail.com has been created in Innovagro. Please confirm the account creation by clicking the following link:

[I verify the Account](#)

If you have not used the email marianthigravani@gmail.com to sign up for Innovagro, please ignore this message.

For any questions you may contact Innovagro:

Email: info@tuc.gr

Thank you for your application.

Innovagro

- When you click this option, you will be routed to a new page with some blank fields that should be filled-in.

Register

Roles *

5. If everything is ok, it will appear at your screen the following message.

Account Activation

Your Account needs to be approved by the Administrator Innovagro

[BACK TO HOME PAGE](#)

Now, you should wait for the administrator to approve your account.

6. When administrator approves your account, you will receive an email which will say “your account is activated, you can now login” and below you can find the option “login”.

Your Account is activated, you may now log in.

[Login](#)

7. Now, you can have access by filling in your email and password in the corresponding fields. There, you will be able to click on the option remember me, in order to not fill every single time your email and password. Also, you can find the option “forgot your password?” in case you forgot your password.

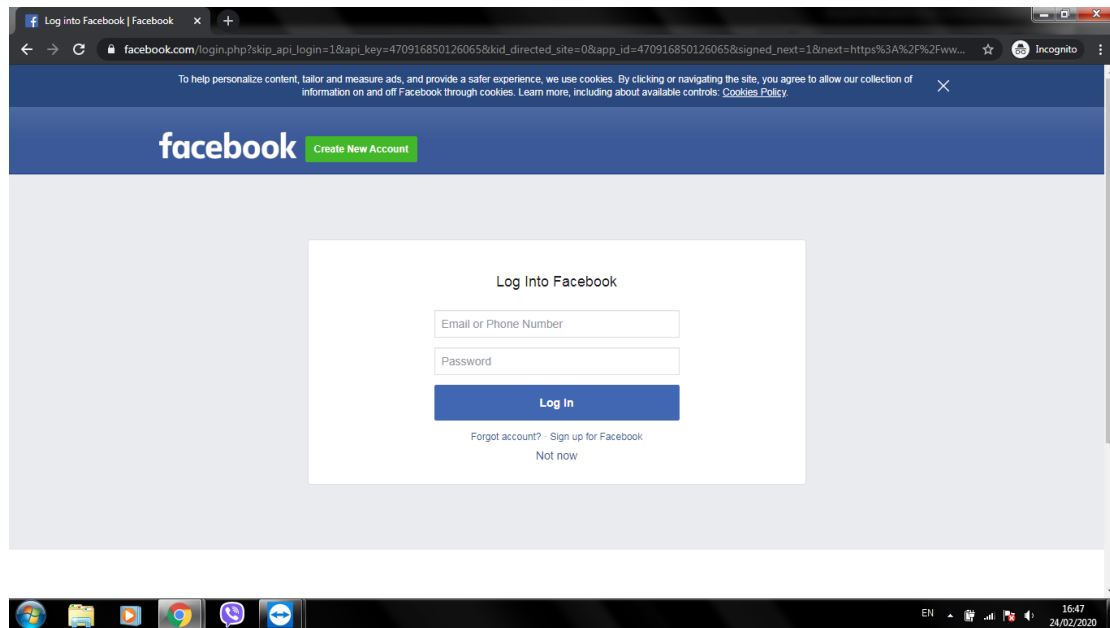

The screenshot shows the INNOVAGRO website's login and sign-up interface. On the left, the 'Login' section has a title, a text input for the email (containing 'marianthigravani@gmail.com'), a password input (masked with dots), a 'Remember me' checkbox, a 'Back To Home' button, a 'Login' button, and a link for 'Forgot your password?'. On the right, the 'Sign Up' section has a title, a message stating that email verification is required for on-line services, and a 'Sign up' button. At the bottom, there are two social login buttons: 'Login with Facebook' and 'Login with Google'.

Register with facebook

1. You should click on the option “sign in with facebook”

The screenshot shows the INNOVAGRO website's register page. At the top, the INNOVAGRO logo is on the left, and a navigation menu with links for HOME, TRANSACTORS, LOGIN, REGISTER, and CONTACT is on the right. The main heading is 'Register'. Below this, the 'Sign Up:' section includes a message about email verification and a 'Thank you for your application' note. To the right of the message are four input fields: 'Name', 'Email', 'password*', and 'password *'. Below these fields is a 'SIGN UP' button. At the bottom, there are two social login buttons: 'Sign in with Facebook' and 'Sign in with Google'.

2. Fill in the email and password that you use to log in on facebook and then click the option “log in”.

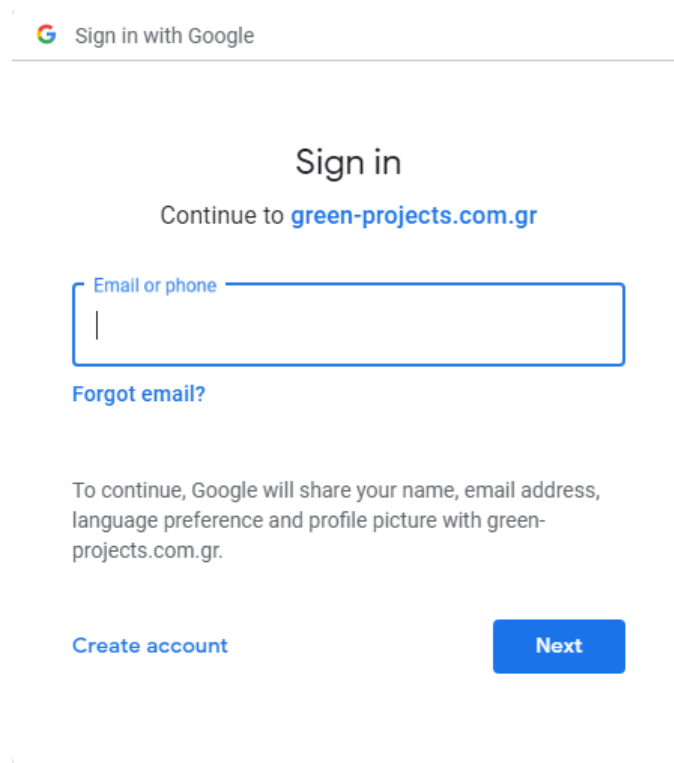

3. Then, this message will appear at your screen. If you agree with these terms, you should click on the option “continue as ____” and you will have access at the app. If you disagree, you can click cancel and log in with another way (gmail or create account).
4. Then follow steps at the point 5, page 7 to complete the registration.

Register with gmail

1. Click on the option “sign in with google”

2. Fill in your Gmail address and then click the option “next”

5.1.6 Contact

In Contact page, you may ask for communication by filling in the web form. You should write your name, email and your message and also confirm that you are not a robot.

The screenshot shows a web form titled "Contact" on a light blue header. The form is contained within a white box with a light gray border. It includes a "Name" input field, an "Email" input field, and a "Message" text area. Below the message field is a checkbox labeled "Δεν είμαι ρομπότ" (I am not a robot) and a reCAPTCHA widget. A "Submit" button is located at the bottom right of the form.

5.2 For the User

5.2.1 Update profile

When your account is activated you will be able to update your profile.

Every user has the ability to edit personal information, such as name or address etc. Also, he/she will be able to edit accounts settings, like username or password. The user may also select if he/she would like to act as a Mentor in the platform.

The screenshot shows a web application interface with two tabs: 'My Info' and 'Account Settings'. The 'Account Settings' tab is active. Below the tabs is a form with a 'Save' button in the top right corner. The form contains the following fields:

- Name:** A text input field containing 'mareve@hotmail.gr'.
- Email:** A text input field containing 'mareve@hotmail.gr'.
- Password:** An empty text input field.
- Password Confirmation:** An empty text input field.
- Is Mentor:** A checkbox that is currently unchecked.

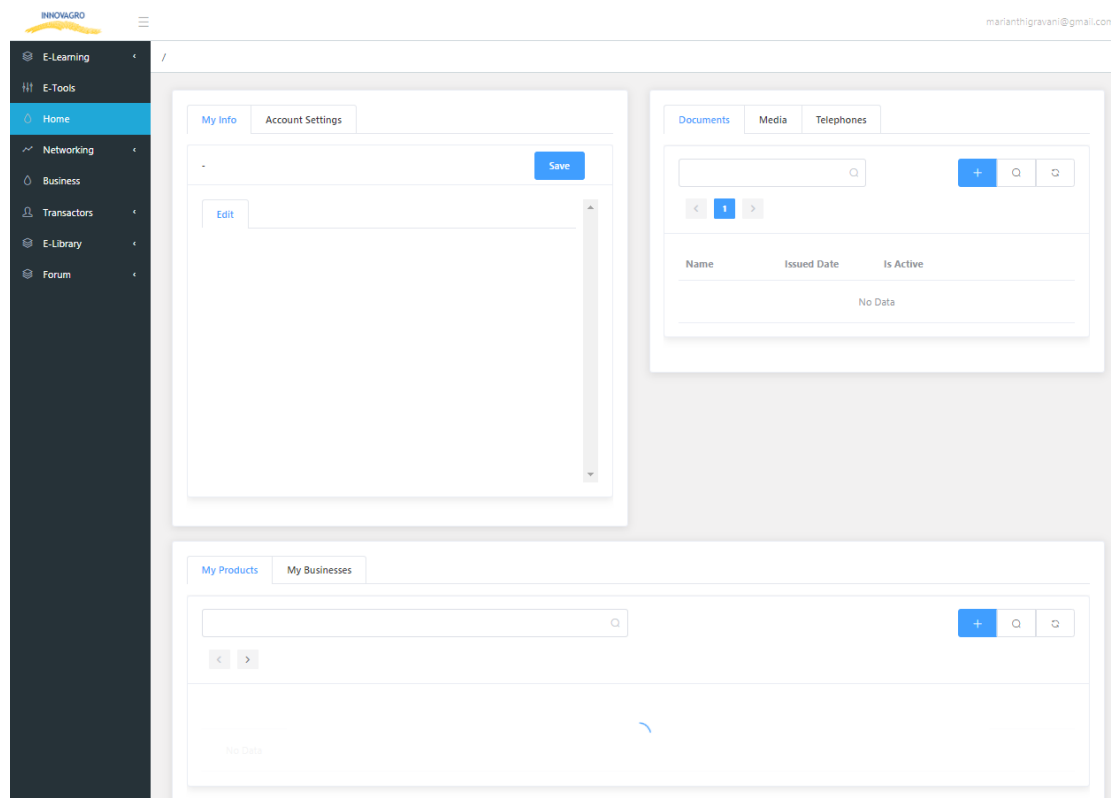

A vertical scrollbar is visible on the right side of the form area.

However, the capabilities that each user has, depending on their role. Below you will find the page that opens in each possible user role.

Agro Food Business Role

If you have registered as agro food business, when you log in, it will display a menu with all documents, media and telephones which you have uploaded.

At the bottom of the page you will find a second menu, where you can find your products and your businesses.

A user who has AgroFood Business role can have access at the following menus:

- Networking
- Business
- Transactors
- E-library
- E-learning
- E-tools
- Forum

Academic/Research Organization

If you have registered as an Academic/Research Organisation, when you log in, it will display a menu with documents, media and telephones.

At the bottom of the page you will find a second menu, where you can find your products and your services.

A user who has Academic/Research Organisation role can have access at the following menus:

- Networking
- Transactors
- E-library
- E-learning
- E-tools
- Forum

Agrofood Cluster – Networks Role

If you have registered as agrofood cluster – network, when you log in, it will display a menu with documents, media and telephones.

At the bottom of the page you will find a second menu, where you can find your products.

The screenshot displays the INNOVAGRO web application interface. On the left is a dark sidebar menu with the following items: Networking, Home, Transactors, E-Library, Forum, E-Learning, and E-Tools. The main content area is divided into three panels. The top-left panel, titled 'My Info', contains a form with fields for First Name (Marianthi), Surname (Gravani), Title (Mrs), and Sex (Female), along with 'Edit' and 'Save' buttons. The top-right panel, titled 'Documents', has tabs for Documents, Media, and Telephones, a search bar, and a table with columns Name, Issued Date, and Is Active, currently showing 'No Data'. The bottom panel, titled 'My Products', also has a search bar and a table with columns Category, Product Family, and Status, also showing 'No Data'. The user's email, marianthigravani@gmail.com, is visible in the top right corner.

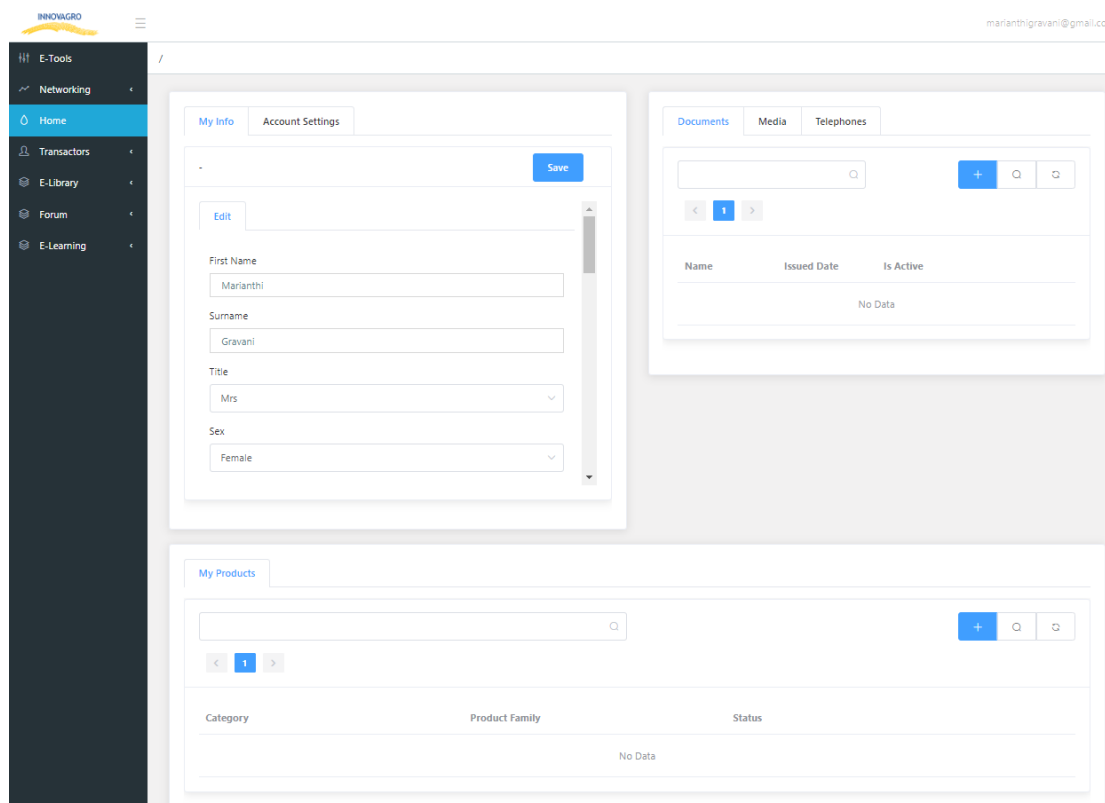

A user who has AgroFood Cluster - networks role can have access at the following menus:

- Networking
- Transactors
- E-library
- E-learning
- E-tools
- Forum

Other Entities Role

If you have registered as other entity, when you log in, it will display a menu with documents, media and telephones.

At the bottom of the page you will find a second menu, where you can find your products.

A user who other entities role can have access at the following menus:

- Networking
- Transactors
- E-library
- E-learning
- E-tools
- Forum

Business Support Organization Role

If you have registered as business support organization, when you log in, it will display a menu with documents, media and telephones.

At the bottom of the page you will find a second menu, where you can find your products.

The screenshot displays the INNOVAGRO web application interface for a Business Support Organization role. On the left is a dark sidebar menu with the following items: Home, Transactors, Networking, Forum, E-Library, E-Learning, and E-Tools. The main content area is light gray and contains two primary sections. The top section is titled 'My Info' and 'Account Settings', featuring a form with fields for First Name (Marianthi), Surname (Gravani), Title (Mrs), and Sex (Female), along with an 'Edit' button and a 'Save' button. To the right of this is a section for 'Documents', 'Media', and 'Telephones', which includes a search bar, a '+', and a 'Q' icon, and a table with columns 'Name', 'Issued Date', and 'Is Active', currently showing 'No Data'. Below these is a 'My Products' section with a search bar, a '+', and a 'Q' icon, and a table with columns 'Category', 'Product Family', and 'Status', also showing 'No Data'. The top right corner of the interface shows the user's email address: marianthigravani@gmail.com.

Simple User Role

If you have registered as simple user, when you log in, it will display a menu with documents, media and telephones.

At the bottom of the page you will find a second menu, where you can find your products.

This screenshot is identical to the one above, showing the INNOVAGRO web application interface for a Simple User Role. The layout, sidebar menu, and main content sections (My Info, My Products, Documents, Media, Telephones) are the same, indicating that the interface for a simple user role is identical to that of a business support organization role.

Local Public Organisation Role

If you have registered as local public organization, when you log in, it will display a menu with documents, media and telephones.

At the bottom of the page you will find a second menu, where you can find your products.

Multiple User Role

If you have many roles, when you log in, it will display a menu with documents, media and telephones.

At the bottom of the page you will find a second menu, where you can find your products, services and businesses.

5.2.3 Business

The option **business** is a section where you can find all the business ideas you have upload or to create a new business idea.

From the option business you will be able to:

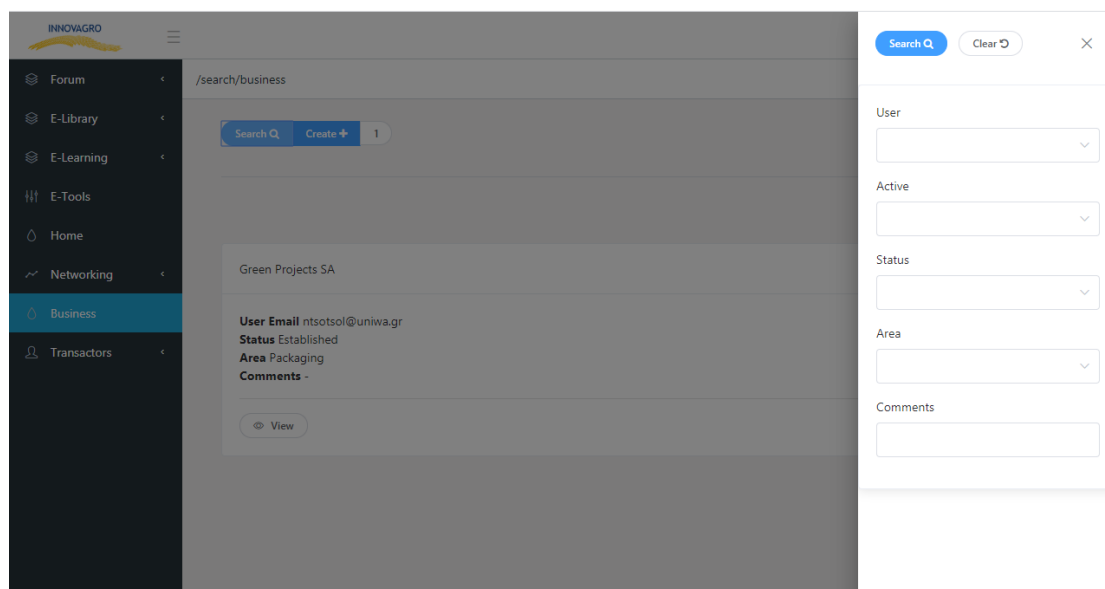

- See all your business ideas. You can change the menu format from the three options on the top of the page at your right.

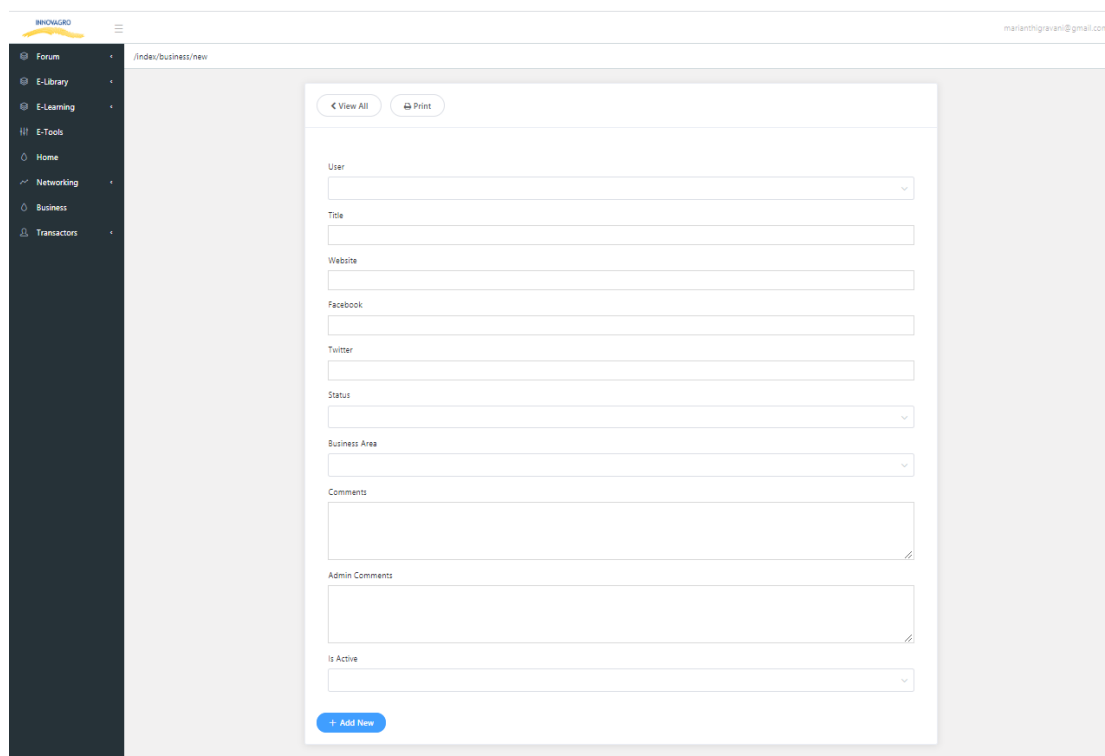

- **Search or create** new business idea.

When you click **search** a bar will open at the right of the page, where you can search an uploaded business idea with these filters.

In order to **create** a new idea you should fill in the following blanks click **add new**. You are, also, able to **print** it.

- Edit the info's of your uploaded businesses ideas, or add new documents and media. (Follow the steps at section 5.1.3)

The screenshot displays a web interface for managing business ideas. On the left, there is a form titled 'Business Idea' with various input fields: User (email), Title, Website, Facebook, Twitter, Status (dropdown), Business Area (dropdown), Packaging, Comments, and Admin Comments. At the bottom of the form are 'Update' and 'Cancel' buttons. On the right, there is a 'Documents' section with a table for managing uploaded documents. The table has columns for Name, Path, Extension, and Is Active. Below the table is a large empty area for document uploads.

5.2.4 Services

The option **services** is a section where you can find services you provide as a business member. From the option services you will be able to:

- See all your services. You can also change the menu format from the three options on the top of the page at your right.

/search/service

The screenshot shows the '/search/service' page. At the top, there is a search bar with 'Search Q', a 'Create +' button, and a count of '2'. Below the search bar, there are two service cards. Each card has a title 'Agronomic Consultant', a description, a status 'Active', and an 'Edit' button.

/search/service

The screenshot shows the '/search/service' page with a table view. The table has columns for Description, Status, Type, and an edit button. The data rows are as follows:

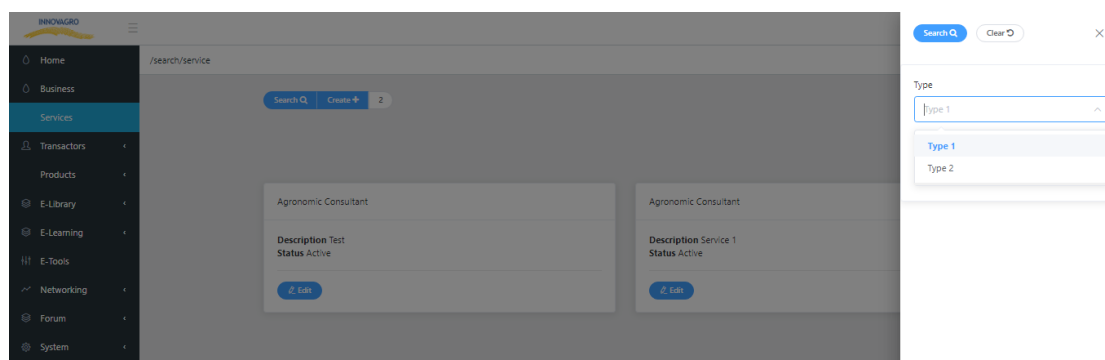

Description	Status	Type	
Test	Active	Agronomic Consultant	Edit
Service 1	Active	Agronomic Consultant	Edit

- Search or create new services

When you click **search** a bar is open at the right of the page, where you can search an uploaded business idea with these filters.

In order to create a new service fill in the following blanks and click **add new**. You are, also, able to print it.

Citrus		Grapefruit Red Blood	Edit
Citrus		Orange Red Blood (Sanguine Fruit)	Edit
Grapes	Active	Table grape	Edit

Third Screenshot (Grid View with Detail): Displays a grid view with more detail for each product card, showing the product name, 'Product Category Citrus', 'Status -', and an 'Edit' button. The products listed are: Orange Sweet (Doica), Tangelo, and Mandarin/ Tangerine (Small).

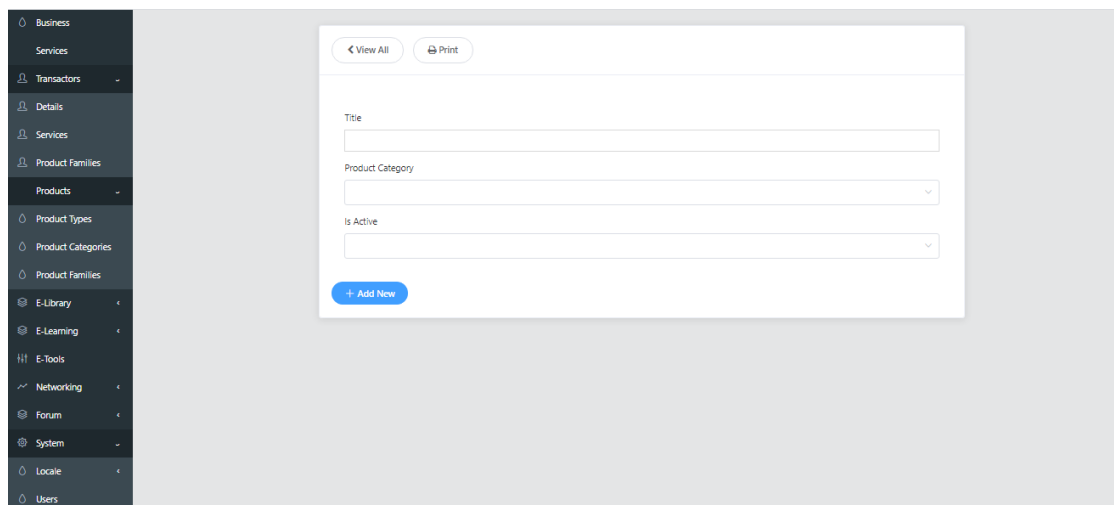

ii. Search or create new product family

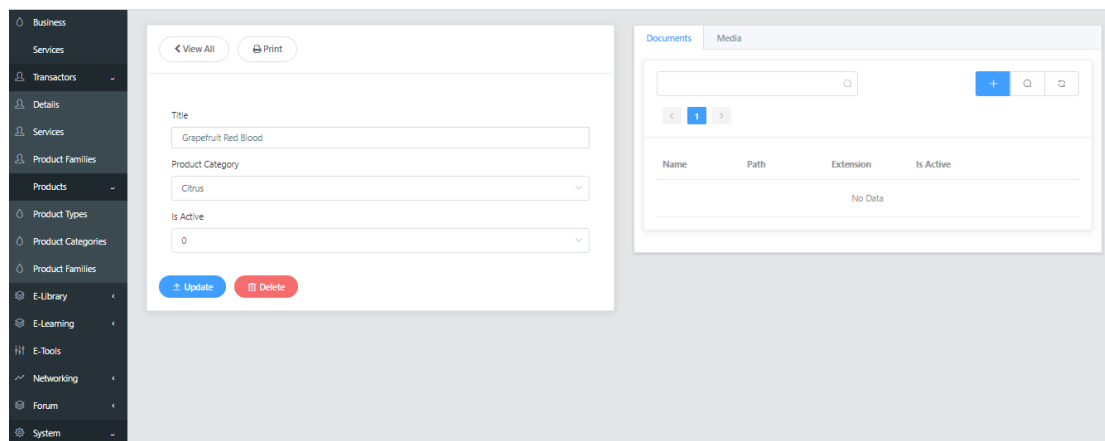

When you click **search** a bar is open at the right of the page, where you can search an uploaded product family.

To create a new product family you should fill in the following blanks and click **add new**. You can, also, print it.

iii. Edit the info's of the product family and click update to save changes. Upload new documents or media (see section 5.1.3).

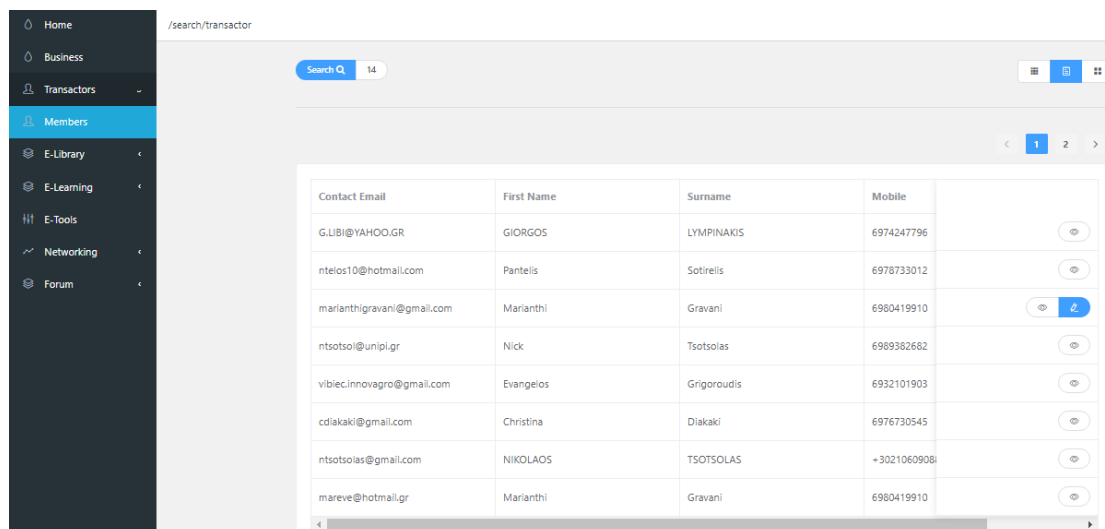

5.2.6 Transactors

The option **transactors** is a section where you can find all the members who are registered and the corresponding details.

When you click member this page will appear:

From each member card you can find personal info's or a short description about the member.

Ben Bodan

Info Description

 Green Projects

 bbodan@green-projects.gr

 6989382681

The area business idea is somehow connected with the forum posts. Each member is able to have access only in business ideas where he has been invited through peer-to-peer posts and if he/she has accepted this invitation.

Business Search Q Clear < 1 >

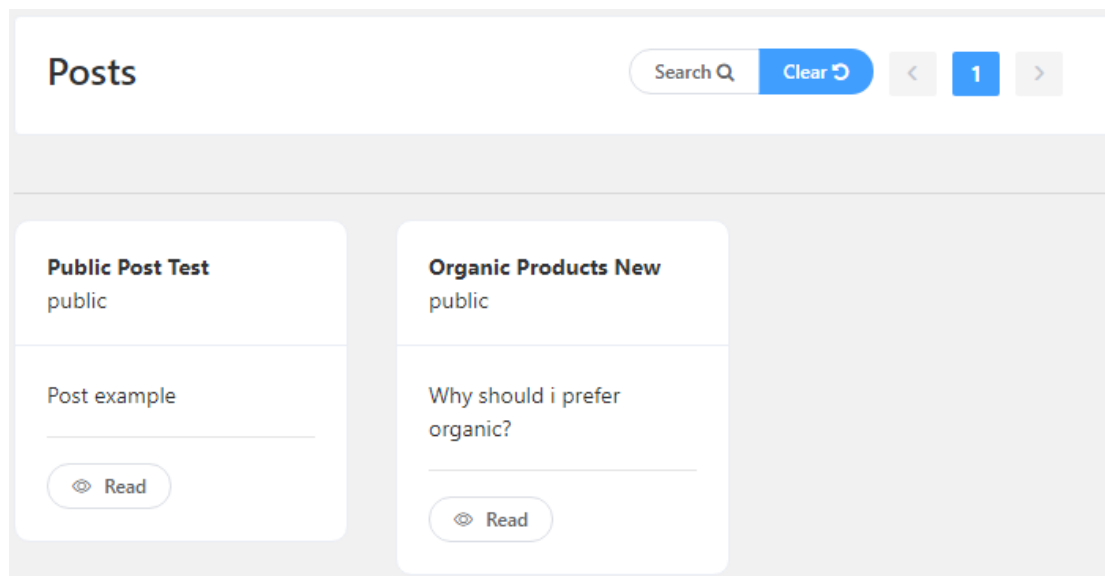

Idea 1
Business Idea

Packaging

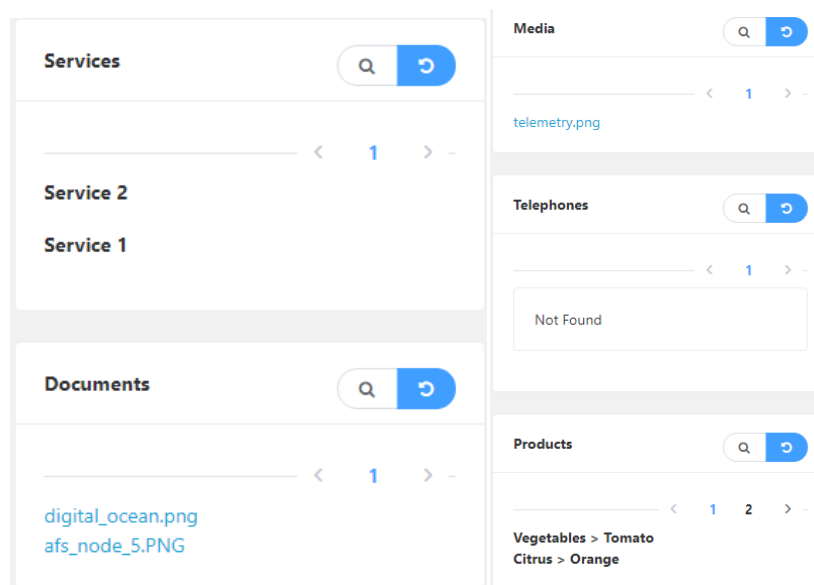

-

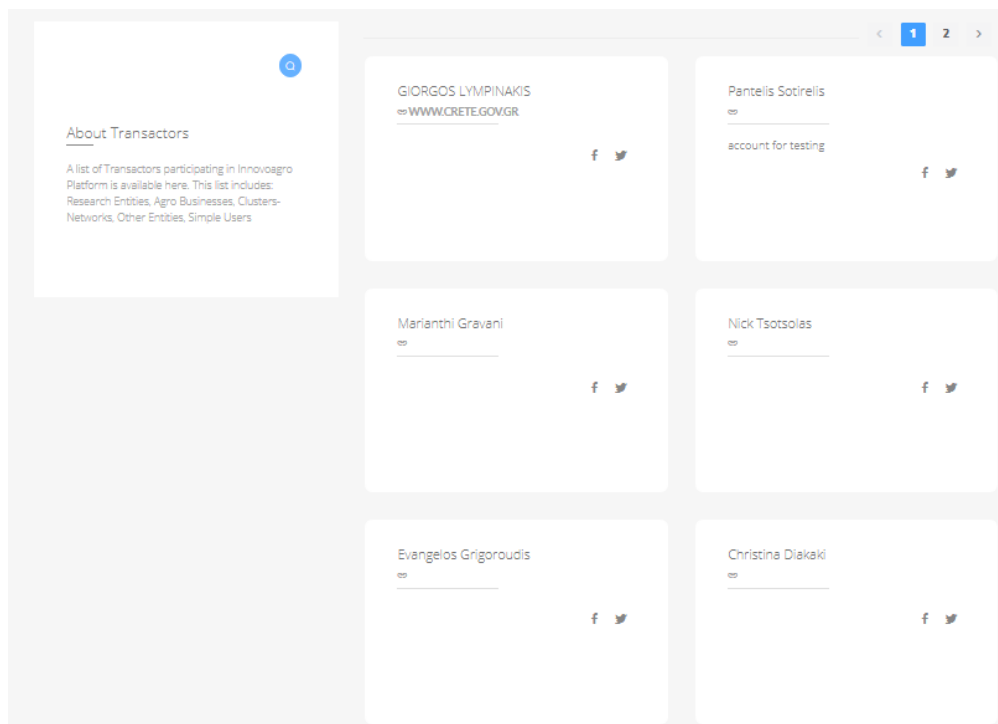

From the field posts you can see member's public posts or private posts where you have been invited.

At the right side of the page you can find member's services, documents, media, telephones and products.

You can also have limited access at this section **without login (public area)**. Click the option transactors in order to find members. You will be able to have limited information about each member, more specifically name, facebook, twitter and institute link.

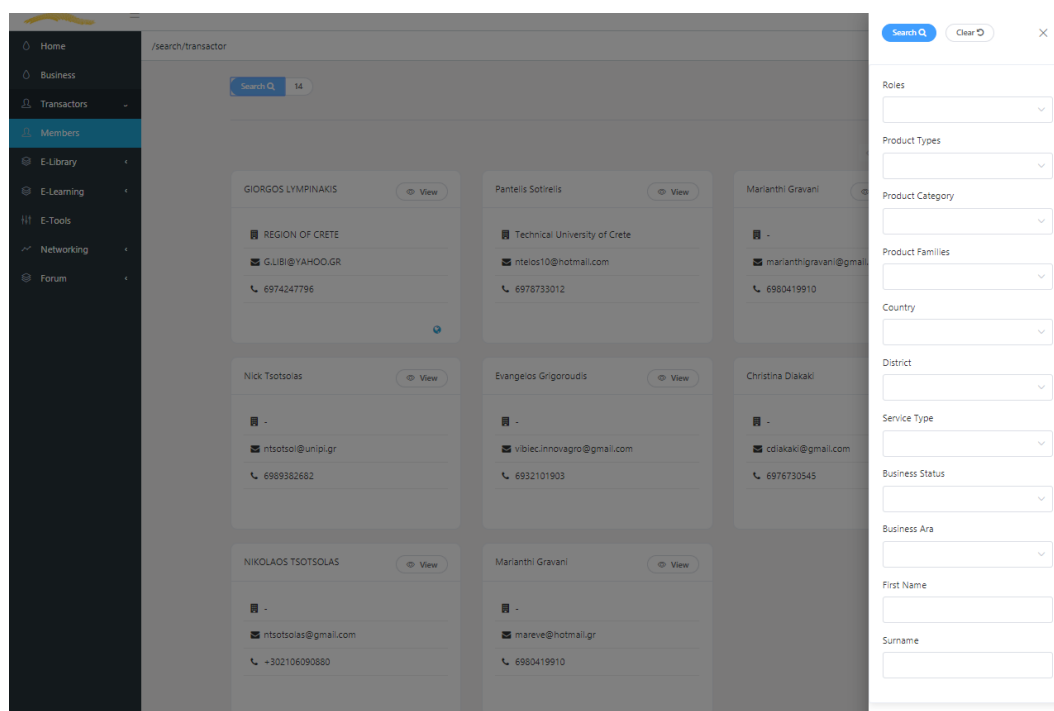

If you want to find more information about a member you would be asked to log in. When you logged in you will automatically be transferred to the membership card.

(*in case you do not redirect automatically you should search the member from the corresponding field, go to section 5.1.4)

i. Search transactor.

When you click **search** a bar will open at the right of the page, where you can search registered members with the use of filters.

5.2.7 E-library

The option **e-Library** is a section which contains information for transactors, such as laws, regulations and operations among different countries.

- i. When you click the option **e-library** a list will open.

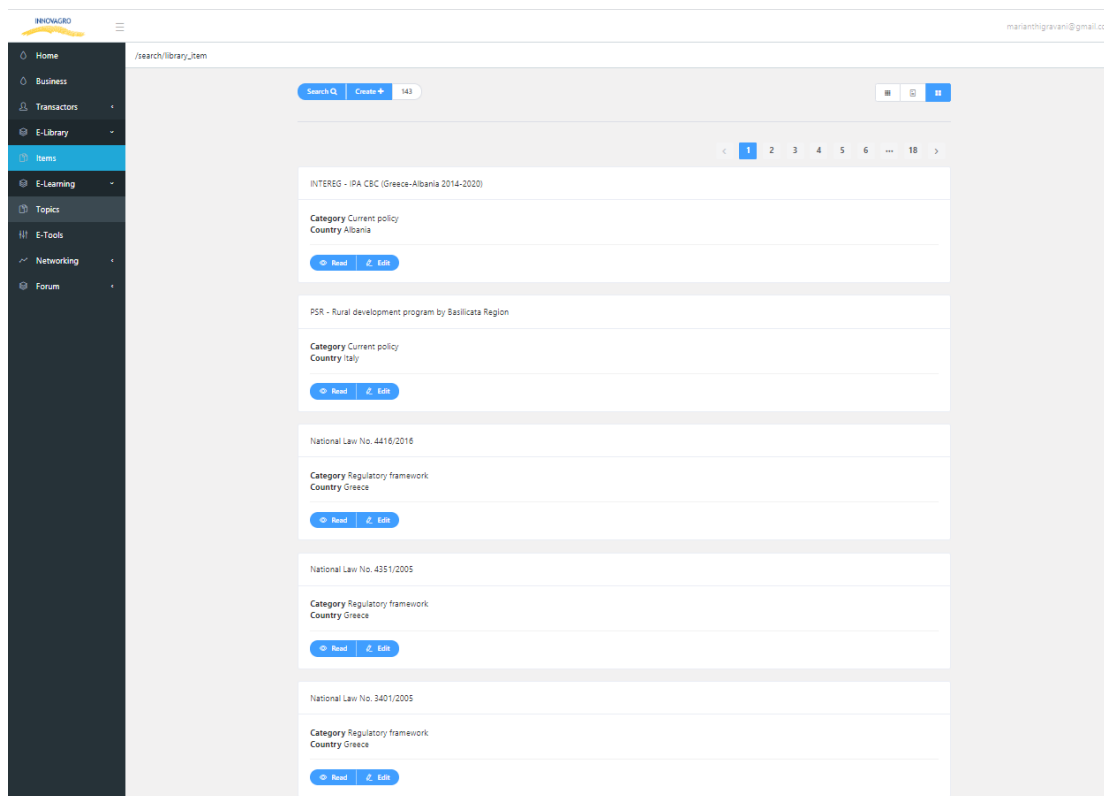

Click on the option items and a menu will appear (choose the menu format)

The screenshot shows the 'Items' menu in the E-Library section. The menu is displayed as a grid of cards, each representing a legal document. Each card includes the title, category, country, and buttons for 'Read' and 'Edit'.

Title	Category	Country
INTEREG - IPA CBC (Greece-Albania 2014-2020)	Current policy	Albania
PSR - Rural development program by Basilicata Region	Current policy	Italy

ii. Search a networking member

When you click **search** a bar will open at the right of the page, where you can search a networking member.

iii. You can choose **read** in order to see a preview of the networking member.

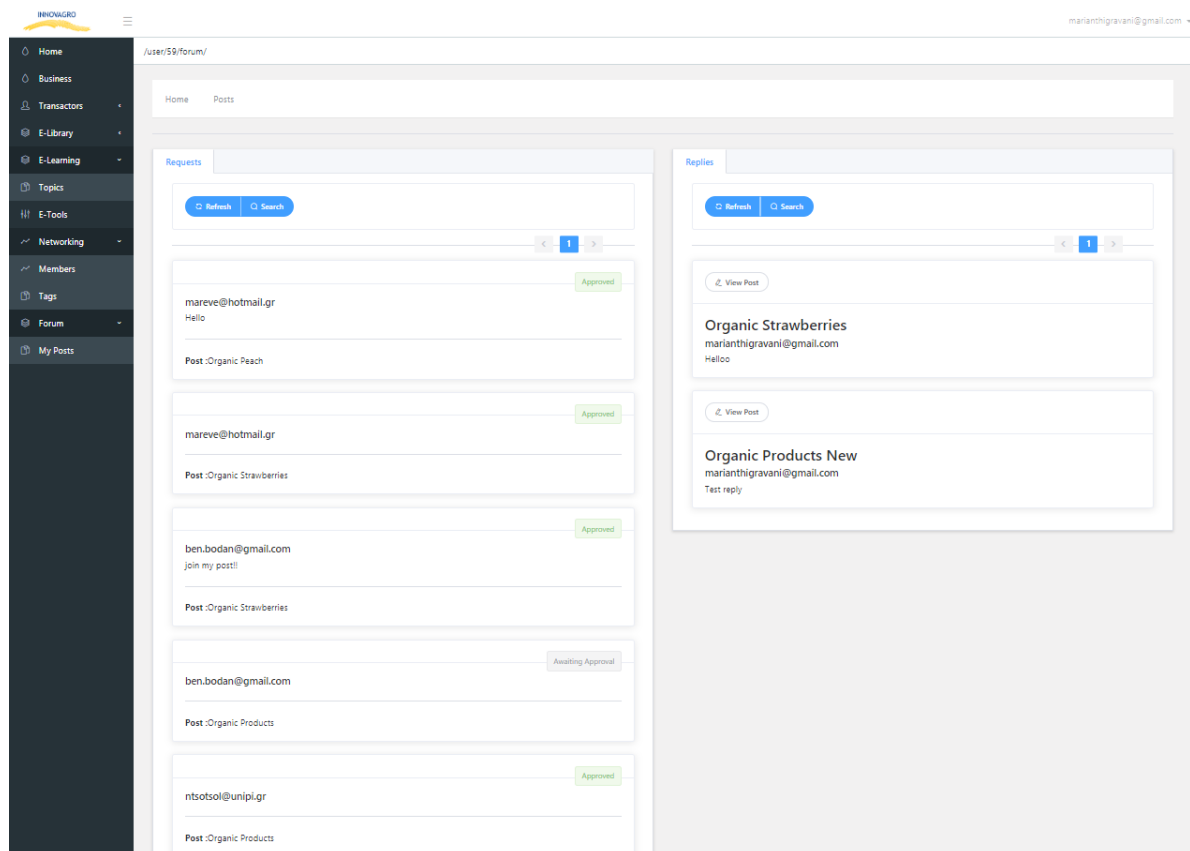

5.2.11 Forum

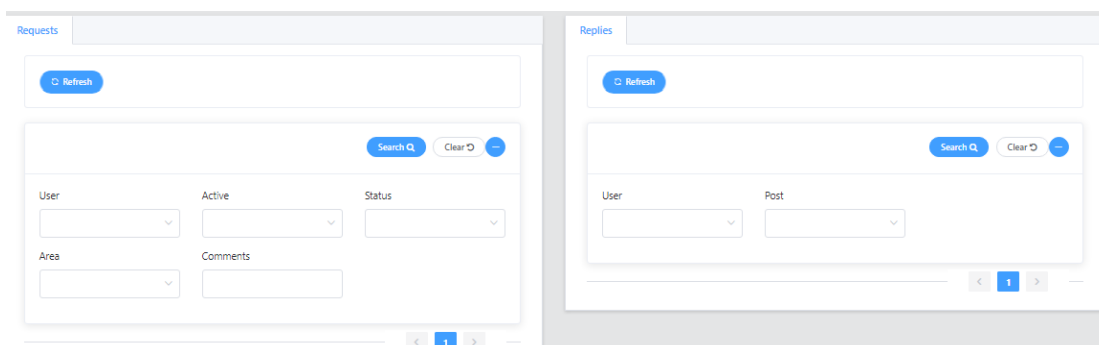

Forum section is a space where you can address your issues – questions either to the public or peer-to-peer (private).

Click the option my posts in order to see all your posts. At the left side of the page you will find your requests and at the left side you can find the replies on your requests.

You can **search** for a request or reply by clicking on search and using filters.

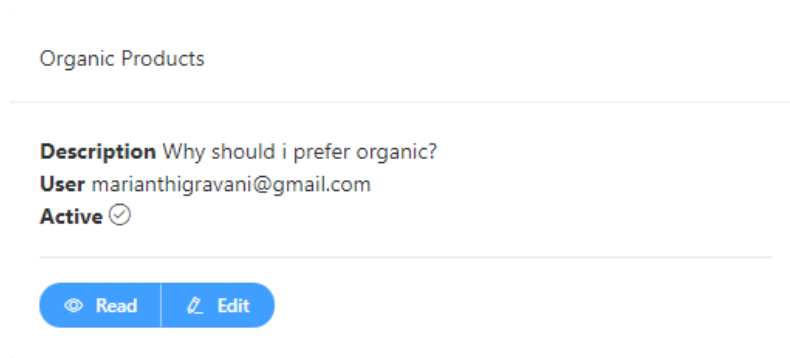

In order to add a new request click on the option create.

For a **public request**, fill in all the blanks, check the field is public and then click **add new**.

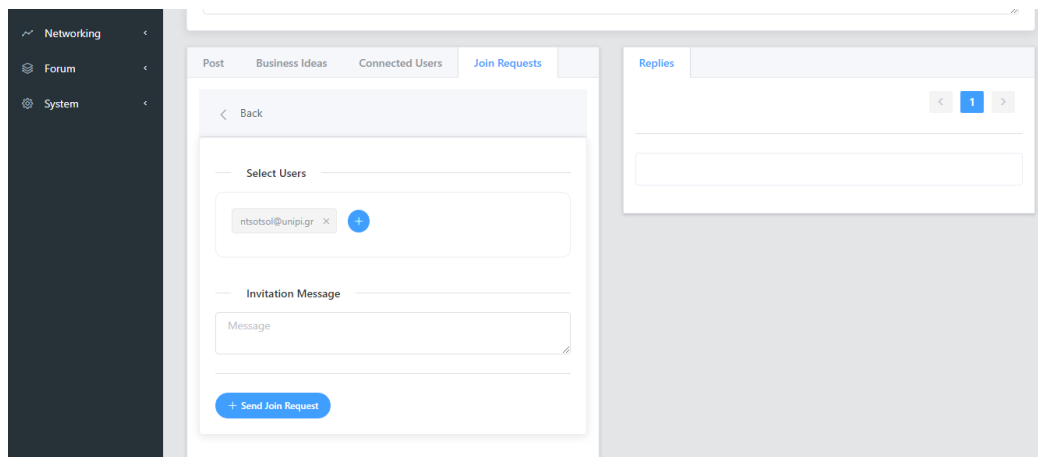

If everything is OK you can find your request where you can read it or edit it.

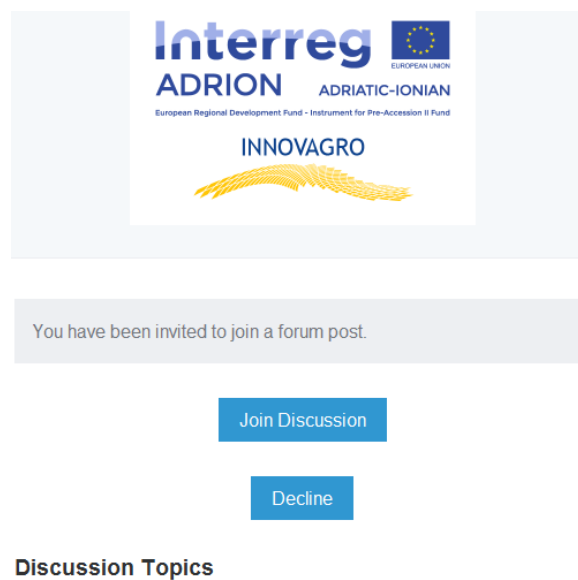

For a peer-to-peer request click **read** at the uploaded post , then select the field **join requests**, click the sign “+” and add the contact you prefer to share the post.

NOTE: Only mentor member are able to be invited to join a request.

When you are ready click the **send join request** button. At this stage you should wait your request be accepted from the other part.

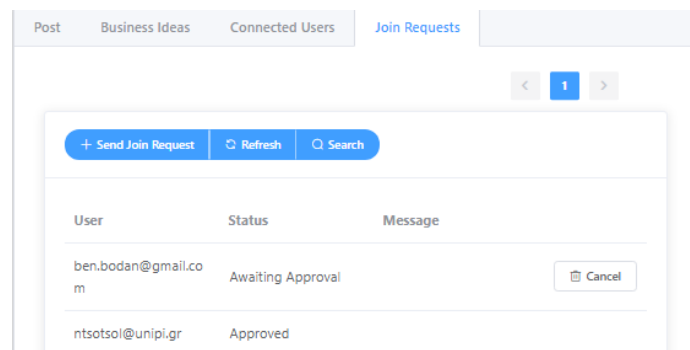

An email is delivered by the other part in order to decide if he wants to join the request or not.

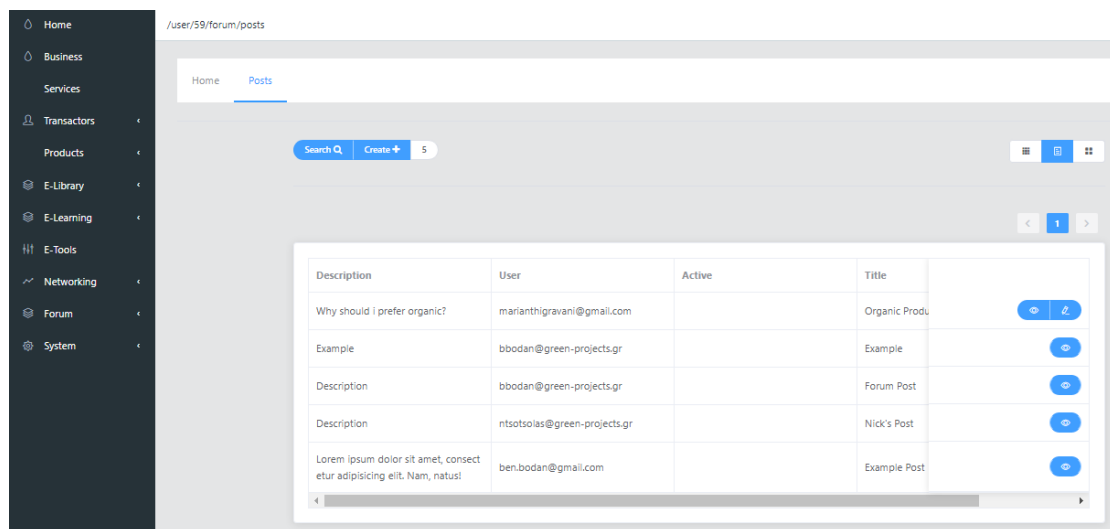

When users approve your invitation, you will receive the following email.

But you have, also, the ability to see any whether your join requests are approved or not.

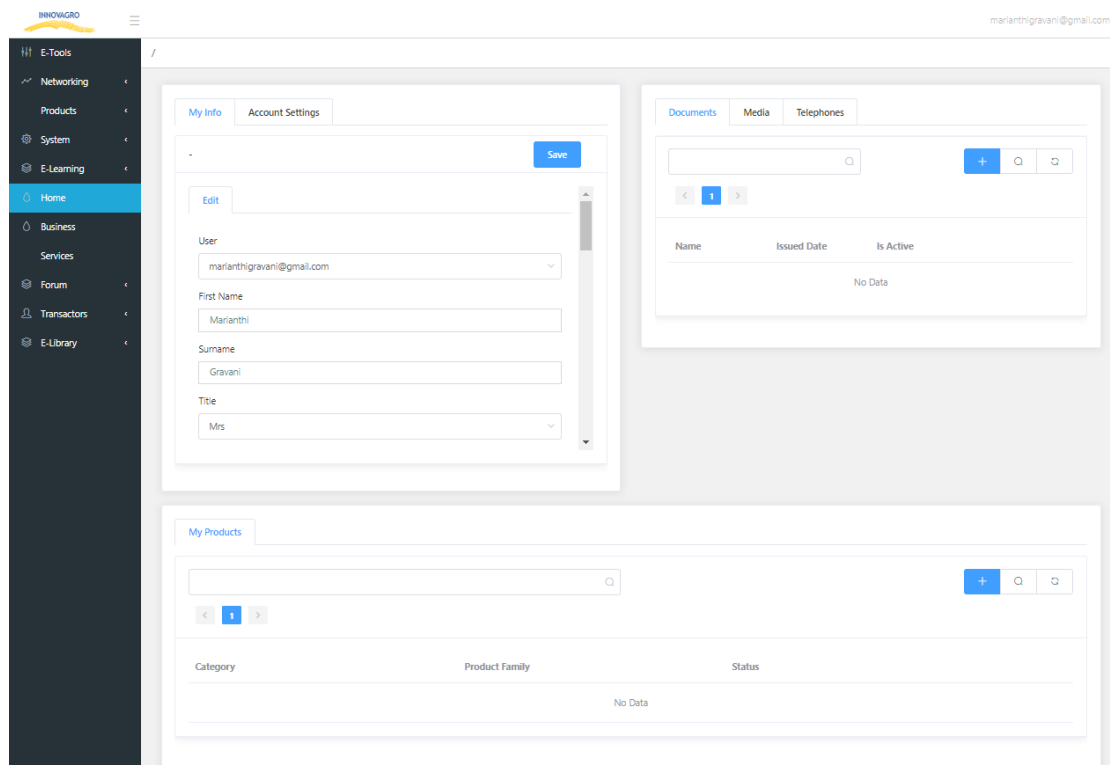

By clicking **posts** a list with all the public posts and all the posts you have created, will open. There you have the ability to read public posts and edit or delete your posts

5.3 For the Administrator

5.3.1 Home page

From the home page admin is able to edit his personal info's. At the right of the page he can find or add files like documents, media or telephones. At the bottom of the page he can find his products or add new.

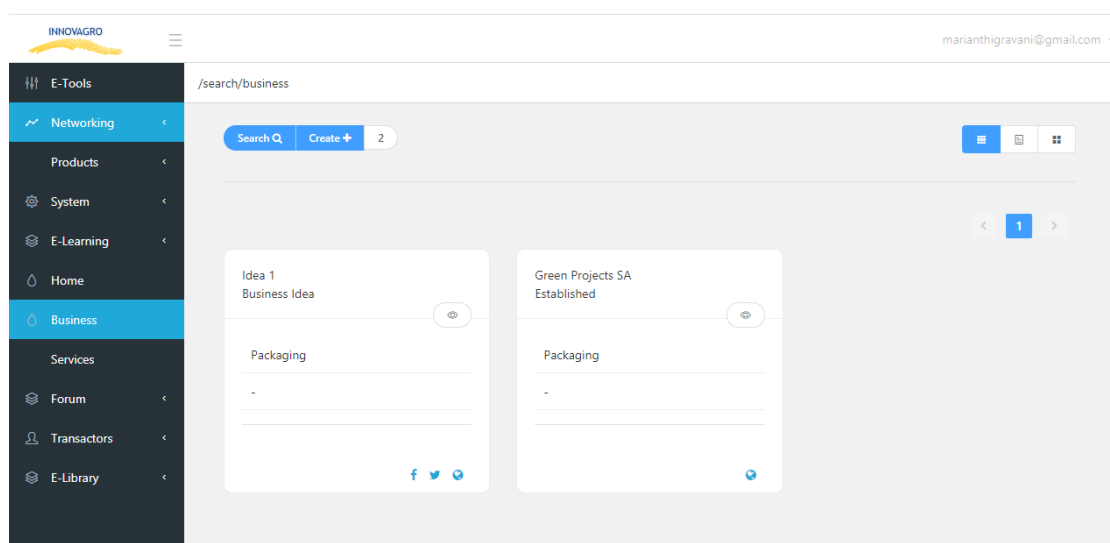

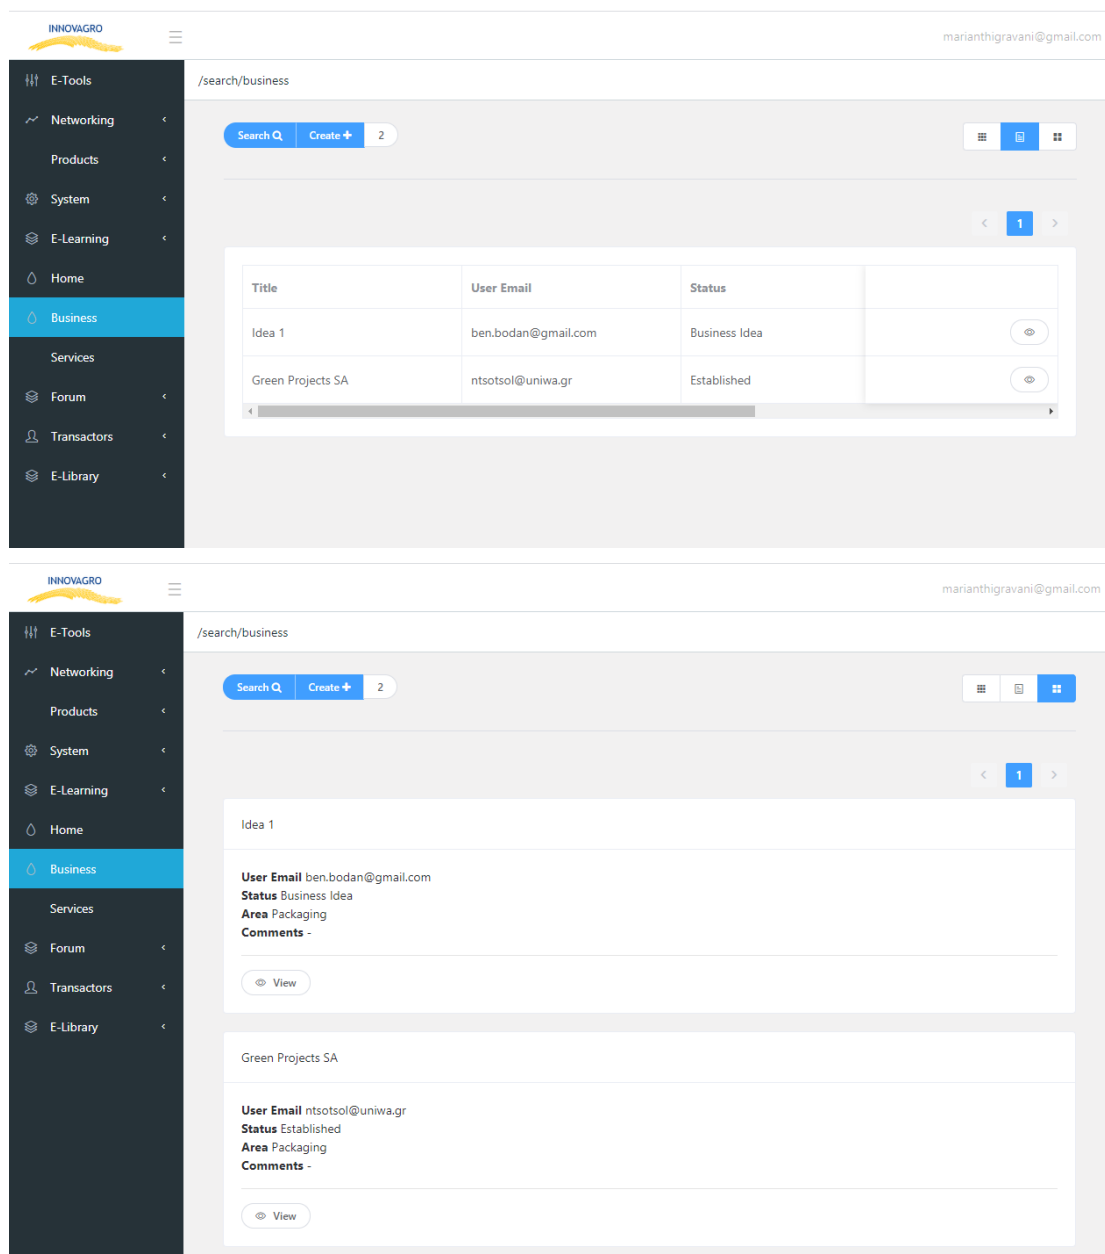

5.3.2 Business

The option **business** is a section where you can find all the uploaded business ideas or to create a new business idea.

From the option business you will be able to:

- See all business ideas. You can change the menu format from the three options on the top of the page at your right.

The top screenshot shows the INNOVAGRO web application interface. The left sidebar contains a menu with options: E-Tools, Networking, Products, System, E-Learning, Home, Business (highlighted), Services, Forum, Transactors, and E-Library. The main content area displays a search results page for "/search/business". At the top, there are buttons for "Search Q" and "Create +" with a count of "2". Below this, a table lists the search results:

Title	User Email	Status
Idea 1	ben.bodan@gmail.com	Business Idea
Green Projects SA	ntsotsol@uniwa.gr	Established

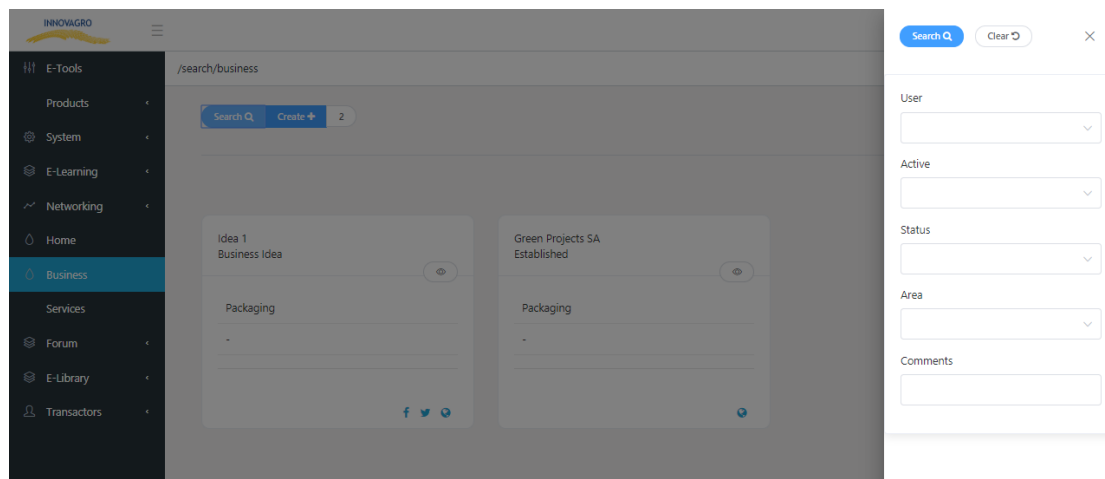

The bottom screenshot shows the same interface, but with the search results expanded into a detailed view. For each idea, the details are as follows:

- Idea 1:**
 - User Email: ben.bodan@gmail.com
 - Status: Business Idea
 - Area: Packaging
 - Comments: -
 - View button
- Green Projects SA:**
 - User Email: ntsotsol@uniwa.gr
 - Status: Established
 - Area: Packaging
 - Comments: -

5.3.3 Services

The option **services** is a section where you can find services you provide as a business plan member. From the option services you will be able to:

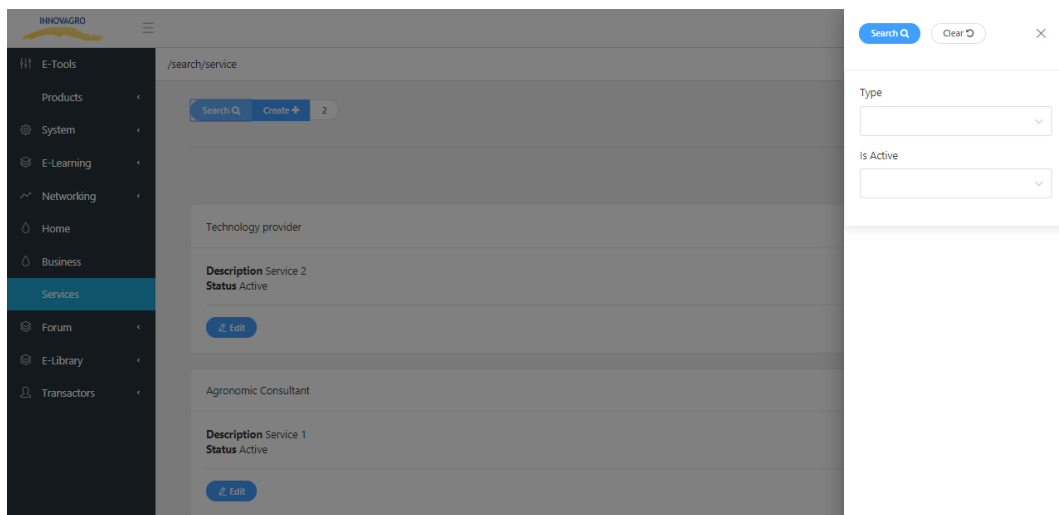

- See all your services. You can also change the menu format from the three options on the top of the page at your right.

- Search or create new services

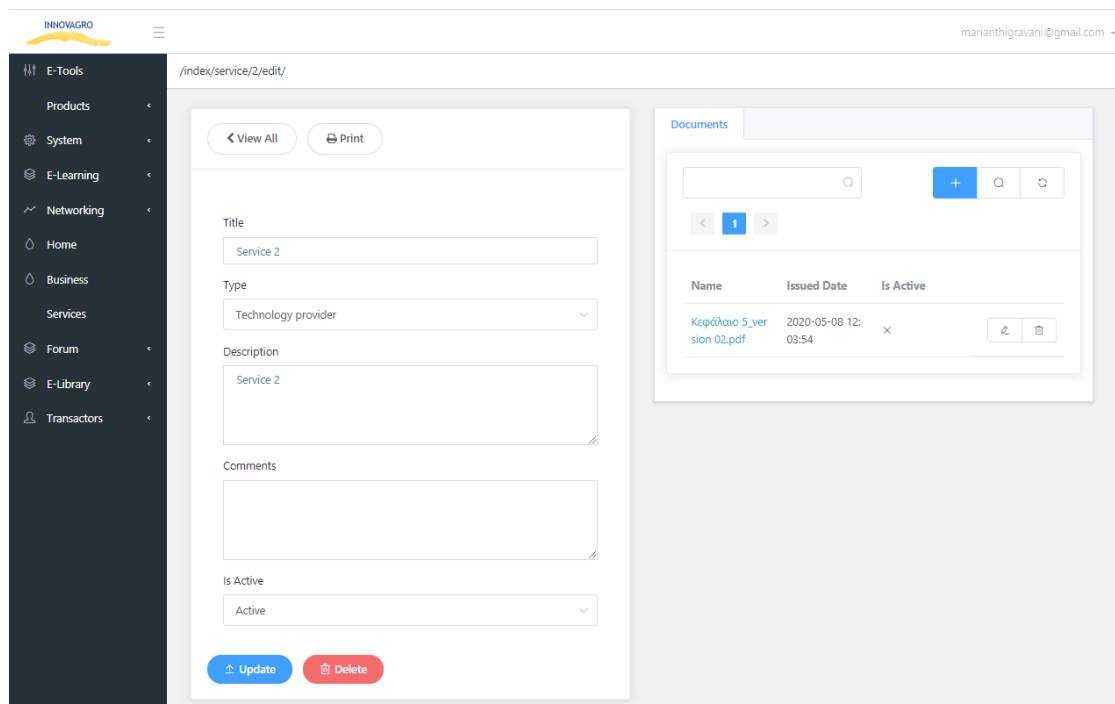

When you click **search** a bar is open at the right of the page, where you can search an uploaded business idea with these filters.

In order to **create** a new service fill in the following blanks and click **add new**. You are, also, able to print it.

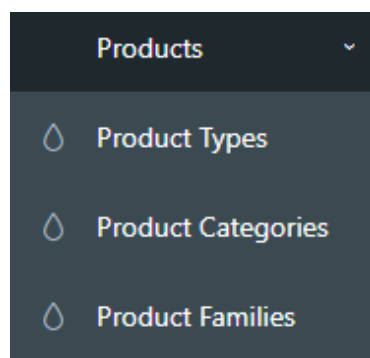

A screenshot of the INNOVAGRO application interface showing the form to create a new service. The sidebar menu is the same as in the previous screenshot. The main content area shows the form with fields for 'Title', 'Type', 'Description', 'Comments', and 'Is Active'. There are 'View All' and 'Print' buttons at the top of the form, and an 'Add New' button at the bottom. The user's email 'marianthigravani@gmail.com' is visible in the top right corner.

Edit info's of services or add new documents. (Follow the steps described in 5.1.3)

5.3.4 Products

When you click the option **products** a list will open.

Product types

- i. If you click on **product types** a menu will appear (choose the menu format). The option products types are consisted by the general category of all uploaded products (for example fruits, vegetables etc.).

To **create** a new topic you should fill the following blanks and click **add new**. You can, also, print it.

iii. Have an overview of the content by clicking **view**.

Here you can read the whole topic, take a test and also you are able to find and edit the connected documents, links and questions.

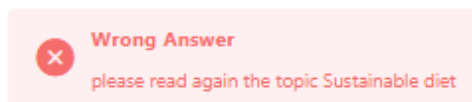

Name	Issued Date	Is Active
50_Agrofood and tourism.docx	2020-05-08 12:37:47	✓

iv. You can click the option **take a test** and redirect to the corresponding page.

Here is a test relative with the topic. When you click **take test** some multiple choices question will appear. You should answer them and click check answers.

If your answer is wrong a message this message will appear:

Or else the answer will be green.

After the end of the test, you can click **search topics** and go back in to the main menu

Or choose read topic and go back at the overview of the topic.

Q&A

From this menu you can find all the questions and all the answers.

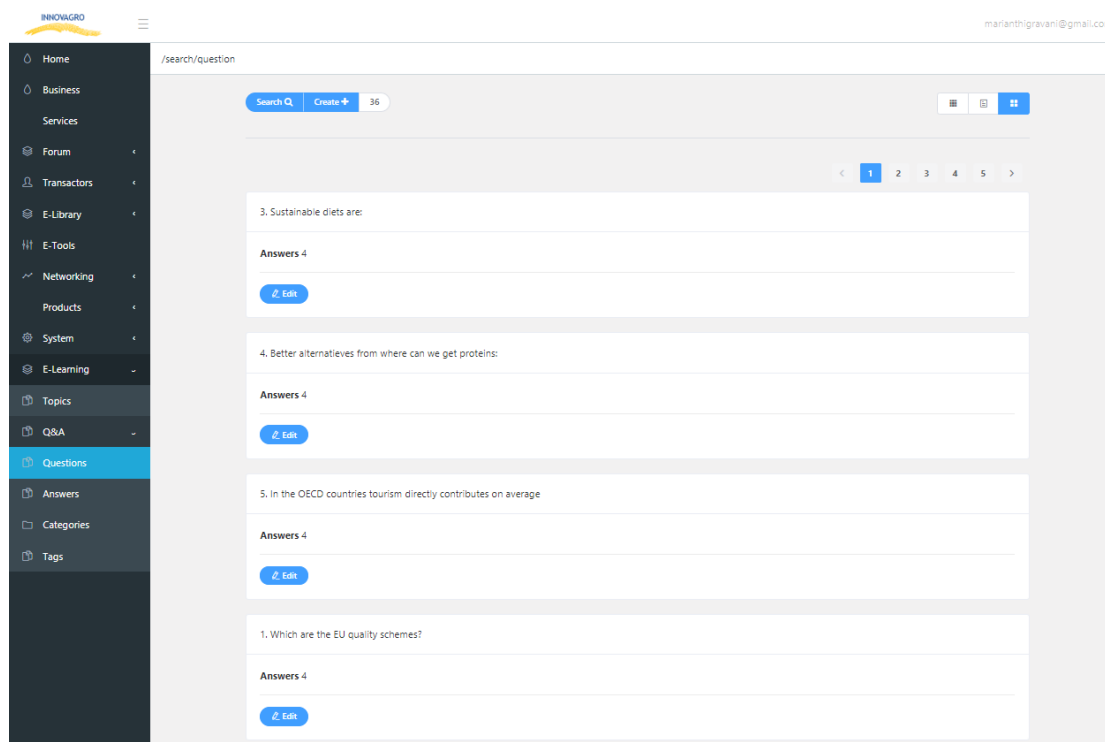

- i. Click on the option Q & A and a menu will appear (choose the menu format).

The screenshot displays the INNOVAGRO Q&A interface. On the left is a dark sidebar with navigation links: Home, Business, Services, Forum, Transactors, E-Library, E-Tools, Networking, Products, System, E-Learning, Topics, Q&A, Questions, Answers, Categories, and Tags. The 'Questions' link is highlighted. The main content area is titled '/search/question' and features a search bar with 'Search Q', a 'Create +' button, and a count of '36'. Below the search bar is a grid of question cards. Each card contains a question, the number of answers (4), and an 'Edit' button. The questions are:

- 3. Sustainable diets are:
- 4. Better alternatives from where can we get proteins:
- 5. In the OECD countries tourism directly contributes on average
- 1. Which are the EU quality schemes?
- 2. Harvard University's 'healthy eating plate' guide recommends
- 4. The highest proportions of young people (below 40 years old) in the agricultural labour force were reported in
- 5. The largest indoor farm in Europe is in:
- 6. How much soil is produced each year from natural soil forming processes

The screenshot displays the INNOVAGRO Q&A interface with a table view. The table has three columns: 'Title', 'Answers', and 'Edit'. The 'Edit' column contains blue buttons with a pencil icon and the word 'Edit'. The data rows are as follows:

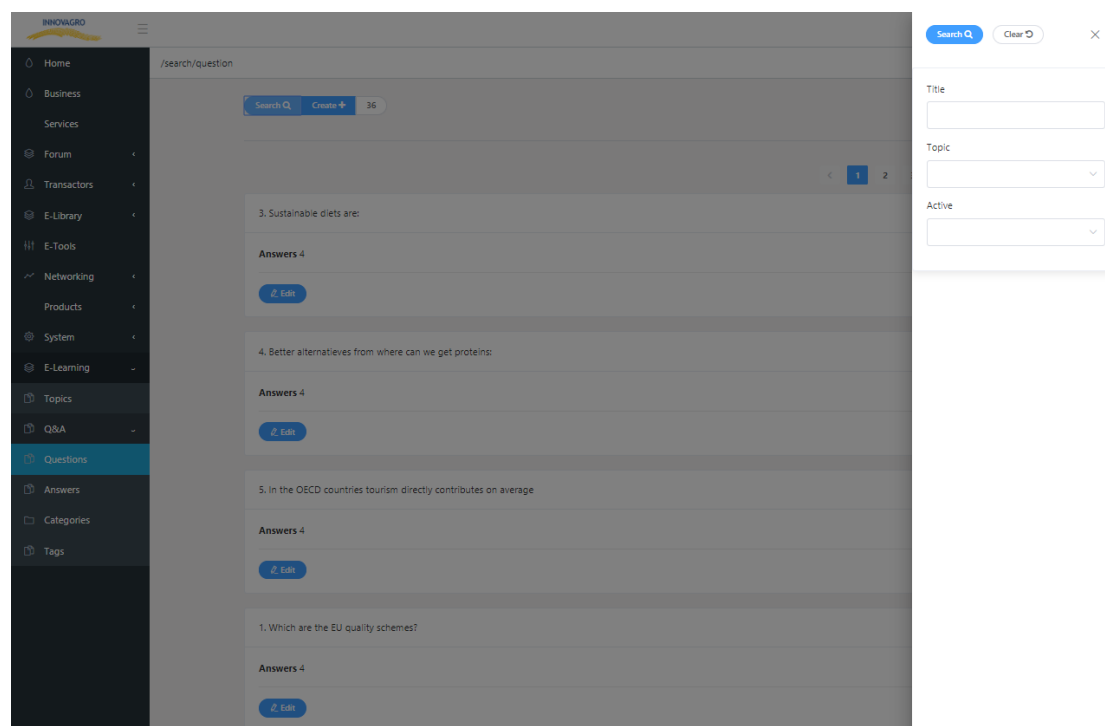

Title	Answers	Edit
3. Sustainable diets are:	4	Edit
4. Better alternatives from where can we get proteins:	4	Edit
5. In the OECD countries tourism directly contributes on average	4	Edit
1. Which are the EU quality schemes?	4	Edit

ii. Search or create new tag

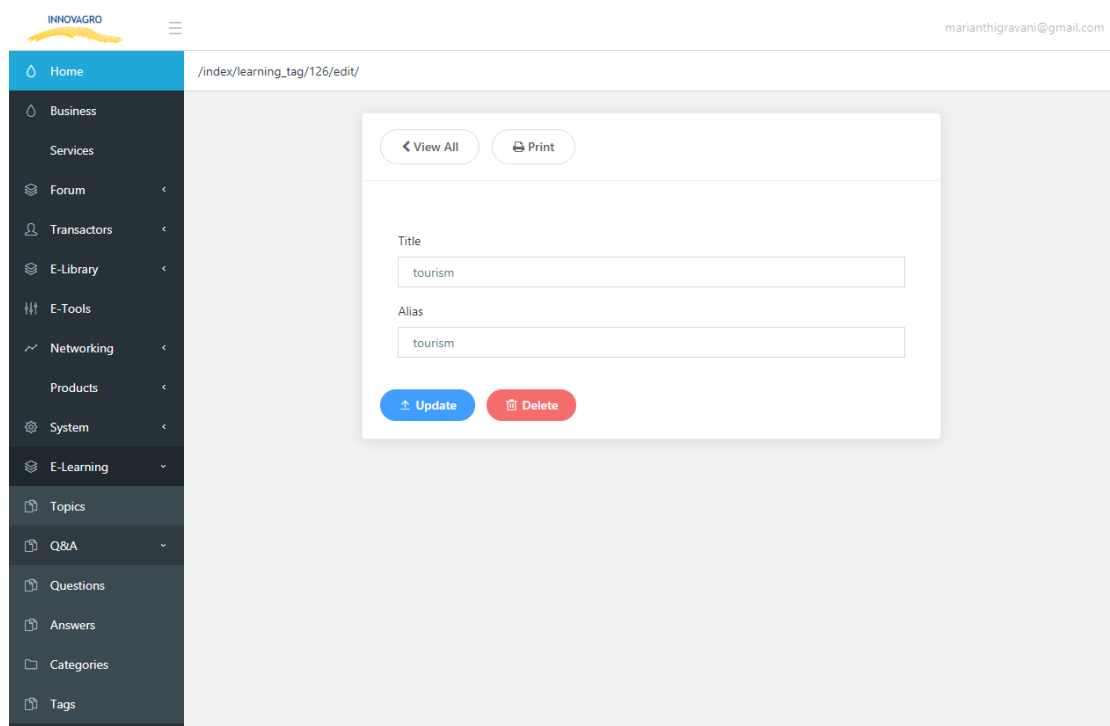

When you click **search** a bar is open at the right of the page, where you can search a tag.

To **create** a new tag you should fill out the following blanks and click **add new**. You can, also, print it.

iii. To edit a tag click the option **edit** and the following page will appear.

5.3.6 E-library

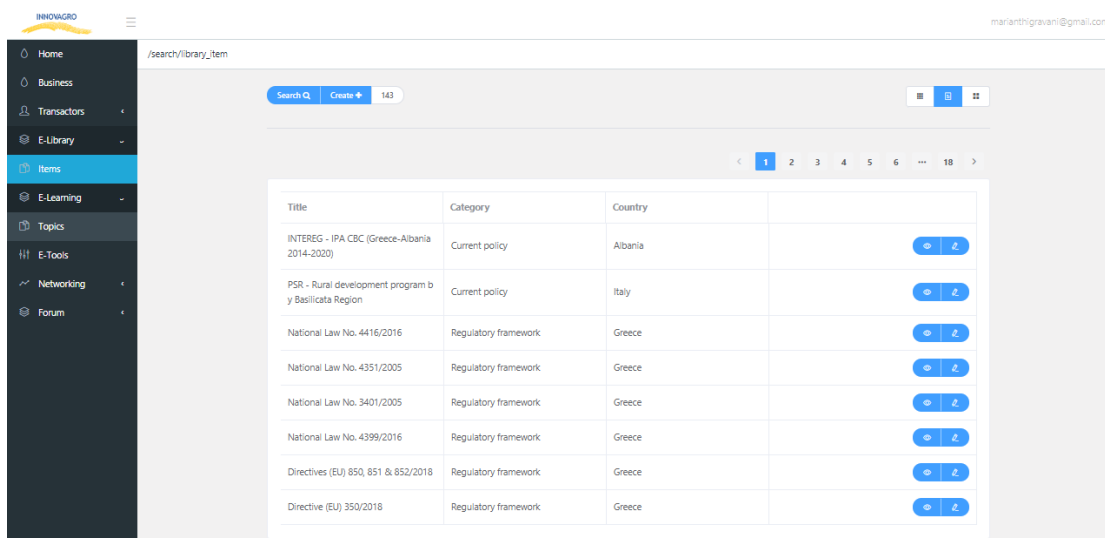

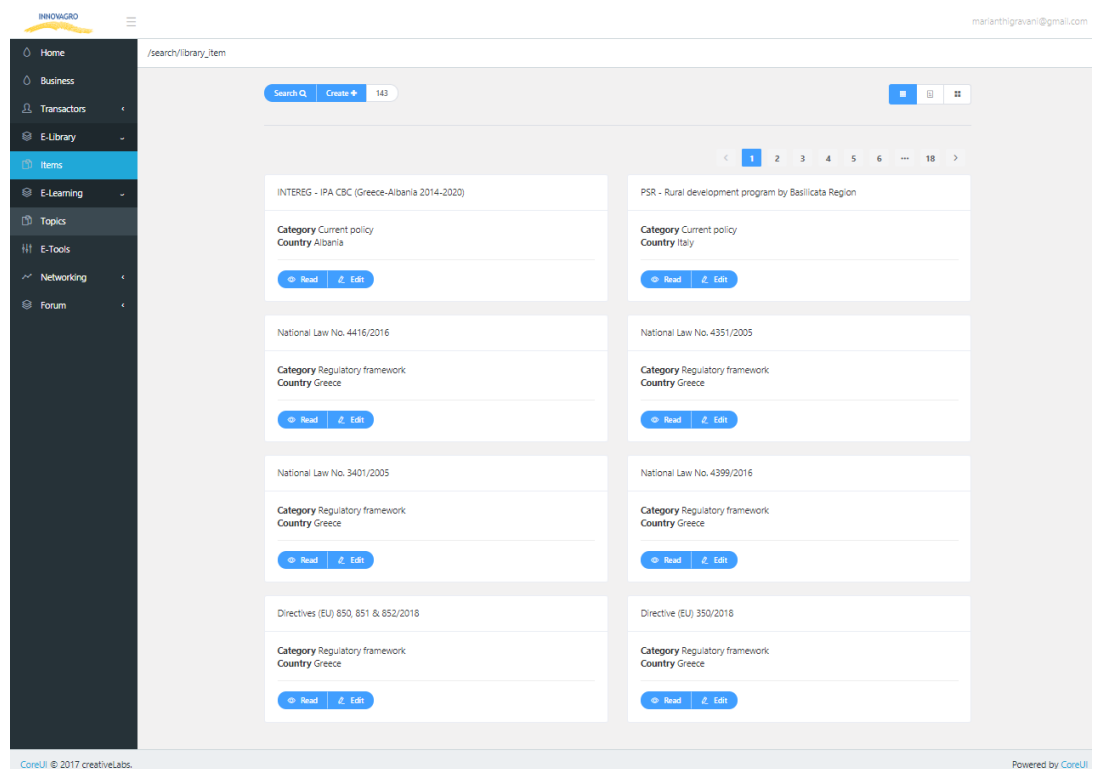

The option **e-Library** is a section which contains information for transactors, such as laws, regulations and operations among different countries.

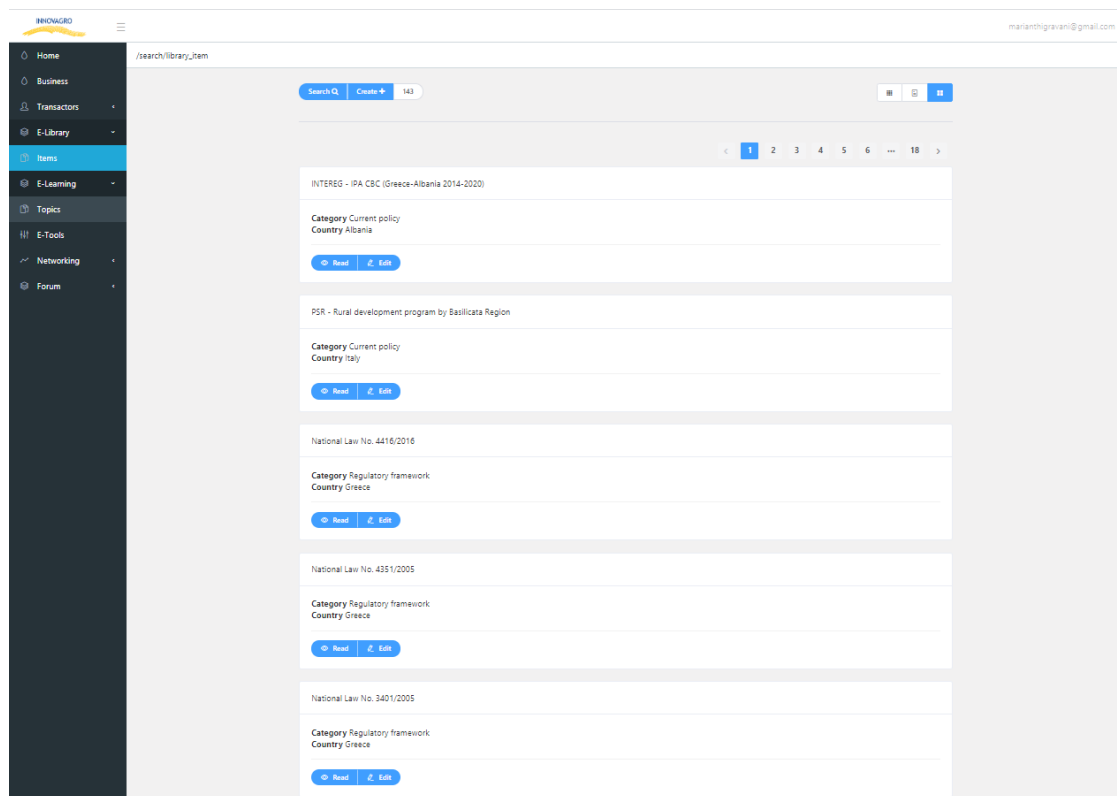

i. When you click the option **e-library** a list will open.

Items

Click on the option **items** and a menu will appear (choose the menu format)

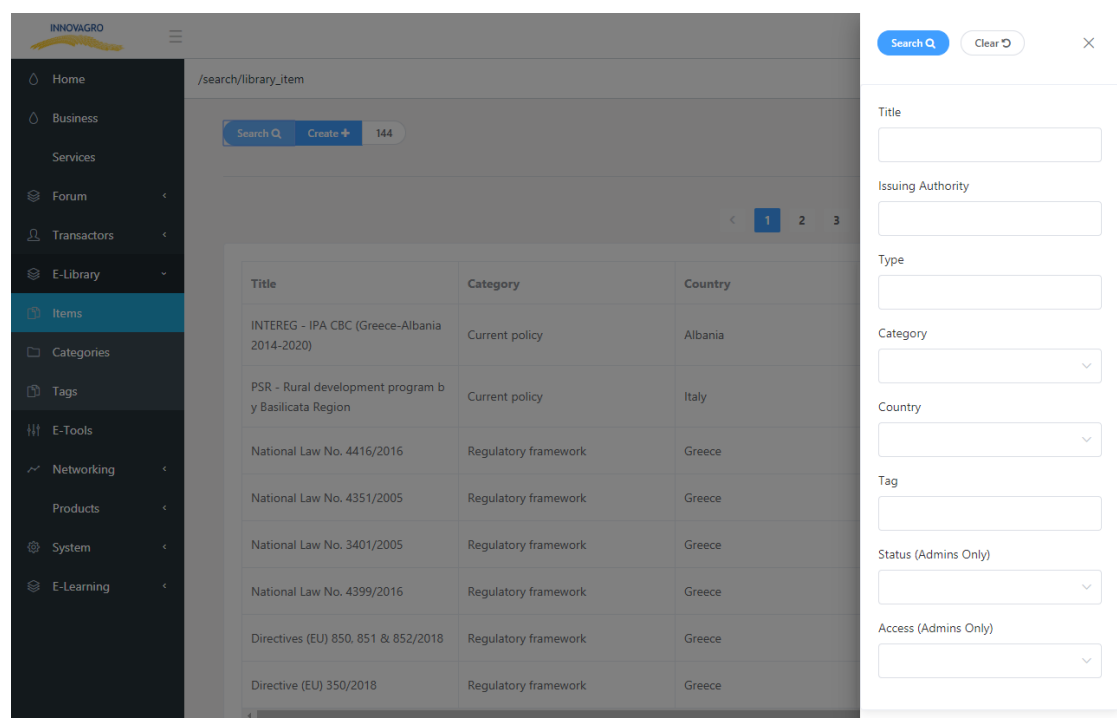

ii. Search or create new item.

When you click **search** a bar is open at the right of the page, where you can search an item.

To **create** a new item you should fill in the following blanks and click **add new**. You can, also, print it.

The screenshot shows the 'Add New' form in the Jodel Library Admin interface. The form is titled 'Add New' and has a 'Print' button at the bottom left. The form fields are as follows:

- Image:** A field with a 'Choose a File' button and a 'Remove' button.
- Title:** A text input field.
- Alias:** A text input field.
- Meeting Authority:** A text input field.
- Type:** A text input field.
- Status:** A text input field.
- Category:** A dropdown menu.
- Country:** A dropdown menu.
- Partner:** A dropdown menu.
- Address:** A dropdown menu.
- Tags:** A dropdown menu.
- Short Description:** A rich text editor with a toolbar and a 'View Source' button.
- Description:** A rich text editor with a toolbar and a 'View Source' button.
- Owner (Email Address Only):** A text input field.

You can have an overview of the content by clicking **read**, and you can edit it by clicking on the **edit**.

The screenshot shows the 'Read' view of an item in the Jodel Library Admin interface. The item title is 'INTEREG - IPA CBC (Greece-Albania 2014-2020)'. The owner is 'ben.bodan@gmail.com' and the alias is 'intereg-ipa_cbc_(greece-albania_2014-2020)'. At the bottom are 'Read' and 'Edit' buttons.

When you click **Read** a preview of the content will appear and you will be able to find or to upload documents and links relative to the item.

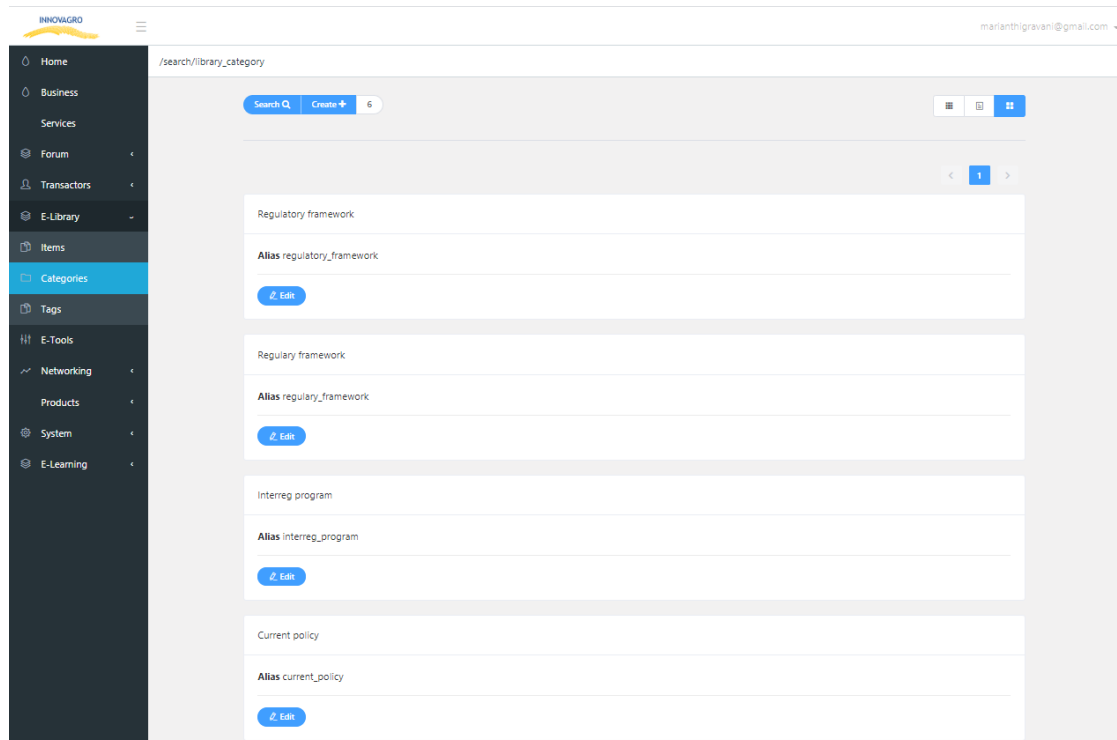

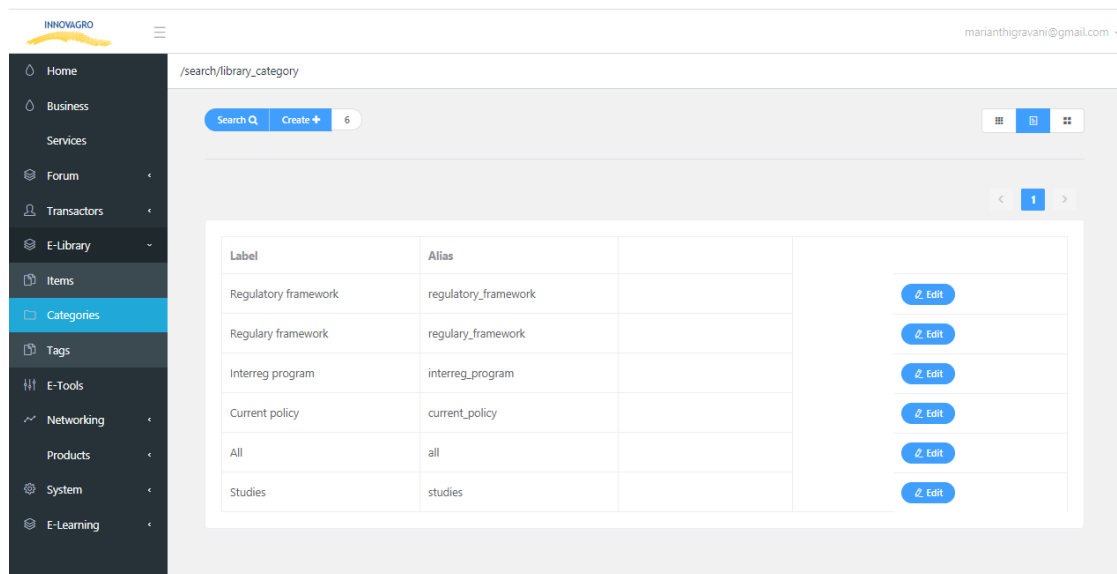

The screenshot shows the INNOVAGRO E-Library interface. On the left is a dark sidebar with navigation options: Home, Business, Services, Forum, Transactors, E-Library (selected), Items, Categories, Tags, E-Tools, Networking, Products, System, and E-Learning. The main content area displays the details of a selected item: 'INTEREG - IPA CBC (Greece-Albania 2014-2020)'. The category is 'Current policy' and the country is 'Albania'. The short description mentions a new crossborder 'Interreg IPA' programme. The description provides a detailed overview of the programme's goals, funding (€42 million from the EU and €36 million from the IPA), and focus areas like environmental protection, sustainable transport, and local economy development. On the right, there are tabs for 'Documents' and 'Links', both showing 'No Data'.

If you click edit you will be able to edit the info's of the item and add new documents or links (see section 5.1.3).

Categories

- i. Click on the option categories and a menu will appear (choose the menu format).

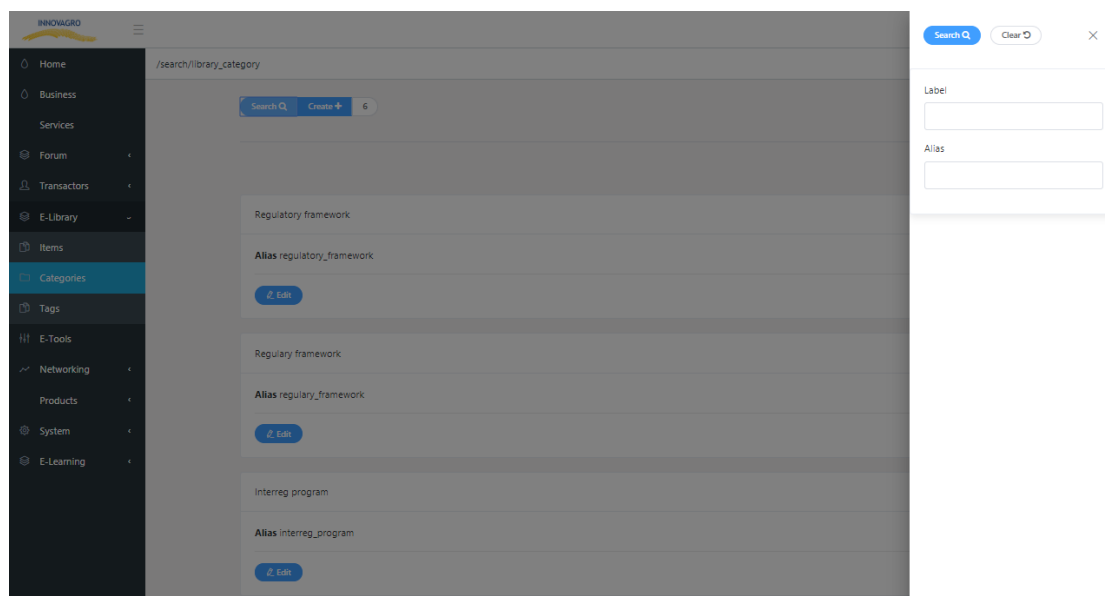

The screenshot shows the 'Categories' page in the INNOVAGRO E-Library. The sidebar is the same as in the previous screenshot, with 'Categories' highlighted. The main content area has a search bar and a 'Create' button. Below, there is a grid of category cards. Each card displays the category name, an alias, and an 'Edit' button. The categories shown are: 'Regulatory framework' (alias: regulatory_framework), 'Interreg program' (alias: interreg_program), 'All' (alias: all), 'Regular framework' (alias: regular_framework), 'Current policy' (alias: current_policy), and 'Studies' (alias: studies).

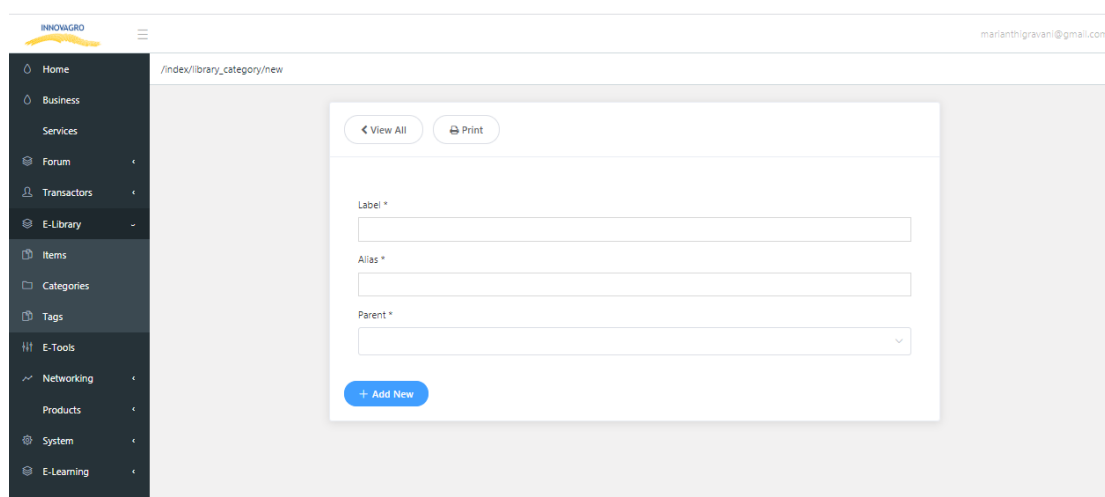

ii. Search or create new category

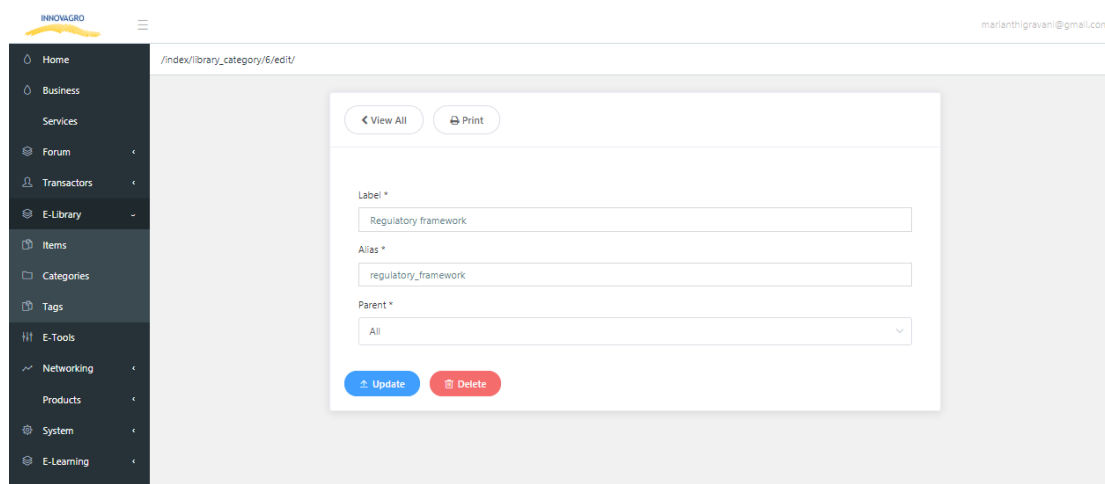

When you click **search** a bar is open at the right of the page, where you can search a category.

To **create** a new category you should fill out the following blanks and click **add new**. You can, also, print it.

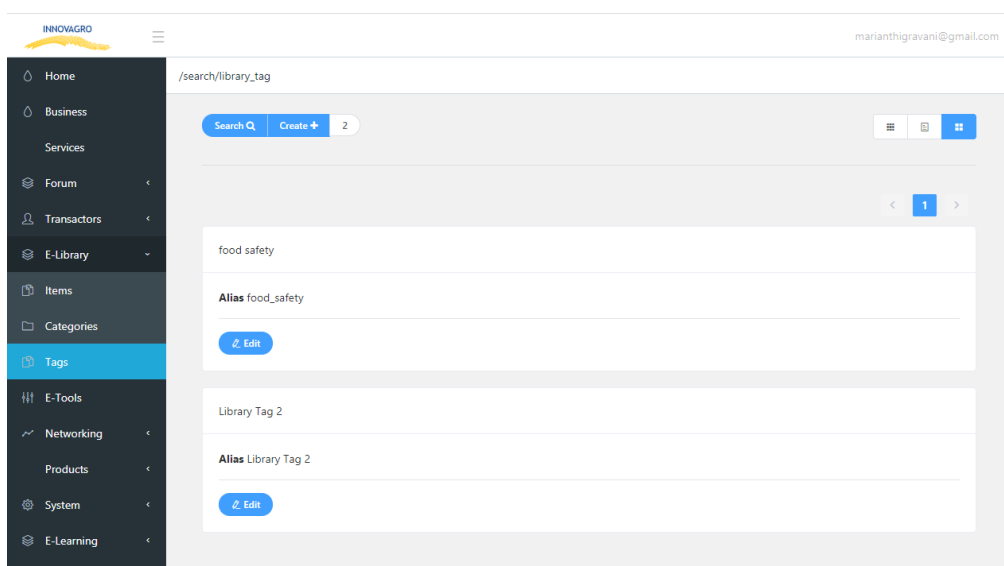

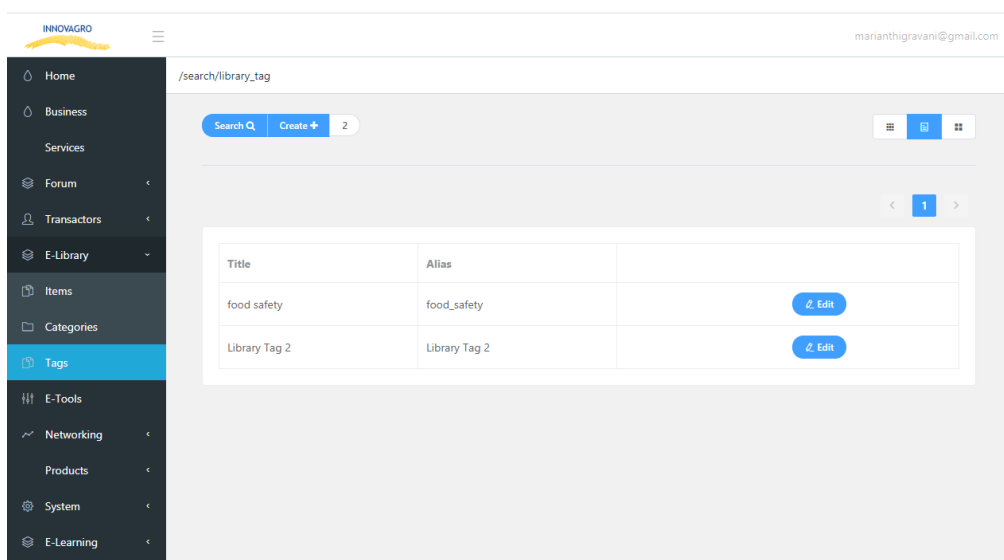

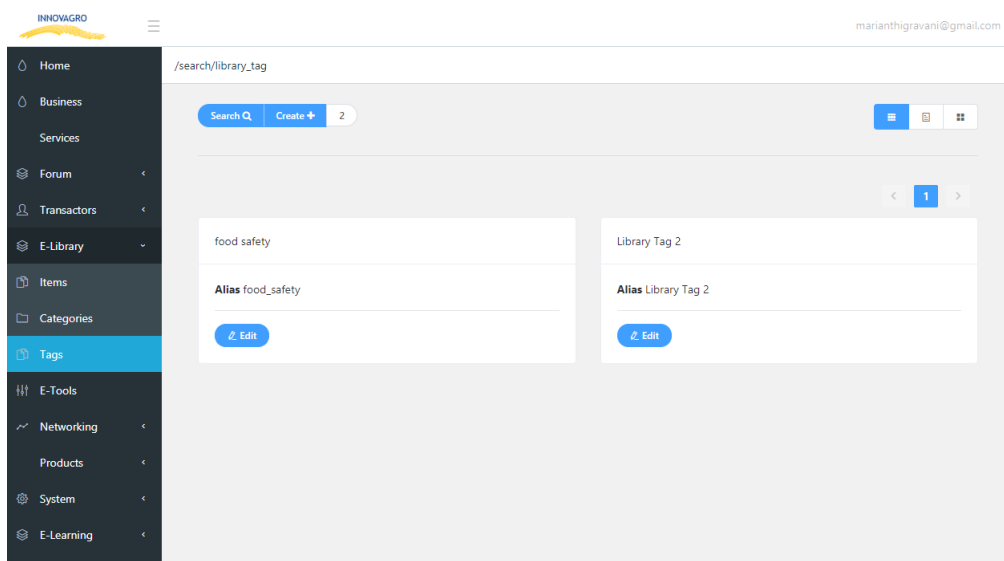

iii. To edit a category click the option **edit** and the following page will appear.

5.3.8 Networking

Networking section will give you the option to find a list of operators related with agro-food industry. When you click the option **networking** a list will open.

Networking members

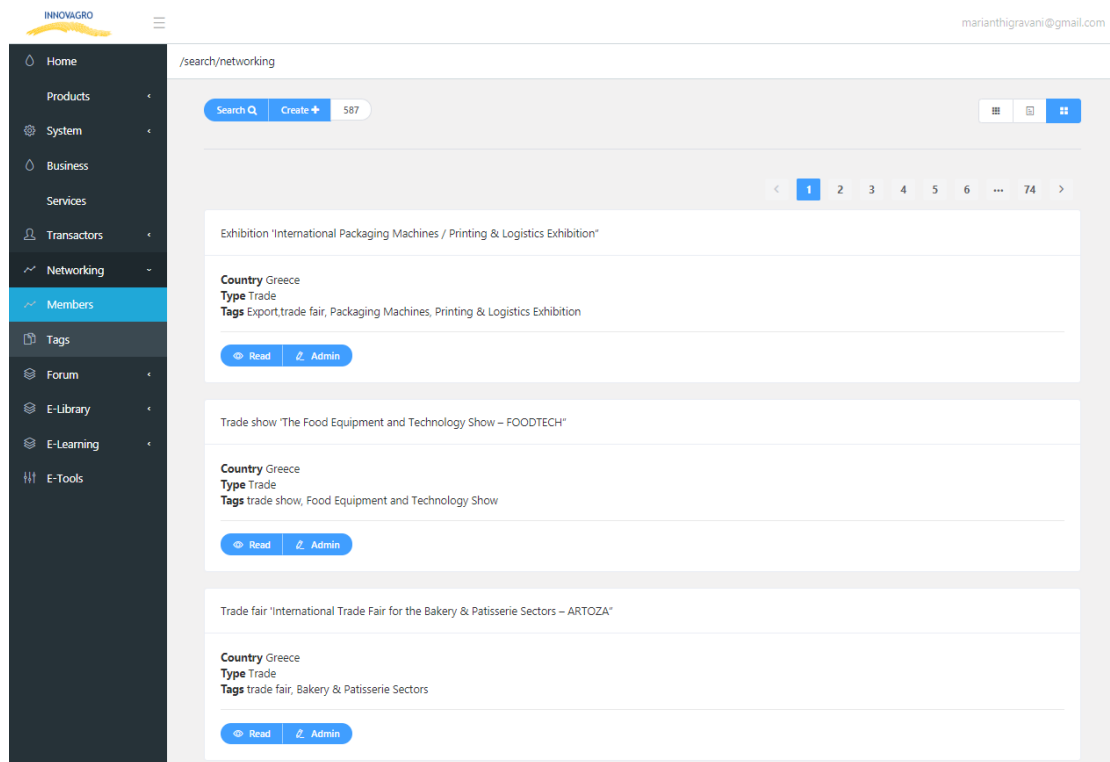

- i. Click on the option members and a menu will appear (choose the menu format)

The screenshot displays the INNOVAGRO web application interface. On the left is a dark sidebar with navigation links: Home, Products, System, Business, Services, Transactors, Networking, Members (highlighted), Tags, Forum, E-Library, E-Learning, and E-Tools. The main content area is titled "/search/networking" and features a search bar with "Search Q" and "Create + 587" buttons. Below the search bar is a grid of six event cards. Each card displays the event title, country (Greece), type (Trade), and tags. At the bottom of each card are "Read" and "Admin" buttons. The events listed are: 1. Exhibition 'International Packaging Machines / Printing & Logistics Exhibition', 2. Trade show 'The Food Equipment and Technology Show – FOODTECH', 3. Trade fair 'International Trade Fair for the Bakery & Patisserie Sectors – ARTOZA', 4. Trade fair 'Supply Chain & Logistics', 5. Trade Fair 'Vegetables, Fruits & Herbs Exhibition – AGROLAND', and 6. Trade show 'Bio-Festival'.

Title	Country	Type	Tags
Exhibition 'International Packaging Machines / Printing & Logistics Exhibition'	Greece	Trade	Export, trade fair, Packaging Machines, Printing & Logistics Exhibition
Trade show 'The Food Equipment and Technology Show – FOODTECH'	Greece	Trade	trade show, Food Equipment and Technology Show
Trade fair 'International Trade Fair for the Bakery & Patisserie Sectors – ARTOZA'	Greece	Trade	trade fair, Bakery & Patisserie Sectors
Trade fair 'Supply Chain & Logistics'	Greece	Trade	trade fair, export trade, supply chain and logistics
Trade Fair 'Vegetables, Fruits & Herbs Exhibition – AGROLAND'	Greece	Trade	agriculture, trade fair, food exhibition
Trade show 'Bio-Festival'	Greece	Trade	agriculture, trade fair, organic food production

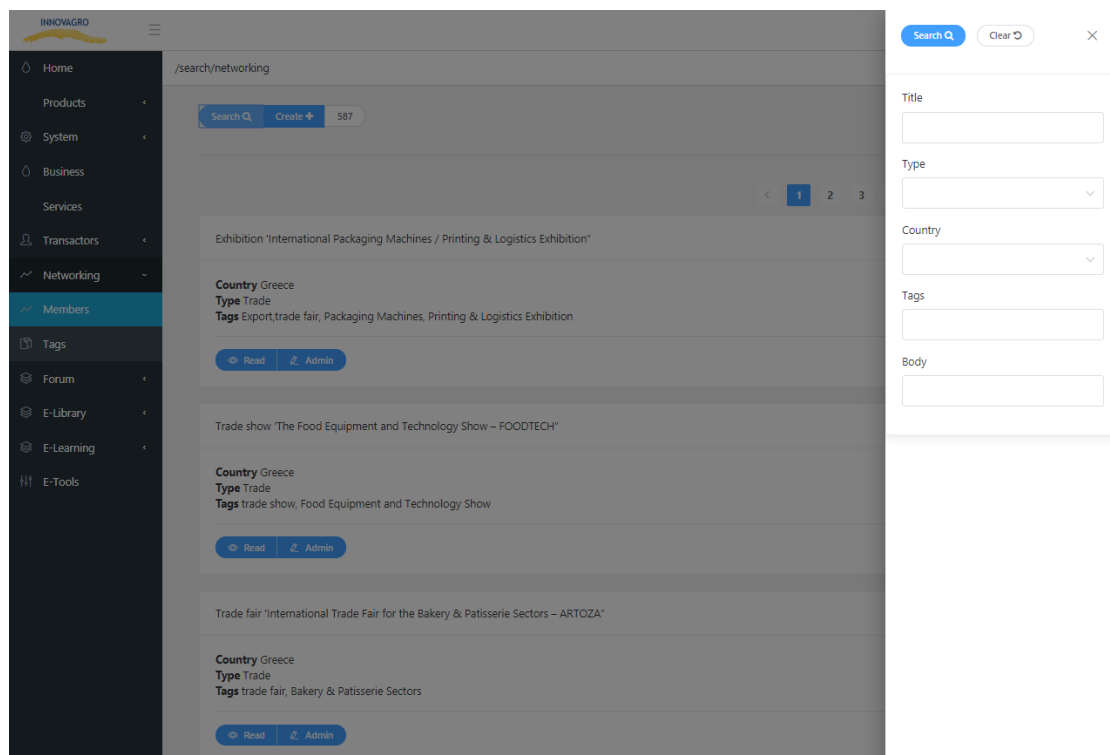

This screenshot shows the same INNOVAGRO interface but with the event data presented in a table view. The sidebar and search bar are identical. The main content area displays a table with columns for Title, Country, Type, and Tags. Each row corresponds to one of the events shown in the grid view above. At the end of each row, there are "Read" and "Admin" buttons. The table lists the following events: 1. Exhibition 'International Packaging Machines / Printing & Logistics Exhibition', 2. Trade show 'The Food Equipment and Technology Show – FOODTECH', 3. Trade fair 'International Trade Fair for the Bakery & Patisserie Sectors – ARTOZA', 4. Trade fair 'Supply Chain & Logistics', 5. Trade Fair 'Vegetables, Fruits & Herbs Exhibition – AGROLAND', 6. Trade show 'Bio-Festival', 7. Trade fair 'Exhibition of Food and Drinks – EXPOTROF', and 8. Trade fair 'FOOD EXPO GREECE / OE NOTELIA'.

Title	Country	Type	Tags
Exhibition 'International Packaging Machines / Printing & Logistics Exhibition'	Greece	Trade	Export, trade fair, Packaging Machines, Printing & Logistics Exhibition
Trade show 'The Food Equipment and Technology Show – FOODTECH'	Greece	Trade	trade show, Food Equipment and Technology Show
Trade fair 'International Trade Fair for the Bakery & Patisserie Sectors – ARTOZA'	Greece	Trade	trade fair, Bakery & Patisserie Sectors
Trade fair 'Supply Chain & Logistics'	Greece	Trade	trade fair, export trade, supply chain and logistics
Trade Fair 'Vegetables, Fruits & Herbs Exhibition – AGROLAND'	Greece	Trade	agriculture, trade fair, food exhibition
Trade show 'Bio-Festival'	Greece	Trade	agriculture, trade fair, organic food production
Trade fair 'Exhibition of Food and Drinks – EXPOTROF'	Greece	Trade	culture, trade fair, food and drink
Trade fair 'FOOD EXPO GREECE / OE NOTELIA'	Greece	Trade	trade fair, food exhibition

ii. Search a networking member

When you click **search** a bar will open at the right of the page, where you can search a networking member.

To **create** a new networking member you should fill out the following blanks and click **add new**. You can, also, print it.

iii. You can choose **read** in order to see a preview of the networking member.

iv. Choose **admin** in order to edit a networking member

marianthigravani@gmail.com	Marianthi	Gravani	6980419910

From each member card you can find personal info's or a short description about the member.

The screenshot shows the profile of Ben Bodan. It includes a header with the name "Ben Bodan" and two tabs: "Info" (selected) and "Description". Under the "Info" tab, there are three rows of information: "Green Projects" with a building icon, the email "bbodan@green-projects.gr" with an envelope icon, and the phone number "6989382681" with a telephone icon.

Ben Bodan

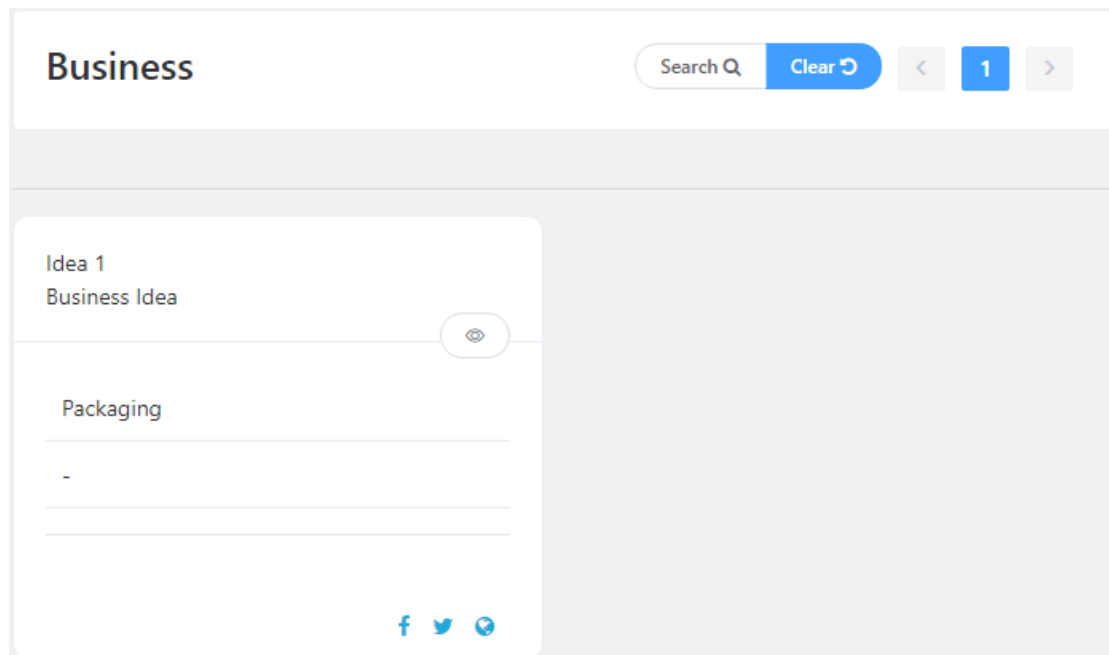

Info **Description**

Green Projects

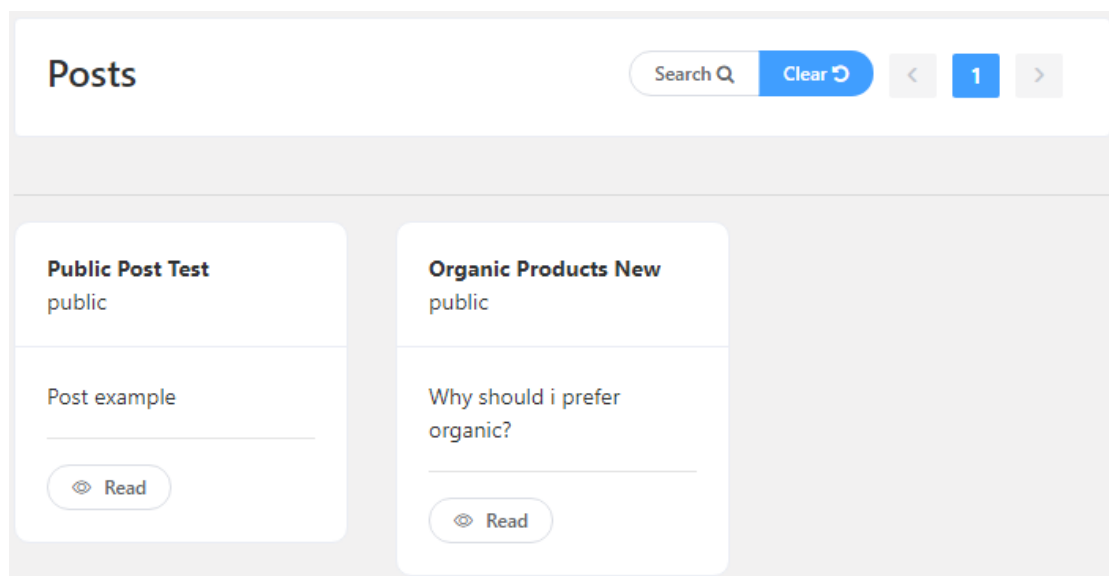

bbodan@green-projects.gr

6989382681

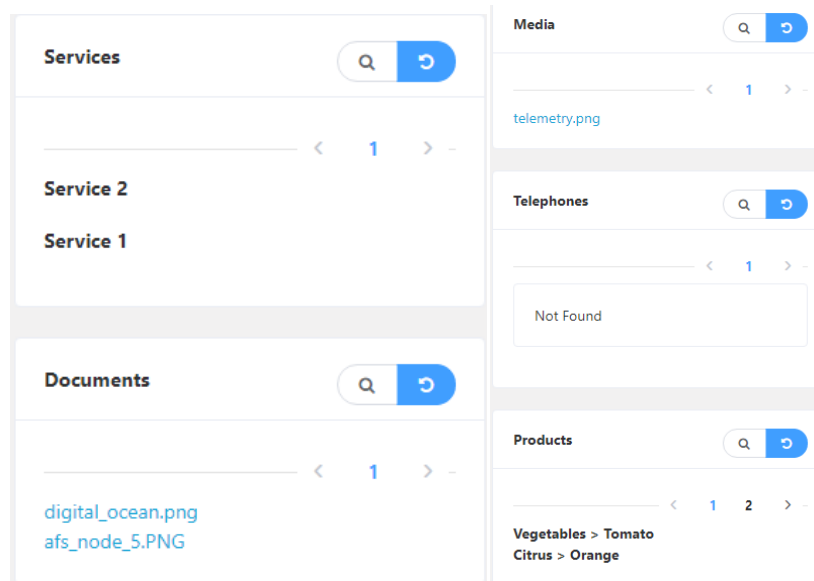

The field business idea draws information from the forum posts. But in this case each member is able to have access only in business ideas where he has been invited through peer-to-peer posts.

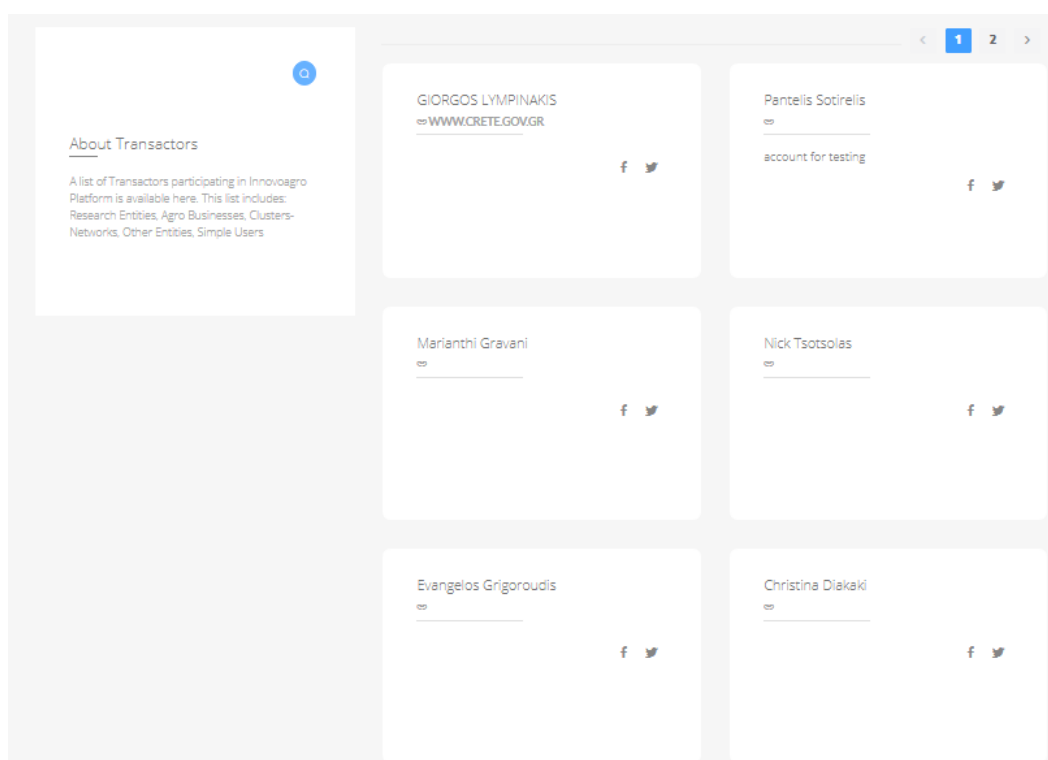

From the field posts you can see member's public posts or private posts where you have been invited.

At the right side of the page you can find member's services, documents, media, telephones and products.

You can also have limited access at this section **without login**. Click the option transactors in order to find members. You will be able to have limited information about each member, more specifically name, facebook, twitter and institute link.

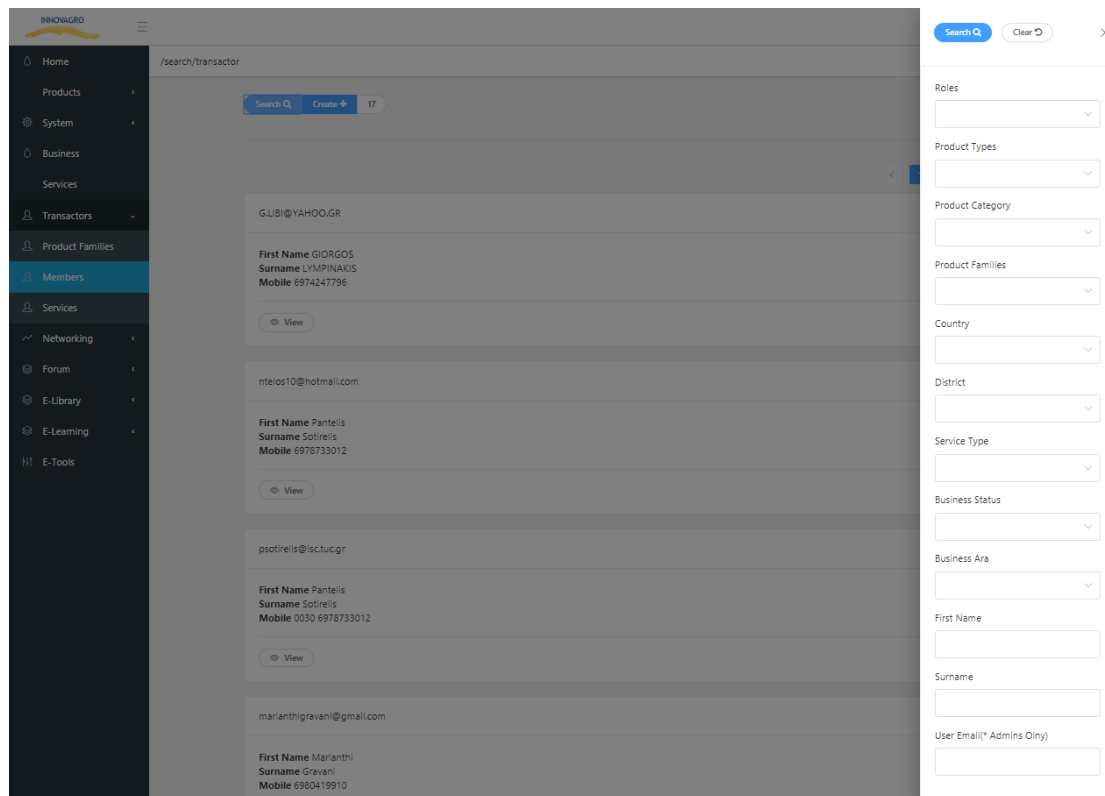

If you want to find more information about a member you would be asked to log in. When you logged in you will automatically be transferred to the membership card.

(*in case you do not redirect automatically you should search the member from the corresponding field, see section 5.1.4)

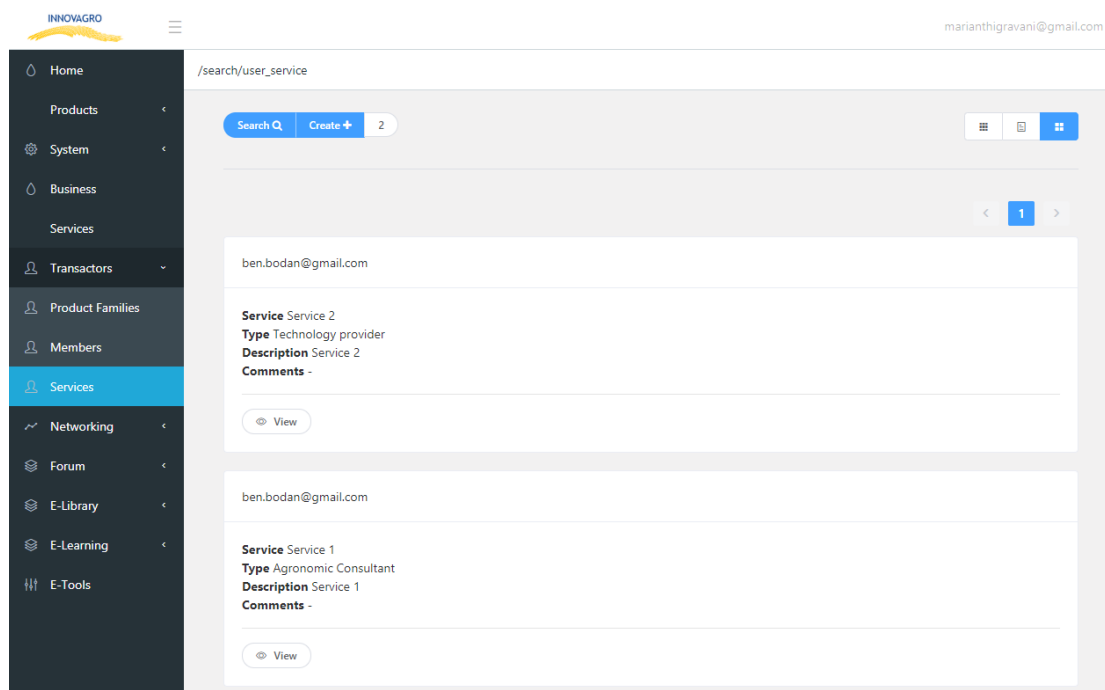

- ii. Search transactor.

When you click **search** a bar will open at the right of the page, where you can search registered members with the use of filters.

Services

- Click on the option services and a menu will appear. (choose the menu format)

The top screenshot shows the search results for user services in a table format. The table has columns for User, Service, and Type. The bottom screenshot shows the same search results in a card format, displaying details for each service.

User	Service	Type
ben.bodan@gmail.com	Service 2	Technology provider
ben.bodan@gmail.com	Service 1	Agronomic Consultant

The bottom screenshot shows the details for each service in a card format:

ben.bodan@gmail.com

Service Service 2
Type Technology provider
Description Service 2
Comments -

[View](#)

ben.bodan@gmail.com

Service Service 1
Type Agronomic Consultant
Description Service 1
Comments -

[View](#)

ii. Search or create service

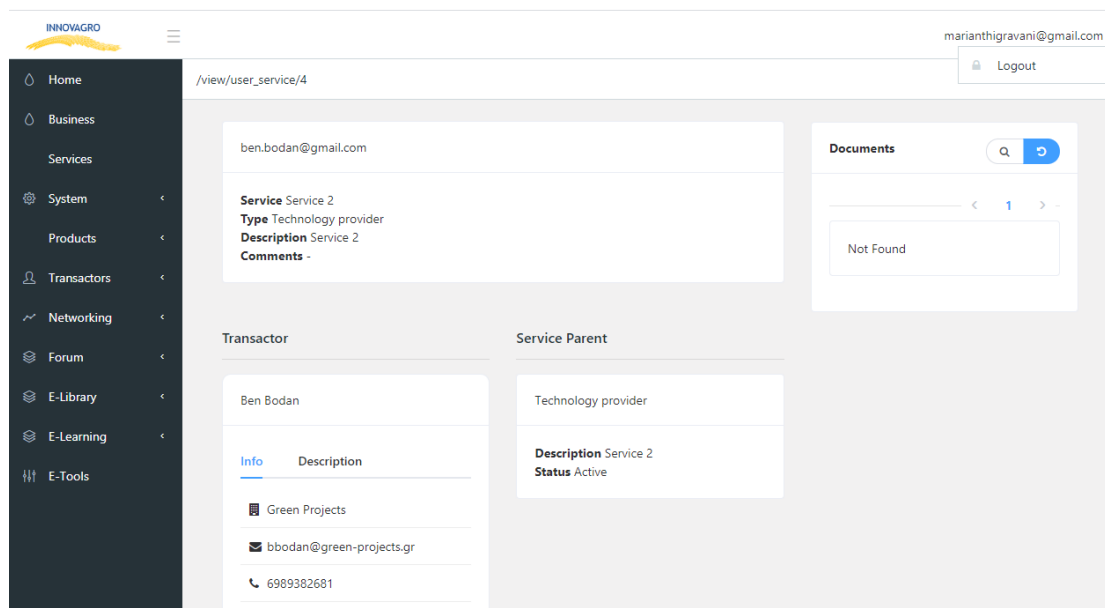

When you click **search** a bar is open at the right of the page, where you can search an uploaded service.

The screenshot shows the INNOVAGRO search interface. On the left is a dark sidebar with navigation links: Home, Products, System, Business, Services, Transactors, Product Families, Members, Services (highlighted), Networking, Forum, E-Library, E-Learning, and E-Tools. The main content area is titled "/search/user_service" and contains a search bar with "Search Q" and "Create + 2" buttons. Below the search bar, there are two service cards for "ben.bodan@gmail.com". The first card is for "Service Service 2" with type "Technology provider" and description "Service 2". The second card is for "Service Service 1" with type "Agronomic Consultant" and description "Service 1". Both cards have a "View" button. On the right side, there is a search filter panel with fields for Title, Type, Description, Comments, Service, and User Email (Admins Only).

To **create** a new service you should fill out the following blanks and click **add new**. You can, also, print it.

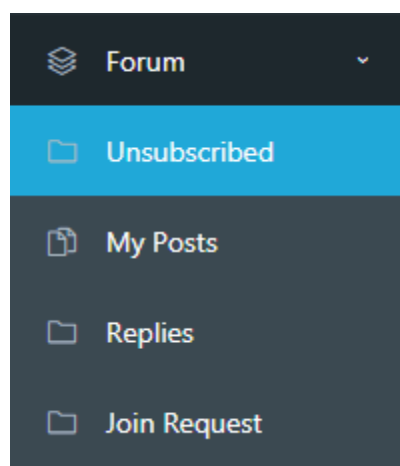

The screenshot shows the INNOVAGRO "Add New Service" form. The sidebar is the same as in the previous screenshot. The main content area is titled "/index/user_service/new" and contains a form with the following fields: User (dropdown), Service (dropdown), Comments (text area), and Is Active (dropdown). There are "View All" and "Print" buttons at the top of the form, and an "Add New" button at the bottom.

- iii. Choose **view** in order to have an overview of each service

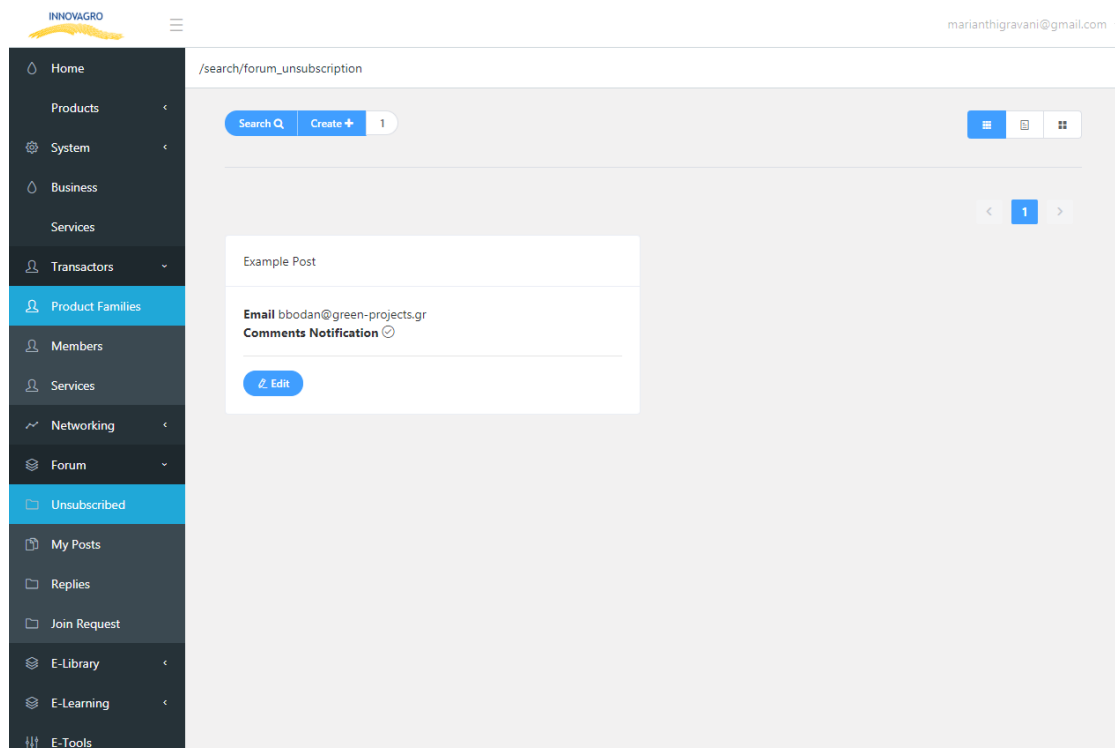

5.3.10 Forum

At forum section admin has more authorities than users.

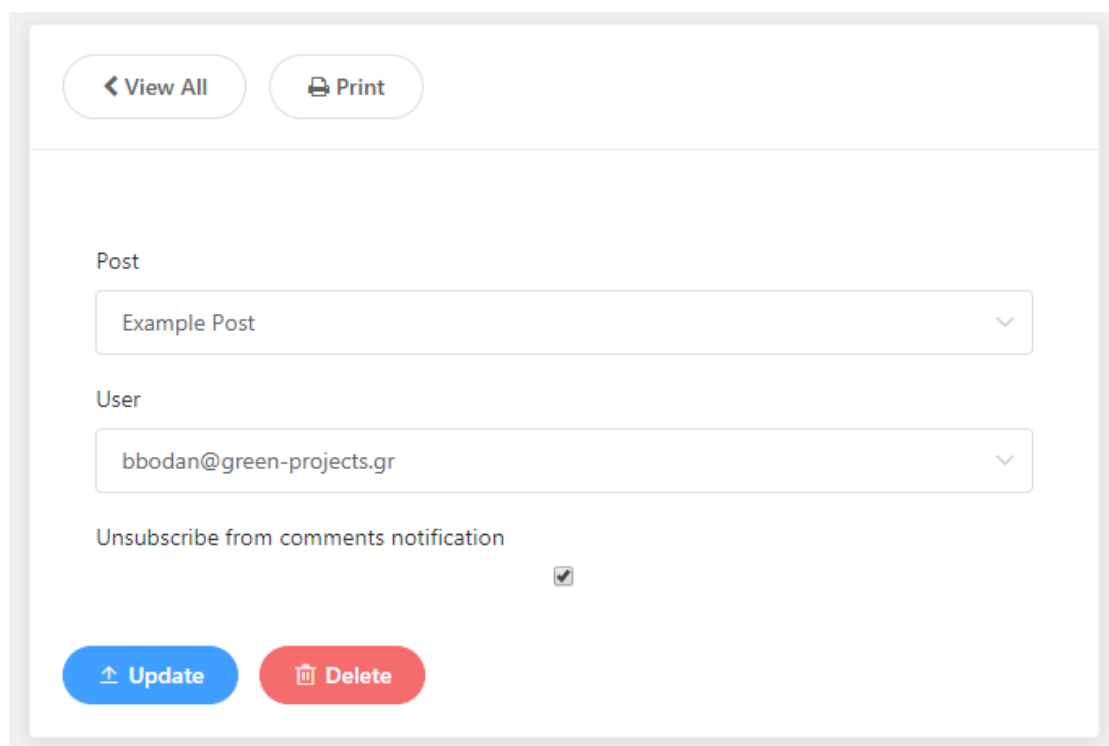

Unsubscribed

From the menu unsubscribed admin has the ability to check who has unsubscribed from a post.

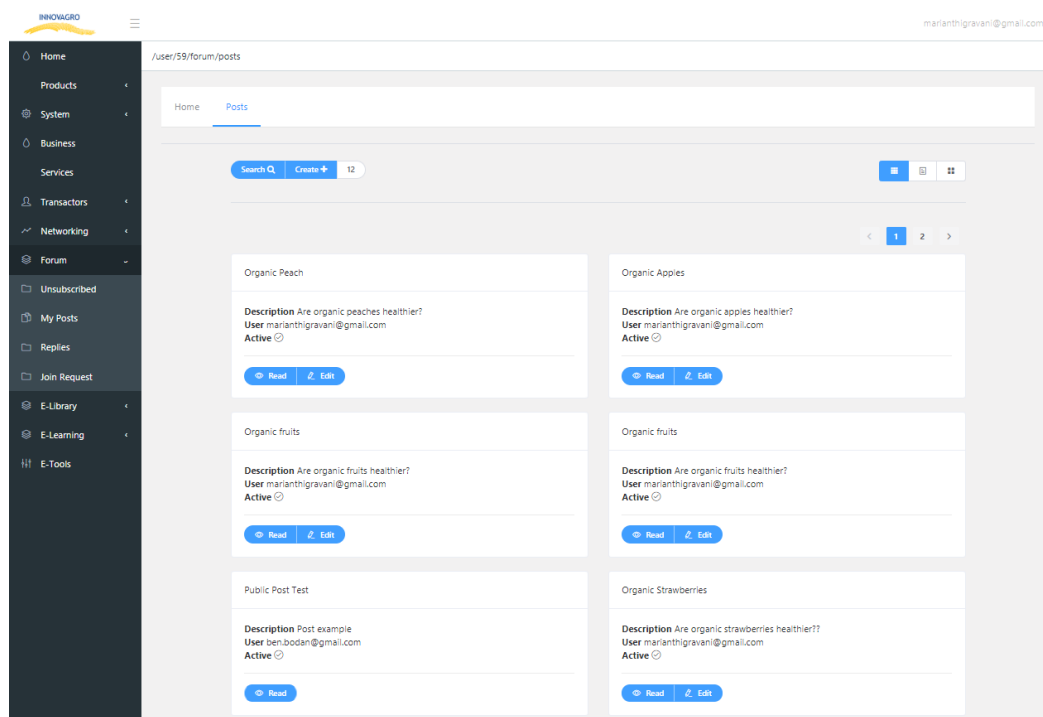

By clicking edit, admin can edit data or even undo this action.

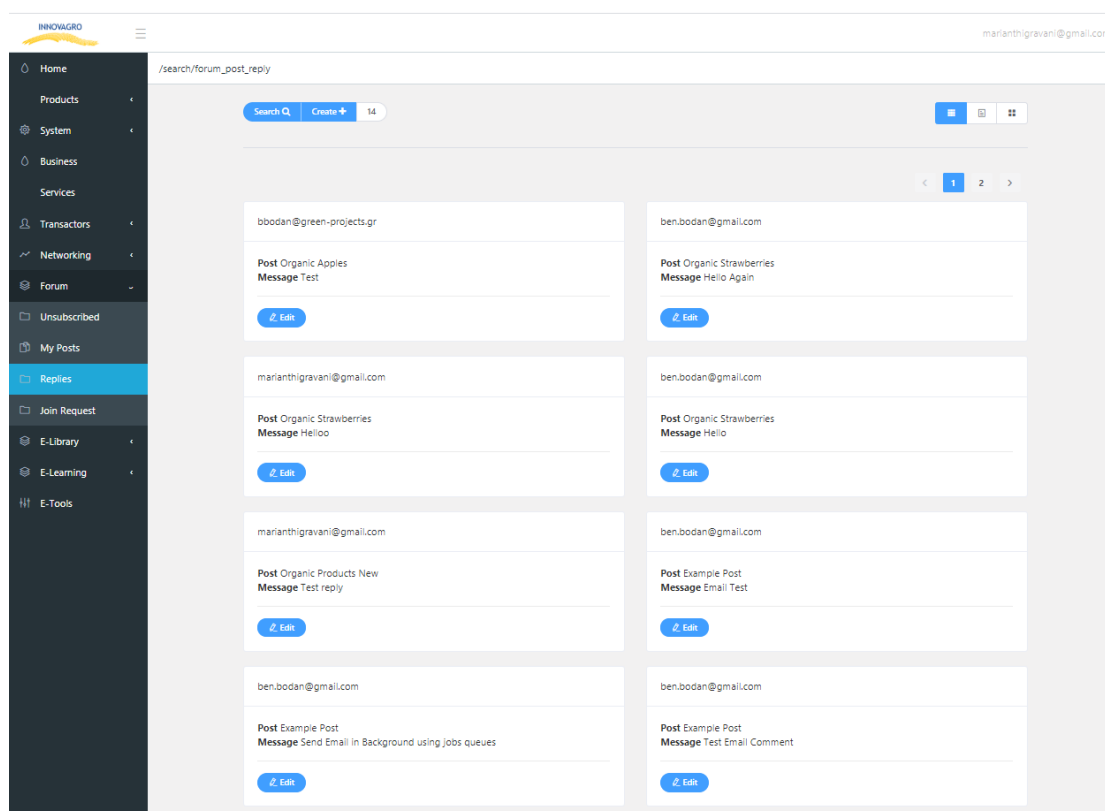

My posts

From the menu my posts admin can have access at every post that takes place either he is an invited member or not.

Replies

From the menu replies admin has the authority to check all replies of all members.

By clicking edit he has the ability to edit the reply or to delete it.

The screenshot shows the INNOVAGRO web application interface. On the left is a dark sidebar menu with options: Home, System, Products, Business, Services, Transactors, Networking, Forum, Unsubscribed, My Posts, Replies, Join Request, E-Library, E-Learning, and E-Tools. The main content area is titled "/index/forum_post_reply/14/edit/". It features a modal form for editing a forum post. The form includes a "View All" button, a "Print" button, a "Message" text area containing the word "Test", a "Forum" dropdown menu set to "Organic Apples", and a "User" dropdown menu set to "bbodan@green-projects.gr". At the bottom of the form are "Update" and "Delete" buttons.

Join request

From the menu join request admin has the ability to check all the requests that have been made.

The screenshot shows the INNOVAGRO web application interface with the "Join Request" menu item highlighted in the sidebar. The main content area is titled "/search/forum_post_join_request". It displays a list of join requests in a table format. The table has columns for the product name, user email, status, and message. There are "Search" and "Create" buttons at the top, and a pagination control showing "1" of 8 items. Each row has an "Edit" button.

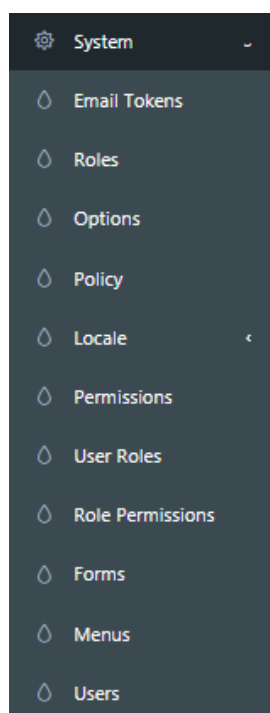

Product	User	Status	Message	Action
Organic Peach	User mareve@hotmail.gr	Status Approved	Message -	Edit
Organic Strawberries	User mareve@hotmail.gr	Status Approved	Message -	Edit
Organic Strawberries	User ben.bodan@gmail.com	Status Approved	Message -	Edit
Organic Products	User ben.bodan@gmail.com	Status Awaiting Approval	Message -	Edit

You can also edit them or delete them

The screenshot displays the INNOVAGRO admin dashboard. On the left is a dark sidebar menu with options: Home, System, Products, Business, Services, Transactors, Networking, Forum, Unsubscribed, My Posts, Replies, Join Request, E-Library, E-Learning, and E-Tools. The main content area shows the URL `/index/forum_post_join_request/14/edit/`. At the top right, the user `marianthigravani@gmail.com` is logged in. The central form for editing a forum post includes: a 'View All' and 'Print' button bar; a 'Message' text area; a 'Key' field with the value `FTdzMfK4kF59QhKRtYmM68110ew3W9Dyq8M1MYWo`; a 'Status' dropdown menu set to 'Approved'; a 'User *' dropdown menu set to `mareve@hotmail.gr`; and a 'Forum *' dropdown menu set to 'Organic Strawberries'. At the bottom of the form are 'Update' and 'Delete' buttons.

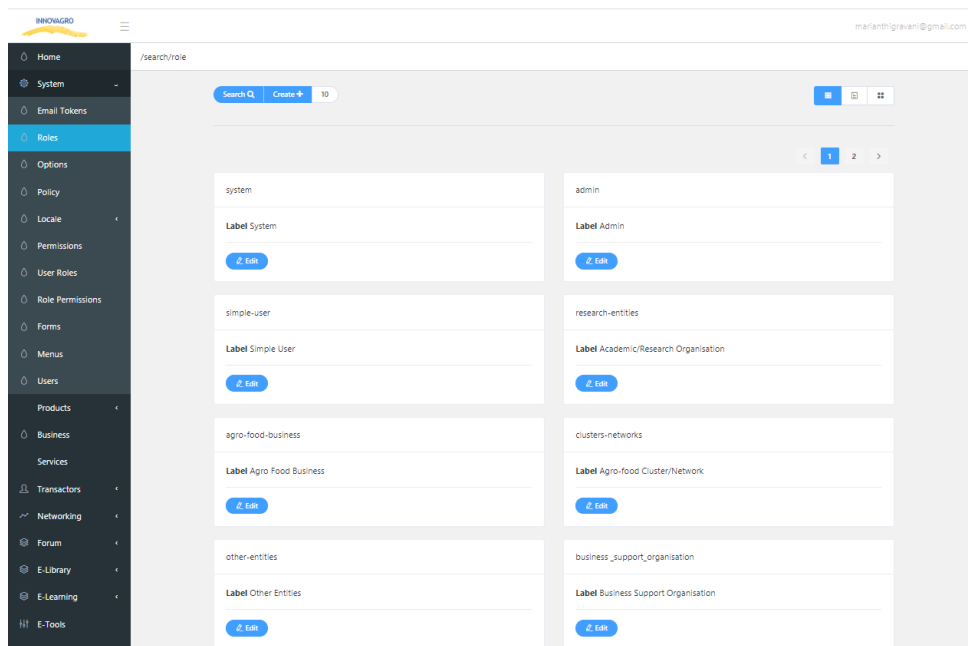

5.3.11 System

From this menu admin can manage the whole platform.

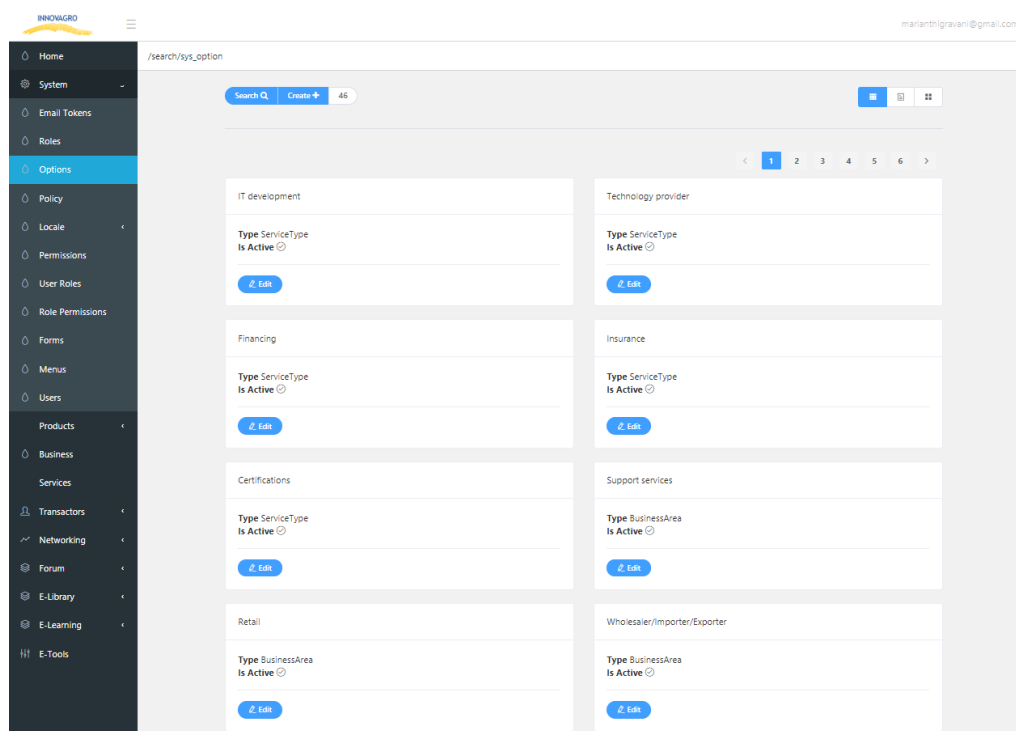

Roles

From the menu roles you can find all roles of the platform. You can edit them or create new roles.

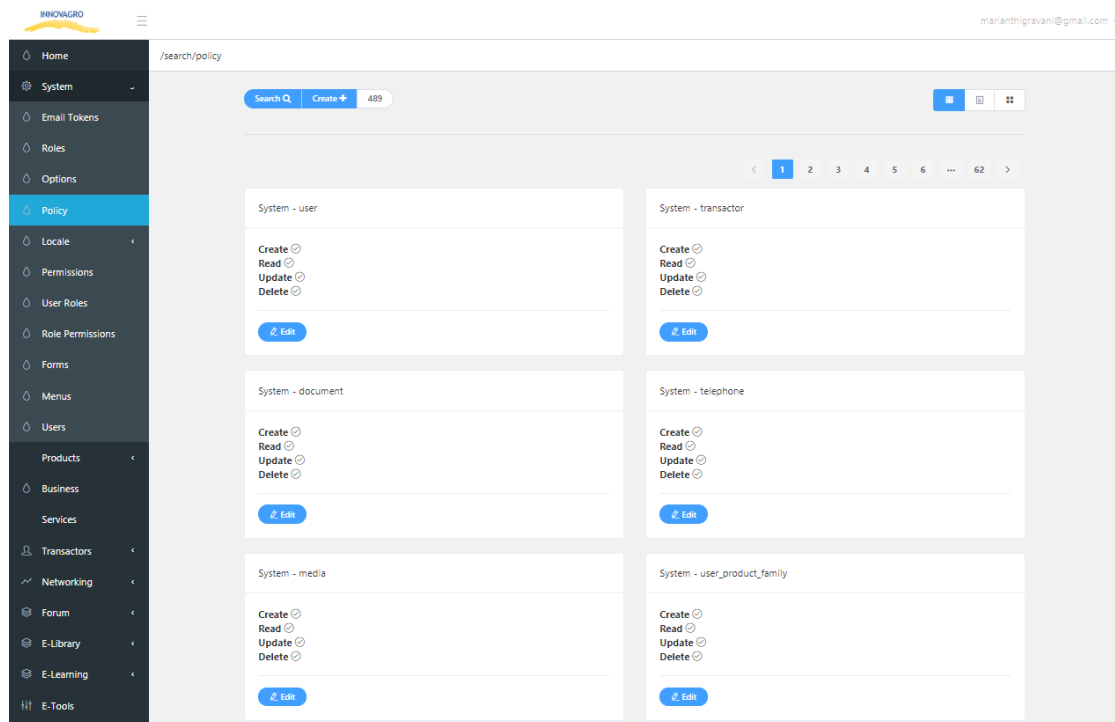

Options

From the menu options you can find all roles of the platform. You can edit them or create new options.

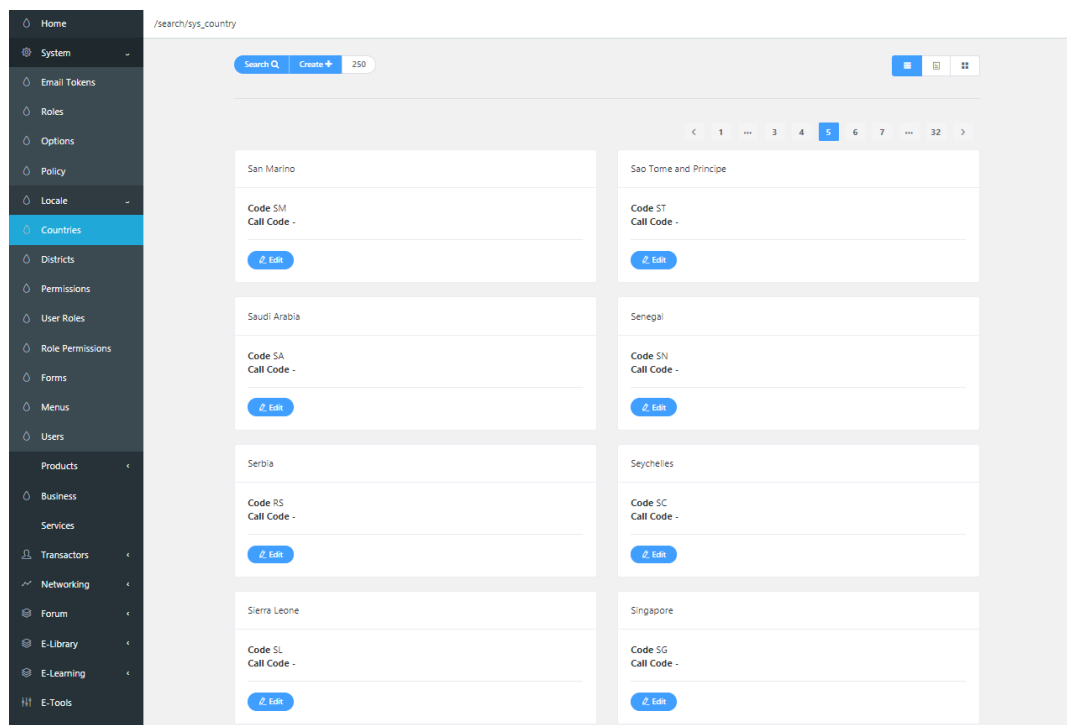

Policy

From the menu policy you can find all policies of the platform. You can edit them or create new policies.

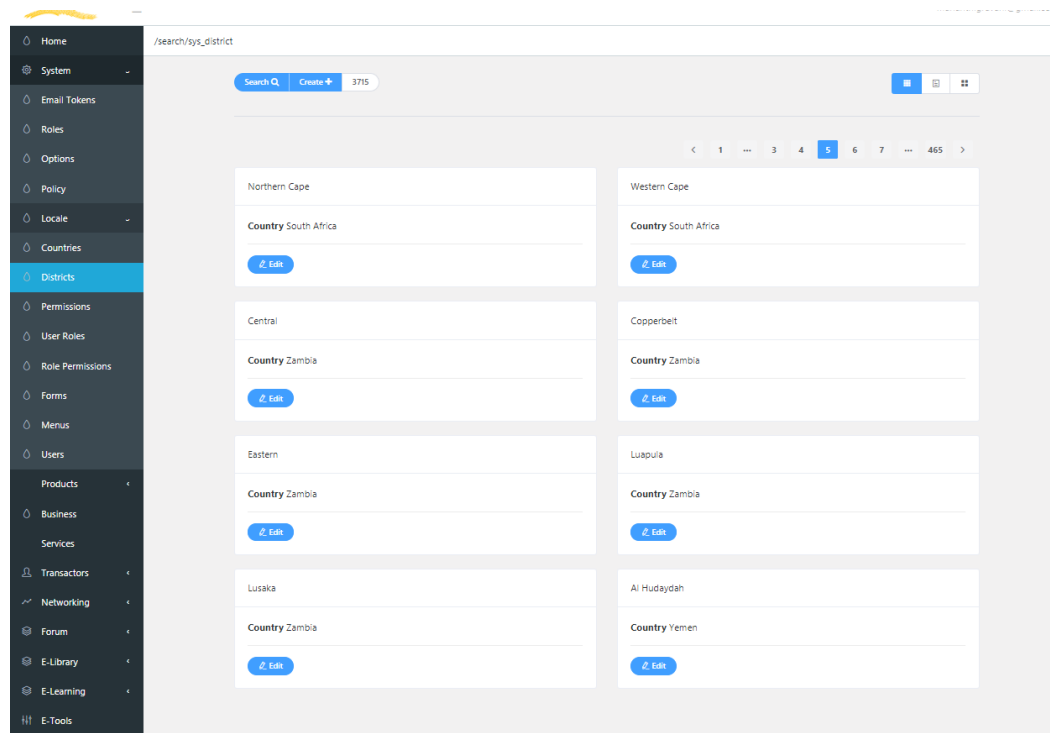

Locale-Countries

From the menu countries you can find all relative with the platform countries. You can edit them or add new countries.

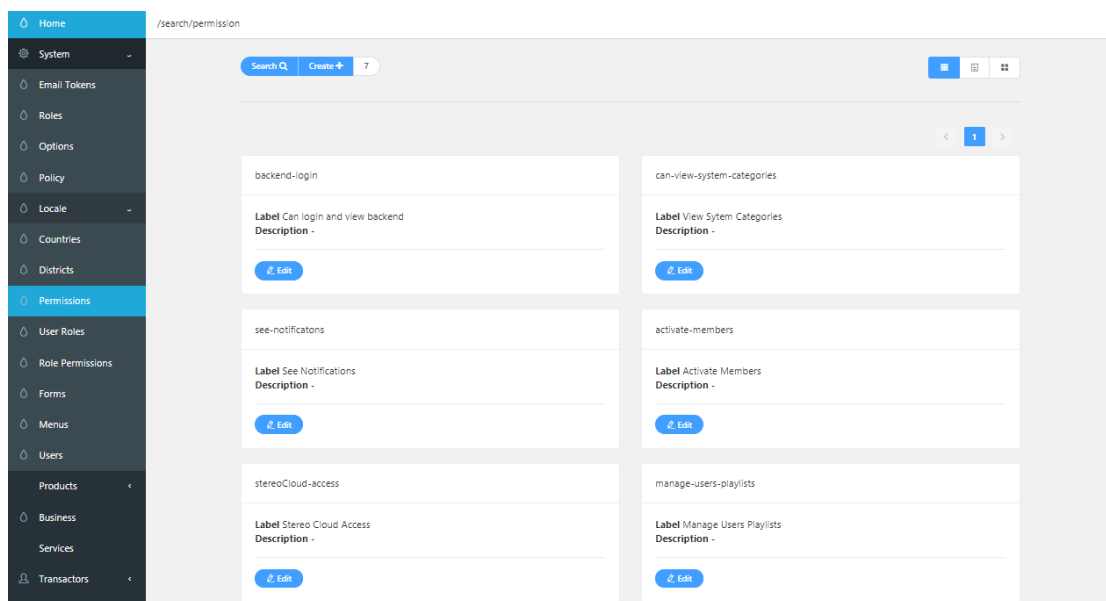

Locale-Districts

From the menu districts you can find all relative with the platform districts. You can edit them or add new district.

Locale-Permissions

From the menu permissions you can find all permissions of the platform. You can edit them or add new permissions.

Locale-User Roles

From the menu user roles you can change each user's permission.
