How to make Social Housing more energy efficient and affordable in a municipalities and regions? Social green is an EU funded project working in 8 municipalities in 6 Eu countries trying to find good solutions and policies on how to make social housing sector more green through mutual learning and development of improved regional policies. It will provide the opportunity to explore green building practices and significantly reduce GHG emissions through cost-effective means while providing much needed housing in a healthy and sustainable manner. Social green project started in October 2016 and will continue until 2020. We wish to provide you concrete tools on how to work with these projects in a municipality. This newsletter and the following have the aim to report on Social Green project, its results, products and any other useful information on the improvement of the energy efficient in Social Housing.

1st Newsletter Social Green
