

“Regional Policies towards Greening the Social Housing Sector”

3rd NEWSLETTER

The SOCIAL GREEN project has been busy during the past few months. The project team gathered a project meeting, local study visit and **open seminar in Varzadin, Croatia**, and also participated in INTERREG EUROPE’s **Policy Learning Platform Event in Seville, Spain**. Meanwhile, our city and regional partners are developing their local action plans for greening social housing, together with their local stakeholder, and the project has published its **first good practice**, involving an innovative financing scheme for retrofitting social housing in Estonia. You can read all about these developments in this issue of our newsletter.

Social Green is an EU funded project working in eight municipalities and regions in six EU countries. Together, we are developing solutions and policies on how to make social housing sector more green through mutual learning and development of improved regional policies. This provides the opportunity to explore green building practices and significantly reduce GHG emissions through cost-effective means while providing much-needed housing in a healthy and sustainable manner.

NEW ON THE WEBSITE

We have added to news sections on the website in order to so that users are informed about what is happening in the project

• **GOOD PRACTICE**

The Sõpruse 202, Tallinn (Estonia) is a **retrofitted building in Estonia** that uses an innovative financing scheme to reduce energy consumption by 60% without increasing the monthly cost for residents.
