

“Regional Policies towards Greening the Social Housing Sector”

5th NEWSLETTER

Social Green is an EU funded project working in eight municipalities and regions in six European countries.

Together, **we are developing solutions and policies on how to make social housing sector more green** through mutual learning and development of improved regional policies.

This provides the opportunity to explore **green building practices** and significantly reduce GHG emissions through cost-effective means while providing much-needed housing in a healthy and sustainable manner.

GOOD PRACTICES

We have already uploaded 15 good practices in greener buildings to our website. Until the end of the first phase, in March 2019, the project partners will update this page as they identify new good practices

LOCAL STAKEHOLDERS MEETINGS

During these months, Social Green project partners have organised several meetings with their local stakeholders to define and improve their respective **Action Plans**.

They will be presented before the end of 2018 and will be implemented in the second phase of the project that will begin in March 2019.
