

International Event Report

October 2019 by project partner CESBA,
final version for public use

Program priority: 2.1 - To raise capacity for better management of energy in public buildings at transnational level

Work package: 2 - Project Communication

Activity: 2.1 – Setting up common methodologies for actions

Deliverable: 2.4.1 – International CESBA MED Events

1 General goal of the event

The aim of the CESBA Sprint Workshop was strengthening of the bottom up process from experts and institutions and the coordination of various activities and networking while learning from each other.

The participants worked on a comprehensive exchange on quality standards for the future built environment, implementation of policies and the involvement of users and project ideas for further cooperation were created.

The personal network among other experts was strengthened. All together the CESBA Sprint Workshop was a strong impetus for the further development of common European sustainable built environment assessment.

6 teams, each focusing on a special topic, but linked to each other guided themselves through the CESBA Sprint Workshop 2018.

2 Goal of the event for participating organisation

The goal of the event for the participating organisations was networking and gaining know-how on their specific topics from other nations and organisations.

3 Target groups reached

Target groups	Target group reached in this reporting period (number)
Energy agencies...	
Business support organisation	4
Education / training center and schools	
Enterprises	
Interest groups including NGO's	14
Higher education and research	5
Infrastructure and public service providers	2
International organisation	3
Local public authority	6
National public authority	2
SME	
Regional public Authority	4

4 Partners involved

The following partner organisations participated:

CESBA, AURA-EE, iiSBE, City of Torino, EnvirobatBDM, Municipality of Udine, Government of Catalonia, Municipality of Sant Cugat del Vallès, national Observatory of Athens, Regione del Veneto, University of Malta, EIHP

5 Contributing projects / organisations

6 Agenda of the event

PROGRAMME TIMELINE

Wednesday 14th November 2018

- 12.30 Common Lunch**
- 14.30 New project applications**
Teams interaction - cultural activity
- 18.30 Teams interaction - common cultural visit and dinner**

Thursday 15th November 2018

- 08.00 Common Breakfast**
- 09.00 Plenary Discussion on topics for teams for the day**
- 09.30 6 Parallel Working Teams – round 1**
- 11:30 Plenary presentations and discussion - results round 1**
- 13.00 Common Lunch**
- 14.00 6 Parallel Working Teams – round 2**
- 17.00 Plenary presentations and discussion - results round 2**
- 19.00 Common dinner, social event, cultural visit**

Friday 16th November 2018

- 08.00 Common breakfast**
- 09.00 Plenary Discussion on topics for teams for the day**
- 09.30 6 Parallel Working Teams – round 3**
- 11:30 Plenary presentations and discussion - results round 3**
- 13.00 Common Lunch**
- 14.00 6 Parallel Working Teams – round 4 – new project applications**
- 16.00 Plenary presentations and discussion - results round 4**
Summary and common final statement of the 5th CESBA Sprint
Workshop 2018
- 19.00 Common dinner and farewell**

PROGRAMME CONTENT

Topics Thursday 15th November 2018

1.1 Latest challenges in the built environment

Participants explain their challenges on the job, share experiences and discuss adaption to climate change reaching from building to urban to territorial scale.

1.2 Capacity to act: Policy implementation and participation I

Deep involvement of users, NGOs or private investments are needed to realize mass oriented improvements in the building sector, adaption to climate change.

1.3 Tools & indicators: their usage and necessary adaptations

Participants debate the qualities of available tools and indicators on sustainable built environment, from building to urban to territorial scale.

1.4 CESBA City Network

*A strong partnership among cities in the Mediterranean? How to collaborate with existing city networks? Common activities and long lasting relationships.
CESBA Neighborhood Award.*

Topics Friday 16th November 2018

2.1 Pooling resources

Effective use of financial and organizational resources. Innovative solutions for the energy transition on urban and territorial scale shall be encountered.

2.2. Capacity to act: Policy implementation and participation II

Deep involvement of users, NGOs or private investments are needed to realize mass oriented improvements on the neighborhoods.

2.3 Energy renovation in buildings

Benchmarking, sharing experiences and needs, formulating new standards among MED-areas resulting from different transnational projects.

2.4. Circular Economy

Circular Economy fosters innovation in the built environment. CE is old wisdom and a new topic at the same. Consequences to our daily work are shared.

Final round 4

New project applications

Participants prepare possible transnational projects based on the common results during the 5th CESBA Sprint Workshop.

Final Statement

All participants will formulate a final statement based on the common results during the 5th CESBA Sprint Workshop

7 Content of the presentation

The following topics have been tackled by the 6 working groups:

TEAM 1 1.1 Latest challenges in the built environment 2.1 Pooling resources	TEAM 2 1.2 & 2.2 Capacity to act: Policy implementation and participation (part I and part II)	TEAM 3 1.3 Tools & indicators: their usage and necessary adaptations 2.3 Energy renovation in buildings
TEAM 4 1.4 CESBA City Network 2.4 Circular Economy	TEAM 5 1.1 Latest challenges in the built environment 2.3 Energy renovation in buildings	TEAM 6 1.3 Tools & indicators: their usage and necessary adaptations 2.1 Pooling resources

(status April 2018)

8 Résumé

40 experts from 8 nations developed joint solutions for a continuous improvement of buildings, neighbourhoods and spatial planning. The 5th CESBA Sprint Workshop was organized by 9 European projects and 5 partner organizations.

By means of the so-called Sprint method 6 working groups dealt with respectively six issues for three days. The most important results are:

- Most programs in cities are tailored for middle class people with a stable income and well-to-do public administrations. CESBA shall reinforce the sensibility and consideration for the social dimension of actions and measures.
- CESBA shall foster a participatory approach of stakeholders through gamification and co-creation. Adopt a parallel “bottom-up” and top-down governance.

- We need to harmonize assessment tools. We need to continue collaboration between us to fulfil these tasks in the forthcoming years. Spatial planning could be a cross-sector facilitation and implementation of horizontal and vertical integration of political programs and recommendations
- CESBA shall focus on the collaboration with existing networks. The success of this collaboration will depend on the development of new CESBA tools.

The Sprint Method was discussed thoroughly by all participants and confirmed as very valuable and profitable.

Furthermore participants agreed on the following statement:

CESBA SPRINT WORKSHOP FINAL AGREEMENT 2018

Together we build on the previous work done in CESBA.

On CESBA:

Latest challenges in the built environment & pooling resources:

Create a positive professional image for public servants that have sustainability at heart. The social dimension is not given sufficient attention. Unstable economic conditions are not conducive to investments into energy efficiency in buildings. Further most programs in cities are tailored for middle class people with a stable income and well-to-do public administrations. CESBA shall dedicate attention to the professional identities of the key person involved in the building refurbishments in local administrations, financial institutions, energy service companies (ESCOs) and reinforce the sensibility and consideration for the social dimension of actions and measures.

Capacity to act:

Involve young generation for long-lasting results and transfer of knowledge. Foster a participatory approach of stakeholders through gamification and co-creation. Adopt a parallel “bottom-up” and top-down governance. CESBA shall pay attention to people real needs. CESBA shall structurally involve stakeholders and shall provide tailored information to end-users.

Tools & indicators:

their usage and necessary adaptations, energy renovation in buildings:

We need to harmonize buildings, urban and territorial assessment tools. Currently there are some known problems such as lack of data, incentives, interoperability, common reporting formats, etc. We need to continue collaboration between us to solve this problem in the forthcoming years. Spatial planning could be a cross-sector facilitation and implementation of horizontal and vertical integration of political programs and recommendations. An improvement of the capacity to act, continuous adaptations and improvements are needed.

CESBA City Network:

The strategy and operational activities of CESBA must be redefined. CESBA shall focus on the collaboration with existing networks. In CESBA we provide for existing city-networks designed tools, trainings and guidance, implementation models, assessment methodologies and contextualization to its members. The next step is to choose the suitable city network according to CESBA principles. The success of this collaboration will depend on the development of new CESBA tools as well as the execution of new European projects that allow financing the use and dissemination its services.

On CESBA Sprint Workshop:

Travel time to the meeting place / hotel should be worth it. It is very important, that all participants stay in the same hotel or very close by. A peaceful place in the countryside surrounded with interesting places to visit is preferred. The CESBA Sprint Workshop shall start either with a common breakfast or a common lunch and end with common lunch or dinner. The day shall be structured in discussions and exchange in teams, 2 common plenary presentations and common networking activities. 10 to 15 people per the team including 2 moderators are a perfect size to work with. Team sessions shall last 4,5 to 5 hours per day (2 sessions with 2,5 hours, or 3 with 1,5 hours). It is important to have time for common social activities and individual exchanges. At the end at least 2,5 hour of common time shall be reserved for finalizing the final statement and next steps.

Out-door team discussions in the nature are important in many ways – they foster collaboration, inspire for new ideas and give access to the meeting place. Further role plays, games and others shall foster participation interaction.) The organizers shall be flexible on participation if some applicants do not show up (participant lists and participation in teams, cost packages for common activities, program itself.) Badges for the participants first name are important for communication among the partners. A person familiar with the local situation, places and habits is necessary. Further organizers shall be prepared for a good documentation of results (flipchart, posters, video, and booklet). Food shall meet different needs of participants (allergies). Good preparation and organization of the event are key to success.
