1 Event Details

Title:

Interventi di conservazione degli habitat delle zone umide costiere nel SIC della Capitanata (progetto LIFE+09 NAT/IT/000150) – Nature conservation schemes for the coastal wetland habitat of the Capitanata SCI (project LIFE+09 NAT/IT/000150)

Type:

Conference (final event of a LIFE project)

Date:

17/06/2019

Location:

Manfredonia - Foggia (Italy)

Programme:

See link below and annex 1.

Link:

<http://www.lifezoneumide.it/dettaglinews.aspx?idart=75>

Audience:

Puglia Region delegates and local stakeholders.

WetNet participation:

- Giancarlo Gusmaroli (Italian Centre for River Restoration)

2 Description of the Event

The objective of the LIFE project “Sipontine Wetlands” is to achieve full environmental restoration of the area involved and, at the same time, to raise awareness on the issues of wetland protection and extension as well as on wetland priority habitats.

The Sipontine marshes are the second most important Italian wetlands. Their importance not only stems from their size and variety of habitats, but also from their central geographic position, bridging the east and west of the Mediterranean basin.

The conference has been the final event of a LIFE project that has been working on the restoration of a coastal wetland in Apulia (South of Italy). WetNet project has been invited to present the state of health of Med wetlands and the experience of the Wetland Contract.

PROGRAMME

https://www.paesaggiopuglia.it/file/documenti/pdf/Life_Zone_Umide_convegno_2019_programma.pdf

3 Relevance for the WetNet Project and the MED territory

The conference has been organized in order to illustrate the works carried out and the results obtained by the LIFE project and that of other projects that also have the conservation of the same target habitats as their objective. Experts in the management of species and habitats, managers and consultants of other similar projects which have carried out similar conservation actions has been invited.

4 Concluding Remarks

Networking at national level with a relevant project. The restoration measures implemented within the LIFE project might be considered in the action plan of Wetland Contracts signed in similar sites. For further information visit the project website: <http://www.lifezoneumide.it/>

ANNEX 1 - Event Programme

PROGRAMMA CONVEGNO FINALE

"INTERVENTI DI CONSERVAZIONE DEGLI HABITAT DELLE ZONE UMIDE COSTIERE NEL SIC
ZONE UMIDE DELLA CAPITANATA. Progetto LIFE+09 NAT/IT/000150"

Oasi Lago Salso, Manfredonia (FG)
21-22 giugno 2019

21 giugno 2019 (venerdì)

(9:30 -10:00)	SALUTI E AVVIO DEI LAVORI	
-	<i>Vittorio Piscitelli</i>	Commissario prefettizio, Comune di Manfredonia
