

Dear friends of sustainable mobility, dear colleagues and partners,

3,5 years ago, we kicked off the project cities.multimodal. 16 partners from the Baltic Sea Region joined forces in order to develop solutions to foster multimodality and sustainable mobility. Many things have been achieved since then. Six **mobility point pilots** and diverse **behavioral change campaigns** are only some of our tested solutions. Find out about all our different activities and outputs on our website and read our **final publications** for more in-depth information and helpful advice for your own planning processes.

We would like to thank all our colleagues and partners in the Baltic Sea Region for their support!

Thank you for following our activities and spreading the word about cities.multimodal. It's been a very fruitful time and we believe that this project has made a change towards a more sustainable urban mobility and more livable cities.

Enjoy reading our last cities.multimodal newsletter!

Best regards,

Steffen Nozon & Lisa Wiechmann

(Hanseatic and University City of Rostock, Lead partner)

A Day of Multimodal Mobility – The Video

We are happy and proud to be able to share the video "**A Day of Multimodal Mobility**" with you. The video illustrates the activities and results of cities.multimodal.
Enjoy!

Mobility points: Vilnius city encourages its citizens to move in more a sustainable way

The City of Vilnius is actively encouraging its citizens to move in more sustainable ways – educational campaigns are launched, new infrastructure for pedestrians and cyclists is being continuously implemented and renewed, the car transit in the Old Town has been reorganized, the public transport services are being improved and the public transport fleet is being renewed.

Among all of the listed sustainable mobility oriented measures –the most recent one is the launching of two **mobility points** in Antakalnis district.

The Vilnius mobility points will officially be inaugurated in mid-April.

Webinar series

WAY(S) - Towards liveable cities in the Baltic Sea Region" consisted of four webinar sessions that took place monthly from December 2020 to March 2021. The four thematic sessions covered Living Streets, innovative citizen involvement, mobility management for different target groups and mobility points.

The recordings along with the presentations can be found here:

- [Co-creating urban space – Testing living streets in the BSR](#)
- [Getting the citizens on board – Testing innovative ways of involvement](#)
- [Breaking bad habits – Increasing multimodality through mobility management](#)
- [Multimodality made visible – Mobility Points in Baltic Sea Region cities](#)

Publications

On the cities.multimodal website you can now find all our final publications that have been produced within the project. To access the publications, [visit the Publications page](#).

- [Planner's Guide to Sustainable Urban Mobility Planning](#) - an inspirational guide for mobility and city planners wanting to take their city's multimodality to the next level.
- [Toolbox for Mobility Management](#) - contains manuals for mobility management for kindergartens and schools, companies and urban developments
- **Evaluation Report** (*to be published*) - contains an evaluation of the project and measure objectives as well as an impact and process evaluation
- [Citizen involvement, peer review and study visit reports, fact sheets and newsletters](#)

**This is the last cities.multimodal newsletter
