

More than a Common Backup: How you can find Community Energy Projects in our Database

Mantas Marciukaitis, Lina Murauskaite
Lithuanian Energy Institute

What is CE database?

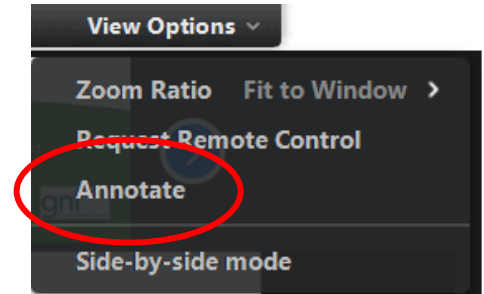

- This database is one of the project outcomes and main **source of first-hand information about the CE projects in the Baltic Sea Region**. It serves as a base of knowledge about technical, financial and organizational aspects of CE project development.
- Database hosts representative cases of various kinds of CE initiatives from partner countries.
- Each case is described and categorized according to information collected from CE project owners or developers.
