

Project co-financed by the European  
Regional Development Fund

**MED Greenhouses**  
**“Green Growth through the capitalization of innovative  
Greenhouses”**

*Development of Stakeholders & Beneficiaries database*

**University of Thessaly**

Project Details:

Programme: **Interreg MED 2014-2020**

Priority Axis: **1. Promoting Mediterranean innovation capacities to develop smart and sustainable growth**

Objective: **1.1. To increase transnational activity of innovative clusters and networks of key sectors of the MED area**

Project Title: **Green Growth through the capitalization of innovative Greenhouses**

Project Acronym: **MED Greenhouses**

Reference No: **3082**

Lead Partner: **University of Thessaly**

Total Budget: **1,171,400 €**

Time Frame: **01/02/2018 - 31.12.2019**

Deliverable Details

WP: **3 - Capitalising**

Activity: **3.1 – State of Play in Policies, Financing, Technologies & stakeholders**

Deliverable Title: **Development of Stakeholders & Beneficiaries database**

Responsible Partner: **University of Thessaly**

Involved Partners: **All**

Date & Place of delivery: **25-02-2019**

Version:**2**

Agricultural Research Institute

## Introduction

---

The overall objective of the “MED Greenhouses” project is to improve eco-innovation capacities of public & private actors in the greenhouse/agriculture sector, through stronger transnational cooperation, knowledge transfer and better collaborative networks. The main beneficiaries will be Greenhouse Farmers, Businesses specialized in Agro-food and Greenhouse industry, Policy Makers - Unions of Agricultural Cooperatives, Research & Technology Institutes, etc.

This deliverable (3.1.2) is elaborated in the context of Activity 3.1 – “State of Play in Policies, Financing, Technologies & Stakeholders” and WP3 – “Capitalising” of the MED Greenhouses project. Activity 3.1 aims, among others, to record and present the state of play of key players and actors of the quadruple helix involved with greenhouse industry, focusing at Regional level (for Cyprus at national level):

- Region of Berat (Albania),
- Cyprus,
- PACA Region (France),
- Region of Thessaly (Greece),
- Molise Region (Italy),
- Region of Murcia (Spain)

In general, the WP3 aims to:

- improve the existing innovative framework conditions in the MED area providing tailored recommendations to stakeholders favouring eco-innovative investments in agriculture sector
- create synergies and cooperation mechanisms strengthening innovative clusters & networks of the sector

The systematisation of the existing knowledge and the presentation of the state of play of the agriculture/greenhouse sector (Act 3.1), will contribute to the achievement of WP3’s objectives.

This Joint report (Del.3.1.2) constitutes the consolidation report including the contribution and the findings of each partner. The report aims to identify and present the key players and the actors of the quadruple helix involved with greenhouse industry at Regional level (see above). The deliverable consists of the following chapters:

- 1 – Stakeholders/Beneficiaries (4-helix) of Greenhouse industry
  - Enterprises
  - Academia
  - Governmental bodies (Policy Makers)
  - Civil Society
- 2 – Stakeholders Analysis
- 3 – Conclusions

## 1. Stakeholders/Beneficiaries of Greenhouse industry per Country

This chapter maps the keystakeholders and beneficiaries that are involved directly or indirectly with greenhouse sector. In particular, the following database consists of factors of quadruple-helix (Enterprises, Academia, Government, and Civil Society) at Regional level: Region of Berat (Albania), Cyprus, PACA Region (France), Region of Thessaly (Greece), Molise Region (Italy), Region of Murcia (Spain).

- **Enterprises** including SMEs, large companies, startups, and farmers. These could be main and highly important (private) actors which can greatly benefit from the project activities
- **Academia** including universities, research institutes and other institutions focused on developing innovative techniques and methods related to the greenhouse industry and products
- **Governmental bodies** including policy makers, chambers, institutions at a national, Regional and local level such as ministries, Regional councils, municipalities, sectoral agencies and other actors whose aim is to develop and implement policies that can affect the agriculture and greenhouses sector
- **Civil society** including actors (NGOs, associations, clusters, etc) that could be a valuable asset for the project as they play an important role in favoring or opposing policies that affect the greenhouses sector.

A thorough analysis of stakeholders and beneficiaries follows in the next sub-sections.

### 1.1 Enterprises

#### 1.1.1 Albania

Table 1 – Enterprises related to agriculture/greenhouse sector in the Region of Berat (Albania)

<b>Name of the Enterprise</b>	Gjedra shpk
<b>Contact details</b>	Contact person: Gjergji Qose: Telephone/Fax: +355 3232565 Address: UraVajguore, Berat, Albania
<b>Size</b>	Large company
<b>Short presentation</b>	Gjedra shpk is a medium sized company whose focus is the wild collection in the area, its processing and preparation for export. Main exported products are plants and spices
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Wild collection, processing and export of medicinal plants and spices

<b>Registration in any Agriculture Cluster/association</b>	Yes
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	4 Gjedra shpk is an important medium sized company in the field of agriculture. The scope of work of this company is important for the Region, especially in terms of export
<b>Name of the Enterprise</b>	Lushnja Farmers' group
<b>Contact details</b>	Contact person: Agim Kadiu Telephone/Fax: +355 693857182 Address: Dushk, Lushnjë, Albania
<b>Size</b>	Large company
<b>Short presentation</b>	Cultivation of organic olive trees and processing of olive oil.
<b>Offered services/products related to Agriculture/greenhouse industry</b>	The group of Olive growers supplies with olives a processor and exporter of organic olive oil and additionally processes Extra virgin olive oil for the domestic market, trading in Healthy Corners in Tirana and Durrës.
<b>Registration in any Agriculture Cluster/association</b>	Yes
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	4 Lushnja Farmers Group is an important large company in the field of agriculture. Their focus is cultivation, processing and export of extra virgin olive oil. The company is located right next to the Region of Berat
<b>Name of the Enterprise</b>	Agim Pudja – "Tomadhea"
<b>Contact details</b>	Contact: Agim Pudja, General Director E-mail: a_pudja@yahoo.com Tel. +355 4 22 32 496 / +355686076622

	Fax: +3554 2415 890 Web: www.tomadhea.com Address: Sheshi Rilindja, P. 129, nr. 18, Tirana, Albania
<b>Size</b>	Large company
<b>Short presentation</b>	Tomadhea is a large enterprise focused on cultivation, wild collection, processing, and export of medicinal and aromatic plants and mushrooms
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Cultivation, wild collection, processing, and export of medicinal and aromatic plants and mushrooms
<b>Registration in any Agriculture Cluster/association</b>	Yes
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	3 Tomadhea is a large company whose impact in the field of agriculture is notable. The company works mainly in the Region of Tirana.
<b>Name of the Enterprise</b>	Lefter Vrapi
<b>Contact details</b>	Address: Drenovice, Ura Vajgurore Phone: 0683770314
<b>Size</b>	Large company
<b>Short presentation</b>	It serves as a collection point for farmers and also the company exports its products outside Albania
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Collection point for greenhouses' products Export of greenhouse products
<b>Registration in any Agriculture Cluster/association</b>	Yes
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	4 The company has an important impact for the project as it serves as a collection point for greenhouses' products

<b>Name of the Enterprise</b>	Fatos Zeka
<b>Contact details</b>	Address: Samaticece, Ura Vajgurore Phone: 0684060788
<b>Size</b>	SME
<b>Short presentation</b>	It serves as a collection point for farmers and also the company exports its products outside Albania
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Collection point for greenhouses' products Export of greenhouse products
<b>Registration in any Agriculture Cluster/association</b>	Yes
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	3 The company has an important impact for the project as it serves as a collection point for greenhouses' products
<b>Name of the Enterprise</b>	Nurçe Oshafi
<b>Contact details</b>	Address: Samatice, Ura Vajgurore Phone: 0682806034
<b>Size</b>	SME
<b>Short presentation</b>	It serves as a collection point for farmers and also the company exports its products outside Albania
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Collection point for greenhouses' products Export of greenhouse products
<b>Registration in any Agriculture Cluster/association</b>	Yes
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	5 The company has an important impact for the project as it serves as a collection point for greenhouses' products
<b>Name of the Enterprise</b>	Mystehak Goga

<b>Contact details</b>	Address: Goriçan, Ura Vajguore Phone: 0694649632
<b>Size</b>	SME
<b>Short presentation</b>	It serves as a collection point for farmers and also the company exports its products outside Albania
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Collection point for greenhouses' products Export of greenhouse products
<b>Registration in any Agriculture Cluster/association</b>	Yes
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	3 The company has an important impact for the project as it serves as a collection point for greenhouses' products
<b>Name of the Enterprise</b>	Asqeri Tafa
<b>Contact details</b>	Address: Goriçan, Ura Vajguore Phone: 0683611918
<b>Size</b>	SME
<b>Short presentation</b>	It serves as a collection point for farmers and also the company exports its products outside Albania
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Collection point for greenhouses' products Export of greenhouse products
<b>Registration in any Agriculture Cluster/association</b>	Yes
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	4 The company has an important impact for the project as it serves as a collection point for greenhouses' products
<b>Name of the Enterprise</b>	Lorenc Hatia
<b>Contact details</b>	Address: Rërëz, Kuçovë

	Phone: 0692235095
<b>Size</b>	SME
<b>Short presentation</b>	It serves as a collection point for farmers and also the company exports its products outside Albania
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Collection point for greenhouses' products Export of greenhouse products
<b>Registration in any Agriculture Cluster/association</b>	Yes
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	3 The company has an important impact for the project as it serves as a collection point for greenhouses' products
<b>Name of the Enterprise</b>	Shkelqim Barjami
<b>Contact details</b>	Address: Samatice, Urga Vajgurore Phone: 0682955594
<b>Size</b>	SME
<b>Short presentation</b>	It serves as a collection point for farmers and also the company exports its products outside Albania
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Collection point for greenhouses' products Export of greenhouse products
<b>Registration in any Agriculture Cluster/association</b>	Yes
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	4 The company has an important impact for the project as it serves as a collection point for greenhouses' products
<b>Name of the Enterprise</b>	Viktor Toska
<b>Contact details</b>	Address: Rërëz, Kuçovë Phone: 0682639452

<b>Size</b>	SME
<b>Short presentation</b>	It serves as a collection point for farmers and also the company exports its products outside Albania
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Collection point for greenhouses' products Export of greenhouse products
<b>Registration in any Agriculture Cluster/association</b>	Yes
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	3 The company has an important impact for the project as it serves as a collection point for greenhouses' products
<b>Name of the Enterprise</b>	Aleksander Shehu
<b>Contact details</b>	Address: Drenovice, Ura Vajgurore Phone: 0693800495
<b>Size</b>	SME
<b>Short presentation</b>	It serves as a collection point for farmers and also the company exports its products outside Albania
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Collection point for greenhouses' products Export of greenhouse products
<b>Registration in any Agriculture Cluster/association</b>	Yes
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	4 The company has an important impact for the project as it serves as a collection point for greenhouses' products
<b>Name of the Enterprise</b>	Mustafa Goga
<b>Contact details</b>	Address: Gorican, Ura Vajgurore Phone: 0692321087
<b>Size</b>	SME

<b>Short presentation</b>	It serves as a collection point for farmers and also the company exports its products outside Albania
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Collection point for greenhouses' products Export of greenhouse products
<b>Registration in any Agriculture Cluster/association</b>	Yes
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	3 The company has an important impact for the project as it serves as a collection point for greenhouses' products
<b>Name of the Enterprise</b>	Luan Tafa
<b>Contact details</b>	Address: Drenovice, Ura Vajgurore Phone: 0692878572
<b>Size</b>	SME
<b>Short presentation</b>	It serves as a collection point for farmers and also the company exports its products outside Albania
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Collection point for greenhouses' products Export of greenhouse products
<b>Registration in any Agriculture Cluster/association</b>	Yes
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	4 The company has an important impact for the project as it serves as a collection point for greenhouses' products
<b>Name of the Farmer</b>	Luto Goga
<b>Contact details</b>	Address: Poshnje, Ura Vajgurore Telephone: 0684073800
<b>Size</b>	3.0 ha
<b>Short presentation</b>	A farmer with a (relatively) large sized greenhouse
<b>Offered services/products related to</b>	Various types of vegetables

<b>Agriculture/greenhouse industry</b>	
<b>Registration in any Agriculture Cluster/association</b>	Yes
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	5 Considering the size of the greenhouse, this farmer is considered an important factor for the project.
<b>Name of the Farmer</b>	Astrit Zeka
<b>Contact details</b>	Address: Drenovice, Ura Vajgurore Telephone: 0682212477
<b>Size</b>	2.7 ha
<b>Short presentation</b>	A farmer with a (relatively) large sized greenhouse
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Various types of vegetables
<b>Registration in any Agriculture Cluster/association</b>	Yes
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	5 Considering the size of the greenhouse, this farmer is considered an important factor for the project.
<b>Name of the Farmer</b>	Ardian Mbërsi
<b>Contact details</b>	Address: Drenovice, Ura Vajgurore Telephone: 0692408287
<b>Size</b>	2.2 ha
<b>Short presentation</b>	A farmer with a (relatively) large sized greenhouse
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Various types of vegetables
<b>Registration in any Agriculture Cluster/association</b>	Yes
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	5 Considering the size of the greenhouse, this farmer is considered an important factor for the project.

<b>Name of the Farmer</b>	Luto Sinani
<b>Contact details</b>	Address: Poshnje, Ura Vajgurore Telephone: 0684510992
<b>Size</b>	1.4 ha
<b>Short presentation</b>	A farmer with a (relatively) medium sized greenhouse
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Various types of vegetables
<b>Registration in any Agriculture Cluster/association</b>	Yes
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	4 Considering the size of the greenhouse, this farmer is considered a valuable factor for the project.
<b>Name of the Farmer</b>	Mikail Cibuku
<b>Contact details</b>	Address: Otlak, Berat Telephone: 0684161728
<b>Size</b>	1.1 ha
<b>Short presentation</b>	A farmer with a (relatively) medium sized greenhouse
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Various types of vegetables
<b>Registration in any Agriculture Cluster/association</b>	Yes
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	4 Considering the size of the greenhouse, this farmer is considered a valuable factor for the project.
<b>Name of the Farmer</b>	Edmond Oshafi
<b>Contact details</b>	Address: Samatice, Ura Vajgurore Telephone: 0683362539
<b>Size</b>	1.1 ha

<b>Short presentation</b>	A farmer with a (relatively) medium sized greenhouse
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Various types of vegetables
<b>Registration in any Agriculture Cluster/association</b>	Yes
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	4 Considering the size of the greenhouse, this farmer is considered a valuable factor for the project.
<b>Name of the Farmer</b>	Dritan Sula
<b>Contact details</b>	Address: Goriçan, Ura Vajgurore Telephone: 0692075314
<b>Size</b>	1 ha
<b>Short presentation</b>	A farmer with a (relatively) medium sized greenhouse
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Various types of vegetables
<b>Registration in any Agriculture Cluster/association</b>	Yes
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	4 Considering the size of the greenhouse, this farmer is considered a valuable factor for the project.
<b>Name of the Farmer</b>	Bledi Nona
<b>Contact details</b>	Address: Otlak, Berat Telephone: 0682309098
<b>Size</b>	0.8 ha
<b>Short presentation</b>	A farmer with a (relatively) small to medium sized greenhouse
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Various types of vegetables
<b>Registration in any Agriculture Cluster/association</b>	Yes

<b>Impact Level to project Cluster</b> (1 Low – 5 high)	3 Considering the size of the greenhouse, this farmer is considered an actor that can potentially benefit from the project activities and grow in size and quality
<b>Name of the Farmer</b>	Luan Bilçari
<b>Contact details</b>	Address: Otlak, Berat Telephone: 0682320585
<b>Size</b>	7
<b>Short presentation</b>	A farmer with a (relatively) small to medium sized greenhouse
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Various types of vegetables
<b>Registration in any Agriculture Cluster/association</b>	Yes
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	3 Considering the size of the greenhouse, this farmer is considered an actor that can potentially benefit from the project activities and grow in size and quality
<b>Name of the Farmer</b>	Fatos Kanaççi
<b>Contact details</b>	Address: Otlak, Berat Telephone: 0694890752
<b>Size</b>	0.6 ha
<b>Short presentation</b>	A farmer with a (relatively) small to medium sized greenhouse
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Various types of vegetables
<b>Registration in any Agriculture Cluster/association</b>	Yes
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	3 Considering the size of the greenhouse, this farmer is considered an actor that

	can potentially benefit from the project activities and grow in size and quality
<b>Name of the Farmer</b>	Luftar Hatija
<b>Contact details</b>	Address: Rërëz, Ura Vajgurore Telephone: 00688352442
<b>Size</b>	0.5 ha
<b>Short presentation</b>	A farmer with a (relatively) small to medium sized greenhouse
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Various types of vegetables
<b>Registration in any Agriculture Cluster/association</b>	Yes
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	3 Considering the size of the greenhouse, this farmer is considered an actor that can potentially benefit from the project activities and grow in size and quality
<b>Name of the Farmer</b>	Bujar Zeka
<b>Contact details</b>	Address: Kutalli, Ura Vajgurore Telephone: 0683271815
<b>Size</b>	0.5 ha
<b>Short presentation</b>	A farmer with a (relatively) small to medium sized greenhouse
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Various types of vegetables
<b>Registration in any Agriculture Cluster/association</b>	Yes
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	3 Considering the size of the greenhouse, this farmer is considered an actor that can potentially benefit from the project activities and grow in size and quality
<b>Name of the Farmer</b>	Artan Hoxha

<b>Contact details</b>	Address: Pobrat, Ura Vajgurore Telephone: 0684073804
<b>Size</b>	0.5 ha
<b>Short presentation</b>	A farmer with a (relatively) small to medium sized greenhouse
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Various types of vegetables
<b>Registration in any Agriculture Cluster/association</b>	Yes
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	3 Considering the size of the greenhouse, this farmer is considered an actor that can potentially benefit from the project activities and grow in size and quality
<b>Name of the Farmer</b>	Hysen Ibrahim
<b>Contact details</b>	Address: Poshnje, Ura Vajgurore Telephone: 0698324432
<b>Size</b>	0.5 ha
<b>Short presentation</b>	A farmer with a (relatively) small to medium sized greenhouse
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Various types of vegetables
<b>Registration in any Agriculture Cluster/association</b>	Yes
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	3 Considering the size of the greenhouse, this farmer is considered an actor that can potentially benefit from the project activities and grow in size and quality
<b>Name of the Farmer</b>	Ervis Hada
<b>Contact details</b>	Address: Goričan, Ura Vajgurore Telephone: 0693988129
<b>Size</b>	0.5 ha
<b>Short presentation</b>	A farmer with a (relatively) small to

	medium sized greenhouse
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Various types of vegetables
<b>Registration in any Agriculture Cluster/association</b>	Yes
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	3 Considering the size of the greenhouse, this farmer is considered an actor that can potentially benefit from the project activities and grow in size and quality
<b>Name of the Farmer</b>	Klement Mema
<b>Contact details</b>	Address: Gajd, Ura Vajgurore Telephone: 0695748009
<b>Size</b>	0.4 ha
<b>Short presentation</b>	A farmer with a (relatively) small sized greenhouse
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Various types of vegetables
<b>Registration in any Agriculture Cluster/association</b>	Yes
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	2 Considering the size of the greenhouse, this farmer is considered an actor that can potentially benefit from the project activities and grow in size and quality

Table 4 – Enterprises related to agriculture/greenhouse sector in the Region of Thessaly (Greece)

<b>Name of the Enterprise</b> (include its logo wherever is available)	<b>1. Agrotechniki IKE</b> 
<b>Contact details</b>	Contact person: Strogilis George-Apostolos Email: sykeon@otenet.gr Telephone/Fax: 2310860276 Website: www.agrotechniki.com Address: Lappa 109, Karditsa, P.C. 43131
<b>Size</b>	SME
<b>Short presentation</b>	Agrotechniki IKE is an SME established by Agrotechniki Ltd that was founded in 1987. Since 1987, Agrotechniki has been the exclusive representative of the Italian glasshouse builder Artigianfer. Agrotechniki is one of the most important greenhouse construction and equipment companies in Greece. The company is engaged not only in the construction of greenhouses, but also provides advice on the rational management of the equipment of the units in order to optimize production.
<b>Offered services/products related to Agriculture/greenhouse industry</b>	The company is focused on the construction of greenhouses

<b>Registration in any Agriculture Cluster/association</b>	No
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	5- Agrotechniki IKE is a greenhouse construction company which has direct implementation with the technologies that are used in the greenhouse sector.

<b>Name of the Enterprise</b> (include its logo wherever is available)	<b>2. GEOTHERMIKI SA</b>  <b>GEOTHERMIKI</b>
<b>Contact details</b>	Contact person: Ioannis Mpatsis Email: info@geotherm.gr Telephone/Fax: 2310797001 Website: http://www.geotherm.gr Address: Sindos industrial area, A2-A9, P.C 57001 Thessaloniki, Greece
<b>Size</b>	SME
<b>Short presentation</b>	Geothermiki S.A. is a Greek market leader for almost four decades. Its' main business is manufacturing of steel frame galvanized greenhouses and it has designed and produced over 20 types of greenhouses, covering the whole range required in this area. It is also known for the quality constructions of poultry and livestock chambers, of snails and mushrooms farms and all kinds of steel buildings. Geothermiki S.A. operates internationally through its network of subsidiaries and dealers. Official partners for sales and technical support can be found in: Romania, Cyprus, Bulgaria, Serbia, Albania, Croatia, Hungary, Russia, Ukraine, Egypt, Jordan, Tunisia, Saudi Arabia and the United Arab Emirates.
<b>Offered services/products related to Agriculture/greenhouse industry</b>	The company is focused on the construction of agricultural constructions with emphasis in greenhouses.

<b>Registration in any Agriculture Cluster/association</b>	Geotechnical Chamber of Greece
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	5- Geothermiki SA is a greenhouse construction company which has direct implementation with the technologies that are used in the greenhouse sector.

<b>Name of the Enterprise</b> (include its logo wherever is available)	<b>3. Agrostis S.A</b>  
<b>Contact details</b>	Contact person: Vangelis Vasiliadis Email: info@agrostis.gr Telephone/Fax: +30 2310 804981-2 Website: www.agrostis.gr Address: A. Tritsi 21, Pylaia P.C 57001, Thessaloniki, Greece
<b>Size</b>	(SMEs or Large Company)
<b>Short presentation</b>	Agrostis is an Information Technology company with a mission to develop and market Information and automation technology products and services in the Agricultural sector. Agrostis management team combines many years of experience and technical expertise in the fields of Information Technology and Agriculture.
<b>Offered services/products related to Agriculture/greenhouse industry</b>	The company focuses on the development and implementation of ICT technologies in the agricultural sector and especially in greenhouses such as the Greenhouse control systems. Agrostis represents in Greece the Dutch company SERCOM, manufacturer of advanced automated Greenhouse control systems. In addition, Agrostis develops Farm Management software and Precision Farming such as the i-farm that is an integrated farm management application.

<b>Registration in any Agriculture Cluster/association</b>	No
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	5- Agrostis is directly cooperating with growers and greenhouse construction companies to incorporate ICT technologies in agriculture and especially in greenhouses.

<b>Name of the Enterprise</b> (include its logo wherever is available)	<b>4. Alargo</b> 
<b>Contact details</b>	Contact person: Nikos Moutevelis Email: info@alagro.gr Telephone/Fax: 211 4000324 Website: http://www.alagro.gr/ Address: Vikela 40, P.C. 111 45 Patisia, Athens
<b>Size</b>	SME
<b>Short presentation</b>	ALAGRO company was founded in Athens, in 2011, by MSc Agronomist of Agricultural University of Athens Nikos Moutevelis, surrounded by a team of experienced agronomists and engineers over the field of hydroponics and automatic, respectively. The object of the company is divided into two pillars. The first pillar has to do with the construction of automatic control systems, along with irrigation, fertilization and climatic conditions in greenhouses. The second is providing agronomic advice in terms of nutrition and plant protection, mainly in hydroponic, but in conventional crops too.
<b>Offered services/products related to Agriculture/greenhouse industry</b>	The company focuses on the development and implementation of ICT technologies in greenhouses.
<b>Registration in any Agriculture Cluster/association</b>	No

<p><b>Impact Level to project Cluster</b> (1 Low – 5 high)</p>	<p>5- Alargo is directly cooperating with growers and greenhouse construction companies to incorporate ICT technologies in agriculture and especially in greenhouses for greenhouse climate and irrigation control.</p>
--	---

<p><b>Name of the Enterprise</b> (include its logo wherever is available)</p>	<p><b>5. Argos Electronics</b></p> 
<p><b>Contact details</b></p>	<p>Contact person: Andreas Nikitas          Email: info@alagro.gr          Telephone/Fax: 00302224770000          Website: http://argoselectronics.gr/          Address: Nimporio, 340 15, Evoia, Greece</p>
<p><b>Size</b></p>	<p>SME</p>
<p><b>Short presentation</b></p>	<p>Argos Electronics produces custom-made control and monitoring systems, focused on climate control and hydroponic heads for greenhouses, all in PLC based philosophy with a user friendly graphic environment. To achieve this, ARGOS has cooperation with Greek Universities and Technological Institutes. To develop and produce its products, knowing in depth the automation needs of greenhouses, is cooperating with a number of companies, such as electrical board manufactures, sheet metal factories and electronic components/sensors suppliers.</p>
<p><b>Offered services/products related to Agriculture/greenhouse industry</b></p>	<p>The company focuses on the development and implementation of ICT technologies in the agricultural sector and especially in greenhouses such as the Greenhouse control systems.</p>
<p><b>Registration in any Agriculture Cluster/association</b></p>	<p>No</p>

<p><b>Impact Level to project Cluster</b> (1 Low – 5 high)</p>	<p>5- Argos Electronics is directly cooperating with growers and greenhouse construction companies to incorporate ICT technologies in agriculture and especially in greenhouses for greenhouse climate and irrigation control.</p>
--	--

<p><b>Name of the Enterprise</b> (include its logo wherever is available)</p>	<p><b>6. AGROinvent</b></p> 
<p><b>Contact details</b></p>	<p>Contact person: Dimitrios Mpesis Email: agroinvent@gmail.com Telephone/Fax: 00306932460611 Website: <a href="https://www.agroinvent.com/en/">https://www.agroinvent.com/en/</a> Address: Athens, Greece</p>
<p><b>Size</b></p>	<p>SME</p>
<p><b>Short presentation</b></p>	<p>AGROinvent constructs machines and automations of agricultural interest, specialising in greenhouses with hydroponic or soil cultures. AGROinvent systems concern the fertigation as well as the control of the greenhouse's microclimate, aiming at the optimisation of all possible conditions, in order to achieve optimum crop growth and production. At the same time, AGROinvent systems are environment-friendly, as they contribute to a rational use of water and energy resources</p>
<p><b>Offered services/products related to Agriculture/greenhouse industry</b></p>	<p>The company focuses on the development and implementation of ICT technologies in the agricultural sector and especially in greenhouses such as the Greenhouse control systems.</p>
<p><b>Registration in any Agriculture Cluster/association</b></p>	<p>No</p>

<p><b>Impact Level to project Cluster</b> (1 Low – 5 high)</p>	<p>5- AGROinvent is directly cooperating with growers and greenhouse construction companies to incorporate ICT technologies in agriculture and especially in greenhouses for greenhouse climate and irrigation control.</p>
--	---

<p><b>Name of the Enterprise</b> (include its logo wherever is available)</p>	<p><b>7. Thrace Greenhouses</b>  A WORLD OF MATERIALS &amp; SOLUTIONS</p>
<p><b>Contact details</b></p>	<p>Contact person: Kyriakos Mistikos Email: papagiannis@thraceplastics.gr Telephone/Fax: +30 210 9875042 Website: <a href="http://www.thracegroup.com">www.thracegroup.com</a> Address: Thrace Greenhouses, Erasmio, Xanthi, Greece</p>
<p><b>Size</b></p>	<p>Large company</p>
<p><b>Short presentation</b></p>	<p>Thrace Greenhouses utilise Geothermal energy sourcesto produce greenhouse tomato and cucumber grown with the hydroponic cultivation method. Thus, Thrace Greenhouses can guarantee the supply of high quality, low carbon footprint vegetables all year round. By operating in their state-of-the-art facilities that currently occupy 14Ha plot of land, Thrace Greenhouses are the largest geothermal greenhouses in Europe. The company is certified for its Good Agricultural Practices by the GLOBALG.A.P. (GGN 4052852805575). Thrace Greenhouses are able to maintain constant supply of nutritious and tasty low carbon footprint vegetables with no cost for the environment: Due to the use of the renewable Geothermal energy, all heating needs are met in an environmentally friendly way, while the hydroponic production method that we</p>

	apply lets us ensure ideal cultivation conditions throughout the year, in full respect towards the environment. Furthermore, THRACE GROUP'S vast experience in the food packaging sector is our asset to create customized packaging solutions, designed to meet any customer's need or specification.
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Geothermal Energy, Hydroponic Agricultural Production, Low Carbon Footprint - Zero Emissions of CO <sub>2</sub> .
<b>Registration in any Agriculture Cluster/association</b>	Yes-Thrace Group
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	5- Thrace Greenhouses is directly connected with the project since it incorporates greenhouse technologies that are related to the project as is the use of geothermal energy for heating.

<b>Name of the Enterprise</b> (include its logo wherever is available)	<b>8. Thrace Nonwovens &amp; Geosynthetics S.A. - Thrace NG</b>  <small>A WORLD OF MATERIALS &amp; SOLUTIONS</small>
<b>Contact details</b>	Contact person: Apostolos Baklavariadis Email: <a href="mailto:geo@thraceplastics.gr">geo@thraceplastics.gr</a> Telephone/Fax: +30 2541 0 45712 +30 2541 0 45658 Website: <a href="http://www.thracegroup.com">www.thracegroup.com</a> Address: THRACE NONWOVENS & GEOSYNTHETICS S.A. Magiko Xanthi, 67100 Xanthi, Greece
<b>Size</b>	Large company
<b>Short presentation</b>	The company is focused on the development of innovative screens and ground cover materials for greenhouses and other applications
<b>Offered services/products related to Agriculture/greenhouse industry</b>	in agriculture/greenhouse

<b>Registration in any Agriculture Cluster/association</b>	Yes-Thrace Group
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	5- Thrace NG is directly connected with the project since it develops equipment (screens) that are used for the development of greenhouses with low inputs and zero emissions.

<b>Name of the Enterprise</b> (include its logo wherever is available)	<b>9. PlastikaKritis</b> 
<b>Contact details</b>	Contact person: Manolis Kikrilis Email: info@plastikakritis.com Telephone/Fax: 2810-308500 Website: https://www.plastikakritis.com Address: P. Street, Industrial Zone, P.C. 71408
<b>Size</b>	Large company
<b>Short presentation</b>	PLASTIKA KRITIS is one of the leading European producers of masterbatches and agricultural films.
<b>Offered services/products related to Agriculture/greenhouse industry</b>	The company is focused on the construction of greenhouses. It is serving with its products the plastics industry, the horticultural & agricultural markets as well as projects related to water-management & environment protection.
<b>Registration in any Agriculture Cluster/association</b>	No
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	5-Plastika Kritis is directly linked with the project since it produces greenhouse cover materials aiming to reduce the input in energy and pesticides in greenhouses.

<b>Name of the Enterprise</b> (include its logo wherever is available)	<b>10. Gardenia Growers Group</b> 
---	---

<b>Contact details</b>	Contact person: Stavros Tsalouchos Email: gardenia@gardenia.gr Telephone/Fax: +30 24280 91246 Website: www.gardenia.gr Address: Agria Pelion - Volos Greece P.C.: 37300
<b>Size</b>	Local
<b>Short presentation</b>	Gardenia Growers Group was founded in 1992 by producers who were already involved in the production of gardenia, with the aim of continuously supplying the European Market, with gardenias of various sizes.
<b>Offered services/products related to Agriculture/greenhouse industry</b>	<ul style="list-style-type: none"> <li>Business support organizations</li> <li>Chambers of commerce</li> <li>Other business clusters</li> <li>Incubators</li> <li>Company development agencies</li> <li>Private business angels and venture capitals for investor forums</li> </ul>
<b>Registration in any Agriculture Cluster/association</b>	No
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	5-The group uses technologies that are capitalised in the project like the low use of energy, use of biomass heating, sustainable use of water and other.

<b>Name of the Enterprise</b> (include its logo wherever is available)	<b>11. Association of Greenhouse producers of Magnesia</b>
<b>Contact details</b>	Contact person: Dimitris Argyrakis Email: agroerg@otenet.gr Telephone/Fax: +302421081888 Address:FilikisEtaireias 39, Volos, P.C.383 34, Greece
<b>Size</b>	SME
<b>Short presentation</b>	Local The association acts in favour of its members. Members of the association are persons from all over the area, registered as agricultural producers,

	<p>vegetables and flowers in greenhouses.</p> <p>It's scope is:</p> <ul style="list-style-type: none"> <li>▪ To act as an informational centre to its members.</li> <li>▪ Help and guide its members to more effective greenhouse production.</li> <li>▪ To solve specific needs and problems of its members.</li> <li>▪ Submitting marketing and price information.</li> </ul>
<b>Offered services/products related to Agriculture/greenhouse industry</b>	<ul style="list-style-type: none"> <li>▪ Chambers of commerce</li> <li>▪ Other business clusters</li> <li>▪ Incubators</li> <li>▪ Company development agencies</li> <li>▪ Private business angels and venture capitals for investor forums</li> </ul>
<b>Registration in any Agriculture Cluster/association</b>	No
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	5-The group uses technologies that are capitalised in the project like cultivation in closed loop hydroponic systems, sustainable use of water and other.

<b>Name of the Enterprise</b> (include its logo wherever is available)	<p><b>12. Agris SA</b></p> 
<b>Contact details</b>	<p>Contact person: Damianos Kirtsonidis</p> <p>Email: info@agris.gr</p> <p>Website: <a href="http://www.agrishorticulture.com/">www.agrishorticulture.com/</a></p> <p>Telephone/Fax: +30 23330 53500/+30 23330 53513</p> <p>Address: AGRIS S.A.</p> <p>P.C.59 300 KLEIDI, IMATHIA</p>
<b>Size</b>	SME
<b>Short presentation</b>	AGRIS SA promotes Horticulture through

	balanced development and constant research. AGRIS SA is a greenhouse crop seedlings producer with two production units in Greece (Klidi, Imathia and Ierapetra, Crete).
<b>Offered services/products related to Agriculture/greenhouse industry</b>	The AGRIS Horticulture Chain includes solutions that serve the distinct needs of every grower comprehensively, effectively and individually. The AGRIS Contract Farming Programme supports - in an organised manner - collaboration between producers and undertakings that process, sell and trade vegetables.
<b>Registration in any Agriculture Cluster/association</b>	No
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	5- AGRIS SAs directly connected with the project since it incorporates greenhouse technologies that are related to the project.

<b>Name of the Enterprise</b> (include its logo wherever is available)	<b>13. Plantas SA</b> 
<b>Contact details</b>	Contact person: ParalosDimosthenis Email: <a href="mailto:contact@plantas.gr">contact@plantas.gr</a> Website: <a href="http://www.plantas.gr/">http://www.plantas.gr/</a> Telephone/Fax: (+30) 226 208 2120 (+30) 226 208 9454 Address: 84th klm National Road of Athens-Lamia, 32 200 Thiva
<b>Size</b>	SME
<b>Short presentation</b>	Aim of the company is, to be the best in finding customers' needs, by providing innovative and cost-effective solutions, through high quality products and services.

<b>Offered services/products related to Agriculture/greenhouse industry</b>	PlantasSA produces grafted plants watermelon, melon, cucumber, tomato, pepper, eggplant, Ordinary (non-grafted) plants: tomato, pepper, eggplant, watermelon, melon, squash, cucumber, lettuce, cabbage, broccoli, cauliflower.
<b>Registration in any Agriculture Cluster/association</b>	No
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	5- Plantas is directly connected with the project since it incorporates greenhouse technologies that are related to the project.

<b>Name of the Enterprise</b> (include its logo wherever is available)	<b>14. Wonderplant SA</b> 
<b>Contact details</b>	Contact person: Themis Makris Email: info@wonderplant.gr Website: <a href="https://www.wonderplant.gr/">https://www.wonderplant.gr/</a> Telephone/Fax:2521081106 Address: Petrousa Drama, P.C 66200
<b>Size</b>	SME
<b>Short presentation</b>	Within the 12Ha of its hi-tech glass greenhouse, its packing-bottling and auxiliary spaces in Petrousa Drama, Wonderplant produces and packages high quality products: high quality hydroponic beef and cluster tomatoes according to the principles of integrated pest management.
<b>Offered services/products related to Agriculture/greenhouse industry</b>	High quality hydroponic beef and cluster tomatoes according to the principles of integrated pest management.
<b>Registration in any Agriculture Cluster/association</b>	No

<p><b>Impact Level to project Cluster</b> (1 Low – 5 high)</p>	<p>5-Wonderplantis directly connected with the project since it incorporates greenhouse technologies that are related to the project.</p>
<p><b>Name of the Enterprise</b> (include its logo wherever is available)</p>	<p><b>15. AGAN EPE</b></p> 
<p><b>Contact details</b></p>	<p>Contact person: PandelisLamprou Email: info@greektomato.gr Website: <a href="http://www.greektomato.gr">http://www.greektomato.gr</a> Telephone/Fax: +306975022609 Address: ThesiKaminia 96, Messini, Messinias, PC 24200</p>
<p><b>Size</b></p>	<p>SME</p>
<p><b>Short presentation</b></p>	<p>Within the 12Ha of its hi-tech glass greenhouse, its packing-bottling and auxiliary spaces in Petrousa Drama, Wonderplant produces and packages high quality products: high quality hydroponic beef and cluster tomatoes according to the principles of integrated pest management.</p>
<p><b>Offered services/products related to Agriculture/greenhouse industry</b></p>	<p>Based on an extensive network of sensors linked to a central computer the managing of the greenhouse is taking place, in order to create the optimal conditions for the production of fine tomato.</p>
<p><b>Registration in any Agriculture Cluster/association</b></p>	<p>No</p>
<p><b>Impact Level to project Cluster</b> (1 Low – 5 high)</p>	<p>5- AGAN is directly connected with the project since it incorporates greenhouse technologies that are related to the project.</p>

<p><b>Name of the Enterprise</b> (include its logo wherever is available)</p>	<p><b>16. ANODOS SA</b></p> 
<p><b>Contact details</b></p>	<p>Contact person: Pantazis Email: anodos@anodosae.com Website: <a href="https://www.anodosae.com/">https://www.anodosae.com/</a> Telephone/Fax:28420.28921, 28420.25038 Address: 3rd km. Ierapetra - GraLygia P.C.72200 Ierapetra</p>
<p><b>Size</b></p>	<p>SME</p>
<p><b>Short presentation</b></p>	<p>ANODOS SA is the leading company in implementing greenhouse systems and cultivation techniques in greenhouse cultivation. ANODOS SA is the dynamic answer to the needs of any modern greenhouse</p>
<p><b>Offered services/products related to Agriculture/greenhouse industry</b></p>	<p>Offers reliable greenhouse systems and equipment suggesting effective solutions for :</p> <ul style="list-style-type: none"> <li>▪ Irrigation and fertilization</li> <li>▪ Water treatment</li> <li>▪ Heating and cooling</li> <li>▪ Saving energy and shading</li> <li>▪ Hydroponic cultivations</li> <li>▪ Propagation material for floriculture</li> <li>▪ Specialized cultivating and post harvesting equipment</li> <li>▪ The nutrition of plants with chemical analyses</li> </ul>
<p><b>Registration in any Agriculture Cluster/association</b></p>	<p>No</p>
<p><b>Impact Level to project Cluster</b> (1 Low – 5 high)</p>	<p>5- ANODOS is directly connected with the project since, as greenhouse construction company, it incorporates greenhouse technologies that are related to the project.</p>

<p><b>Name of the Enterprise</b> (include its logo wherever is available)</p>	<p><b>17. Diamantopoulos Greenhouses</b></p> 
<p><b>Contact details</b></p>	<p>Contact person: Diamantopoulos Ioannis Email: info@e-diamantopoulos.gr Website: <a href="http://e-diamantopoulos.gr/">http://e-diamantopoulos.gr/</a> Telephone/Fax: 27610-22868 27610-25444 Address: 2<sup>nd</sup>klmKiparissia-Filiatron</p>
<p><b>Size</b></p>	<p>SME</p>
<p><b>Short presentation</b></p>	<p>The "Diamantopoulos I. &amp; Co." is active in a wide range of metal constructions and has as main activity the construction of thermal vats for professional use.</p>
<p><b>Offered services/products related to Agriculture/greenhouse industry</b></p>	<p>Provides complete solutions for greenhouse, from design to fitting.</p>
<p><b>Registration in any Agriculture Cluster/association</b></p>	<p>No</p>
<p><b>Impact Level to project Cluster</b> (1 Low – 5 high)</p>	<p>5- Diamantopoulos greenhouses is directly connected with the project since,as greenhouse construction company, it incorporates greenhouse technologies that are related to the project.</p>

<p><b>Name of the Enterprise</b> (include its logo wherever is available)</p>	<p><b>18. DKG Group</b></p> 
<p><b>Contact details</b></p>	<p>Contact person: Katsanos Christos Email: welcome@dkggroup.com Website: <a href="https://www.dkggroup.com/">https://www.dkggroup.com/</a> Telephone/Fax: +30 2310 488.915 +30 2310 488.916 Address: 5 b, Ioustinianou P.C. 551 34,</p>

	Kalamaria, Thessaloniki
<b>Size</b>	SME
<b>Short presentation</b>	DKG Consulting Ltd offers specialized sustainable solutions to individuals, professional groups and corporations within the fresh produce industry creating value through people, and for people, all driven by a brand-centric philosophy.
<b>Offered services/products related to Agriculture/greenhouse industry</b>	DKG Consulting services are focused on greenhouse and farm activities include general advice regarding hydroponic techniques, crop or product selection, cultivar (variety/ies) selection, plant propagation processes, general cultivation practices, distance crop monitoring, feeding solutions recipes, harvesting, packaging and post-harvest practices based on Total Greenhouse Management ® and Total Farm Management® methodologies.
<b>Registration in any Agriculture Cluster/association</b>	No
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	5- DGK group is directly connected with the project since it incorporates greenhouse technologies that are related to the project.

<b>Name of the Enterprise</b> (include its logo wherever is available)	<b>19. AGREK SA</b> 
---	---

<b>Contact details</b>	Contact person: Konstantinos Samantouros Email: agrekae@gmail.com Website: <a href="http://www.agrek.gr/">http://www.agrek.gr/</a> Telephone/Fax: 22210-78502, 22210-85448 Address: GlyfaChalkida P.C.34100
<b>Size</b>	SME
<b>Short presentation</b>	The AGREK K. SAMANTOUROS SA condenses experience over 25 years in the creation of competitive agricultural and livestock farms
<b>Offered services/products related to Agriculture/greenhouse industry</b>	The goal of the company is to provide comprehensive services. Starting from the economical feasibility study, the inclusion envelope in subsidy program, design and construction, to equipment, operation and producer education in farming, AGREK fully covers units which are handled by creating innovative modern constructions leading companies in the sector across the country that will serve as a model and starting point for the development of the primary sector in our country.
<b>Registration in any Agriculture Cluster/association</b>	No
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	5- AGREK SA is directly connected with the project since,as greenhouse construction company, it incorporates greenhouse technologies that are related to the project.

<b>Name of the Enterprise</b> (include its logo wherever is available)	<b>20. EMMANOULIDIS SA</b> <b>ΕΜΜΑΝΟΥΗΛΙΔΗΣ</b> 
---	--

<b>Contact details</b>	Contact person: Dimitra Emmanouilidi Email: info@greenhouses.gr Website: <a href="http://www.greenhouses.gr/">http://www.greenhouses.gr/</a> Telephone/Fax: +30 2310 782 140, +30 2310 778 275 Address: Egnatia Odos, Delta, P.C. 57008
<b>Size</b>	SME
<b>Short presentation</b>	The EMMANOUILIDIS metal constructions company was founded in 1981 in the southwest of Magnesia, Thessaloniki, in the heart of agricultural vegetable production. Since the early years she has been offering her services by finding solutions to farmers' problems and has soon founded her own greenhouse production line.
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Studying structures that facilitate the difficult task of primary agricultural or livestock production
<b>Registration in any Agriculture Cluster/association</b>	No
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	5- Emmanouilidis greenhouses is directly connected with the project since, as greenhouse construction company, it incorporates greenhouse technologies that are related to the project.

<b>Name of the Enterprise</b> (include its logo wherever is available)	<b>21. AGROPLAST SA</b> 
<b>Contact details</b>	Contact person: Chatzikostis Email: info@agroplast Website: <a href="http://www.agroplast.gr/">http://www.agroplast.gr/</a> Telephone/Fax: 23910 91 218 23910 91 140 Address: AthiraPellasP.C. 58005
<b>Size</b>	SME

<b>Short presentation</b>	The AGROPLAST® company, a continually rising firm, was established in 1978 by people with professionalism, knowledge, faith and vision for success. Main purpose is to design, develop and allocate into the market, products and solutions that meet the needs of a modern agriculture,
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Specialized in the production of polyethylene plastic sheets for each type of crop.
<b>Registration in any Agriculture Cluster/association</b>	No
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	5- Agroplast is directly connected with the project since it develops greenhouse cover materials and screens that are used for sustainable greenhouse production.

<b>Name of the Enterprise</b> (include its logo wherever is available)	<b>22. AXAIKA PLASTIKA</b> 
<b>Contact details</b>	Contact person: PapageorgiouArgiris Email: info@achaika.gr Website: <a href="http://www.achaika.com/">http://www.achaika.com/</a> Telephone/Fax: +30 26910 28287 +30 26910 29500 Address: 4, Fteris str., Aigio P.C. 25 100
<b>Size</b>	Large company
<b>Short presentation</b>	ACHAIKA PLASTICS S.A. serves the Greek and European market. Their products have specialized in three main sectors: <ul style="list-style-type: none"> <li>▪ Agricultural</li> <li>▪ Industrial</li> <li>▪ General Distribution Sector</li> </ul>
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Agricultural films, GREENHOUSING FILMS, which are 3 layer coextruded, are

	<p>UV – stabilised for 33 or 45 months.</p> <p>They are available in different film formulations and well adapted to the conditions of use. MULCH FILMS. Our range is designed for the mulching of soils</p>
<b>Registration in any Agriculture Cluster/association</b>	No
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	5- ACHAIKA PLASTICS S.A. is directly connected with the project since it develops greenhouse cover materials for sustainable greenhouse production.

<b>Name of the Enterprise</b> (include its logo wherever is available)	<p><b>23. EuroFilm</b></p> 
<b>Contact details</b>	<p>Contact person: Matzaris</p> <p>Email: info@eurofilm.gr</p> <p>Website: <a href="http://www.eurofilm.gr/">http://www.eurofilm.gr/</a></p> <p>Telephone/Fax: 27410 51900 , 27410 51901</p> <p>Address: Zevgolatio, Korinthia P.C. 20001</p>
<b>Size</b>	Large company
<b>Short presentation</b>	EurofilmMantzaris SA is a modern plastic film industry. It manufactures a variety of plastic films from the finest raw materials using the most sophisticated machinery
<b>Offered services/products related to Agriculture/greenhouse industry</b>	EurofilmMantzaris SA specializes in the production and trade of polyethylene films for agricultural use, packaging and wrapping materials, as well as consumer products
<b>Registration in any Agriculture Cluster/association</b>	No
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	5- EuroFilmis directly connected with the project since it develops greenhouse cover materials for sustainable greenhouse production.

### 1.1.5 Italy

Table 5 – Enterprises related to agriculture/greenhouse sector in Molise Region (Italy)

<p><b>Name of the Enterprise</b> (include its logo wherever is available)</p>	<p>Verde 21</p> 
<p><b>Contact details</b></p>	<p>Contact person: Consorzio Polo Tecnologico Magona Email: info@verdeventuno.it Telephone/Fax: +39 0586 632142 Website: www.verdeventuno.it Address: Via Magona - 57023 - Cecina (LI) ITALY</p>
<p><b>Size</b></p>	<p>Start up</p>
<p><b>Short presentation</b></p>	<p>Verde21 is an innovative Start up Verde21 is an i-srl, or a limited liability company. The company has a share capital of 60,000.00 euros held for more than 51% by natural persons and is regularly registered in the special "start-up-innovative" section of the Business Register of Livorno (Italy). Verde 21 exclusive purpose is the production of innovative services with high technological value.. Verde 21 opera partners are holders of PhD, It carries out research and development activities the overall workforce is constituted for at least 1/3 by PhD students, PhDs or researchers, or at least 2/3 by members or collaborators of any degree with a Master's degree Verde21 is an Energy Service Company, that carry out actions to improve the energy efficiency of buildings, taking on itself the risk of the initiative and freeing the final customer from any</p>

	<p>organizational and investment burden</p> <p>GREEN HOUSE Special issue are related to energy systems for air conditioning with renewable energy sources - a single system provides heating, cooling and air treatment</p> <p>Verde21 produces geothermal systems with vertical (closed circuit) or ground water (open circuit) probes.</p> <p>Furthermore Verde21 promotes the construction of geothermal systems with horizontal probes, which prove particularly advantageous in terms of cost / benefit ratio given the climatic characteristics of our peninsula.</p>
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Startup involved in the production of greenhouses energy systems and in innovative solutions
<b>Registration in any Agriculture Cluster/association</b>	No
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	3–high, the company is involved in association

<b>Name of the Enterprise</b> (include its logo wherever is available)	<p>VivaioCiucciovè</p>

<b>Size</b>	SMEs

<p style="text-align: center;"><b>Short presentation</b></p>	<p>The Farmer was founded in 1986 by the intuition of Pietro Ciucciovè and Gabriella Speranzoni to start one of the first activities in the Marche region that produced young plants of vegetables and flowers on honeycomb containers, pressed cubes and jars.</p> <p>Today the company covers a total area of about 10 hectares, of which 20,000 m<sup>2</sup> occupied by greenhouses heated with clean energy and equipped with irrigation bars. The sowing, germination, transplantation and order preparation phases are carried out in two laboratories equipped with the best latest generation equipment: 2 precision seeders, 2 dicing machines, 2 germination cells, 2 automatic transplants (with 8 or 16 clamps) , 2 potting machines, 3 Vertical Big Bale loaders and a led light system. The company also has a large fleet of vehicles, through which it guarantees fast and professional deliveries. A company expansion is being planned for the construction of an additional 8,000 m<sup>2</sup> of greenhouses, which will complete the use of existing renewable energies.</p> <p>The Azienda Agricola Ciucciovè Pietro has decided not to be indifferent to the environmental problems and the drastic climate changes that the use of fossil fuels entails.</p> <p>For this reason, in 2012, started a project of business innovation that minimized dependence on fossil fuels, in particular diesel fuel, but at the same time guaranteed an efficient heating of greenhouses even in the case of very low</p>
--	--

	<p>night temperatures.</p> <p>To ensure this, a geothermal plant was built consisting of 102 wells 100 m long each, connected to 9 rooftop heat pumps of 100 kWt each, and a 286 kW raised-integrated photovoltaic system. They are two forms of renewable energy that aim at the natural conservation of our planet and respect for all humanity.</p>
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Offered services related to Agriculture, produced young plants of vegetables and flowers on honeycomb containers, pressed cubes and jars with geothermal energy
<b>Registration in any Agriculture Cluster/association</b>	NO

<p><b>Contact details</b></p>	<p>Contactperson:Salvatore Pisani          Email: info@professioneserre.it          Telephone/Fax: +39 081955284/ +39 08119308575          Website: www.professioneserre.it          Address: Via A. Manzoni          84010 San Marzano sul Sarno(Salerno) ITALY</p>
<p><b>Size</b></p>	<p>SMEs</p>
<p><b>Short presentation</b></p>	<p>Profession Serre was born in 2005 from over 30 years of experience in the greenhouses sector. F Spirit of initiative, innovation, highly qualified personnel, market research, in this company, form excellent tools to satisfy the domestic and foreign market. Profession Serre becomes a producer of greenhouses, realizing any type of agricultural</p>

	<p>greenhouse for horticultural and floricultural productions, warehouse greenhouses, farm greenhouses, photovoltaic greenhouses, garden center greenhouses, and greenhouses for any other use and coverage. All the materials used in the processing of the structures are certified and tested before being put on the market. Production The Serre Profession dedicates much attention to the details of the greenhouses, in fact, failing to find, in a market now standardized, suitable materials, dedicates part of its work to the production of the same, combining functionality and technology in respect of the economy. Moreover, it always lends itself to the study of new technologies adopted by the market, this to provide a new and innovative product. Technical study The greenhouses are designed by our technical office that employs a team specialized in the field, which meets the criteria of design composition based on synergies between, solutions and customer needs, crop needs, climatic conditions, completing with flow calculations and structural , statements designed and supplied by engineers according to current regulations, available at our offices.</p> <p>An efficient technical assistance service, with the constant presence on the construction sites of our technicians, guarantees each customer obtaining the maximum result from his purchase: the added value of Professione Serre is the technical and commercial assistance that starts from the initial phase of the design and extends to the post-sale phase.</p> <p>The system of technical study and marketing is certified according to the quality standards UNI EN ISO 9001: 2008 and CE 1090 and UNI EN ISO</p>

<b>Size</b>	SMEs
<b>Short presentation</b>	<p>CofealSrl is a stable point of reference in the field of production of vegetable garden and greenhouses, structures for storing materials and agricultural tools and irrigation systems, thanks to the experience gained in over 45 years of activity. With around 10,000 square meters of production and warehouse space, Cofeal can count on a factory created specifically to meet every need regarding the production cycle.</p> <p>The use of machines that have automated and standardized production guarantees the production of high quality products, carefully controlled during each processing.</p> <p>All Cofeal products are carefully designed, manufactured and installed on the basis of the long experience acquired in this sector and the constant updating of internal professionals. The refined quality of the materials, all of first choice, allows to create greenhouses highly resistant over time and to the elements.</p> <p>In addition, every product item has been carefully studied in order to know every peculiarity: in this way Cofeal can respond in a timely manner to any customer requirement.</p> <p>The design solutions are implemented on the basis of an in-depth study customer requests with the use of technical documents necessary forevaluate every aspect of the commission. The cofeal staff is able to offeralso any assistance in the implementation phase.</p>

<p><b>Name of the Enterprise</b> (include its logo wherever is available)</p>	<p>AGRIMEC snc</p> 
---	--

<b>Contact details</b>	Contact person: AGRIMEC snc Email: info@agrimec.it Telephone/Fax: +39035-810747/ +39 035-812679 Website: http://www.agimec.it Address: Via F.lli Calvi 1, Casazza (BG) ITALY
<b>Size</b>	Large Company
<b>Short presentation</b>	<p>AGRIMEC snc was founded in 1979.</p> <p>AGRIMEC immediately gained significant experience in the field of production and installation of greenhouses for floriculture and horticulture, both nationally and internationally.</p> <p>It is still administered by the Spelgatti family.</p> <p>The property (8,000 square meters) is located in the emerging industrial area of Casazza (BG), a commercial location in the enchanting Valle Cavallina.</p> <p>Four large sheds make up the covered part of the production plant. The management and technical-administrative offices, the production departments and the warehouse are located in this area. Tests and tests are carried out beforehand in order to approve the functionality of the new solutions.</p> <p>In the outdoor area, a wide exposure of the various structures was also set up.</p> <p>Plants and Technologies</p> <p>In thirty years of activity the company has innovated production technologies alongside the professional skills of its workers.</p> <p>The design activity makes use of the latest finite element drawing and calculation tools.</p> <p>It has consolidated in Italy and abroad an adequate sales network able to provide customer assistance starting from its first contact with the company.</p> <p>AGRIMEC is also affiliated with numerous road haulage companies.</p> <p>Quickly and professionally deliver their goods throughout Italy on terms not burdensome for the customer.</p> <p>Turnkey service</p> <p>It makes use of skilled craftsmen for the installation of</p>

	<p>its plants. The assembly of a greenhouse or a plant is an aspect of primary importance. It must be entrusted to professionals with skills, experience and organization. At the request of the customer AGRIMEC can take over the management of the work and supply complete turnkey systems.</p> <p><b>Greenhouses and Energy</b></p> <p>In recent years, the design activity has been dedicated to the energy issue, which is so important in the horticultural and horticultural sector.</p> <p>AGRIMEC has been interested in renewable energy since the first hour.</p> <p>Since November 2006, a photovoltaic solar plant of 19.2 kW has been operating at its premises. It is a pilot project that is presented to its customers as a model to follow, an invitation to use new forms of energy for the greenhouses.</p> <p>Since 2010 AGRIMEC has installed a gas cogeneration plant through which it produces hot water for its own internal needs and integrates the electricity already produced with the photovoltaic system, placing itself in a condition of energy independence.</p>

Moro, snc – 18010 Terzorio Italy</p>
<p><b>Size</b></p>	<p>Large Company</p>
<p><b>Short presentation</b></p>	<p>The company METALSERRA, was founded in 1979, from the idea of the owner ANTONIO PERINI, with the marketing of greenhouses and related items. With the increase in requests and work, in the early 90s METALSERRA became a producer of greenhouses, opening a new shed, equipped with related machinery for sheet metal processing. The vast range of greenhouses is designed to meet the needs of the end user, given the enormous flexibility of the synergies that the company has.</p> <p>In 2002 METALSERRA was awarded the MERCURIO D'ORO prize for entrepreneurial merits and dedication to work and its development. Over the years, METALSERRA has made its way into the market, with excellent results and customers throughout Italy and abroad, becoming a real reference point in the world of greenhouses.</p> <p>Greenhouses in glass          Metalserra offers a wide range of standard and oversized greenhouses. The structures are built and</p>

	<p>designed according to the canons applied in each region, in terms of steel structures, therefore with different snow and wind overloads depending on the area in which it is built. On design they are also carried out oversized.</p> <p>We design and build greenhouses for every need, standard and customized.</p> <p>Today Metalserra is able to offer, a system designed and designed to integrate photovoltaic panels on greenhouses, roofs, canopies and sheds, with solutions designed specifically for every need. In 2010 Metalserra built the largest photovoltaic greenhouse in Europe.</p> <p>Tunnel greenhouses</p> <p>The arched greenhouses produced by Metalserra combine excellent performance in crop management with reduced plant and maintenance costs. The experience of Metalserra in the constructions of shutters, has allowed the development of structures with high internal brightness and with ventilation systems that guarantee the ideal microclimate for different types of crops. All our greenhouses are in UNI -EN 13031-1 European Standard.</p> <p>The tunnel greenhouses are made of 80 × 80 square tube columns and 60/80 diameter tube arches. All elements are protected against corrosion by galvanizing. The greenhouses provide single and multiple naves of mt. 8.00 / 9.60 / 12.80, with step from mt. 2.00 / 2.50 / 3.00 and height to the eaves up to mt. 5.00. The cover can be made with plastic films that guarantee high reliability. The range of side openings and ridge available makes it possible to satisfy every need.</p>

<b>Legal Status</b>	Public Equivalent Body
<b>Short presentation</b>	<p>An important parameter of the international recognition that the University enjoys is the universities' international rankings. In less than 10 years of operation, the CUT has occupied high positions in international rankings. Specifically, in the 2017-18 Times Higher Education World University Rankings (THE), the CUT is ranked 351-400 worldwide, while in the year 2016-17 it has been ranked among the top 401-500 universities worldwide as well as 16th among the world's top Universities. At the 2017 Young University Rankings, the CUT is ranked 88th in the top new universities in the world, 12th top-of-the-line university and 201-250 among the top European universities.</p> <p>The international networking of the university is realized through its participation in 67 international</p>

	<p>organizations and bilateral cooperation with 78 universities abroad which lead to beneficial inter-university synergies. In addition, the internationalization strategy is enhanced through its participation in the Erasmus mobility programme and the national management of the IAESTE programme.</p>
<p><b>Offered services/products related to Agriculture/greenhouse industry</b></p>	<p>CUT is constantly committed to promoting research excellence, and is internationally distinguished in this area, providing a total of 40 million Euros of external funding for 227 research programmes. In view of the modern needs and requirements of the single European market and with the aim of contributing to the technological upgrading and modernization of the agri-food sector of the island, the Cyprus University of Technology established the first Department of Agricultural Sciences, Biotechnology and Food Science in Cyprus. The Department offers a university degree in agricultural sciences, specializing in three main directions:</p> <ul style="list-style-type: none"> <li>• Crop Science and Technology</li> <li>• Food Science and Technology</li> <li>• Animal and Dairy Science</li> </ul>
<p><b>Registration in any Agriculture Cluster/association</b></p>	<p>N/A</p>
<p><b>Impact Level to project Cluster</b> (1 Low – 5 high)</p>	<p>5</p>
<p><b>Name of the actor</b> (include its logo wherever is available)</p>	<p>FOSS Research Centre for Sustainable Energy of the University of Cyprus (UCY)</p>

<p><b>Short presentation</b></p>	<p>The University offers more than 100 conventional face-to-face (on campus) and distance learning online programmes at the Bachelor, Master and Doctorate level, hosting more than 11,500 students from all over the world. As an entrepreneurial digital university, it responds to the needs of the knowledge-based society. Research at the University focuses on a variety of global and local issues, including health, complex networks, social organisation, education, ICT, engineering, and environmental sustainability. Researchers examine contemporary challenges from a wide range of perspectives, including technological and scientific advances, and modern culture and thought. They apply their expertise, derived from addressing local, regional and national concerns, to key issues with global impact; and develop teams to bring disciplinary strengths together to approach such issues. Cutting-edge research is carried out in the areas of Educational Technology, Virtual and Augmented Reality, and Artificial Intelligence and Machine Learning.</p>

<p><b>Offered services/products related to Agriculture/greenhouse industry</b></p>	<p>School of Sciences and Engineering</p> <p>a) Nutrition and Dietetics program:          The aim of the programme may be summarised as: to produce, through well designed and appropriate courses, adequately trained and competent graduates who are equipped for the world of work in the 21st century and who can apply their knowledge of food and nutrition/dietetics for the benefit of individuals and the public health in general across Cyprus and/or their chosen country of practice.</p> <p>The programme has both an academic (theoretical and practical) skills and a dietetic market orientation. It focuses on studying and analyzing the latest trends and developments in the science of Nutrition and Dietetics.</p> <p>b) Environmental and Energy Management programme aims to:</p> <ul style="list-style-type: none"> <li>• Give students a broadly based scientific understanding of the environment, recognizing the legislative, economic and political drivers for improvement in environmental performance and energy management in all types of organisations</li> <li>• Prepares students for Professional Certifications in Environmental Management Systems (ISO 14001) and in Energy Management Systems (ISO 50001)</li> <li>• Consider the complex ramifications which result from human exploitation</li> </ul>
--	---

	<p>of the environment, the management of energy and to meet the requirements of sustainable development.</p> <ul style="list-style-type: none"> <li>• Provide students with an in-depth knowledge on climate change adaptation and mitigation strategies.</li> <li>• Prepare students to develop knowledge on the concepts of low carbon economies, cyclic economy and smart cities.</li> </ul>

<b>Legal Status</b>	Public
<b>Short presentation</b>	The <b>Institut Sophia Agrobiotech</b> (UMR Inra 1355, CNRS 7254, UNS), an international research institute funded by Inra, CNRS and Université Nice Sophia Antipolis. Situated at the interface of Environment and Agriculture, the main research topics concern the study of <b>plant-interactions, pathogens and symbionts</b> and their dynamics in time and space. For this, the Institute brings together strong expertise in <b>comparative, evolutionary and functional genomics, in community ecology and agronomy</b> . The institute aims to address some of the challenges offered for agricultural research in the field

	of ecological management of agroecosystems. The ultimate goal is to integrate this knowledge in the development of <b>innovative agronomic strategies</b> (integrated pest management, biological control), more respectful of the <b>environment</b> and human <b>health</b> .
<b>Offered services/products related to Agriculture/greenhouse industry</b>	<ul style="list-style-type: none"> <li>• Address the challenges offered for agricultural research in the field of ecological management of agroecosystems.</li> <li>• Integrate research knowledge in the development of innovative agronomic strategies</li> </ul>

<p><b>Short presentation</b></p>	<p>The research group of prof. Giorgio ProsdocimiGianquinto are working on Serra 2.0 to improve environmental management of greenhouses. The greenhouse is seen as a machine for intensive cultivation, and how it adapts to the Mediterranean climate. The products grown in greenhouses have become indispensable, from the production of food to nursery gardening.</p> <p>Although greenhouse productivity is typically higher than open field cultivation, it becomes necessary to improve its efficiency and sustainability, and there are several ways to do this: reduce the amount of resources used through a better greenhouse design; improve the use of technical means, from fertilizers, to growing substrates, plastic films and antagonistic insects, improving production processes; activate a monitoring system aimed at improving productivity and growth environment.</p> <p>The ecological footprint of production in a sustainable greenhouse can be significantly reduced, as well as running costs.</p>

<b>Short presentation</b>	In the recent activity of EGOCREANET (c / o Incubator of the University of Florence) the aggregation of an Operational Group of European Partnership (PEI-AGRI) began to develop the "SERRE-NUTRACEUTICHE" HIGH TECH project, aimed at improving the quality of the products and to increase the effectiveness and efficiency of food production processes with high nutraceutical quality.  The Nutraceutical Serre are developed in the field of technological innovation of the protected food Serricoltura. The project aims to develop eco-sustainable circular economy farming techniques, with low environmental impact and easily adaptable to increasingly unfavorable physical and climatic conditions.  Collaborate as a partner: University of Florence, University of Pisa, CNR Florence, Tuscan Food Quality Center and other research and enterprise bodies that aim to develop a European design to support the development of the circular economy of Serra Nutraceutica as a development strategy local zero km

	<p>and zero waste.</p> <p>The formation of a GO-PEI-AGRI pursues an open and articulated concept of cooperation because multidisciplinary, aimed at stimulating innovation and the growth of knowledge, intensifying regional links between research and innovation of rural agri-food system enterprise on cross-cutting themes wide-ranging for the production chain, seen in relation to the development of Tuscan pedo-climatic areas with particular potential for growth and environmental sustainability as well as food safety of production processes, in the context of climate change and socio-economic risks of development and of occupation of the area.</p> <p>For this purpose EGOCREANET proposes to collaborate in the organization of GO-AGRI-PEI Operational Groups.</p> <p>The Regional Call for these projects, funded 100% by the European Community through the regions, are based on the idea of "interactive innovation" in agriculture in a network with other subjects of the knowledge growth system. Therefore the GO-AGRIPEI must unite in a strategic collaboration different actors around a concrete idea to facilitate the co-creation and cross-fertilization of knowledge and innovation, they can hopefully activate different financial sources from European or National projects and be included in the network</p>

<b>Short presentation</b>	The University is involved in a project related to geothermal energy. The project bringing geothermal energy and spirulina together involves EGP and Co.Svi.G. together with Photosynthetic & Microbiological, a spin-off of the Department of Agricultural, Food and Environment at the University of Florence. The project is about the construction of the world's first greenhouse for the cultivation of spirulina heated by the earth, with smart and sustainable reuse of the CO2 waste produced by geothermal plants. At the 125-sqm plant, spirulina is grown in open tanks and photobioreactors at a rate of 60 grams per day. Chihuahino geothermal power plant. The plant, in operation with an installed capacity of 20 MW, produces about 150 million kWh per year, avoiding the emission of 100,000 tonnes of CO2 into the atmosphere, and saving fossil fuels equal to 32,000 TOE (tonne of oil equivalent) annually . A "Superfood" for Space

	<p>The results achieved by Enel Green Power and Co.Svi.G over the first twelve months of testing are encouraging: the geothermally-heated greenhouse is able to produce 25% more spirulina with 30% less cost, compared to production in other environments.</p> <p>"Spirulina is considered a " superfood ": it's rich in protein, it has antibiotic and antiviral properties and it's one of the most powerful nutrient sources available to humans"</p> <p>NASA is considering spirulina as a potential food source for astronauts on long missions to the moon and in the future to Mars.</p> <p>Spirulina prevents cardiovascular disease and has one of the most useful properties in space, its weight: just one kilogram, in fact, has the nutritional value of about 1000 kilograms of vegetables.</p> <p>Energy from the territory, for the territory</p> <p>The commercial perspectives of Enel Green Power and Co.Svi.Gi project has been welcomed by local Tuscan institutions, who look favorably at the possibility of creating an entire supply chain for the cultivation of spirulina for pharmaceuticals and food use, starting with geothermal energy.</p>

<p><b>Legal Status</b></p>	<p>Public</p>
<p><b>Short presentation</b></p>	<p>IMPROVEMENT OF SERIAL SERIES WITH LED LIGHTS Measure: 16 - Cooperation Type of surgery: 16.1.1 - Establishment and management of EIP operational groups on productivity and sustainability in agriculture 16.2.1 - Implementation of pilot projects and development of new products, practices, processes and technologies Description of operation: MiProLed - Improvement of the lampshades with led lights Purpose: The project intends to refine the technical and scientific knowledge on LED lights by directly involving companies to make them aware of the advantages and to become familiar with their use. The operational objectives are as follows: a) improve the productivity of heated greenhouses in the autumn winter; b) to improve the quality of plant nursery products produced in a confined environment; c) identifying the horticulture and nursery products for which the LED system is cost-effective and sustainable from an economic point of view; d) to expand the use of greenhouses and human resources available at the horticultural nurseries; e) to develop a protocol for the use of the new lighting</p>

	<p>system, which can be immediately transferred to the Veneto's horticulture and flower farms.</p> <p>The project involves several companies in order to cover different production areas along the flower and nursery supply chain: the proposing company, az. VaninVivai, is specialized in the production of propagation material; the az. Vergerio is in the production of flower pot plants and the az. Zocca cultivates spirulina algae. It is clear how, for this production, the modest natural winter light conditions of the Po Valley constitute a strong limiting factor. The presence of a company that develops LED lamps (Ambras.r.l.) is functional to the need to develop technologies in collaboration with the research organization (DAFNAE - University of Padua). The latter guarantees the refinement of the technique according to the scientific evolution and the control / management of the experimentation with specifics. Florveneto acts as an incubator of this innovative approach, which focuses on the crucial phase of production qualification / differentiation. Finally PianetaFormazione has developed training projects aimed at the technical and operational updating of producers and production workers in question.</p>

<b>Short presentation</b>	<p>The Institute of Biometeorology (CNR-IBIMET) carries out research, technology transfer and training activities in the areas of Meteorology and Applied Climatology, management, protection and development of the territory and the study of global changes.</p> <p>In recent years, particular attention has been paid to the use of innovative methodologies, such as mathematical modeling and precision sensors, in order to guide agronomic techniques and / or business choices in order to limit the impact on the environment. Among the projects carried out in this sector we must remember those that led to the development of mathematical models for the prediction of peronosporic attacks and for "precision farming" activities in viticulture, for the estimation of yields in the cereal field and for the calculation of the budget water, as well as the development of expert systems for the management of fertigation in closed-cycle tomato crops. In the field of equipment development the CNR-IBIMET has designed and implemented low cost agrometeorological stations with data transmission via modem (radio, GSM, satellite), sensors and systems for the evaluation of soil erosion, FACE systems (Free Air CO2 Enrichment), CO2 flow measurement systems, systems for the optimal management of irrigation of ornamental plants in pots, grown in greenhouses, etc.</p> <p>Among the IBIMET projects concerning the horticultural sector and in particular the optimization and automatic management of irrigation, limited to the last ten years, we mention:</p> <ul style="list-style-type: none"> <li>- Project "Optimization of water resources in nurseries", conducted in collaboration with CeSIA - AccademiadeiGeorgofili and financed by the EnteCassa</li> </ul>

	<p>di Risparmio of Pistoia and Pescia.</p> <ul style="list-style-type: none"> <li>- IDRI Project: "Rationalization of the use of water resources and fertilizers in nursery gardening", funded by ARSIA (Regional Agency for the Development of Agriculture in the Region of Tuscany). As part of this project, the CNR-IBIMET conducted tests to evaluate the applicative possibilities of sensors for measuring water resources and fertilizers in nursery gardening.</li> <li>- Project "Development of a support system for the management of soil cultivation systems", in collaboration with the Department of Agronomic Sciences and Management of the Agro-forest Territory - University of Florence and the Department of Biology of Agricultural Plants - University of Pisa, financed by MIUR (PRIN 2003). As part of this project, a DSS was created for the management of the irrigation and nutritional component of over-ground greenhouse cultivation: SGX-pomodovers. 1.0.</li> <li>- Project "Physiological and technological aspects of the mineral nutrition of horticultural plants grown out of soil with closed-loop systems and effects on the phytosanitary status of crops", in collaboration with the Department of Biology of Agricultural Plants - University of Pisa, funded by MIUR (PRIN 2005). As part of the project, the "SGX-Pomodoro vers. 2.0: Support system for the management of closed-loop fertirrigation of off-soil tomato crops ", a system that integrating simulation models of the main parameters represents a tool for scenario analysis, aimed at long-term strategic choices.</li> <li>- Project ECO.IDRI.FLOR. (ECO-efficiency of the IDRica management in FLORovivaismo: resources, technologies and systems for the optimization) - "Development of a system for the automatic management of fertigation in the horticultural field", financed by the Mi.PAAF. realized the experimental prototype Hydro, an automatic system for the optimal control of the irrigation of ornamental plants in pots grown in the greenhouse, starting from measurements</li> </ul>

	<a href="#">x_en?OpenDocument</a>
<b>Short presentation</b>	The Agricultural Research Institute (ARI - see organizational chart) is a Department under the Ministry of Agriculture, Rural Development and Environment, of the Republic of Cyprus. The ARI was founded in 1962, after the independence of Cyprus, in cooperation with the Special Development Fund of the United Nations and the Food and Agriculture and became the property of the Government of Cyprus in 1967.
<b>Offered services/products related to Agriculture/green house industry</b>	<p>The Agricultural Research Institute (ARI) conducts feasibility and theoretical research aimed at the rational increase of agricultural and livestock production and upgrading of product quality. Directions in which research is directed at the Institute are: Arboriculture - Viticulture, Plant Breeding, Horticulture - Floriculture, Plant Protection, Soil - Water Use and Environment, Animal Production, Rural Development and Agrobiotechnology.</p> <p>The ARI has a Central Laboratory, a library, other well-equipped special laboratories, greenhouses and cold storage chambers, vegetable germplasm bank and herbarium. In its experimental mansion in Athalassa, ARI keeps its animal units and conducts the work in plant breeding. There are also experimental stations in Acheleia and Zygi for citrus, subtropical plants and vegetables, Saitta for deciduous trees and Xylotymbou and Polis for cereals. Also, experiments conducted in the fields of producers in various regions. The Agricultural Research Institute conducts research aiming to create and transfer knowledge for the development of the primary sector and to solve problems at the farmer's level. The research results are transferred to stakeholders through modern educational programs and dissemination tools. Its research activity strengthens rural development and contributes to the adoption of a sustainable rural policy and innovation offer.</p>
<b>Registration in any Agriculture Cluster/association</b>	The Institute cooperates with UN agencies dealing with agriculture (FAO, IAEA), other international organizations (IPGRI, ICARDA, ICRISAT, AARINENA, CIARD), the EU, and with research and academic institutions in Cyprus and other

	countries under bilateral agreements.
<b>Impact Level to project Cluster</b> (1 Low – 5 high)	5
<b>Name of the actor</b> (include its logo wherever is available)	Cyprus Agricultural Payments Organization (CAPO) 
<b>Contact details</b>	Address: 20 Michael Koutsofta, (Esperidon & Michael Koutsofta), 2000, Nicosia, P.O.Box 16102, 2086 Nicosia T: +357 22 557777 Fax: +357 22 557755 E-mail: <a href="mailto:info@capo.gov.cy">info@capo.gov.cy</a> Website: <a href="http://www.capo.gov.cy">http://www.capo.gov.cy</a>
<b>Short presentation</b>	The Cyprus Agricultural Payments Organization (CAPO) was established under Council Regulation (EC) No. 1258/1999 on the financing of the Common Agricultural Policy, of the European Union. Within the scope of Cyprus' preparations to enter the European Union, on June 27th 2003, the House of Representatives enacted Law No. 64(I) 2003 entitled "The Establishment and Operation of the Agricultural Payments Organisation and other Related Matters Law". According to Law No. 64(I) 2003, CAPO is an independent legal entity that does not come under any Ministry or Department of the Government. It was established and it operates as an autonomous public organisation based on its own legislation that provides it with valuable flexibility, to respond effectively to the stringent standards and time limits set by the Community. The head of CAPO is the Commissioner of Agricultural Payments, who is appointed by the Council of Ministers. The Commissioner is aided in his work by the Assistant Commissioner.
<b>Offered services/products related to Agriculture/green house industry</b>	CAPO has the authority and the competence to take all necessary measures to ensure the attainment of its aims and the correct application of The Agricultural Payments Organization Law No. 64(I)2003, the regulations which set out the necessary procedures for the agricultural aid payments to the recipients and of EU's relevant legislative acts. In particular,

	<p>the Cyprus Payments Organization:</p> <ul style="list-style-type: none"> <li>• maintains and administers the Operational Fund and the Payments Fund;</li> <li>• checks and approves payments concerning activities which may be financed by the Payments Fund;</li> <li>• effects payments to the beneficiaries;</li> <li>• keeps all accounts in relation to any payments made to the beneficiaries;</li> <li>• is vested with the structure, services and staff as provided in Part IV of Law 64(I)/2003;</li> <li>• assigns part of or all of the functions for the approval of payments to delegated bodies which concern the Payments Fund from which the following expenditure is made:             <ol style="list-style-type: none"> <li>1) Direct payments to the beneficiaries in accordance with the measures in force within the framework of the Common Agricultural Policy of the European Union.</li> <li>2) Payments to the beneficiaries in accordance with the operating rural development schemes laid down in Regulation 1257/99/EC and Regulation 445/01/EC.</li> <li>3) Complementary or state aids to the beneficiaries which are to be provided exclusively by the Cyprus Republic upon EU approval as well as in respect of procedures concerning the Technical Services and the Integrated Administration and Control System (IACS).</li> </ol> </li> </ul>
<p><b>Registration in any Agriculture Cluster/association</b></p>	<p>N/A</p>
<p><b>Impact Level to project Cluster</b> (1 Low – 5 high)</p>	<p>5</p>

<b>Short presentation</b>	Rational use of resources in nursery gardening: fertilizers, energy, water Fertilizers, energy and water are the main productive factors of agricultural crops. In the horticultural sector, as in all other sectors of agriculture, there is a long series of initiatives, also of a regulatory nature, aimed at reducing or, better, rationalizing the use of these factors, by reducing production activities to the way of a more sustainable agriculture. In recent years, ARSIA has promoted and financed numerous actions aimed at drawing a realistic picture of the regional situation with regard to the use of these factors, with the aim of defining integrated production disciplinary measures, pursuant to Law no. 25/99, applicable to our realities.

	<p>These activities have also made it possible to create cognitive and operational tools useful to responsible technicians and growers, even outside of any obligations assumed under measure 6.2 of the Rural Development Plan of the Tuscany Region. ARSIA were involved in the publications of three papers related to "fertilizers", the "energy efficiency of greenhouses" and "the responsible management of water", a resource object of increasingly worried attention.</p>

S. Lucia Superiore 84091 Battipaglia (SA)
<b>Legal Status</b>	Public
<b>Short presentation</b>	<p>SEGIS INTEGRATED SYSTEM FOR GREENHOUSE IRRIGATION MANAGEMENT</p> <p>The SEGIS project allows an intelligent control of irrigation systems based both on the observation of the agro-environmental parameters, through an advanced wireless sensor network, and on the analysis of the soil-plant-atmosphere system in the greenhouse, through sophisticated models for the estimation evapotranspiration and hydrological balance. The processing of the collected data, carried out in real time, makes it possible to identify the areas where irrigation is necessary and the corresponding water volume to be supplied.</p> <p>The main innovations introduced by SEGIS compared to the systems available on the market today are:</p> <ul style="list-style-type: none"> <li>- Integration in real time between the acquired data and models for the calculation of the irrigation volume and of the intervention time;</li> <li>- Integration in real time between the evaluations performed by SEGIS and the irrigation system control.</li> </ul> <p>Through this tecnoclogia one can:</p> <p>Verify the accuracy of the estimation of the irrigation needs resulting from the currently adopted procedures, with particular reference to the crops of the IV gamma sector through the monitoring of the volumes administered and the quantitative yields of the products;</p> <p>Integrate the current methods of processing and distribution of irrigation council with improvements at the company level;</p>

	<p>Carry out cost-benefit analysis deriving from the adoption of SEGIS with particular reference to energy costs;</p> <p>Dissemination and widespread information on the benefits resulting from the adoption of SEGIS, with the dual objective of improving the technical skills of agricultural operators and redeveloping the irrigation sector.</p> <p>SEGIS was designed for typical cold greenhouses spread in southern Italy and throughout the Mediterranean region, but can easily be adapted to different types. It therefore has a high degree of transferability, and the particular configuration of the data transmission network makes it highly flexible compared to the size of the company's plants and their distribution in the territory. The demonstration activities, starting from the direct comparison of SEGIS and traditional-run greenhouses, will make it possible to make visible the advantages in terms of production, economy and environment of the new technology</p>
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Offered services/products related to Agriculture/greenhouse industry

<b>Legal Status</b>	Public
<b>Short presentation</b>	<p>Mobile urban greenhouse for hydroponic cultivation of salads.</p> <p>This is the result of the Ur.C.A. (Urban Contemporary Agriculture), funded by the Tuscany Region, with funds for agri-food research.</p> <p>The project originated from the collaboration between the Abita Research Center of the Department of Architecture and the Department of Agricultural Production Sciences of the University of Florence, which proposes urban agriculture as a strategy for the redevelopment of unused and marginal areas of the city. Created in partnership with the Cammelli agricultural company, the prototype was physically developed by IdromeccanicaLucchini.</p> <p>A removable greenhouse, where vegetables grow with a tenth of the water required by agricultural land, without the need for soil and fertilizers.</p> <p>The hydroponic technology used, which does not require the presence of land, makes this project functional to the city and its citizens, with the creation of shared green spaces and vegetable cultivation in protected and sustainable spaces.</p> <p>Made with particular attention to design and architectural quality, the greenhouse fits perfectly into the urban environment and offers the possibility of creating alternative and zero-kilometer food networks.</p>
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Greenhouses for urban use, hydroponic technology

<b>Legal Status</b>	NGO

<p><b>Short presentation</b></p>	<p>The Agronomists Council was established in March 1987 with the House of Representatives' Resolution on the Registration of Agronomists Law No 32 of 1987. The establishment and operation of it is rightly considered to be the corollary of the long and laborious effort of the Agronomists to guarantee the Agricultural Profession, and recognizing this need by the state.</p>
<p><b>Offered services/products related to Agriculture/greenhouse industry</b></p>	<p>The Council's primary responsibility is to examine the professional training of applicants and to register them in the Register of Agronomists after they are satisfied that they possess the required academic qualifications and meet the conditions that allow them to practice the Agriculture as explicitly set out in the legislation. The ultimate aim of the institution as far as society is concerned is to ensure that citizens are provided with quality services in the field of agricultural sciences, to highlight the work and responsibility of the agronomist in providing safe and healthy agricultural and other products and the protection of human health and of the environment.</p>

<b>Legal Status</b>	NGO
<b>Short presentation</b>	The Pancyprian Association of Agronomists was founded in 1959, initially as a club, and was registered as a Society in 1982. Its initial objective was to bring together the agronomic potential of Cyprus to serve the objectives of Rural Development and to strengthen the links between the agronomists of that time. Although it was the first trade union organ of the Agronomists, it did not deal with trade unionism since the rights of its members were to a large extent also for the data of the time, and the jobs were more than the graduates of the agronomic schools.
<b>Offered services/products related to Agriculture/greenhouse industry</b>	Based on this background, the Association, through interventions, complaints, meetings with competent bodies and services and amendments to legislation, has made it possible for several projects to be claimed by agronomists and to introduce mechanisms to monitor the implementation of the relevant law.

<p><b>Legal Status</b></p>	<p>Public / Private</p>
<p><b>Short presentation</b></p>	<p>The Cluster CAT.AL association is an aggregation of</p>

	<p>Lombard companies, universities and research centers that collaborate to increase and improve technological development and innovations in the agri-food sector. Through this synergy, a network of relationships and shared knowledge is created and strengthened to foster sustainable and forward-looking economic growth. The Cluster promotes the unions and collaborations between specialized companies at all levels of agri-food and agro-industrial chain. Furthermore, CAT.AL and its associates work together to strengthen territorial companies in order to dialogue and expand at national and European level. The Cluster 2017 call for proposals aims to improve the internationalization of Lombard companies.</p> <p>CAT.AL favors the networking of the companies of the agrofood in Lombardy. The members are facilitated to know the strengths and objectives of the industrial research policies of the Region, encouraging the start of relationships between companies that can lead to more profitable business.</p> <p>CAT.AL is the cluster recognized by the Lombardy Region to define the research and innovation objectives of the agri-food sector. For this reason, the members of CAT.AL are adequately represented when the guidelines for innovation in the sector are drawn up and in the drafting of the call for tenders.</p> <p>By enhancing the companies in the territory through technological innovation services, CAT.AL intends to contribute to making the member companies more competitive and attractive both at local and international level</p>

<b>Short presentation</b>	<p>Eight big industry, research and innovation are allied to promote innovation made in Italy. Eni, Enel, Terna, General Electric, CNR, RSE, the Inter-university Consortium EnSIEL and ENEA will work side by side in the 'National Energy Technology Cluster'. with the aim of making technological innovation a factor in reducing costs, increasing national security and increasing the competitiveness of our companies, starting with the SMEs that face the very high energy price gap with the rest of Europe.</p> <p>Enea will be in charge of chairing and coordination of the working group. Already chosen the first two first pilot projects, which concern smart grids, technologies for renewable sources and for energy storage, areas in which weight games are played at national and European level also with reference to the safety and resilience of the energy system. But the goal is to work at 360 degrees on all the issues of innovation in the energy field.</p> <p>"The energy cluster is born to give coordinated and advanced answers on strategic issues for a sector, that of energy, which today more than ever requires research and innovation. The objective is to play a role of coordination between public and private</p>

	<p>research, bringing together the attitudes to research with the needs of companies ", explains ENEA president Federico Testa.</p> <p>The new cluster does not only involve the 8 big names in the sector, but is open to the participation of all the actors interested in the energy issues. There are already more than 80 subjects in the research and industrial world (both SMEs and large companies) who have expressed an interest in joining and 15 Regions have already assured their support.</p>

## 2. Stakeholders Analysis

Section 1 presents a wide range of stakeholders, including but not being limited to: national / Regional / local public authorities such as ministries, Regional agencies and municipalities; higher education institutes that specialize in the field of agriculture, agro-tourism and agro-industry; organizations supporting businesses and other non-government and/or non-profit organizations; small and medium businesses in the required area of expertise and the general public including farmers and greenhouse owners at Partner's country level.

This section will present a more detailed view of all types of stakeholders and beneficiaries (at country level) that are included in the database and could take part in the project's activities.

### 2.1.1 Albania

Table 25 – Analysis of key stakeholders of the 4-helix in the Region of Berat (Albania)

Type	Total No	Public		Private		Other		SMEs	Large Companies	Clusters/ Associations	Manufactures	Farmers	Research centres/institutions	Service providers
		No	% (of total)	No	% (of total)	No	% (of total)							
Enterprises	14	0	0	13	92,86	1	7,14	9	4			22		1
Academia	8	5	62,5	3	37,5	0	0						5	3
Government	16	16	100	0	0	0	0							16
Civil Society	19	1	5,26	9	47,37	9	47,37			6			1	3
<b>Total</b>	57	22	38,6	25	43,85	10	17,54	9	4	6		22	6	23

In particular, considering the type of stakeholders / beneficiaries there is a total of 57 stakeholders, out of which 14 (or 25%) come from enterprises (the farmers are excluded); 16 (or 28%) are governmental institutions, 8 (or 14%) are part of the academic world and research institutions and 19 (or 33%) are actors coming from the civil society and nonprofit organization, as shown in Figure 1. Furthermore, around 44% of the identified key actors are private institution, 39% are public institutions and 17% are Non Profit Organisations.

Figure 1 –Type of key stakeholders / beneficiaries in the Region of Berat (Albania)

Furthermore, the 22 farmers (all in the Region of Berat) that own a greenhouse are not included in the ENTERPRISES section, because (at least in Albania) they have a different form legal status. A detailed analysis of farmers of the greenhouses sector (Figure 2) shows that their farm size varies from 0.2 ha to 2.7 ha. As observed, the majority of farmers in the greenhouse industry in the region of Berat (68%) own a greenhouse smaller than 1 ha.

Figure 2 –Number of farmers according to farm size – Region of Berat (Albania)

If categorized by the level of impact, 37% of them are considered to have a high level of impact, whereas 39% have a very high level of impact. 19% of stakeholders and beneficiaries have a moderate level of impact, and the remaining 5% of stakeholders have a low level of impact. These numbers, at least at this phase, are estimations predicted by the supposed role of each beneficiary in the project. A more realistic view will be presented in the latter phases.

Figure 3 –Level of impact of key stakeholders / beneficiaries – Region of Berat (Albania)

<b>Total</b>	53	17	17	26	26	10	10	16	5	2	10	9	10	30

The distribution of the different type of stakeholders presented in this report along the quadratic helix is presented in **Σφάλμα! Το αρχείο προέλευσης της αναφοράς δεν βρέθηκε..** It can be seen that about 40% of the presented stakeholders belong to the enterprises sector while the Academia, Governmental and NGOs equally share the rest 57%.

Figure 8 - Type (Enterprise, Academia, Governmental and NGO) of key stakeholders/beneficiaries of listed greenhouse industry in Greece

The distribution of the different type of stakeholders presented in this report between public, private or other type of organisations is presented in **Σφάλμα! Το αρχείο προέλευσης της αναφοράς δεν βρέθηκε..** It can be seen that most of the stakeholders listed (49%) are private, 32% are public and 19% are other type of organisations.

Figure 9 - Type (public, private or other type of organisations) of key stakeholders/beneficiaries of listed greenhouse industry in Greece

It can be seen (**Σφάλμα! Το αρχείο προέλευσης της αναφοράς δεν βρέθηκε.**) that a large number of the stakeholders presented is providing services, and several of them are providing research. A quite high number of the listed stakeholders is directly related with production (farmers) while it can be also seen that several manufacturers of greenhouse systems, equipment or materials are also listed.

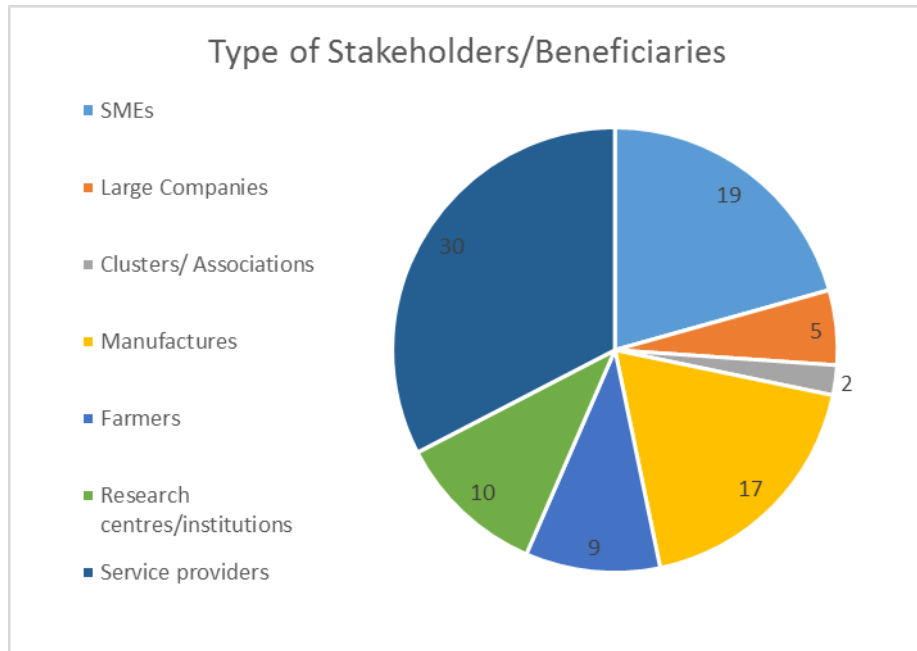

Figure 10 - Type of key stakeholders/beneficiaries of listed greenhouse industry in Greece.

The listed stakeholders are highly related to the project since are directly related with the greenhouse sector either in the research, design, and construction and building of greenhouses or in the production or service/consultancy sector. Thus, it is estimated that the impact of the project to the listed stakeholders will be very high in 53% of them, high in 15% of them and moderate, low or very low to the rest of the listed stakeholders (Σφάλμα! Το αρχείο προέλευσης της αναφοράς δεν βρέθηκε.).

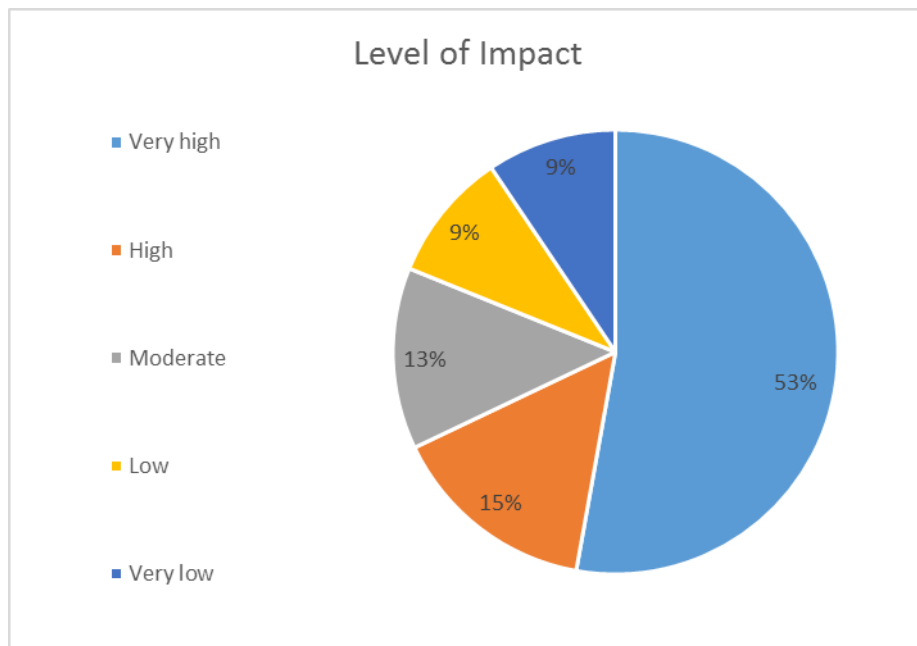

Figure 11- Level of Impact of listed Stakeholders/beneficiaries of Greenhouse industry in Greece

## 2.5 Italy

A total number of 44 the Stakeholders were involved in the analysis. 12 private company were involved, with 6 SMSs, 5 Large Companies and 1 farms. All the actors offers products related to the greenhouses sector.

11 public research center and Academia institutions were analyzed, 10 of them offers research activities and one of them offers services. 10 Governmentinstitution activities related to the greenhouses sector were analyzed. 11 Civil Society analysis were performed, 3 public entities, 1 private and 7 other.

The level of impact of Stakeholders/beneficiaries of Greenhouse industry were very high for the 55% of stakeholders, 7% high and 27% moderate; only 11% showed a low level of impact

## 2.7 Consolidated Results

Table 31 – Analysis of stakeholders of the 4-helix in the 6 Regions

Type of helix	Total		Public		Private		Other		SMEs	Large Companies	Clusters/ Associations	Manufactures	Research centres/institutions	Service providers
	No	% (of total)	No	% (of total)	No	% (of total)	No	% (of total)						
Enterprises	71	32%	1	1%	70	99%	0	0%	28	18	2			
Academia	48	21%	44	92%	4	8%	0	0%					44	14
Government	54	24%	51	94%	3	6%	0	0%						37
Civil Society	51	23%	6	12%	28	55%	17	33%			35		1	14
<b>Total</b>	<b>224</b>	<b>100%</b>	<b>85</b>	<b>-</b>	<b>79</b>	<b>-</b>	<b>7</b>	<b>-</b>	<b>28</b>	<b>18</b>	<b>37</b>		<b>45</b>	<b>65</b>

As can be noticed from table 30 and figures 14 and 15, the identified key stakeholders/beneficiaries of the 6 regions are distributed almost equally in the four helixes. However, a top-down analysis shows that there is lack of manufacturers by contrast with the service providers which are the majority in the examined categories. The presence of many service providers, associations and academic institutions can ensure that there is available capacity building for transferring knowledge, the policy making, the provision of the required information to end-users and the dissemination of eco-innovative technologies in agriculture sector to main beneficiaries such as farmers, SMEs and large companies. Regarding the lack of manufactures this could be addressed by focusing in other areas of Mediterranean region, applying mechanisms favouring synergies and collaborations that will be developed during project implementation (del. 3.2.6).

### Type of key stakeholders/beneficiaries in greenhouse industry

### 3. Conclusions

---

The following conclusions can be extracted at regional level.

#### 3.1 Albania

As presented on the sections 1 and 2, the list of key stakeholders in the Region of Berat is composed by a wide variety of beneficiaries, which include: greenhouse farmers, businesses specialized in agro-food and greenhouse industry, policy makers and public institutions, research and technology institutes, unions and associations in support of farmers and businesses, among others.

All these stakeholders / beneficiaries can benefit directly or indirectly from project's activities and main outputs such as Policy recommendations favouring collaboration and synergies between them promoting eco-innovation, the Transnational Agricultural Innovative Cluster, the Joint Action Plan transferring knowledge, The training seminars and the financial channels etc. All project's activities will serve as a common ground for creating and strengthening a network of bodies capable of developing and implementing policies from which will benefit a wide range of actors in the greenhouses / agriculture sector. Furthermore, by having a wide range of stakeholders creates optimal conditions for sharing and transferring knowledge and for stimulating the use and application of innovative technologies.

#### 3.2 Cyprus

The greenhouse sector in Cyprus includes several stakeholders representing the quadruple helix. The current research shows that in the private sector, civil society and academia are included stakeholders or beneficiaries that are directly engaged and occupied in the sector of greenhouse; therefore they would have the opportunity to benefit the most out of the project's activities and outputs.

Another important point that derives from the outcomes of the research is the centralization of power in regards to the policy making in the greenhouse sector. The most important stakeholders in reference to decision making for policy development are the governmental institutions. Academia and the civil society has also an important role, however the private sector is not so powerful when it comes to impacting policy formulation.

#### 3.3 France

- The use of geothermal resources to warm and cool greenhouses is an opportunity and requires improvement and political involvement in the PACA region and in France in general.

- The French government is encouraging the investment in innovative greenhouses in the competitive context affecting the horticulture and market gardening sectors and in line with the main axes put forward in the framework of the 2025 strategic plan.
- Researchers are requested to introduce innovative techniques and strengthening the product quality in order to improve the economic performance and the technical level of the end users by the modernization of the production tool.
- The introduction of innovative greenhouses in France aims to ensure regular production adapted to the market demand in respect of the environment.

### 3.4 Greece

The greenhouse sector in Greece incorporates several stakeholders from the quadratic helix. From the research carried out to sample and list the stakeholders presented in this report, it is considered that the Enterprises and Academia have stakeholders that are directly devoted to the greenhouse sector and thus the project may have high impact on them.

It was also found that not many Governmental organisations/stakeholders are solely devoted to the greenhouse sector while in addition, there are no Civil Society organisations directly involved or connected with the greenhouse sector in Greece.

### 3.5 Italy

The analysis of the stakeholders and key players of the sector has been performed on the actors of 4-helix (Enterprises, Academia, Governmental bodies, Civil Society) of the Greenhouse Industry at national level. The analysis of stakeholders showed a great variability and a different absences and lack among the actors.

The SMEs usually offers products and services related to the greenhouses sectors, starting from the design and installation of greenhouses, the equipment and systems for the automatic control of greenhouses and related air conditioning systems, up to accessories for greenhouses, greenhouse coverings for mulching, automatism for greenhouses.

Large companies are involved in the production of greenhouses for horticultural and floricultural productions, warehouse greenhouses, farm greenhouses, photovoltaic greenhouses, garden center greenhouses and greenhouses for any other use and coverage. They are also involved in the production of a wide range of control units for the greenhouses management, such as irrigation fertigation and climate control.

Both SMEs and Large Company rarely have relations with other actors in the supply chain, such as universities, civil society, etc. Their reference is the buyer; in most cases, they are not involved in cluster.

Innovative Start up purposes is the production of innovative services with high technological value, related to energy systems for air conditioning with renewable energy sources, geothermal systems with vertical (closed circuit) or ground water (open circuit) probes, more generally in innovative solutions.

*Universities and Research Institutes* contribution to innovation has only recently become one of the main missions of the University sphere, creation of knowledge has always been a fundamental goal of the Higher Education Institutions (HEIs).

At a national level, both universities and research centers are strongly committed to developing innovative greenhouse technologies. They are often present in clusters and participate in projects with national and international partners.

Regions, Municipalities, Ministries, Chambers etc. are involved in projects with the aim to further develop the agricultural and agro-industrial system. Actors are involved at international level, national level and regional level.

Usually there is strong territorial collaboration in projects involving several municipalities, regions, chambers of commerce, local action groups and regional or national research centers. The projects aim is to promote the dissemination and exchange of know-how (transfer knowledge), develop new systems (research activities), innovative methodologies and technologies for monitoring, control and increase the efficiency of the greenhouses system (rational use of resources: fertilizers, energy, water).

Initiatives Civil Society: NGOs, Associations, Clusters, fosters the aggregation of companies, universities and research centers that collaborate to increase and improve technological development and innovations in the agri-food sector.

### 3.6 Spain

The analysis and the research show that, in all sectors, there are some points in common in the general interests as the impact by particular stakeholders, which is in general high in the list of actors of the 4-helix of the Greenhouse Industry. Learning among different stakeholders is possible around the analysis, the factors that influence, the implications and possible approaches to its management.

Universities are major actors in scientific knowledge production. Public policies are emphasising knowledge transfer through a set of supporting mechanisms to promote innovation. One of these mechanisms is the establishment of innovation intermediaries.

The institutionalisation of knowledge transfer is a continuous, unfinished, and precarious process that deserves attention from policy-makers.
