Deliverable Number: D2.10.1

Title of Deliverable: Online database to exchange good practices

Description of Deliverable:

One online database provided by external provider (contracted by ECF) which contains at least 18 cycling tourism good practices in a standardized format with pictures and facts and figures (provided by all partners except PP2 and PP10).

Link: <https://pro.eurovelo.com/resources>

The online database allows to store documents online and contains a search engine to look for specific MEDCYCLETour Good Practices.

MEDCYCLETour Good Practice – GIFT 2.0

The Gift 2.0 project aims to improve mobility between Italy and Greece both for goods and passengers. As part of the project, several bikes will be installed in many bicycle stations in the city of Patras, Greece. Potential users will be locals and tourists. End users and stakeholders will have the opportunity to plan their trip through the platform. This Good Practice was developed by the Region of Western Greece as part of the MEDCYCLETour project.
