

PARTN RSHIP

LET'S THINK GREEN

Project CB005.2.12.075: "Revitalization of abandoned dump sites"

The project is co-funded by the European Union through the Interreg-IPA CBC Bulgaria-Turkey Programme.

This publication has been produced with the assistance of the European Union through the Interreg-IPA CBC Bulgaria -Turkey Programme, CCI No 2014TC16I5CB005. The contents of this publication are the sole responsibility of Foundation "Institute for Innovative Research Activities" and can in no way be taken to reflect the views of the European Union or the Managing Authority and the National Authority of the Programme.

When people toss trash and leave it behind, all that trash must go somewhere, so in this book you'll find:

What is Litter?

Litter is what doesn't naturally belong in an environment.

Look Out for Litter...

Put an X on all the litter you can find in this picture. There are 50 pieces of litter.

Litter causes trouble for farmers when it is thrown into their fields.

Animals get sick from eating litter and expensive farm machinery can break down.

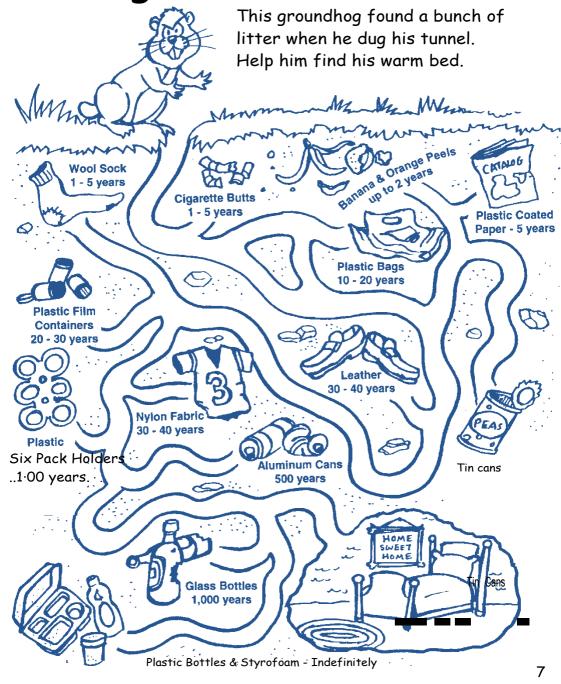

Some trash ends up where it doesn't belong because it is littered or dumped. This can happen when people don't know the right way to get rid of their trash. It can also happen when someone drops litter by accident, doesn't think or doesn't care.

How long will litter last?

Waterways also become

From the country...

polluted because of litter

...to the city.

The road to your house

may also be littered

The project is co-funded by the European Union through the Interreg-IPA CBC Bulgaria-Turkey Programme. Project CB005.2.12.075: "Revitalization of abandoned dump sites"

Draw a Picture of Where You Live

Is there litter near your home?

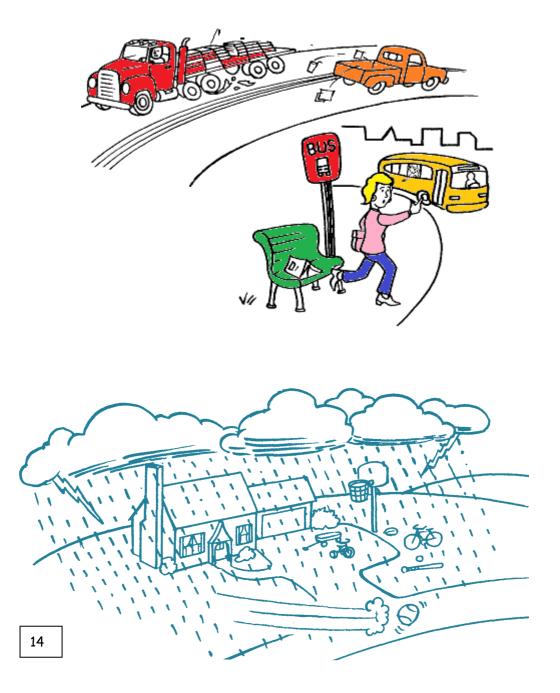

Put Trash In Its Place

Circle the items that can be repaired, reused or recycled. Draw lines from the trash to the trash can.

Sometimes Litter...

... Happens by accident

The project is co-funded by the European Union through the Interreg-IPA CBC Bulgaria-Turkey Programme. Some people litter on purpose...

Lots of things we throw away can be reused.

When we open our eyes to litter we see how we can keep our homes and watersheds litter-free.

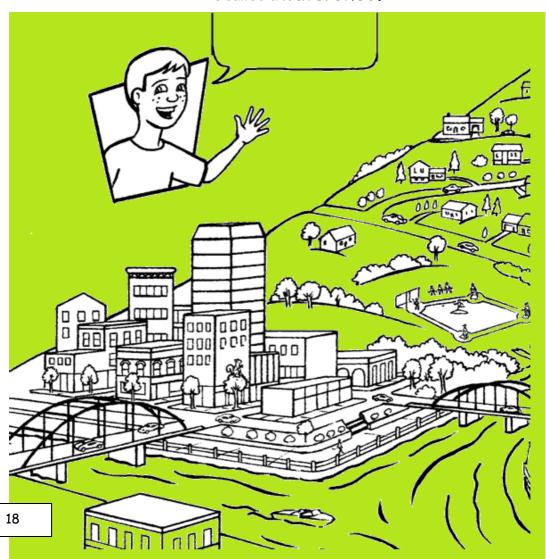

Pretend you can see from up high in the sky the land down below where the river goes by.

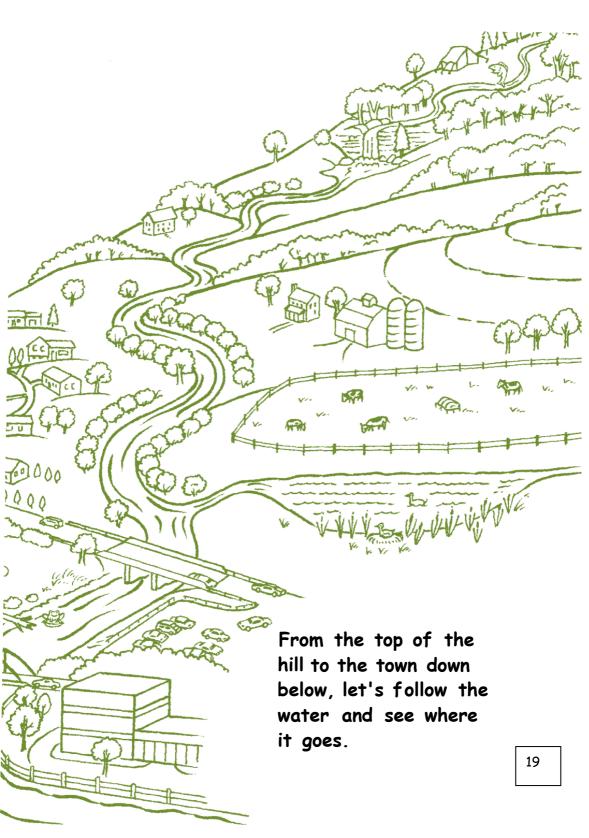

The land surrounding streams and rivers is called a watershed.

While hiking they found more trash - that's not all, the trash made a mess by the big waterfall.

The family was mad. Here was trash and much danger.

So dad took some pictures to show the park ranger.

Bottles and cans floated downstream to their nest. Wind blew in more trash leaving their home quite a mess.

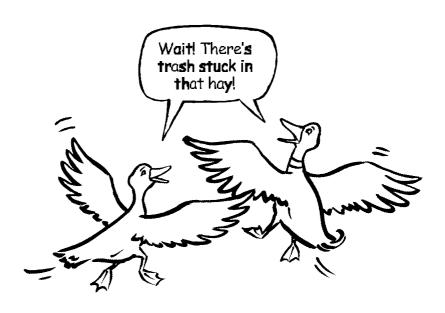

There was trash on the farm.
The ducks ran to the cows
to warn of the harm.

Project CB005.2.12.075: "Revitalization of abandoned dump sites"

How can **YOU** make a difference today? What can you do at home, in school and in your community to help?

Think before you toss.

Care about what you do with things you don't need or want anymore.

Buy recycled products and products that can be recycled.

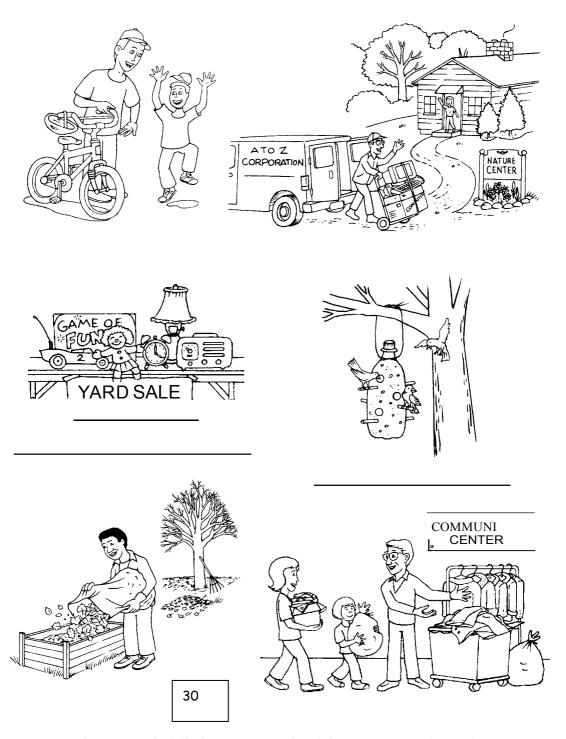

Read labels and look for recycling logos.

Lots of things we throw away can be reused.

REDUCE...

How can we use less of something so that it will last longer?

Can it be made useful again and again?

Can it be repaired or used in a different way?

Is there litter near your school?

Have you learned about litter

in your school?

Project CB005.2.12.075: "Revitalization of abandoned dump sites"
