Topics tackled & links to deliverables/outputs

After having to cancel the originally planned and already fully organized guided tour through the Wachau region Höhereck in collaboration with the Verein Welterbegemeinden Wachau and experts on dry stone walls at the last minute due to the Covid-19 pandemic in late 2021 an alternative STRENCH Local Working Table 2 (LWT2) was held online on February 08th 2022.

Hosted by the Center of Cultural Property Protection of the University for Continuing Education Krems the STRENCH project together with Synergizing the Project “KulturGutRetter” was presented to numerous participants with the focus on bringing together stakeholders from various levels and professions in order share and discuss the developments and tools and ways to contribute to sustainable implementation efforts in cultural heritage protection and to foster a transfer of knowledge of all stakeholders regarding cultural heritage management and protection strategies.

The presented content strongly emphasized the required synergy of expertise from cultural heritage experts, civil protection experts and local partners while discussing new and useful tools and management methods such as risk assessment as seen in the STRENCH project and how these tools may benefit in the cycle of crisis response, recovery, mitigation and preparedness.

Expected effects and follow-up

Further awareness raising of the STRENCH project, outputs and tools and networking between heritage protection organisations and enthusiasts was performed and strongly enhanced.

Side programme (if conducted)

A presentation of the project “KulturGutRetter” an emergency mechanism for cultural heritage in crisis situations was held by Constance Domenech de Cellès of the German Archeological Institute
