2017.

The Efficient Block is one of CESBA-MED's two pilot areas in Catalonia. The project aims at fostering a new way to boost sustainable renovation projects and to establish a holistic and multidisciplinary model, as well as launching a campaign to raise public awareness on the energy renovation of buildings.

A strong communication plan has been designed to support the project and raise public awareness. There is the plan to expand the project to other blocks of the area, the historic neighbourhood of l'Eixample in Barcelona.

Partner CESBA
