

BASIC TRAINING

ORGANIZED BY: [DEMOCENTER-SIPE FOUNDATION](#)

Between 28th and 30th of March the 18th edition of MEC SPE held in Parma. MEC SPE is the reference exhibition in Italy for Industry 4.0. Democenter was also presented in partnership with the Mechanical Association, Bologna. The joint effort was directed to organize two seminars dedicated to two hot topics for Industry 4.0: materials and autonomous vehicles. In the first seminar titled [‘Materials 4.0’](#), superficial treatments and additive manufacturing was discussed as key points for the production 4.0 of mechanical components. The second event was focused instead on [‘Modena Automotive Smart Area’](#): MASA is the first “urban open-air laboratory” for researching, experimenting and standardizing technologies functional to autonomous driving and the interconnection with the city infrastructures. Democenter was involved in its development together with the University of Modena and Reggio Emilia and the City of Modena. Both the seminars will be on 28th of March.
