

BASIC TRAINING

ORGANIZED BY: [PANNON BUSINESS NETWORK ASSOCIATION](#) & [UNIVERSITY OF SOPRON](#)

Between 22nd and 24th of January the basic training will be held in Szombathely, Hungary. The two Hungarian partner of the project - Pannon Business Network Association and University of Sopron - jointly organized the basic training .

During the 3 days long training - thanks to presentations and interactive modules - the key topics and solutions of Industry 4.0 were discussed. The basic training included four modules: A general introduction to Industry 4.0, a part for business model development & strategy, a part for human resource & organization management and a part for technology.

Gergely Bencsik - from University of Sopron - was talked about the development of industry from James Watt (1781) until nowadays (Industry 4.0). He provided some example of how to use Industry 4.0 solutions in different companies.

The participants could learn more - with the help of interactive presentations - about several Industry 4.0 solutions like robotic arm, 3D printing, HoloLens, Autonomous Mobile Robot (AMR).
