## Output factsheet: Training in Hungary

Version 1

<b>Project index number and acronym</b>	CE933, RURES
<b>Lead partner</b>	Aufbauwerk Region Leipzig GmbH
<b>Output number and title</b>	Output O.T3.3 - Trainings for impr. capacity in lasting economic effects of EE/RES measures with value calculator
<b>Responsible partner (PP name and number)</b>	PP8 Zala County Government
<b>Project website</b>	<a href="https://www.interreg-central.eu/Content.Node/RURES.html">https://www.interreg-central.eu/Content.Node/RURES.html</a>
<b>Delivery date</b>	26.05.2020

### Summary description of the implemented training measure(s), explaining the specific goal(s) and target groups

In connection with the energy-efficiency online value calculator developed in frame of the project, online training was held by the Zala County Government on 26<sup>th</sup> May 2020.

The purpose of the event was to introduce the developed value calculator and to train the local stakeholders in using the online tool. The LSG members and other relevant stakeholders (municipalities, educational and social institutions, development agencies, SMEs) were invited to the event work in the field of energy efficiency or interested in installation of different RES solutions. Altogether 39 stakeholders participated in the training.

Firstly, the RURES project was presented: the partnership, the aim of the project, the implemented activities and the results achieved so far.

Then, the value calculator prepared within the framework of the project was introduced, its functions, benefits and the methodology how to use it.

Finally, the participants were familiarized with the practical use of the value calculator, the introduction followed the following structure: type of user, selection of the renewable energy source, indication of the location, and indication of the product to be used.

### NUTS region(s) where training(s) have been conducted (relevant NUTS level)

NUTS 1: HU2, Transdanubia  
NUTS 2: HU22, Western Transdanubia Region  
NUTS 3: HU223, Zala County

### Expected impact and benefits of the trainings for the concerned territories and target groups

Due to the training, the 39 participants who joined to the online event have the necessary knowledge and skills to use the calculator during their work. To apply funds regarding different renewable energy sources they are able to calculate with the opportunities, economic and social benefits, they can select the most suitable RES to their investments. Zala county is rich in geothermal resources, there are good conditions for exploitation of energy carriers. The utilization can be supported by the calculator via the preliminary information, good examples and calculation methods.

### Sustainability of the training(s) and developed training material(s) and their transferability to other territories and stakeholders

The participants got a general overview and a detailed explanation how to use the online tool. They will be able in the future to use the calculator without any external support. However, if they require, the Zala County Government help them in the correct use of the tool. After the training session, the participants had the necessary knowledge to analyze the different RES solutions.

Due to the event, participants can promote the tool for wider use, they were informed that an online tutorial will be uploaded in video format on YouTube. Certainly, they can also teach and educate other relevant stakeholders who are interested in the online calculator.

### Lessons learned from the development and implementation of training measures and added value of transnational cooperation

The online value calculator was developed by cooperating of all project partners, they participated in the creation of the tool and of the handbook, translated the necessary information and provided the responsible partner with all relevant data and inputs concerning their region.

The calculator was continuously monitored and tested during the preparatory phase by the partners so that the tool will be more user friendly. The webpage and the available information was checked several times. In case of mistakes or errors the responsible partner immediately repair it and modify the national versions.
