

FROM ENERGY SAVINGS TO RES INVESTMENTS

FRANCE, PROVENCE-ALPES-COTE D'AZUR

The purpose of the action is to impulse a local dynamic on EE measures and RES for inhabitants with the participation of the local companies/craftsmen and the support of local authorities. Low income households will also be targeted.

The pilot project includes :

- Energy visits to complete the territorial energy diagnosis and precise the type of EE (and RES) measures needed (market analysis) including low income beneficiaries;
- Organising a participative approach to develop suited services in a community approach (individual or collective EE (and RES) measures) in line with the market analysis;
- Implementation of EE and RES measures by local companies/craftsmen with support of local authority (inhabitants information / mobilisation).

The results is:

- A better knowledge of the energy savings potential on the territory (for the local authority and local companies/craftsmen);
- An awareness raising of the inhabitants;
- EE and RES measures implemented by local companies = economic development.

Project co-financed by the European Regional Development Fund

Macro objective:

Reduce energy consumption of households;

Encourage the green economy on the territory;

Impulse a collective dynamic on energy (EE and RES).

Specific objectives:

- Raise awareness towards public on energy transition and involve them in concrete measures with the support of the local authority ;
- Support local companies / craftsmen creating customised solutions for the territory's inhabitants in link with inhabitants feedback and the local authority;

RES potential to be exploited:

Around 9 000 000 kWh / y on housing retrofitting (around 1000 houses to be renovated / year)
