Key participants /targets groups	<ul style="list-style-type: none"> <li>• Local/regional government (5)</li> <li>• Public (3)</li> <li>• Interest groups incl. NGO's (7)</li> </ul>

### Short Description / Summary

Due to the very bad situation in the Czech Republic regarding the Corona virus pandemic, we could not organize open “normal” workshop. We tried to organize on-line meeting but since March almost everything was organized on-line, the people are almost fed up with on-line meetings.

Finally, we organized it together with company UDIMO who prepared our SUMP. Mr. Kuchta was presented as the representative of municipality of Hranice, Mrs. M. Skrobankova as the project manager and Danuše Strnadová as the Expert (project member).

The goal of this meeting was again explaining the complex process of SUMP preparation which was interrupted by pandemic of corona virus. The original plan was to finish SUMP in the summer and introduce complete plan and next steps for the future. As all the processes were delayed the main discussion was about:

- Proposals for modification of non-motorized transport
- Classification of the communication network of individual automobile transport
- Proposals for modifications of the public transport network

The documentation is available here:

<http://mobilita-hranice.cz/novy-vykres-navrhu/>

Another important point of our workshop was to give an overview of the pilot actions we have done as a part of Smart Commuting project.

On-line discussion is always harder, we had also some technical problems with connection but some question were raised directly during on-line meeting and the e-mail address was offered to audience to send their questions regarding the presentation, SUMP, PA or the project itself.

### Agenda

**Datum: 15. 10. 2020**

**Workshop: D.T3.11.1**

**Místo: on-line setkání**

### Agenda workshopu

<u>Popis</u>	<u>Trvání</u>	<u>Kdo?</u>

#### Links to deliverables and outputs

The workshop itself is the D.3.11.1.

D.T1.2.1, D.T1.3.1, O.T3.1 (Pilot Actions), D.T3.2.1 (Joint elaboration of a SUMP at FUA level), D.T3.9.1 (Pilot Actions at Hranice FUA) and D.T3.10.1 (transnational Publication in Pilot Actions).

#### Expected effects and follow up

By communicating the project contents and also the measures from the project, a good basis and understanding of the importance of the topic commuting and above all sustainable transport planning was certainly created among local politicians. This understanding may make it easier to make sustainable political decisions and thus speed up effective implementation.
