

Forest Bioenergy in the Protected Mediterranean Areas

Interreg
Mediterranean

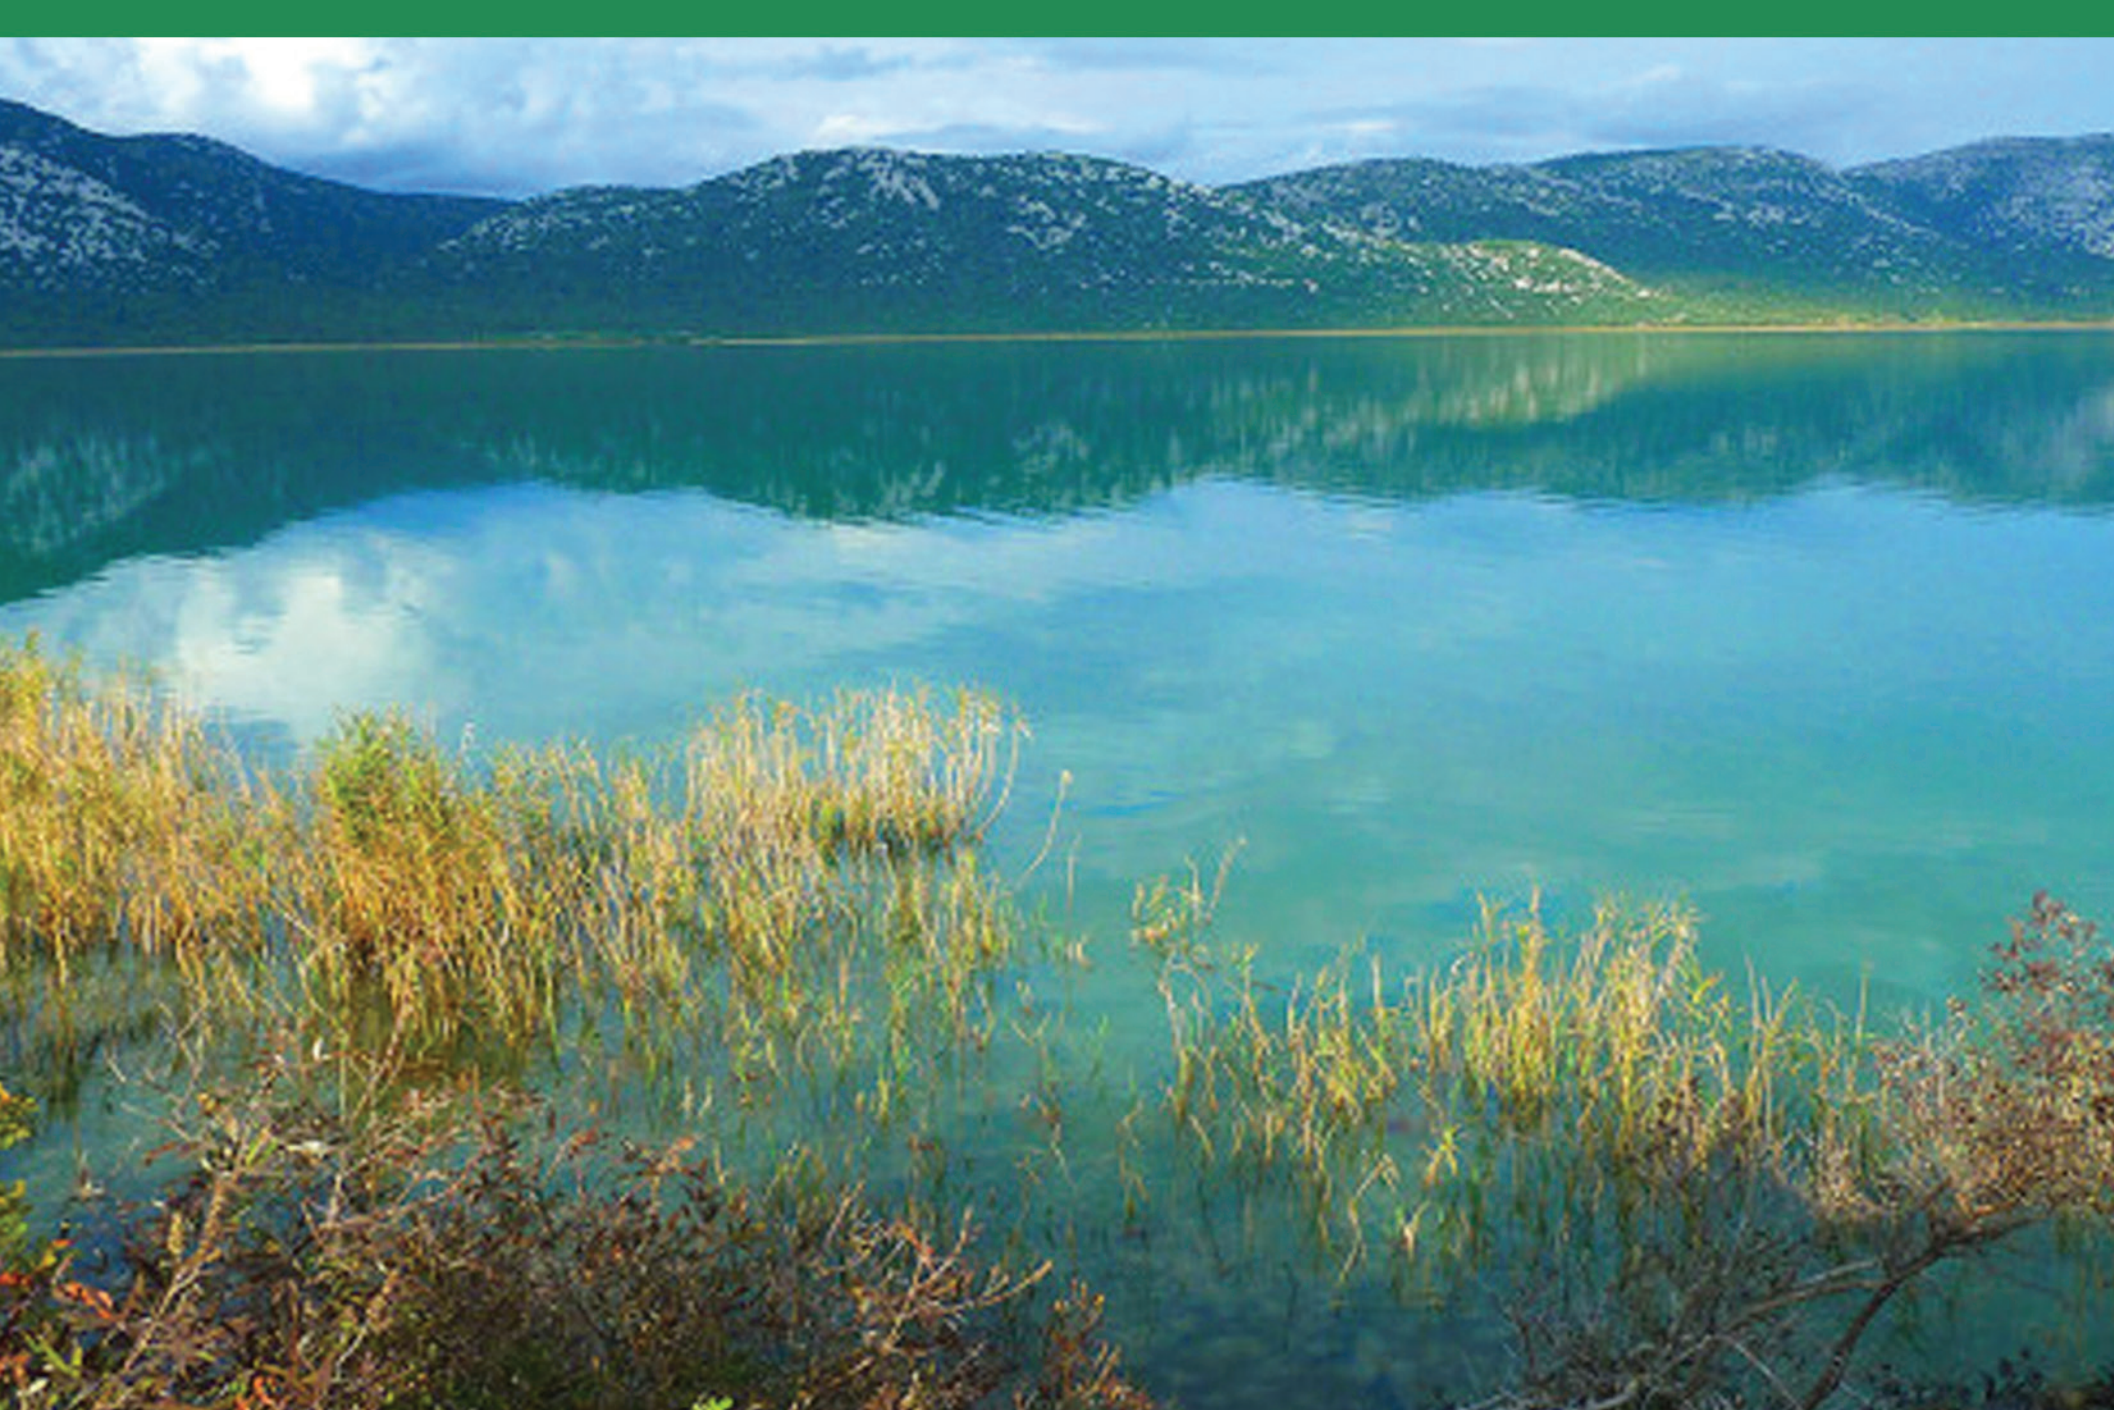

Project co-financed by the European
Regional Development Fund

ForBioEnergy

The aim of the ForBioEnergy project is to foster bio-energy production and to overcome barriers in the protected areas in order to develop forest-based bioenergy value chain.

Cilj projekta "ForBioEnergy" je poticati proizvodnju bioenergije i nadvladati prepreke u zaštićenim područjima kako bi se razvio vrijednosni lanac bioenergije dobivene iz šuma.
