

**D.T3.2.11 Training and education model  
delivered to non-partner airport FUAs  
public entities**

**Version 1  
10 2019**

## 1. Introduction

The Enlarged Transfer Programme's training was organized 30 September - 1 October 2019 at Vienna International Airport.

This deliverable is built upon the D.T3.2.1, that described the planning and organization phases of the training even, whereas in D.T.3.2.11 provides the final agenda, invitation letter, the list of attendance, the presentations and pictures about the event.

## 2. Agenda and participants

The final training programme was announced few days prior the event with a reminder on useful information such as how to approach the venue. All these have been directly communicated to the participants.

The final agenda and the invitations can be found in the appendix including the presentations

Altogether 35 people attended the 2-days of the training at Vienna International Airport, Office Park 1, 1st Floor, Conference Room. Altogether 6 non-partner functional urban areas were represented at the event, and the project consortium including the ASPs or other relevant public entities.

The list of attendance can be found in the appendix.

## 3. Feedback from participants

Based on the feedback from the participants, they found the training useful and interactive. They got away with new thoughts, ideas inspired by the event. The participants were happy to learn especially the project experience at other airports. They emphasized the importance of learning different viewpoints, angles how the participants approached the same issue during the workshop session.

The non-partner FUA participants covered their own costs. Most of them represented airports (Krakow, Debrecen, Brescia), that have in general greater freedom in terms of finances compared to other public entities. This could have been one reason for the lower attendance.

The central location in Vienna was found appropriate enough by the participants.

Even though it has been a training (advertised as workshop & conference), the participants found the networking and social event opportunities at least as useful to learn each other and to discuss relevant issues.

Impressions and photos about the event can be found in the appendix.

## 4. Conclusion

The number of participants from the target group was lagging behind the originally planned ones. The event was organized and held at a high professional quality as a result of a good teamwork among the organizers, the quality and well-prepared speakers and the active contribution of all participants.

# APPENDIX

## List of attendance

LAirA Conference and Workshop on Improving Landside Accessibility of Airports in Central Europe

By signing this list, I agree that photos and videos that are taken on this event can be published during and after the event.
