Project co-financed by the European
Regional Development Fund

Prominent MED

Prominent MED focuses on the use of Public Procurement of Innovation (PPI) to stimulate the adoption of innovative products and services that can improve the quality of the services for citizens.

PPI will be related to innovative energy efficient materials and processes for public building energy refurbishment.

The aim is to improve the quality of public services activating a market demand triggering industry to scale up its production chain to bring products on the market with desired quality / price ratio within a specific time.

This objective meets the Programme priority specific objective through:

» The setting up of a transnational network among quadruple helix actors (public authorities, research sphere, enterprises cluster and civil society) dealing with the specific matters of application of PPI to the Energy efficiency advanced material;

» The promotion of a wide application of the PPI as a key tool for unlocking innovation potential and promoting the market uptake of innovative high technology solutions applied to the sectors of Energy efficiency advanced material;

» The attraction of investments to improve the energy performance of public buildings in order to increase the quality social economic sustainable growth of the territories and the increase of enterprises competitiveness with the related impact on the labor market.
