Overall objective: to improve innovation capacities of public and private actors involved in the management of waste from intensive livestock farming, through stronger cooperation among the 4-helix actors.

Specific objectives:

1. Stimulate private actors in the adoption of innovations for the profitable re-use of waste deriving from the livestock productive chain.
2. Support public actors in the formulation of policies that recognize struvite as fertilizer and incentive the adoption of innovations tested.
3. Improve transnational cooperation and connections between actors of the quadruple helix (research bodies, businesses, public authorities, civil society) and other stakeholders.

What we want to achieve

PROJECT EXPECTED RESULTS

- 3 Small-scale pilot plants** for the production of valuable fertilizers installed and functioning; **1 existing Small-scale pilot plant upgraded** with the introduction of technical innovations;
- Non-financial support** provided to enterprises: support SMEs in adopting and testing innovations: Technical training sessions and exchange visits; Evaluation activities of the pilot actions and the comparative analysis;
- SMEs capacity improved in successfully requesting for grants financing innovative investments: Information sharing on grants opportunities and relevant policies; **Networking activities with 4-helix actors**, that will favor partnership building;
- Constitution of a **transnational network** to create synergies with innovation clusters;
- Provided support to policies formulation that can incentive innovation adoption: elaboration of **policies guidelines**, which will be presented and discussed during **regional thematic round tables** . These policies should include recognition of Struvite fertilizer in the EU legislation, as well as incentives as fiscal incentives, tax breaks, rewarding criteria for innovative SMEs and clusters.

What are your expectations of the GG community?

Our expectations on being part of the Interreg MED Green Growth community

- *Finding **synergies** with other projects and organisations;*
- ***Exchanging know-how** with other MED Green Growth stakeholders;*
- *Finding a new **learning space** inside the community, meant as a favorable environment for the germination of **innovative Ideas**;*
- *Reinforcing **networking** with organisations aiming at supporting the Green Growth in the MED area;*
- *Receiving **support for spreading RE-LIVE WASTE results** in all the MED area and beyond.*

THANK YOU FOR YOUR ATTENTION
