About the project

+RESILIENT puts together a 4-helix partnership of 8 MED countries to tackle the need for innovation conducive to increased socially responsive competitiveness of SMEs & stimulate new jobs, especially for companies operating in the social economy. It aims to kick-start a process of policy change at regional level in the involved areas resulting in the integration of successful elements into the new Cohesion policy (EU2020+). It is an integrated project that establishes a structural approach to policy & practice improvement of emerging dynamics in social innovation through an overarching process based on the intertwined use of open data & the creation of a transnational socially responsive value chain. This includes studying existing initiatives, adapting and testing, with the final objective of capitalizing them in the MED area.

Intervention area and partnership

MED EU Cooperation areas
MED IPA Cooperation areas

We are a 4-helix partnership composed of: **regional authorities** that represent different levels of development (Veneto, Istria and East Macedonia and Thrace), **local authorities** capable to lead critical social innovation at urban level (ANCI and Barcelona Activa) **technological hubs** leading in open data and technologic social innovation (GFOSS and ITAINNOVA), **scientific and academic bodies** who guarantee sound scientific base to knowledge systematization (AMU and UOC), **chambers of commerce** representing the economic actors and SMEs (Veneto and Albania) and **institutions representing operational bodies** capable to involve civil society and economic stakeholders (FPCSD, PRIZMA and RCDI).

Project's objectives and results

PROJECT GENERAL OBJECTIVE

- to increase the capacity of 4-helix actors of SVRC to provide improved policy and support services improving growth and jobs;
- to support the SVRC in the process of consolidation of socially responsive economic activities through capacity building, knowledge transfer, mobility and policy improvement in the MED area;
- to foster a transnational SVRC network for the benefit of common solutions capable to promote scalability, transfer, mobility and policy improvement in the MED area.

PROJECT'S RESULTS

- SVRC implement sets of innovative transnational/common policies/operations;
- SVRC become integrated elements and measures of mainstream policy and funding;
- SVRC generate jobs, skills and social cohesion;
- SVRC respond better to socially-driven market requirements in different sub-sectors and in other MED area.
