Co-Create aims to set up a network of competitive MED clusters with the contribution of creative industries.

After 36 months, the Co-Create is reaching the end. Project partners are currently capitalising the main results. But what has been done and what results have been obtained? Now you can have the answer in our [project video](#).

MANIFESTO

Co-Create Cross-Fertilisation Manifesto

We believe that Co-Create will contribute to the development at MED level of more competitive clusters through elaboration of a cross-fertilisation methodology and toolkit to support and manage cross-clusters initiatives.

Co-creation and cross-fertilisation processes between creative industries and traditional sectors are the best way to generate ideas for new products and services according to social and technological trends.

Do not hesitate to contact us for any information you may need!
