

## German Association for Housing, Urban and Spatial Development

### Organisational profile:

- Independent non-profit discussion platform for housing, urban development and spatial affairs;
- Development of strategic position papers and policy recommendations;
- Implementation of different participation formats and stakeholder consultation processes;
- Main fields of action are spatial and urban development (including mobility), energy, housing and demographic change;
- Interdisciplinary, public-private member- and partner structure including ministries and authorities at national and federal level, housing companies, financing institutions, NGO's and individuals.

### Challenges we address:

- Sustainable development of cities and regions in the context of demographic, social and structural changes;
- Affordable, age-appropriate and energy efficient housing with regional differing housing markets;
- Financing of real estates, infrastructure and urban development with changing framework conditions.

### Role in the project:

- **Leader of work packages** Management and Communication (internal, external).

### Activities in the project:

- All administrative project management procedures such as financial and thematic management including progress reporting and organizing partner meetings; 
- Transfer of project outcomes and results through workshops, seminars and various dialogue processes; 
- Communication activities including website development, maintenance of social media channels e.g. Facebook, targeting events, partner roll-ups and fact sheets; 
- Provision of professional advice and administrative support to work packages leaders on the development of key project outputs such as EU-wide status-quo analysis, thematic regional status-quo analysis and action plans for seven partner regions.
