

## ReMod Urban Traffic

Redesign Model and Methodological Guide  
for accelerating integrated solutions for urban  
communities congested by traffic

Paraskevi Tarani

*Director Creativity Platform NPO*

Using the REMEDIO project overall methodology together with other EU and international experiences and good practices, a **Redesign Model for accelerating integrated urban solutions** has been produced.

The **Methodological Guide** aims to support the transferability of the Model, the knowledge sharing and the capitalisation of the project results.

## Why do we speak about a redesign and participatory governance **model**?

A **model** is a representation of a system, made of a set of concepts or components. A model must be developed in such a way as to provide an easily understood system interpretation for the models users.

**ReMod's primary aim** is to satisfy four fundamental objectives:

- To ensure the capitalization of knowledge gained through REMEDIO project and the transferability of knowledge
- To enhance model's users' understanding of the representative system
- To facilitate efficient transferability of the model's components between various stakeholders
- To provide a flexible toolkit and pool of solutions and ideas that can be recombined in different ways according the needs

## Contents and structure of the methodological guide

- **The model** development produced by the Remedio methodology + International Good Practices
- **The Guide** Methodological implementation of the Model **including a toolkit of solutions and a implementation Roadmap**
- **Index I:** International good practices for integrated solutions in redesigning urban axes
- **Index II:** MoUs and Agreements templates to commit actors in the integrated solutions

THE MODEL

IMPLEMENTATION AND METHODOLOGICAL GUIDE

REMEDIO METHODOLOGY + INTERNATIONAL GOOD PRACTICES

## ReMod Urban Traffic

Participatory Governance and Redesign Model  
for accelerating integrated solutions  
for urban communities congested by traffic

TOOLKIT OF SOLUTIONS

Urban Analysis

Participatory Governance  
& actors' protocols (MoUs)

Community Building

Participatory Planning

Promotion & Engagement

Monitoring & Evaluation

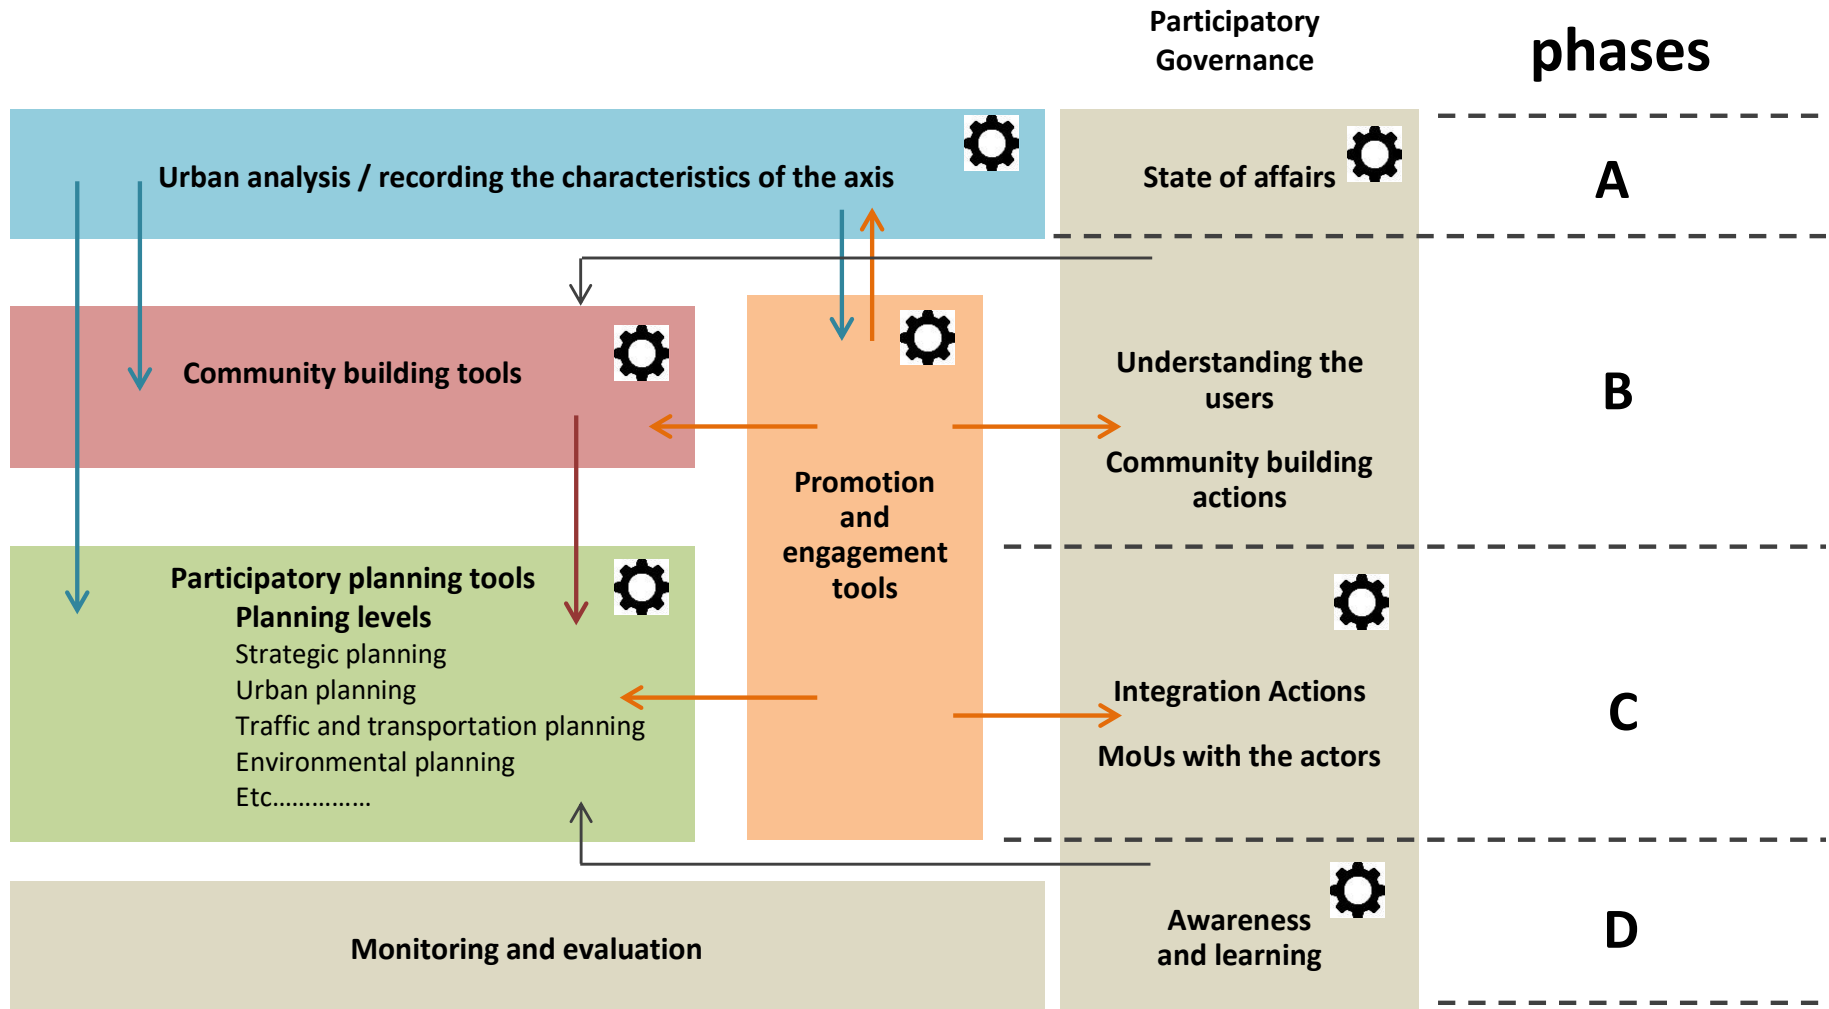

**INDEX I**  
INTERNATIONAL  
GOOD PRACTICES

**INDEX II**  
ACTORS' AGREEMENTS,  
PROTOCOLS, MoUs

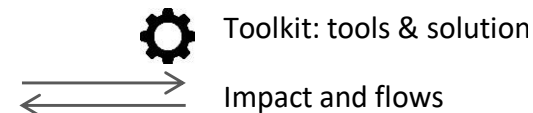

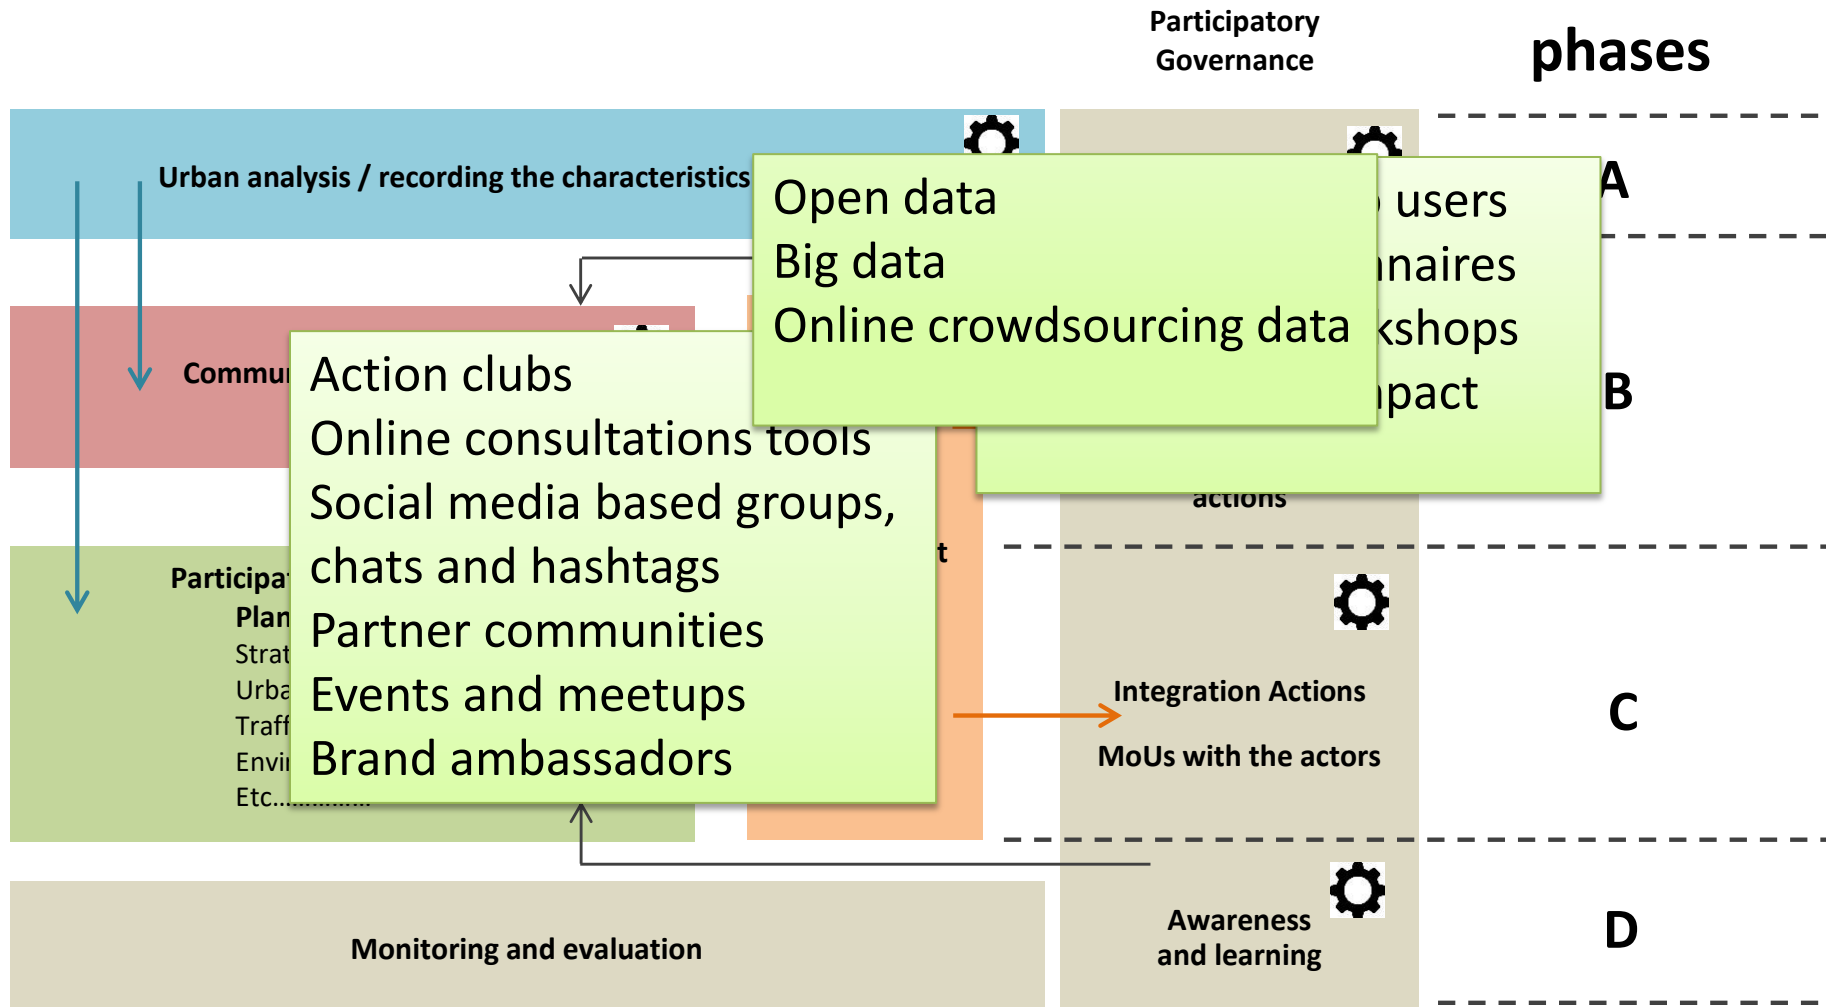

## ReMod Planning Roadmap

Accelerating integrated solutions  
for urban communities congested by traffic

# Implementation Roadmap

# Implementation Roadmap

## How the ReMod model and guide can be used in various cases

1. Decide to adopt the model according the area of intervention and the problem faced
2. Select and adopt the toolkit of solutions according the specific needs: urban analysis solutions / community building / promotion and engagement / participatory planning tools (any level of planning) / participatory governance tools / monitoring tools
3. Follow the roadmap steps and phases
4. Use the Guide's two indexes for ideas, paradigms or templates

# Thank you!
