#2 Newsletter

REgenerating mixed-use **MED** urban communities
congested by traffic through **I**nnovative low carbon
mobility **sOL**utions

The project aims at fostering the use of available low carbon transport systems and solutions through the testing of an operational path in the governance and management of high congested roads, a common issue for many middle-sized Mediterranean cities lacking of proper orbital roads or bypasses.

The Participatory Approach under REMEDIO Project

**HORIZONTAL CONDOMINIUM
of the West Road in Treviso**

REMEDIO is testing in 4 pilot cities a participative approach that proposes to transform high congested roads of middle size urban areas in “**horizontal condominium**”.

The “**horizontal condominium**” is proposed as an effective way to engage trade and business operators, enterprises, commuters, citizens, local communities and obviously local authorities in sharing a new vision for these high congested roads surrounding the city centres.

Thanks to REMEDIO project and the MED funds, the initiative is now widening its area of intervention towards the Sustainable Mobility profile of the axis, that is a mixed-use peripheral road of the middle sized city center of Treviso.

The leverage to engage trade and business operators and enterprise might be in term of incentives for energy saving and the promotion of renewable energy sources or for actions promoting a more sustainable mobility profile of the area or in the housing renewal and building refurbishment.

In Treviso The “**horizontal condominium**” has been already established, thanks to the submission of a

MEMORANDUM OF UNDERSTANDING

among the three main authorities that will be later made an extension the

among the three main authorities that will be later work on enlarging the initiatives to other strategic stakeholders that might join this vision of a unique “**horizontal condominium**”, more liveable and with better mobility, environmental and health conditions.

Participatory Process Events

TREVISO

June 2017, during the celebration of the European Sustainable Energy Week, the Treviso Municipality kicked off the idea of the “horizontal condominium”, inviting all the business operators of the road to join a seminar where the local associated partners of REMEDIO were invited as well (Environmental and Energy Departments of Veneto Region, the Province of Treviso, Villorba Municipality, Metropolitan area of Venice, Association of Artisans Marca Trevigiana).

SPLIT

City of Split is in a process of delivering the methodological path for the participatory governance. Started organizing an open workshop with the Split’ citizens in October 2017.

THESSALONIKI

In December 2017 organized the 1st participatory workshop with local authorities, stakeholders and experts. The proposals have been presented during the event and discussed with the local stakeholders.

MEET THE TEAM

SALVATORE PATTI

Salvatore is the Executive of the Regional Air Observatory Service of ARPAV, with premises in Mestre-Venice. Over the last 11 years he has dedicated his activity in leading the specialist unit in charge of the whole process of air quality monitoring, management and planning on behalf of ARPAV, the Public Agency for Environmental Protection supporting the Veneto Region Administration. Under his leadership, the Regional Air Observatory has been participating and leading INTERREG Projects on air pollution issues, also integrating modelling techniques for source apportionment analysis, air dispersion studies and mitigation measures assessment.

In REMEDIO, Mr Patti is glad and proud to be the Project Manager on behalf of ARPAV, Leader Partner of the consortium involving eight partners from five different EU Countries. Beside carrying out ARPAV's statutory mission on pollution prevention, focusing in actions to reduce air pollutants and CO2 emissions, to relieve noise pollution, to prevent negative effects on human health, to reduce energy consumption and promote energy efficiency, REMEDIO is an interesting opportunity to cooperate with partners and institutions of diversified background and expertise.

CHRYSOSTOMOS KALOGIROU

Worked in Local Authorities in the decade 1989 - 1998 as an officer of the Greek Development Agency for Local Development and Local Government, in the designing and implementation of programs for Urban & Social Development and the period 1999 - 2001 in the organization for urban planning of Thessaloniki as Coordinator of Social Actions in the framework of EU urban initiative in Western Thessaloniki.

Since 2001, as an officer of the Hellenic Organization & Management Unit For Development Planning of the Ministry of Economy and Development, worked until 2011 in the Managing Authority of the Regional Programme of Central Macedonia in projects for the 2nd, 3rd and 4th Programming Period as Project Coordinator in numerous thematic objects (Integrated Urban Development Plans, Archaeological Projects, Culture Infrastructures & Monuments Restoration, Hospital Infrastructure, Welfare Projects and Infrastructures).

Since 2011 he worked as Advisor of Development Projects in the Municipality of Thessaloniki, under Hellenic National Framework and European Territorial Cooperation Programs. Since 2013 member of the Administration Board of The Metropolitan Development Agency of Thessaloniki SA and since 2016 holding the position of Managing Director.
