1 INTRODUCTION

Research entities and enterprises usually have difficulties having access to funding opportunities due to the large amount of information which is needed to consider in order to apply for a specific programme. This document will serve as a brief catalogue to provide guidance to those entities and researchers who are interested in taking part of a series of funding opportunities at both European and National levels.

“Funding opportunities available in SUDOE regions”¹ has been developed as a part of the TR@NSENER project². This project has been financed by the Interreg V programme which promotes European territorial cooperation between border countries. Although this guide has been redacted aiming at countries belonging to SUDOE regions³, most of the programmes listed here have a European scope which make them accessible for all the European member states and third countries, depending on the specific call.

This catalogue has been elaborated to promote the participation of interested groups and entities to take part of cooperation programmes. The programmes gathered here can be included in different fields such as Regional & Urban development, employment & social inclusion, agriculture & rural development, maritime & fisheries polices, research & innovation or humanitarian aid.

Similarly, every programme can have different types of funding conditions. The principal funding methods are grants, loans, guarantees, subsidies and prizes⁴.

¹ All the information included in this guide has been collected from programmes' official sources
