The river Arges brings here many things, which the fish eat. That's why everyone says that because Arges flows into the Danube, there are more fish on our side of the river. It has things to eat, it really is more than in the opposite Bulgarian side.

Bogdan Bidilici,
Oltenita, fisherman

I've been making boats for more than 30 years. Today, I am the last one to take up this craft. There are hardly more than a hundred wooden boats left on the river...

Rumen Troskov,
Tutrakan, boat master
