Resources

Visual perception

- Acuity -- discrete dots merge into a continuous band
- Persistence of vision -- The image of an object lasts on retina for 1/16 th second. ... So the next **picture** is seen before the image of first has died and the **pictures** appear as **moving** on the screen. This is due to persistence of vision

Fundamentals of Videos

- video: sequence of images displayed at constant rate
 - e.g. 24 images/sec
- digital image: array of pixels
 - each pixel represented by bits
- redundancy
 - spatial (within image)
 - temporal (from one image to next)

Examples:

- MPEG 1 (CD-ROM) 1.5 Mbps
- MPEG2 (DVD) 3-6 Mbps
- MPEG4 (often used in Internet, < 1 Mbps)

Research:

- layered (scalable) video
 - adapt layers to available bandwidth

Modes of Interaction

- Live streaming
- Interactive live video conferencing
- Recorded streaming
- Recorded download

Quality of Service

- Delay: how long does it take?
- Throughput: how much per unit time?
- Loss: what percentage delivered
- Jitter: what is the variation in delay?

- Communication

End to End Quality of Service

End to End matters to the user

Components

Client
Network
Server

Need to have a balanced system

User Quality of Experience

- Fidelity
 - Image: resolution
 - Sound: resolution
 - Video: HD, 4k etc.
- Speed
 - Responsiveness
 - Delay
 - Interaction

Making a video from Powerpoint

- Shoot or make some media
- Use it to make a deck of slides
- Record yourself talking to the slides

The screenshot shows a PowerPoint presentation with five slides. The first slide is the title slide, the second is 'Why now?', the third is 'Why does heritage matter?', the fourth is 'What do we mean by?', and the fifth is 'Where does the digital come in?'. The presentation is displayed in a software window with a menu bar at the top and a taskbar at the bottom.

Digital Heritage and Preservation

Alan Miller
ahr1@st-andrews.ac.uk

Why now?

- Changes in the world
 - Climate change
 - Conflict
 - Covid 19
- Advances in digital technology:
 - Smart phones
 - Computer games
 - Computer networks
- Changes in Digital Literacies
 - Mobile
 - 3D Environments

Why does heritage matter?

- Important for the economy
- Important for education and understanding the past
- Important part of defining who we are

What do we mean by?

Valued objects and qualities such as historic buildings and cultural traditions that have been passed down from previous generations.
'Europe's varied cultural heritage'
mass noun 'the estuary has a sense of history and heritage'

as modifier Denoting or relating to things of special architectural, historical, or natural value that are preserved for the nation.
'a heritage centre'
'60 miles of heritage coastline'

Threats to heritage

There are numerous risks and dangers threatening the cultural heritage, such as war and political, ethnic and religious conflict, looting, theft, illegal export and import, illicit trafficking of cultural property, deterioration, neglect, destruction or alteration to heritage, pollution, and disappearance.

UNESCO

Where does the digital come in?

- Preservation
 - Creating a digital record of the present
- Understanding
 - Once digitised heritage can be examined in new ways
- Communication
 - In the digital domain accessibility is transformed

Resources

Kdenlive

- Multitrack edition with a timeline for editing
- Unlimited number of video and audio tracks, plus
- Facilities for splitting audio and video from a clip into multiple tracks
- You can keep working on a project while it is rendering
- Effects and transitions can be used with ease!
- Simple tools for easy creation of color clips, text clips and image clips
- Automatic [slideshows](#) creation from pictures directories, with crossfade transitions among the images
- Configurable keyboard shortcuts and interface layouts

The screenshot shows the Kdenlive website with a navigation bar at the top containing links for About, Features, Download, News, Toolbox, Contribute, and Inside Kdenlive. Below the navigation bar is a horizontal bar with four download buttons: AppImage 20.08.0, PPA 20.08.0, Install 20.08.0, and Standalone 20.08.0. The main content area is divided into three sections: GNU/Linux distributions, Windows, and Mac OSX. The GNU/Linux section provides instructions on how to use the AppImage and how to add the PPA to repositories. The Windows section includes a warning about the uninstall utility and instructions for the standalone version. The Mac OSX section mentions that packages are available from the MacPorts project and provides instructions for compiling and installing.

[kdenlive](#) About Features **Download** News Toolbox Contribute Inside Kdenlive

AppImage 20.08.0 PPA 20.08.0 Install 20.08.0 Standalone 20.08.0

GNU/Linux distributions

The AppImage will work on most GNU/Linux distributions. After having downloaded the file, you have to make it executable (right click and in the permissions set "Allow executing file as program" or similar); you can then launch it by double-clicking on it.

If you're using Ubuntu or a derivative and prefer to use native packages, you can add our PPA to your repositories.

Windows

Do not use the Kdenlive uninstall.exe utility installed before 10-July-2019, simply delete the installed files and folders manually. More details see [here](#).

Windows standalone version: Double click the self-extracting exe (not an installer, does not need admin rights to extract). To start Kdenlive double click Kdenlive.exe in the "bin" folder.

First time use of Kdenlive: Please start Kdenlive twice. This issue should be solved with Windows version 19.04.2-6

Corrupted Kdenlive GUI. Please follow these [steps](#) to solve the issue.

Mac OSX

Kdenlive and MLT can compile and run under Mac OS X. Packages are available from the [MacPorts](#) project, unfortunately they are outdated. Volunteers are encouraged to contribute.

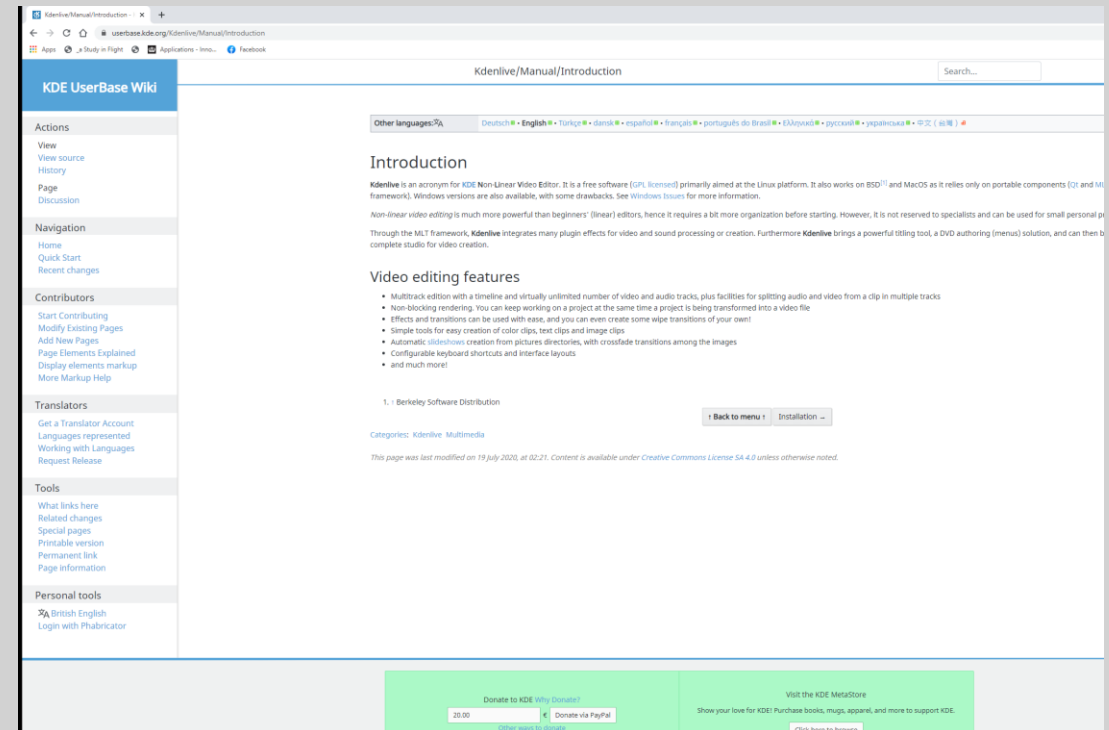

Compiling and Installing

Most distributions ship Kdenlive packages. However, Kdenlive and its core libraries like MLT are evolving quickly and distribution packages are not always available for the latest version.

Check our [documentation](#) if your distribution is not in the list for instructions on how to compile and install manually.

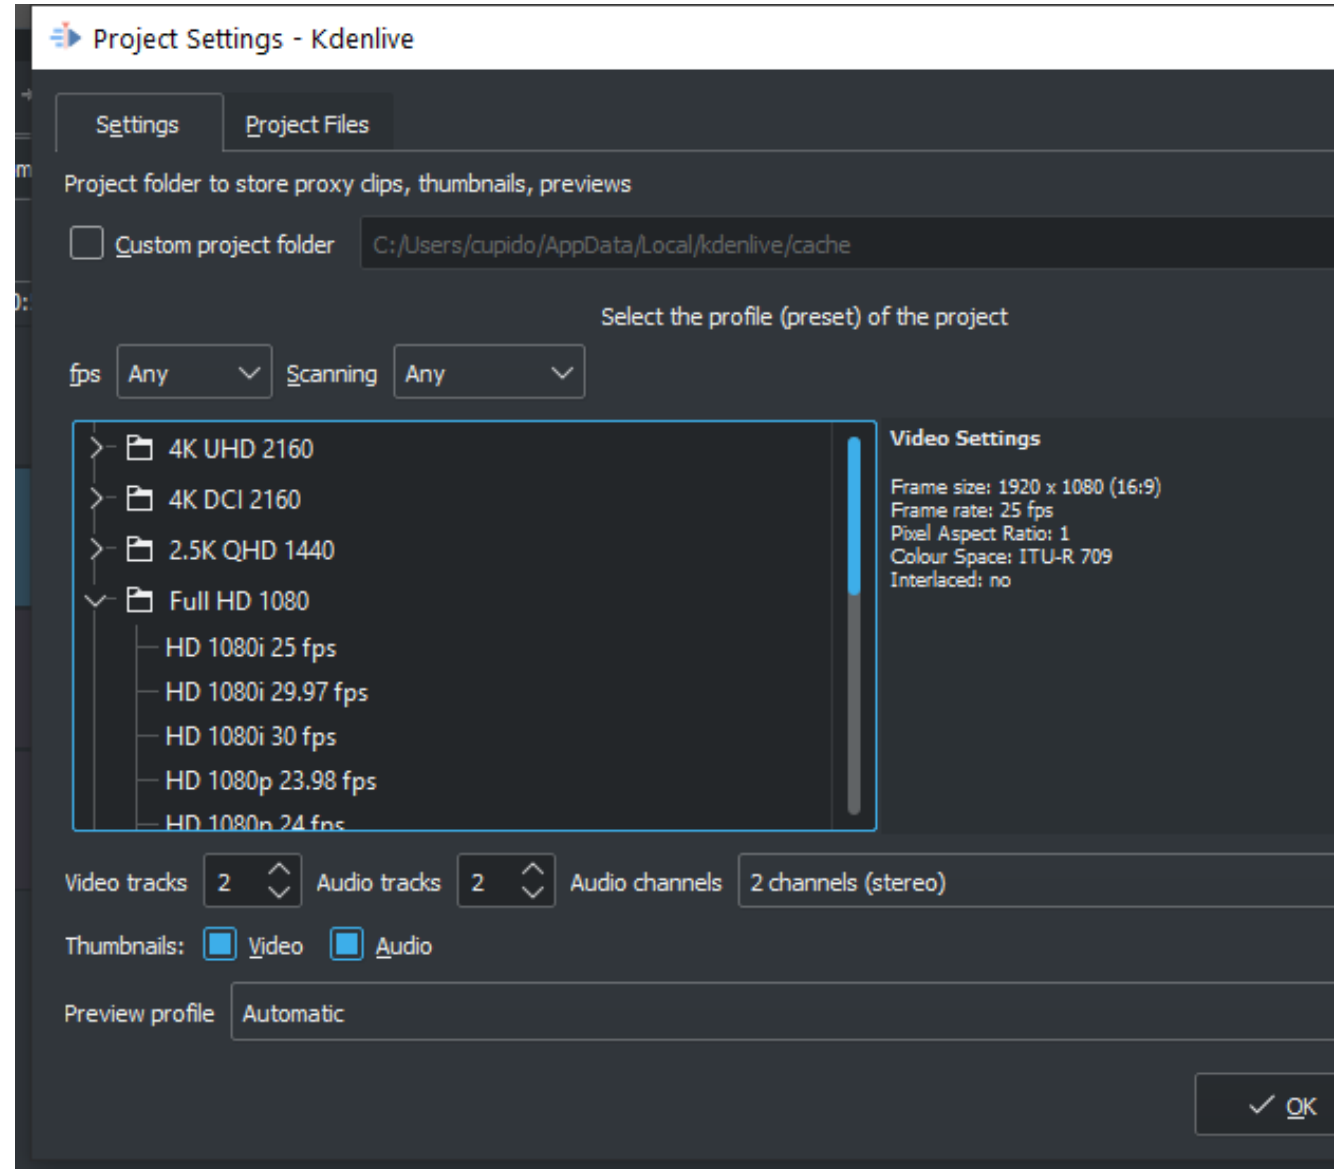

Quick Start

- Create a project
- Add clips
- Edit timeline
- Add effects
- Add soundtrack
- Render Video

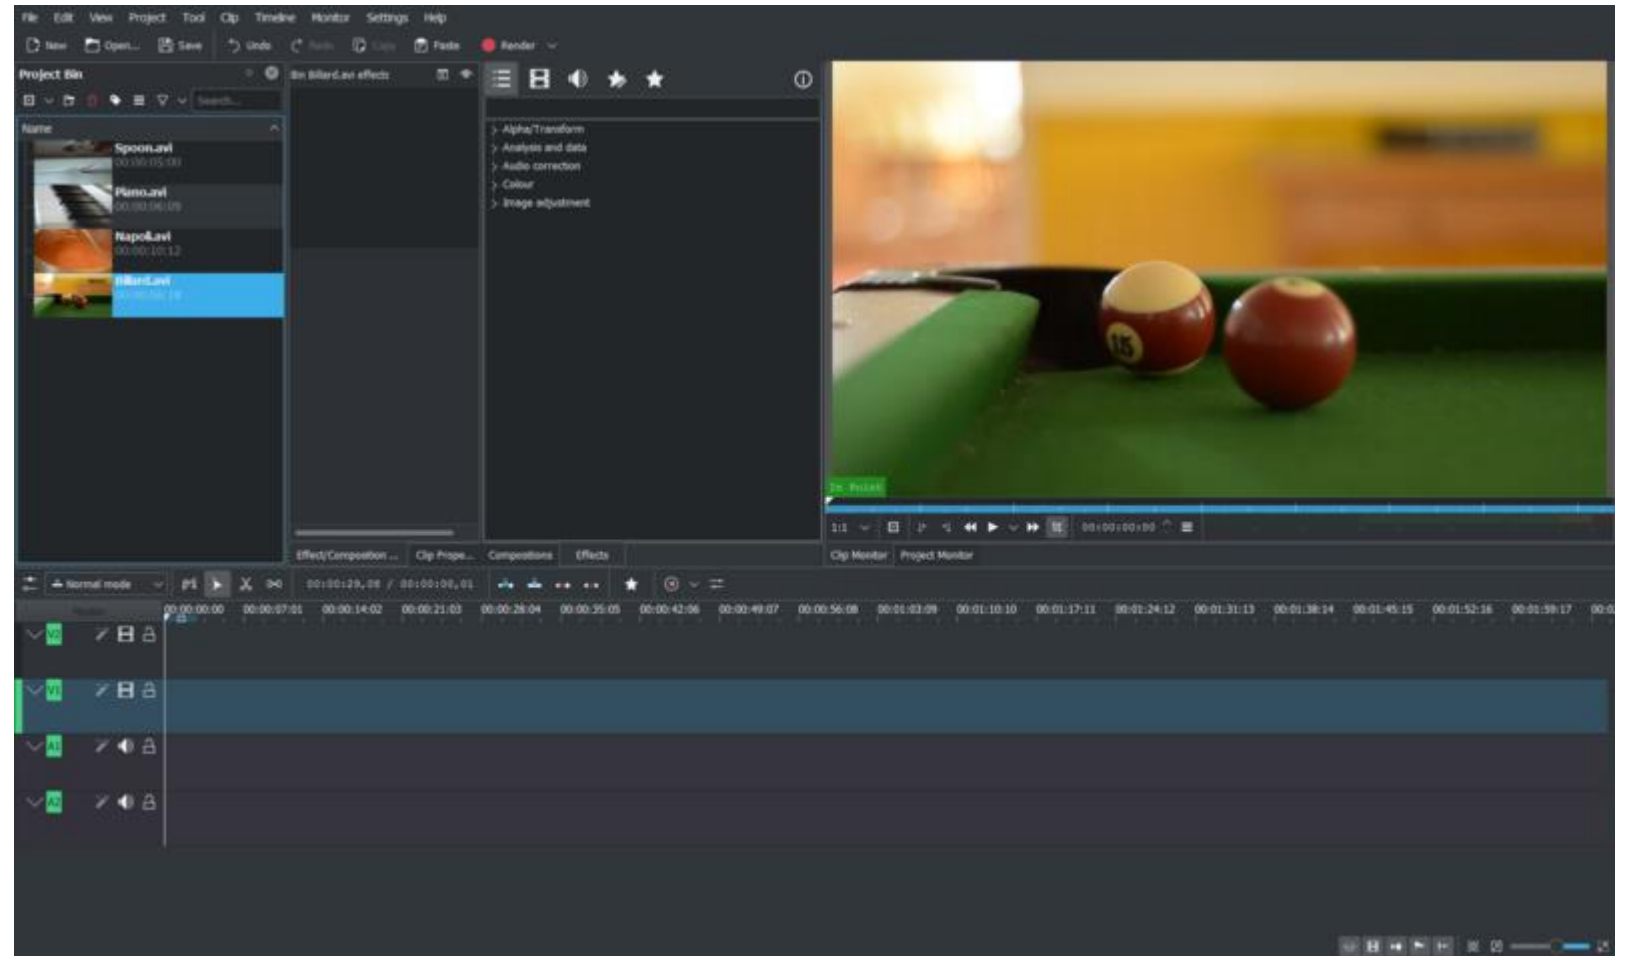

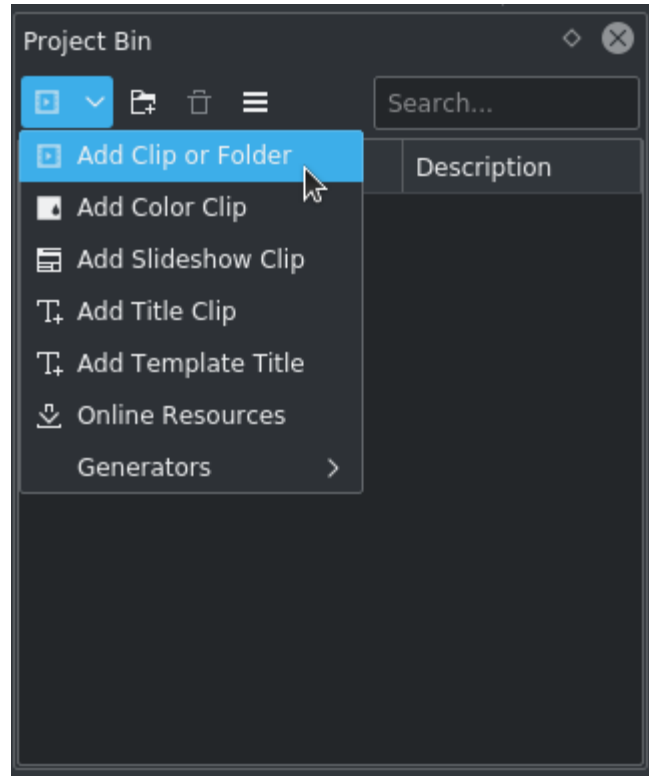

Create project

- Choose folder
- Frames per second
- Resolution
- Number of video tracks
- Number of audio tracks
- Number of channels

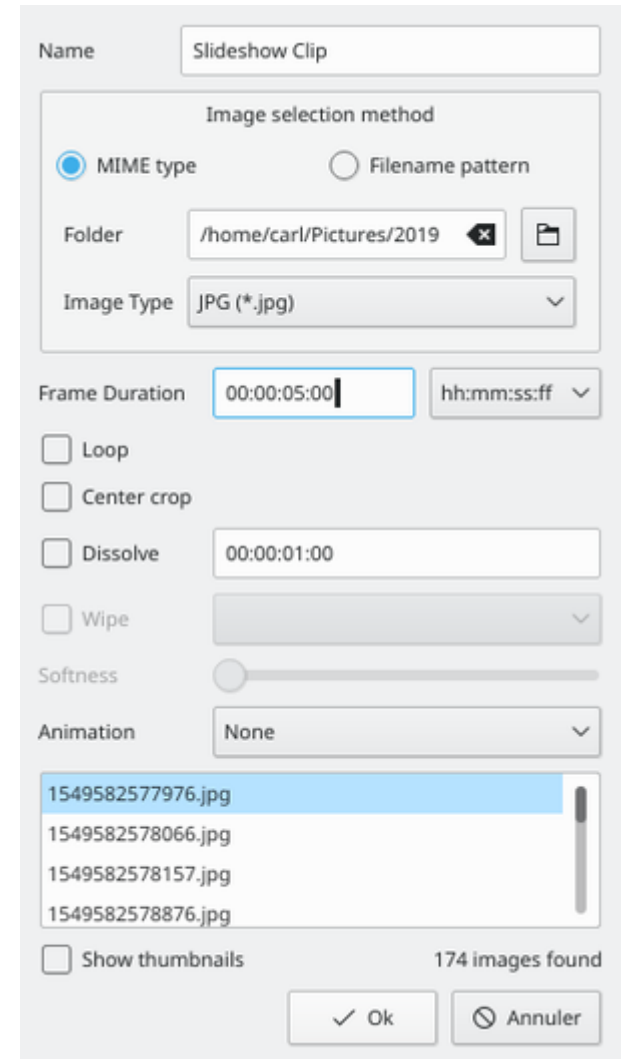

Add clips

Slideshow clips

- 1) Slideshow clips are clips created from a series of still images.
- 2) To create a slideshow clip, choose Add Slide Show Clip from the Add Clip drop down list.
- 3) From the **Slideshow Clip** dialog choose Filename pattern as **Image selection method**.
- 4) Browse to the location of the images which will make up your slideshow and select the first image.
- 5) Number the image file names to set the order 001.jpg,002.jpg etc
- 6) Select an appropriate frame duration.
- 7) Then hit OK.
- 8) A video file made up of all the images in the folder from which you selected the first frame file from will be added to the Project Tree.
- 9) You can then drag this video to the timeline.

https://userbase.kde.org/Kdenlive/Manual/Projects_and_Files/Clips

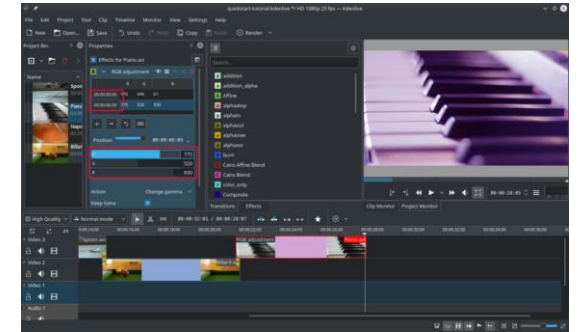

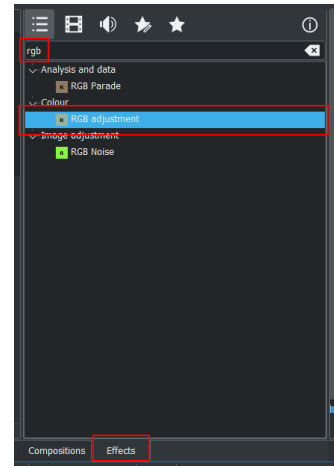

Timeline

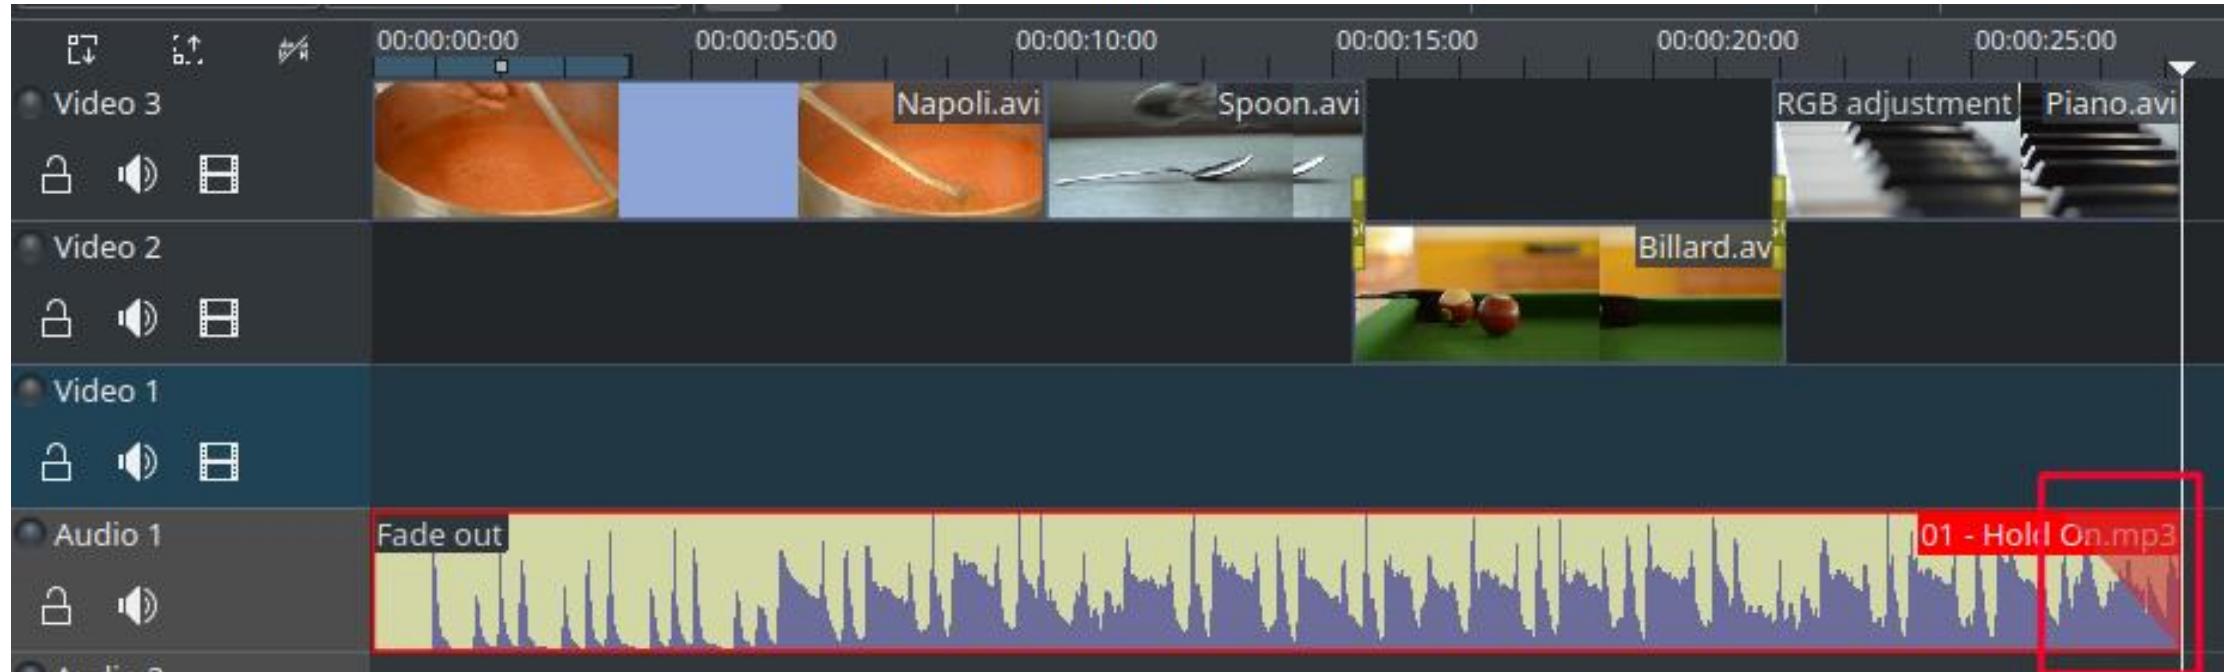

- Drag and drop editing
- Cut unwanted pieces of clips
- Add transitions between clips

Adding effects

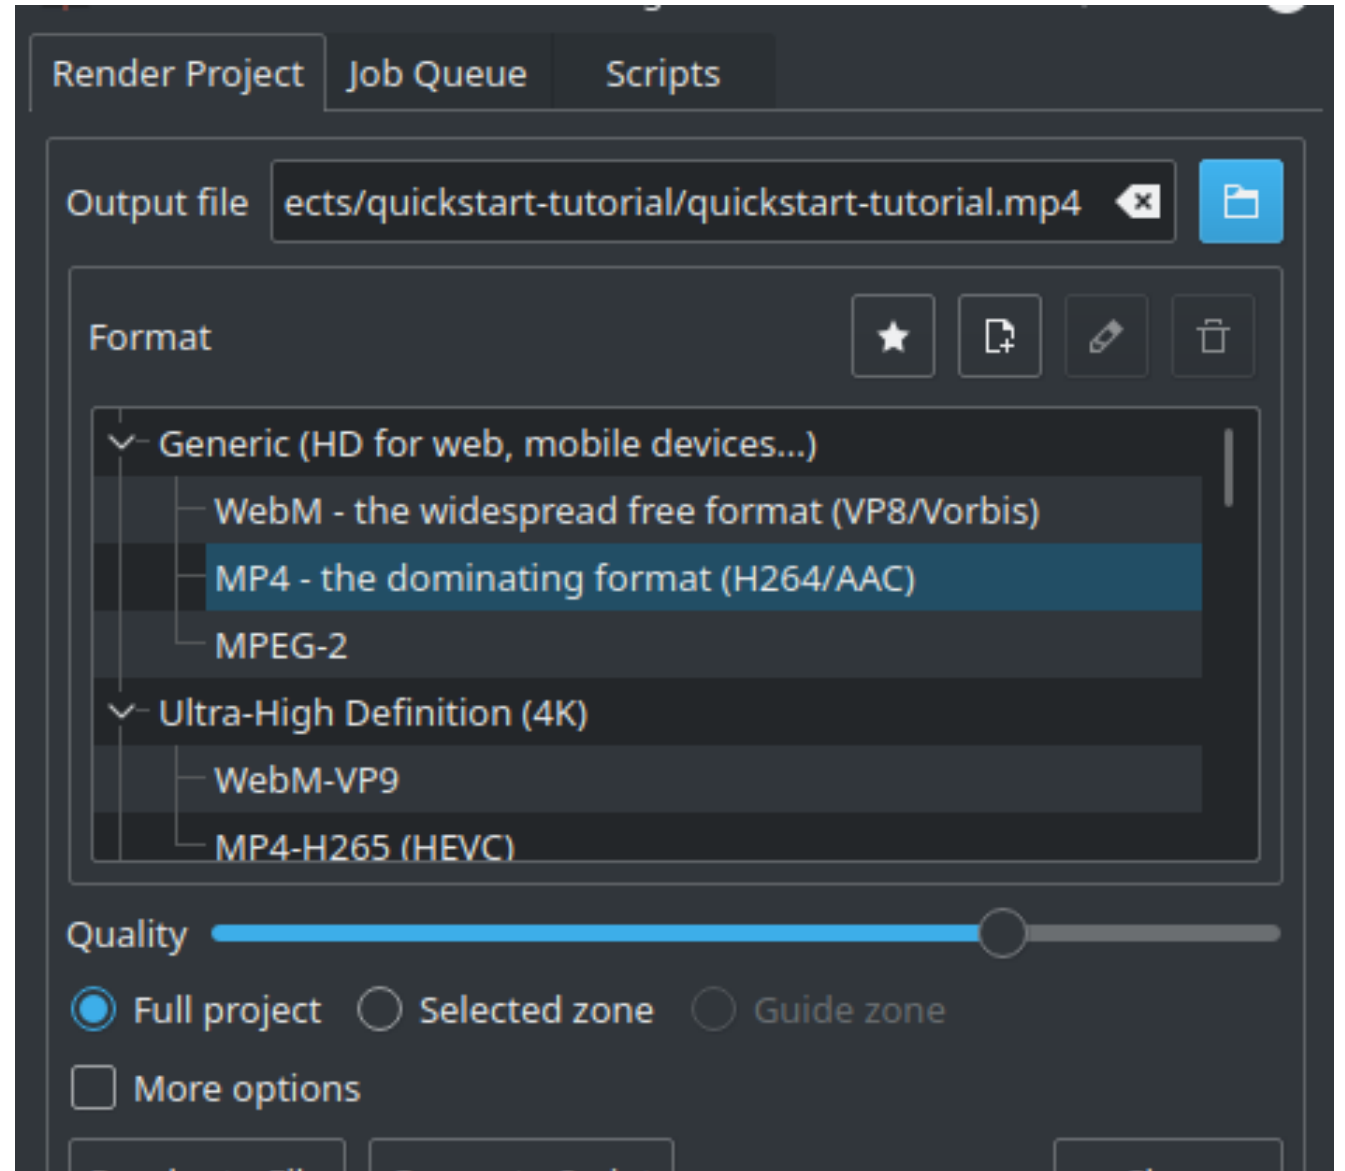

Adding Audio

Rendering

- Set location
- Choose resolution
- Choose format
- Render file out

GRAND-FINAL! Sentinels vs Cloud9 HIGHLIGHTS - PAX...

“When you upload or post Content to YouTube, you grant: to YouTube, a worldwide, non-exclusive, royalty-free, transferable licence (with right to sub-licence) to use, reproduce, distribute, prepare derivative works of, display, and perform that Content in connection with the provision of the Service and otherwise in connection with the provision of the Service and YouTube's business, including without limitation for promoting and redistributing part or all of the Service (and derivative works thereof) in any media formats and through any media channels;”

<https://www.youtube.com/static?template=terms>

Creative Commons

Creative Commons licences provide a standard way for content creators to grant someone else permission to use their work. YouTube allows users to mark their videos with a Creative Commons [CC BY](#) licence.

If you've marked your video with a CC BY licence, you retain your copyright and other users get to reuse your work subject to the terms of the licence.

Creative Commons on YouTube

All users have the ability to mark uploaded videos with a Creative Commons licence.

The standard YouTube licence remains the default setting for all uploads. To review the terms of the standard YouTube licence, please refer to our [Terms of Service](#).

Because Creative Commons licences are for your original content, you cannot mark your video with the Creative Commons licence if there is a [Content ID claim](#) on it.

By marking your original video with a Creative Commons licence, you are granting the entire YouTube community the right to re-use and edit that video.

What's eligible for a Creative Commons licence

Please understand that you may only mark your uploaded video with a Creative Commons licence if it consists entirely of content that can be licensed by you under the CC BY licence. Some examples of such licensable content are:

- Your originally created content
- Other videos marked with a CC BY licence
- Videos in the [public domain](#)

what is avidemux?

- news
- downloads
- screenshots
- wiki docs
- forums

Avidemux is a free video editor designed for simple cutting, filtering and encoding tasks. It supports many file types, including AVI, DVD compatible MPEG files, MP4 and ASF, using a variety of codecs. Tasks can be automated using projects, job queue and powerful scripting capabilities.

Avidemux is available for Linux, BSD, Mac OS X and Microsoft Windows under the GNU GPL license. The program was written from scratch by Mean, but code from other people and projects has been used as well. Patches, translations and even bug reports are always welcome.

Microsoft PowerPoint interface showing a presentation slide titled "Going Live with social media". The slide features a colorful abstract background with a central globe and a grid pattern. The text "Going Live" is prominently displayed in the center, with "with social media" to its right. The footer of the slide includes logos for Interreg North Sea Region CUPIDO, University of St Andrews (FOUNDED 1413), HIE Highlands and Islands Enterprise, and XPONORTH.

The PowerPoint ribbon is visible at the top, with the "Insert" tab selected. The slide thumbnail pane on the left shows a sequence of six slides. The status bar at the bottom indicates "Slide 1 of 46" and "English (U.S.)".

OBS Studio interface showing the Audio Mixer and Scene Transitions panels. The Audio Mixer displays two audio sources: Desktop Audio and Mic/Aux, both at 0.0 dB. The Scene Transitions panel shows a Fade transition with a duration of 300 ms. The Controls panel on the right includes buttons for Start Streaming, Start Recording, Studio Mode, Settings, and Exit. The bottom status bar shows "LIVE: 00:00:00", "REC: 00:00:00", and "CPU: 1.9%, 60.00 fps".
