Exploitation of waste heat potentials in Central Europe

Project CE-HEAT organizes within the 12th International SDEWES Conference a special event on Exploitation of waste heat potentials in Europe, which will be held on 5th of October in Dubrovnik.

WHERE: Hotel Valamar Lacroma Dubrovnik, Iva Dulcica 34, 20000 Dubrovnik, Croatia, situated at Babin kuk

WHAT: Exploitation of waste heat potentials in EU

The event marks waste heat as an important energy source, which should be valorized in existing and future energy systems. Various speakers will provide an up-to-date understanding of the fundamentals, principles and practices associated with the operation of waste heat utilization systems.

In broader view, the exploitation of thermal energy as excess energy of industrial processes across Europe will be featured. The event will provide the information concerning the exploitation of waste heat potentials in EU and developments in the field of waste heat recovery in specific industrial processes. The efforts of CE-HEAT initiative towards the common Central Europe (CE) waste heat sources cadastre and a waste heat platform will be addressed. The event will be wrapped up by the panel discussion leading to the directions for enhancement of investment mechanisms and strategic guidelines for improvement of waste heat utilization in CE space.

WHEN: Thu, October 5, 2017, 13:30-17:30 h
