

# DELIVERABLE 4.1.1

# COMMUNICATION STRATEGY for EDU-RAIL PROJECT

European Union European Regional Development Fund

## 1. Introduction

The overall objective of the project is to reduce fragmentation of railway engineering and logistics VET in the region by jointly developing aligned specialisation modules that take into account the needs of the regional labour market, including shared challenges of further integration with European Railway system and joint regional aspects.

The communication plan is a tool for making most of project communication. It is to support project implementation and can be used to further elaborate and better plan the communication work in the project.

Communication is a common responsibility of all project partners to ensure efficient dissemination of the project results and outcomes. Dissemination will take place throughout the project period and all partners will be active participant in this task.

Effective communication will help to deliver project's overall objective, engage successfully with stakeholders, communicate the results of work as well as ensure people understand the importance of project.

### 2. Communication objectives

Communication is a common responsibility of all project partners to ensure efficient dissemination of the project results and outcomes. Dissemination will take place throughout the project period and all partners will be active participant in this task.

To ensure effective communication the Communication Strategy is worked out by TTI in cooperation with the management team. Communication Strategy details the relevant message for each target group, the methods of taking the message to the target groups and the measures to monitor the communication process to ensure it succeeds.

The project webpage is set up on the TTI webpage to reach stakeholders and cooperation partners as well as wider public. Communication seminars will be organised in all 3 partner countries to present project final results to stakeholders. Dissemination includes communication with target groups, presentations, articles. In addition to direct contacts of all project partners the Steering Group will be a valuable support to the project in providing access to new networks and acting as catalysts for the change through analysing the achieved results and spreading information about them.

The modules will be also disseminated to other railway education institutions in the neighboring countries of the Central Baltic region in order to facilitate common understanding and cooperation in railway VET.

The project results will be published on the project webpage and also on webpages of all partners. These webpages are run long-term, and thus the materials will be long-term available for use by others. All partners will continuously disseminate project results after the end of the project and will be ready to give further information and consultations.

## 3. Target groups

The target groups are the main groups of people who are implementing the project as well as those who are of interest to project in reaching its main objectives. Each of your target groups has unique characteristics and needs. Different target groups require different communication approaches.

The main target groups of project and their needs and sources are shown in the Table 1.

| Target group  | What do they need to know?  | How to identify the need?   |
|---|---|---|
| Project partners  | Understand their own role in<br>implementing the project well<br>How to succeed in project<br>communication                         | Day-to-day contact within the team.<br>Feedback and evaluation process. |
| General public  | The benefits of the project and European cooperation  | Media, social media   |
| Railway related<br>stakeholders   | Needs of railway employers,<br>operational environment of the<br>railway  | Round tables, interview, questionnaires                                 |
| Academic staff of<br>higher education<br>and research<br>education/training<br>centres and school<br>enterprise,<br>excluding SME | How the five multipurpose study<br>modules, if implemented in teaching<br>and training process, will meet the<br>needs of employers | Round tables, workshops, interview, questionnaires                      |

#### Table 1. Target group communication needs

# 4. Strategy and measures to be taken

#### External communication

EDU-RAIL web page

Articles

Media relations - press releases

Presentations

Seminars and events

Social networking

#### Internal communication

Project meetings (Management team and WP meetings)

Steering group meetings

Information through project partners ordinary information channels

Intranet for the project partners

Articles

The main aim with the communication in the project is to reach the target groups with relevant and correct information so that the project aims will be fulfilled.

All participants in the project are responsible for spreading knowledge about the project aims when communicating with target groups.

An important part of the communication is to share methods, results and knowledge that have been acquired during the project, with the target groups.

#### Table 2. Message and methods for different target groups

| Target group   | Method   |
|--|--|
| Project partners   | Meetings, workshops, e-mails, web page   |
| General public   | Press conferences, press releases, web page, articles  |
| Rail related stakeholders                                | Round tables, seminars, workshops, e-mails, web page, articles   |
| Academic staff of relevant education and VET enterprises | Round tables, seminars, workshops, e-mails, web page,<br>newsletters, learning materials in the virtual education<br>environment |
| SME's in the Central Baltic region                       | Seminars, workshops, information material, networking, web page  |
| Steering group   | Meetings, e-mails, web page  |
| Media  | Press conferences, press releases, interview, web page   |
| Specific projects and organisations of interest          | Via direct contact or events   |
| Joint Technical Secretariat (JTS)                        | Meetings, e-mails, communication through APM and CPM   |

# 5. Work plan

The work plan that indicates the main communications activities is shown in the Table 3.

#### Table 3. Communication work plan

| Activities  | Timeframe           | Responsibilities            |
|---|---------------------|-----------------------------|
| Networking, seminars and work shops   | Continuously        | LP and all project partners |
| Information at Steering<br>Group meetings about<br>communication and info<br>status | Continuously        | LP                          |
| Kickoff meeting in Tallinn  | November 2015       | LP                          |
| Steering Group Meetings   | November 2015       | LP                          |
|   | November 2016       | LP                          |
| Management team meetings  | November 2015       | LP                          |
|   | May 2016            | LP                          |
|   | November 2016       | LP                          |
|   | May 2017            | LP                          |
|   | November 2017       | LP                          |
|   | September 2018      | LP                          |
| Round table with national railway stakeholders                                      | February-March 2016 | LP and all project partners |
| Internal status report  | Monthly             | LP                          |
| Design, logo  | December 2015       | ТТІ                         |
| Webpage of the project  | February 2016       | ТТІ                         |
| Local webpage with general information about project                                | March 2016          | LP and all project partners |
| Country seminars  | June 2018           | LP and all project partners |
| Portal with education modules   | June 2018           | LP and all project partners |
| Articles  | One per year        | LP and all project partners |

# 6. Responsibilities for implementation

The responsible persons for work plan implementation are shown in the Table 4.

| Activities  | Timeframe           | Responsibilities             |
|---|---------------------|------------------------------|
| Networking, seminars and work shops   | Continuously        | Local project leaders        |
| Information at Steering<br>Group meetings about<br>communication and info<br>status | Continuously        | LP leader                    |
| Kickoff meeting in Tallinn  | November 2015       | LP leader                    |
| Steering Group Meetings   | November 2015       | LP leader                    |
|   | November 2016       | LP leader                    |
|   | November 2017       |                              |
|   | November 2018       |                              |
| Management team meetings  | November 2015       | LP leader                    |
|   | May 2016            | LP leader                    |
|   | November 2016       | LP leader                    |
|   | May 2017            | LP leader                    |
|   | November 2017       | LP leader                    |
|   | September 2018      | LP leader                    |
| Round table with national railway stakeholders                                      | February-March 2016 | Local project leaders        |
| Internal status report  | Monthly             | Content project manager      |
| Design, logo  | December 2015       | TTI project leader           |
| Webpage of the project  | February 2016       | TTI project leader           |
| Local webpage with general information about project                                | March 2016          | LP and local project leaders |
| Country seminars  | June 2018           | Local project leaders        |
| Articles  | One per year        | Local project leaders        |
| Portal with education modules   | June 2018           | WP2 and WP3 project leaders  |
| General coordination of   | Continuously        | Content project manager      |
|   |                     |                              |

#### Table 4. Responsibilities for implementation of communication working plan

communication activities

TTI project leader

# 7. Evaluation

Effectiveness of communication activities is defined by means of indicators listed in Table 5.

| Activities   | Indicators                                |
|--|---|
| Networking, seminars and workshops   | Number of local seminars and workshops    |
|  | Number of participants                    |
| Information at Steering Group meetings about communication and info status | Presentations at the internal portal      |
| Kickoff meeting in Tallinn   | Minute                                    |
|  | Presentations at the internal portal      |
| Steering Group Meetings  | Presentations at the internal portal      |
| Management team meetings   | Minute                                    |
|  | Presentations at the internal portal      |
| Round table with national railway stakeholders                             | Regional study reports                    |
| Internal status report   | E-mail                                    |
| Webpage of the project   | Web page                                  |
| Local webpage with general information about project                       | Web pages                                 |
| Articles   | Number of articles and other publications |

# 8. Budget

All communication activities are in line with the already agreed budget for the project.
