Introduction

This report summarizes the results of Self-Assessment tool online survey.

Aim of the survey was to evaluate strengths and weakness related to policy, ecosystems and innovations in the field of smart health and care and the learning process, in 9 ITHACA partner regions.

Data collection took place between December 4th 2017 and January 14th 2018.

Sample & Respondents

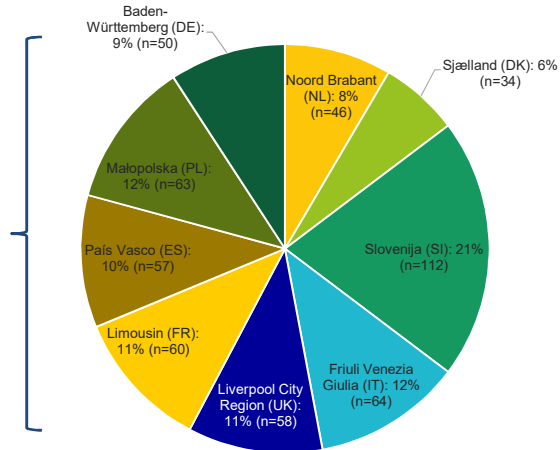

ITHACA SURVEY BASICS

In total, 544 of stakeholders across nine European regions have responded to the ITHACA SA Survey. The highest absolute numbers of responses were collected in Slovenia, Italy and Poland, and the lowest in Denmark and the Netherlands.

TOTAL RESPONSES
544

Note: Additionally, 4 responses from non listed regions were collected. But are excluded from further analysis.

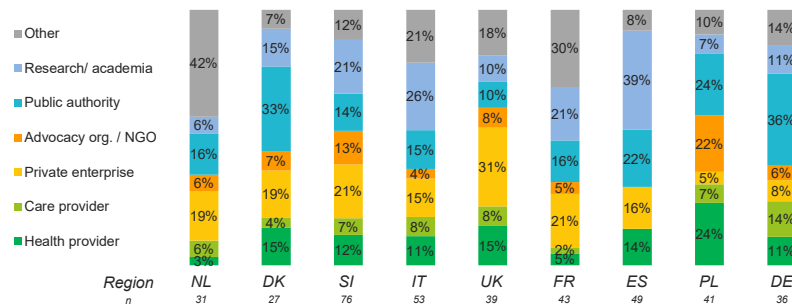

5

TYPE OF ORGANIZATION

Poland has the highest share of respondents from health providing organizations (24%), while the Netherlands and France have the lowest. The share of respondents from private enterprises is the highest in the UK (39%).

What type is your organization?

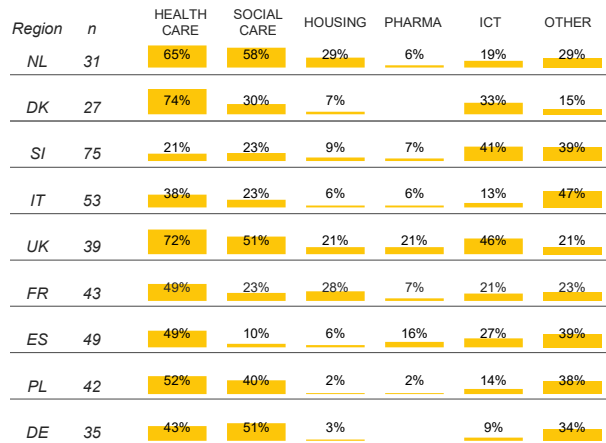

6

OPERATIONAL FIELDS

Health care and to lesser extent social care are the most common operational fields of respondents in the majority of regions. Exception is Slovenia with the ICT as the most common operational field.

In what fields does your organization operate?

7

SCOPE OF ORGANIZATION

In all countries but Slovenia, most organizations of respondents mainly operate on the regional scope. Local main scope is relatively common amongst Polish and German respondents, and the least common in Spain. Spain is also the most internationally orientated; 36% of Spanish respondents report that their scope is international. In contrast, in Denmark this share is only 7%.

What is the main scope of the organization?

8

Results Summary

General

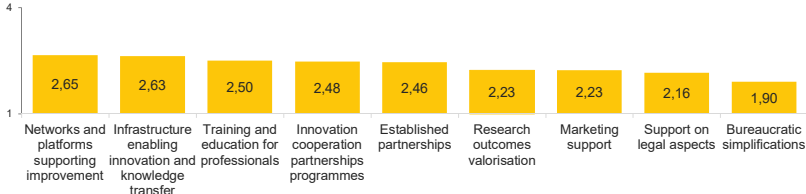

9

INNOVATION SUPPORT SERVICES

Networks and platforms supporting improvement is on average the highest rated extent of Support services items, closely followed by *Infrastructure enabling innovation and knowledge transfer*, while *Bureaucratic simplifications* and *Research outcomes valorization* have the lowest ratings.

In your opinion, to what extent are the following support services, for developing and scaling up of smart health and care solutions, provided in your region? *Scale 1 (Not at all) to 4 (To a large extent)*.

Support Service	Average Mean Value
Networks and platforms supporting improvement	2.65
Infrastructure enabling innovation and knowledge transfer	2.63
Training and education for professionals	2.50
Innovation cooperation partnerships programmes	2.48
Established partnerships	2.46
Research outcomes valorisation	2.23
Marketing support	2.23
Support on legal aspects	2.16
Bureaucratic simplifications	1.90

Note: Average mean values presented above are calculated as the average of regional mean values.

10

DEVELOPMENT & USE OF INNOVATIVE PRODUCTS & SERVICES

New ideas are rated as the most intensively occurring development in the field, followed by *Innovative products and services*. The average mean value is somewhat lower for the intensity of *Daily usage of innovative products and services*.

How would you rate intensity of the occurrence of the following developments in the field of smart health and care in your region? Scale 1 (Very low intensity) to 5 (Very high intensity).

Note: Average mean values presented above are calculated as the average of regional mean values.

11

REGIONAL POLICY FRAMEWORK

Influencing initiatives funding decisions has the highest average mean value among the regional policy framework facets, followed somewhat distantly by *Lead for initiatives*. The lowest average mean values were recorded for *Transnational knowledge and experience exchange*, *Integrating services into publicly-funded systems* and *Services deployment plans*.

To what extent do you agree or disagree with the following statements about regional policy frameworks related to development and use of technology-enabled services for smart health and care within your region? Scale 1 (Strongly disagree) to 5 (Strongly agree).

Note: Average mean values presented above are calculated as the average of regional mean values.

12

Results Summary

Breakdown by region

13

ECOSYSTEM - Usefulness of involvement

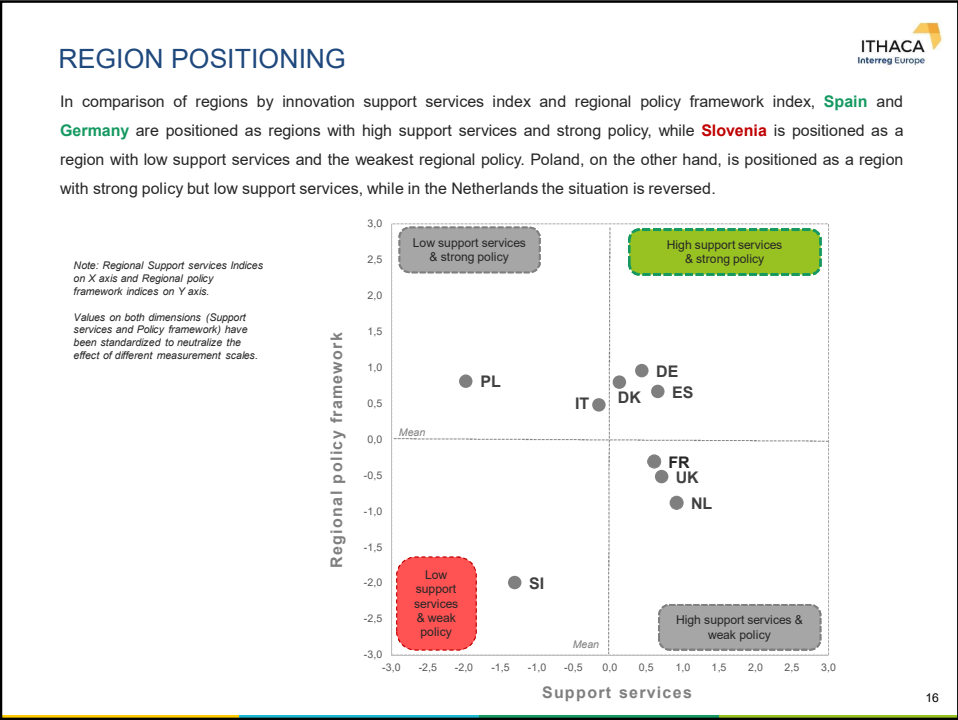

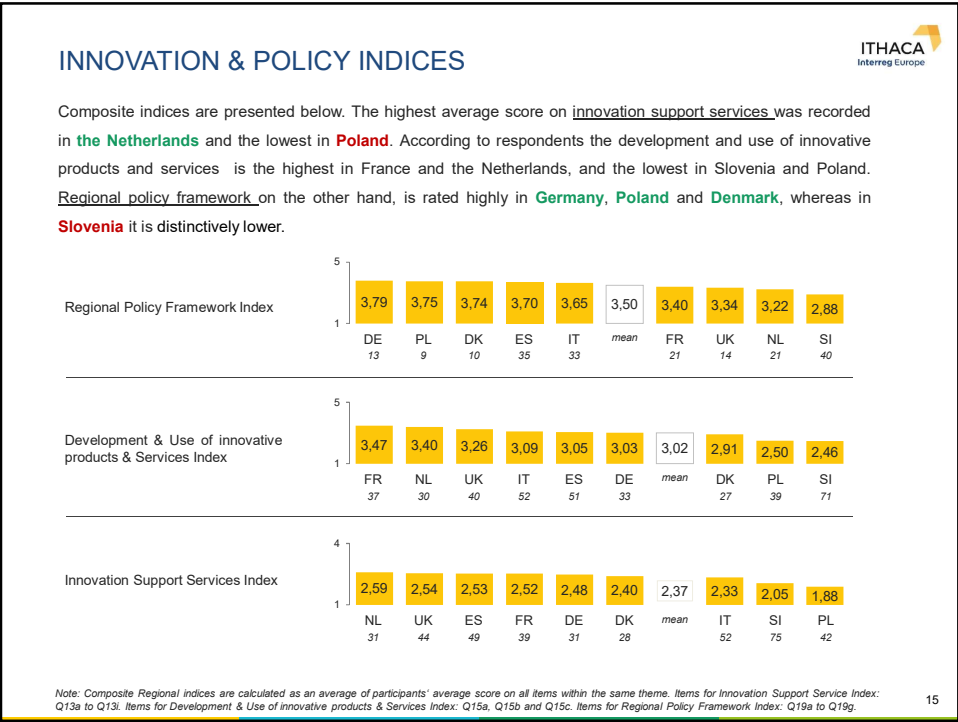

In **Germany, UK and the Netherlands** more than half of respondents consider their involvement as very useful. On the other side, only 17% **Polish** and 18% **Slovenian** respondents evaluate their involvement as very useful.

In general, how useful is the involvement in the innovation cooperation partnerships on smart health and care for your organization? In case, you are involved in more innovation cooperation partnerships, please consider the usefulness of the one most relevant for you.

Region	n	Mean	Very useful	Somewhat useful	Slightly useful	Not useful at all
DE	35	3,7	69%	31%	0%	0%
UK	52	3,5	58%	37%	6%	0%
NL	39	3,4	54%	33%	8%	5%
ES	27	3,3	44%	37%	19%	0%
FR	51	3,2	33%	49%	18%	0%
IT	38	3,1	34%	47%	13%	5%
DK	25	3,0	24%	52%	24%	0%
PL	18	2,9	17%	61%	22%	0%
SI	45	2,8	18%	49%	31%	2%

Note: Only participants that are involved in at least one listed cooperation partnership or have indicated „other“ partnership in Q5 were asked this question.

14

Results Summary

Breakdown by type of organization

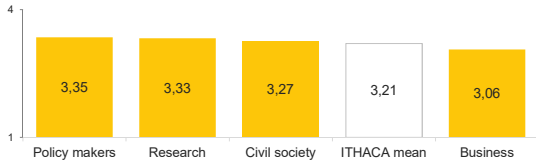

17

ECOSYSTEM - Usefulness of involvement

Policy makers and **Research** organizations are those who find involvement in the innovation cooperation partnerships most useful, with averages values of 3,35 and 3,33 respectively. The two types of organization are closely followed by Civil society (3,27), while **Business** organizations have rather lower average that stands at 3,06.

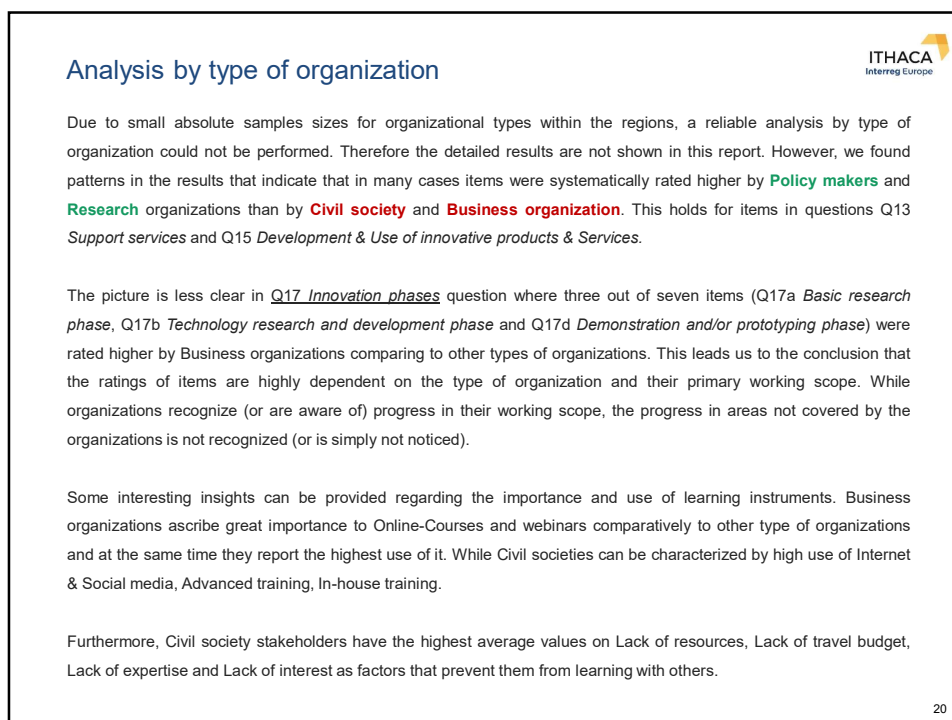

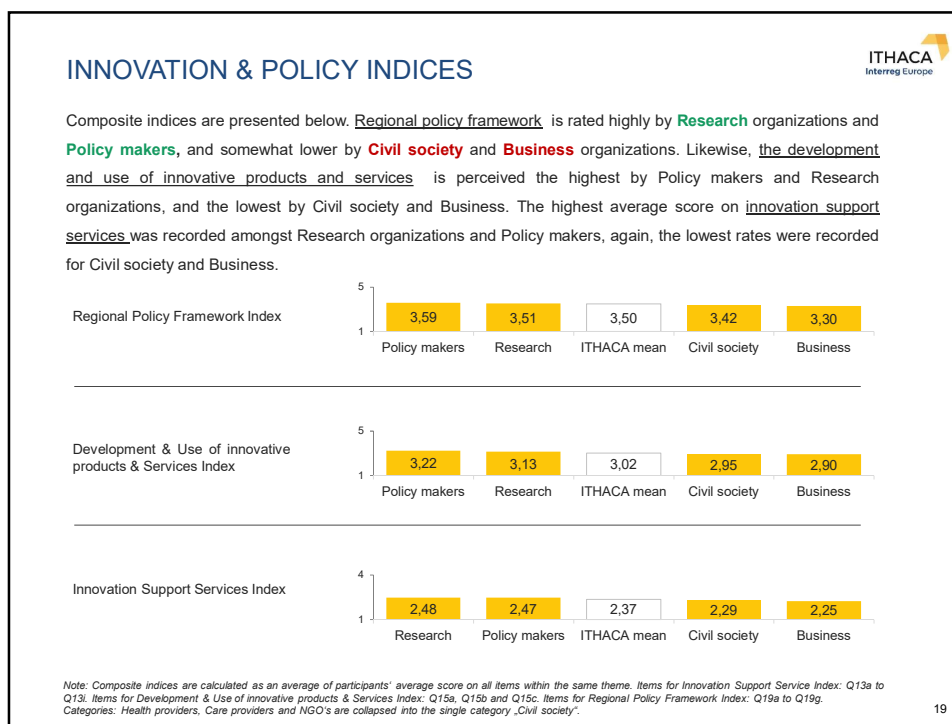

In general, how useful is the involvement in the innovation cooperation partnerships on smart health and care for your organization? In case, you are involved in more innovation cooperation partnerships, please consider the usefulness of the one most relevant for you.

Organization Type	Average Value
Policy makers	3,35
Research	3,33
Civil society	3,27
ITHACA mean	3,21
Business	3,06

Notes:
 Sample: Only participants that are involved in at least one listed cooperation partnership or have indicated „other“ partnership in Q5 were asked this question.
 Means: In the first step the average value for a specific type of organization in every region was calculated, in second step, the average across all regions was calculated.
 ITHACA mean: Ithaca mean is the average of regional averages.
 Categories: Health providers, Care providers and NGO's are collapsed into the single category „Civil society“.

18

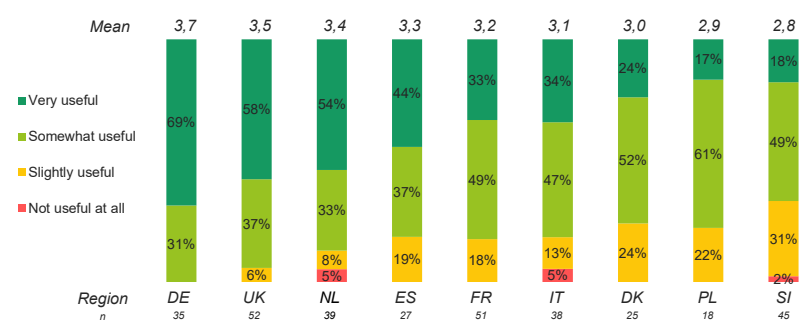

Detailed overview of the results

ECOSYSTEM - Usefulness of involvement

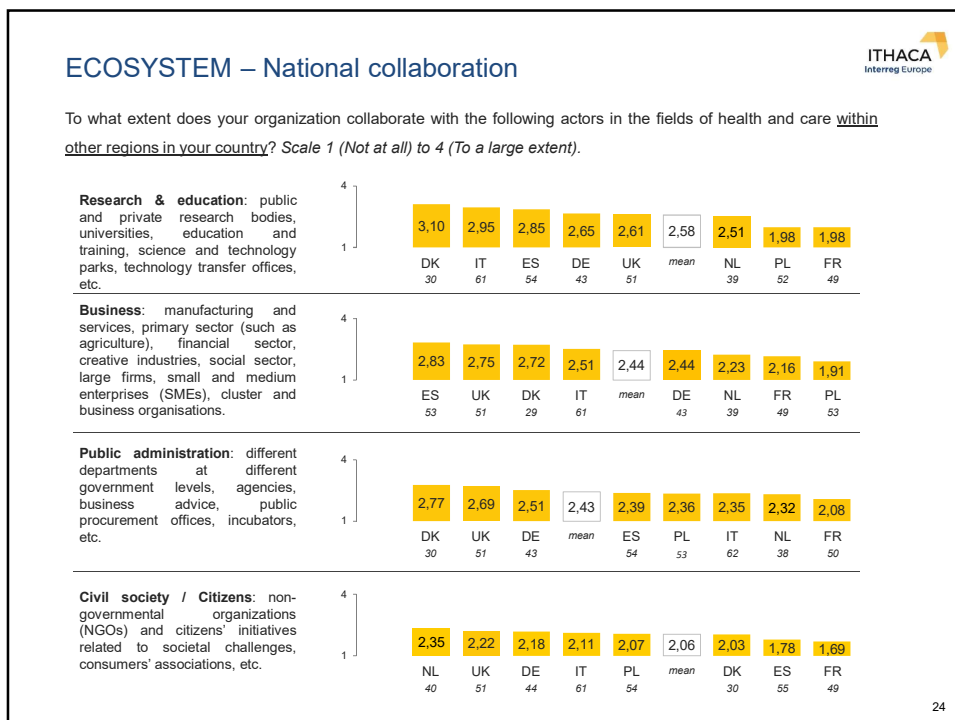

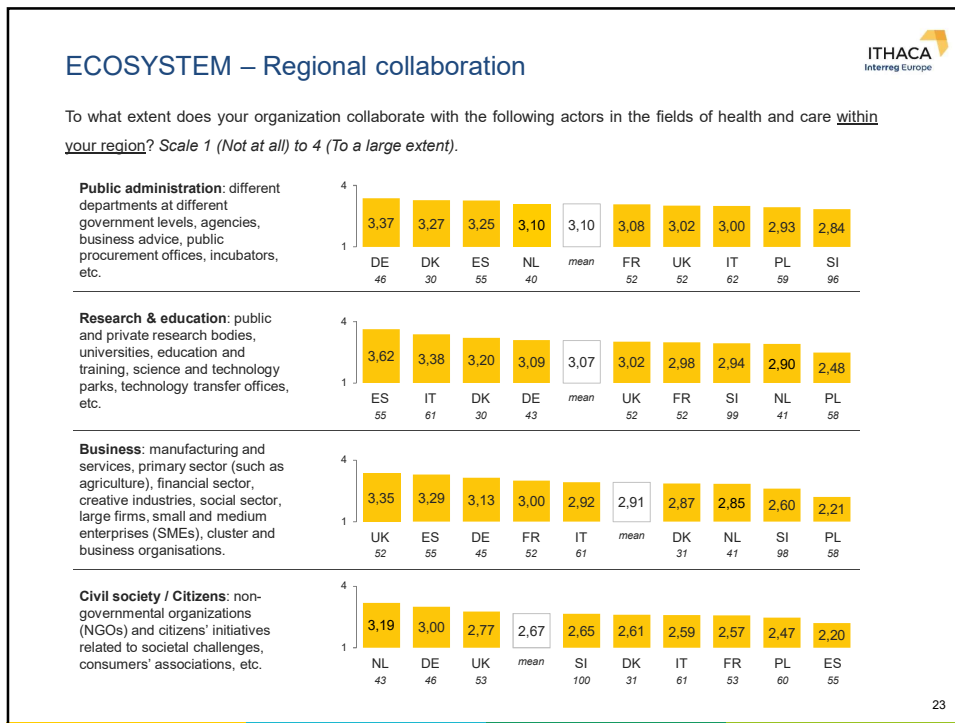

In **Germany, UK** and **the Netherlands** more than half of respondents consider their involvement as very useful. On the other side, only 17% **Polish** and 18% **Slovenian** respondents evaluate their involvement as very useful.

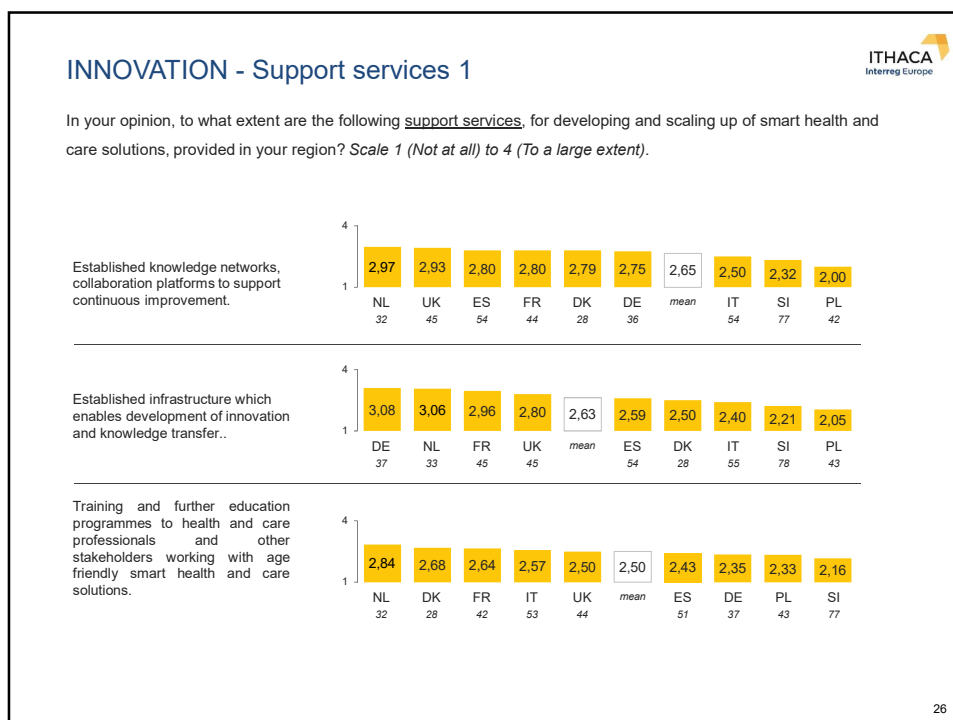

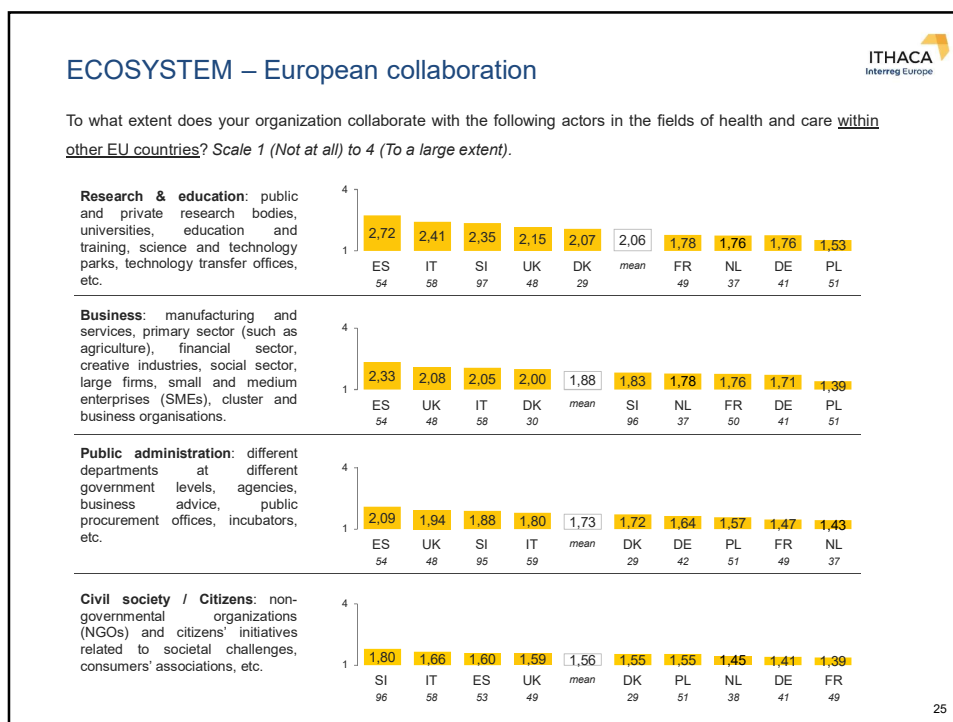

In general, how useful is the involvement in the innovation cooperation partnerships on smart health and care for your organization? In case, you are involved in more innovation cooperation partnerships, please consider the usefulness of the one most relevant for you.

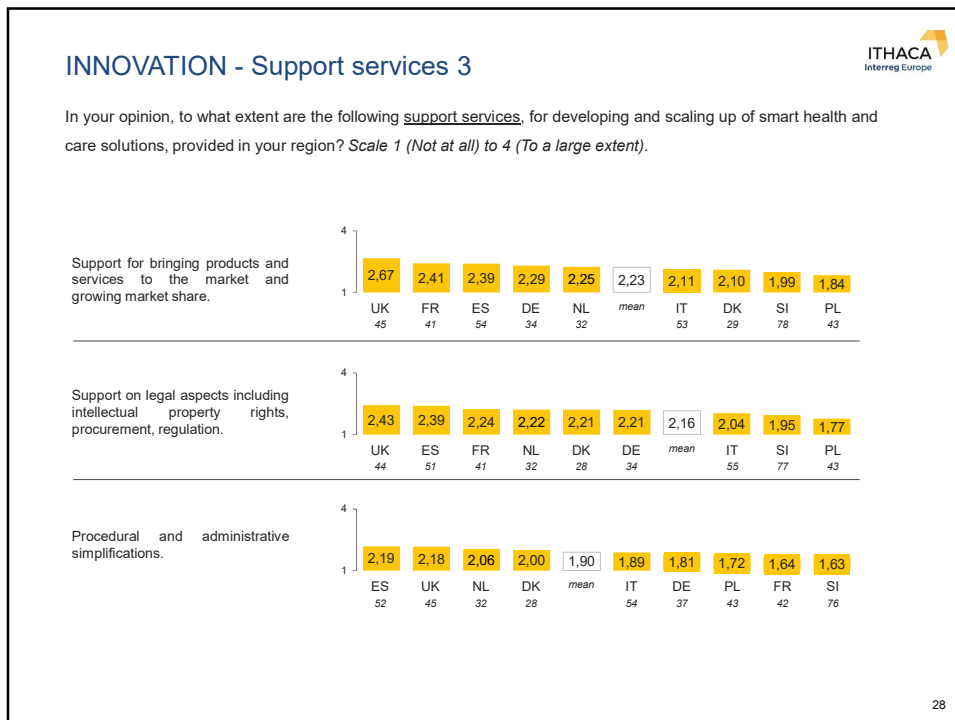

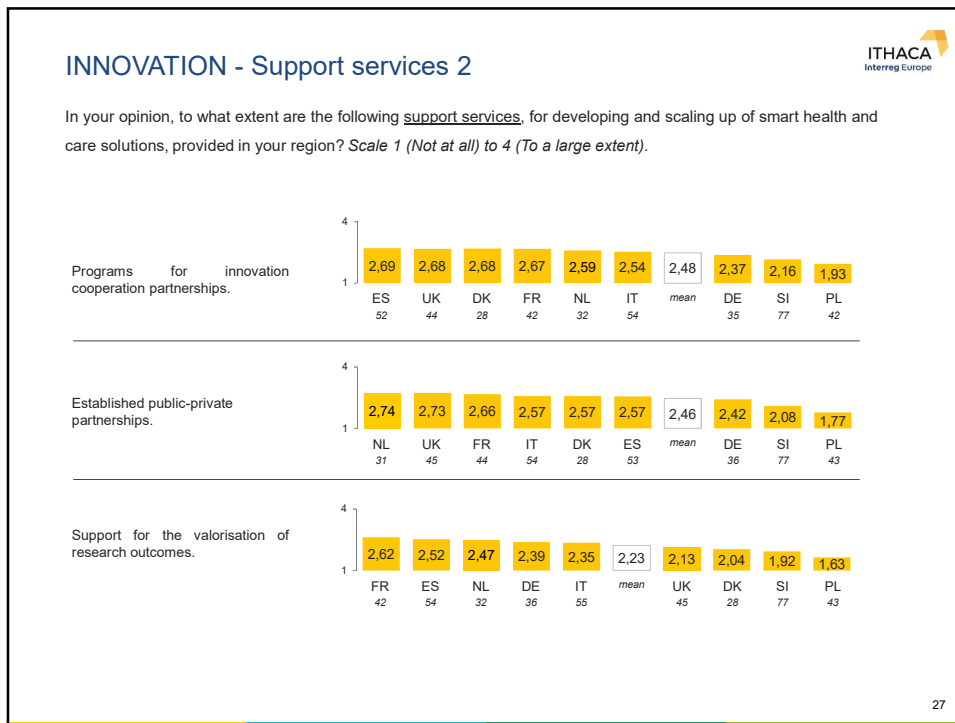

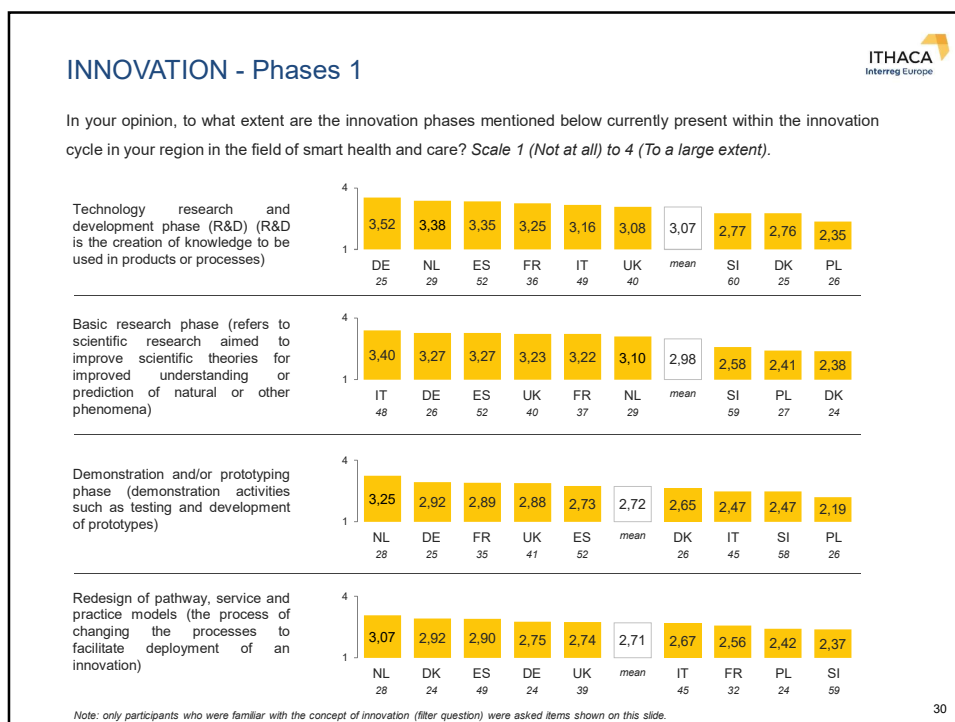

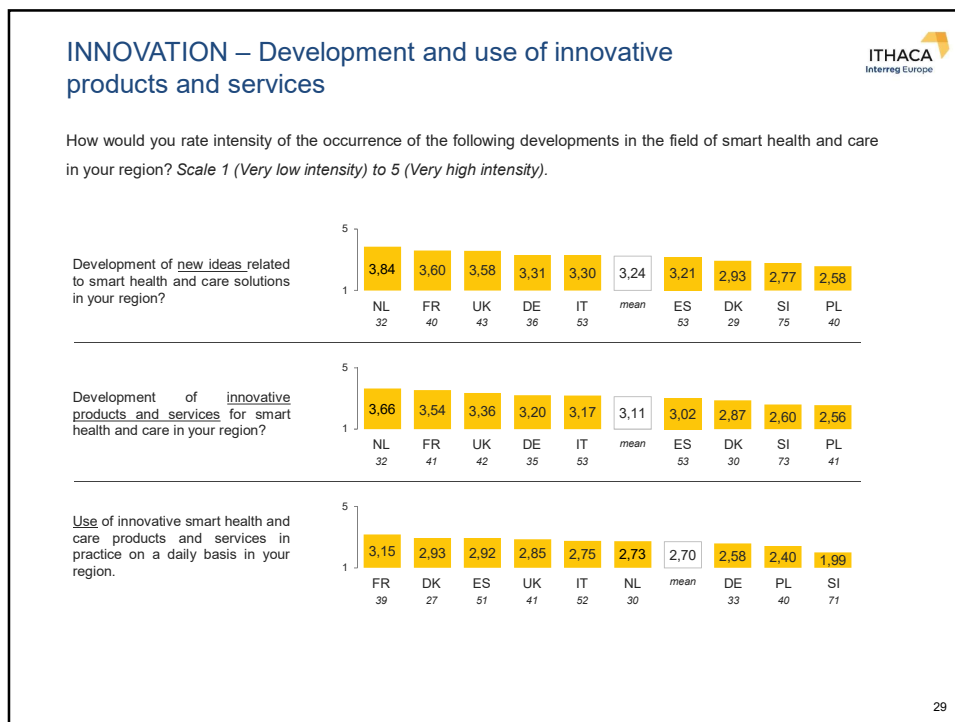

Region	DE	UK	NL	ES	FR	IT	DK	PL	SI

n	35	52	39	27	51	38	25	18	45

Note: Only participants that are involved in at least one listed cooperation partnership or have indicated „other“ partnership in Q5 were asked this question.

INNOVATION - Phases 2

In your opinion, to what extent are the innovation phases mentioned below currently present within the innovation cycle in your region in the field of smart health and care? Scale 1 (Not at all) to 4 (To a large extent).

Note: only participants who were familiar with the concept of innovation (filter question) were asked items shown on this slide.

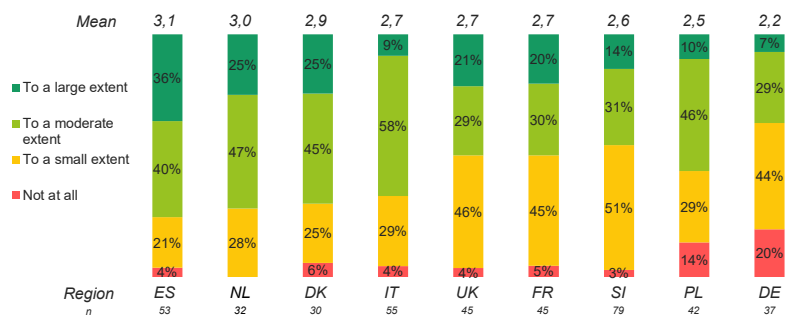

31

POLICY - Information

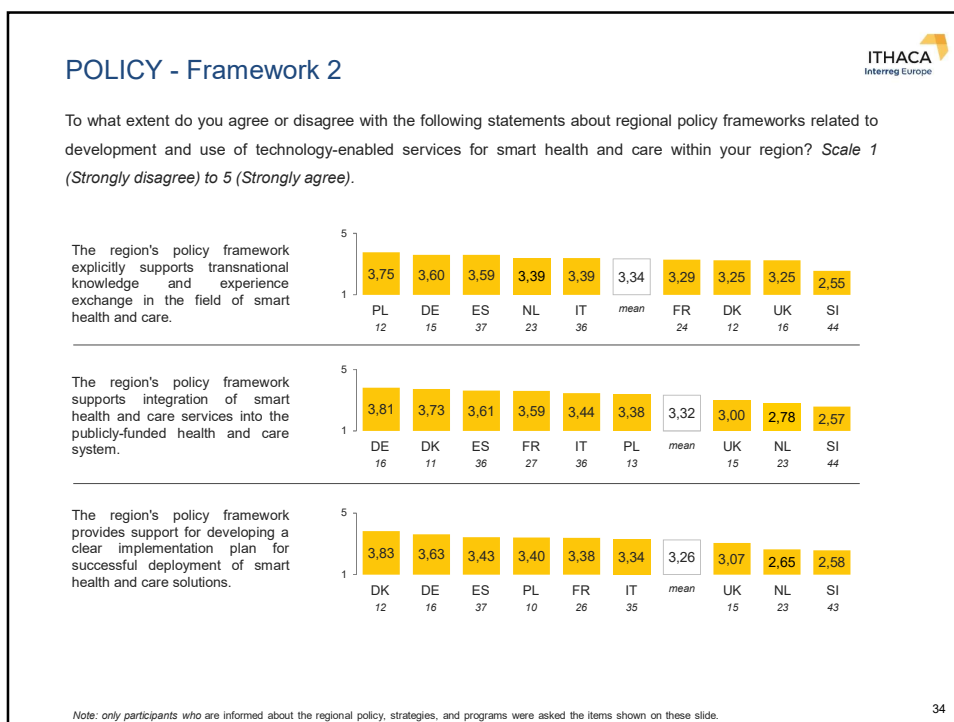

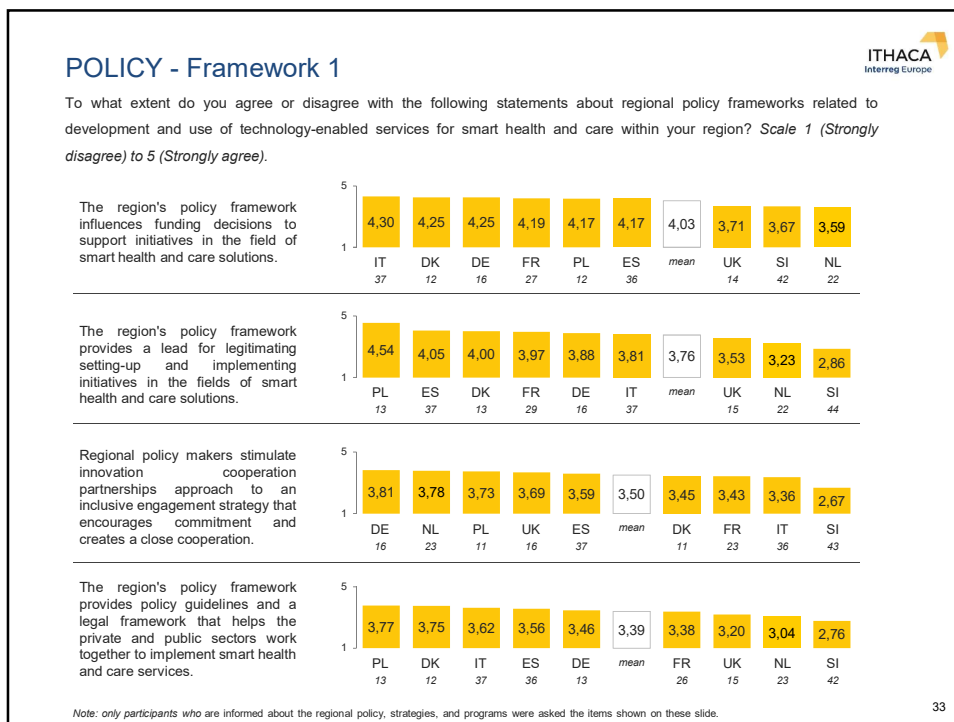

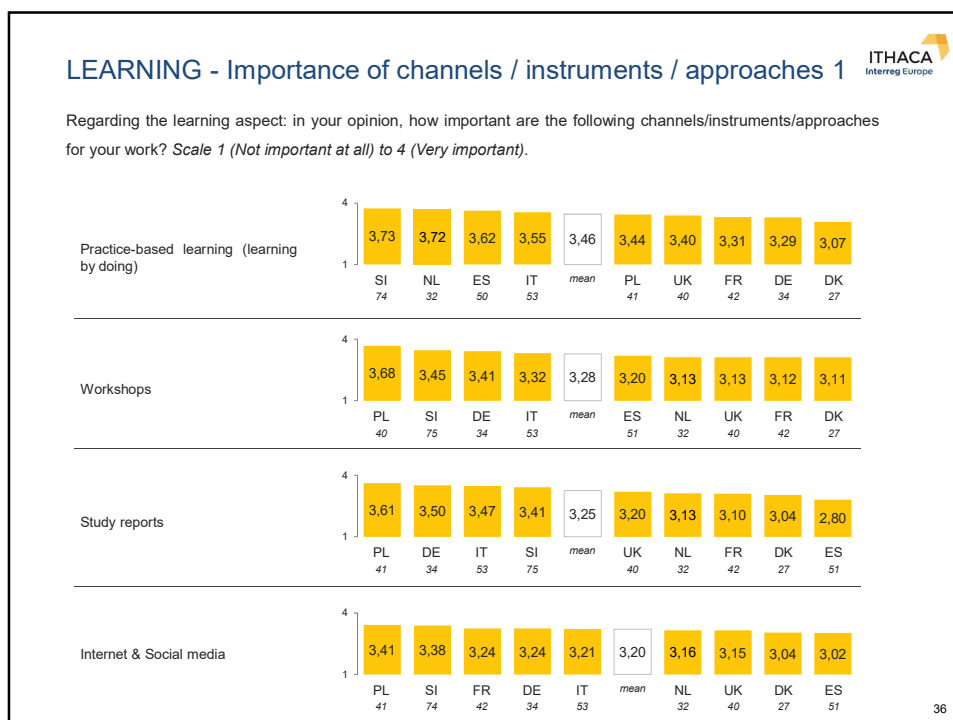

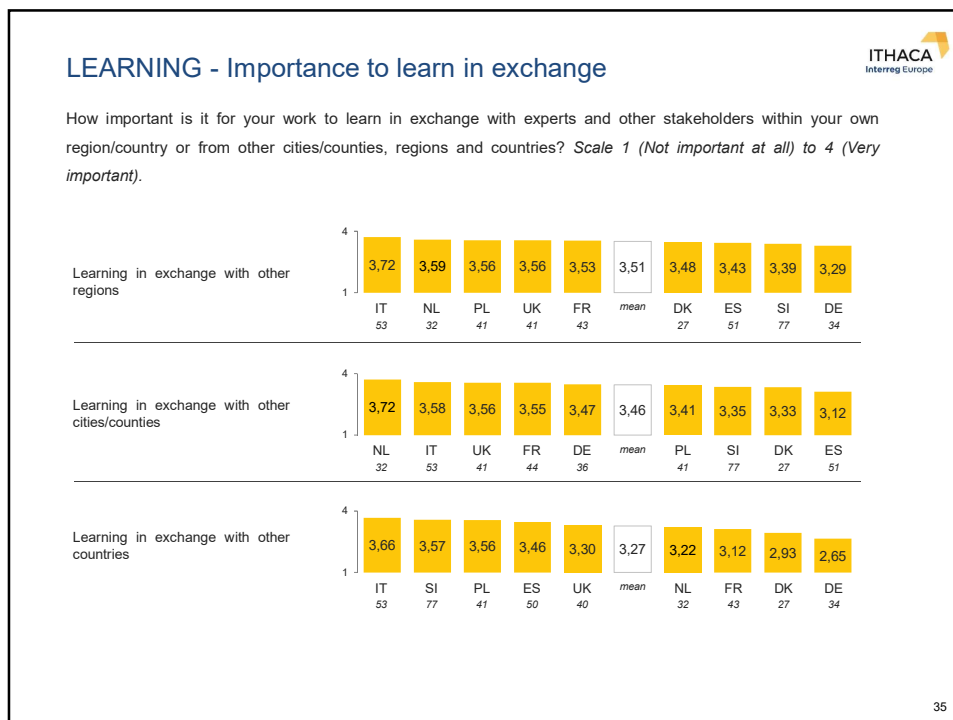

The share of respondents that are to a large or moderate extent informed about regional policy, strategies and programs is highest in **Spain, the Netherlands** and **Denmark**, and the lowest in Slovenia and Germany. The share of respondents who claim that are not informed at all is the highest in **Poland** and **Germany**.

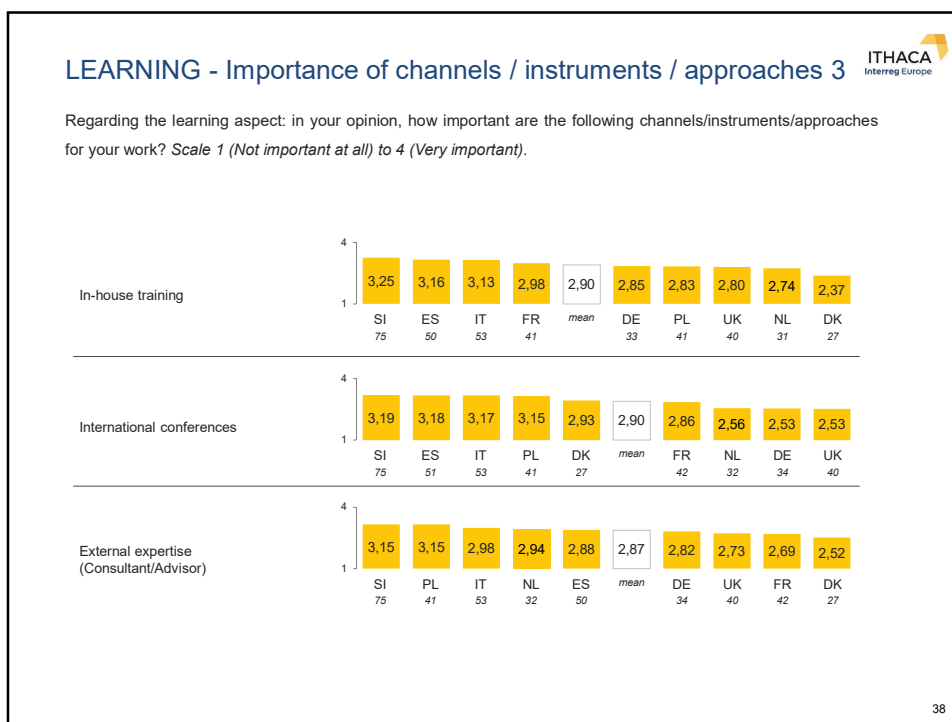

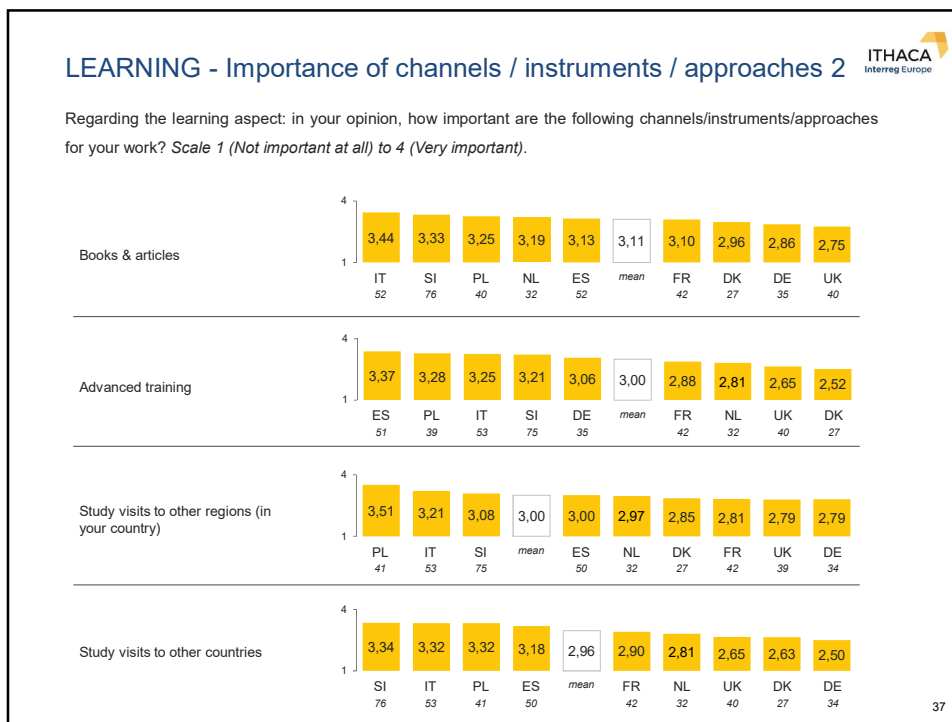

To what extent are you informed about the regional policy, strategies, and programs in the field of smart health and care?

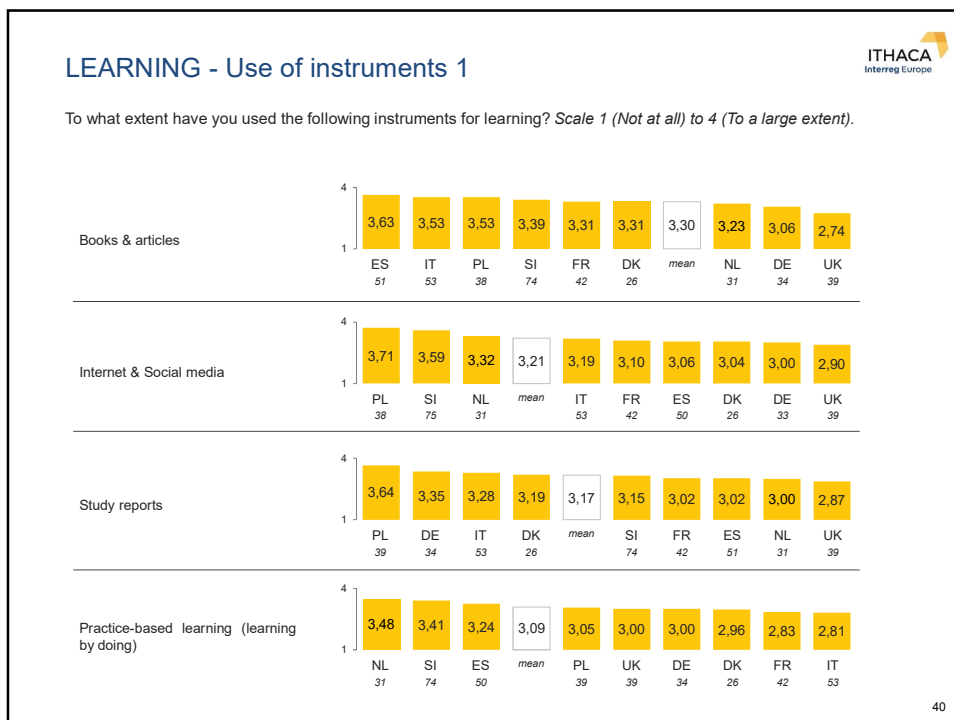

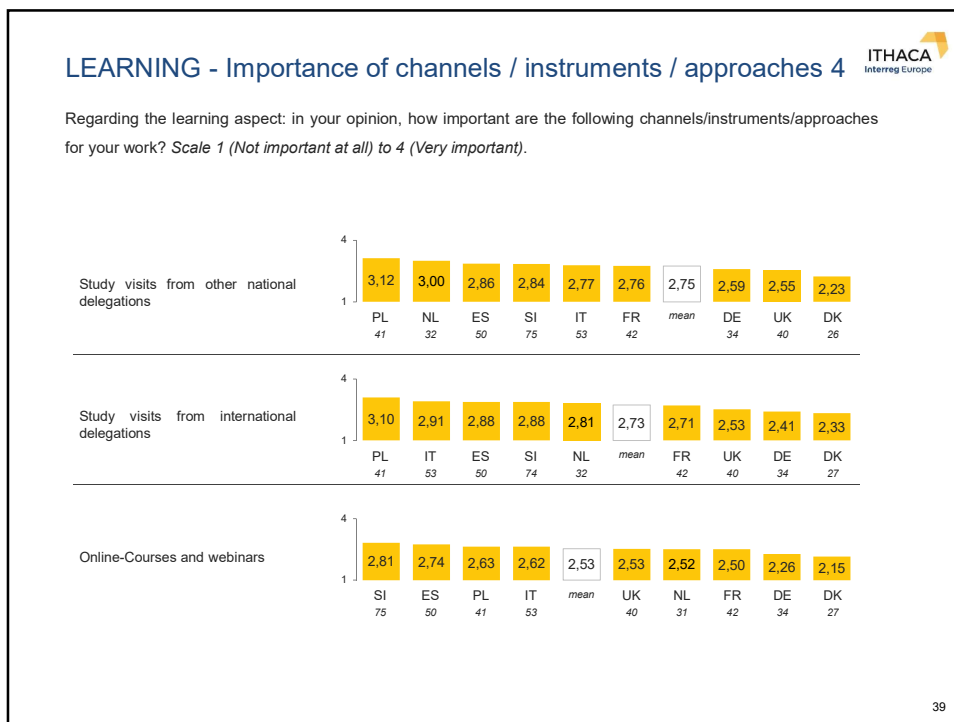

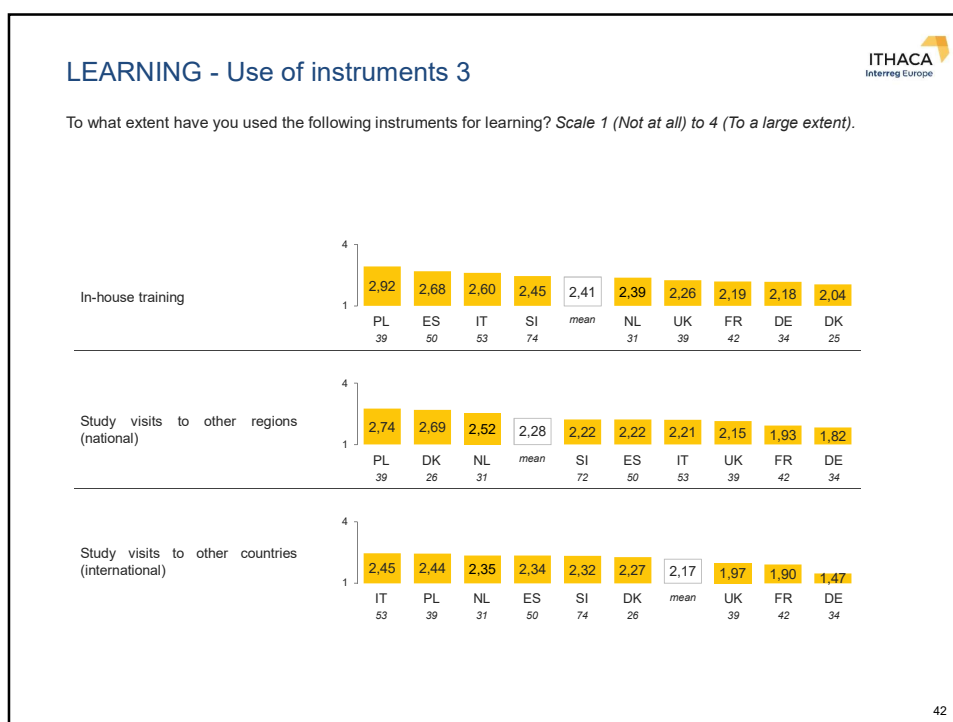

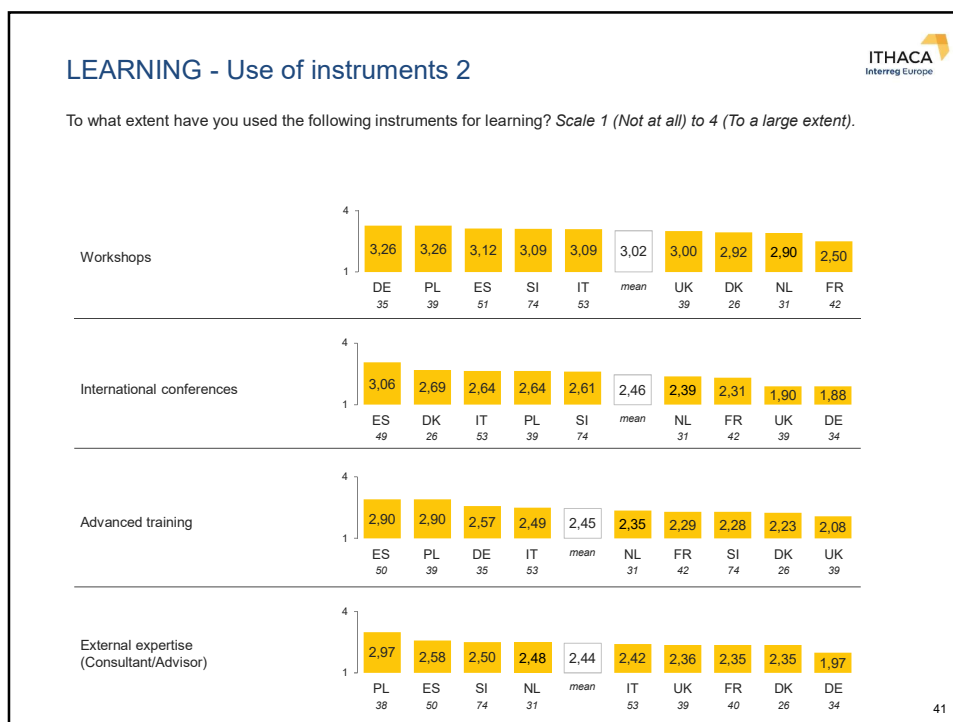

32

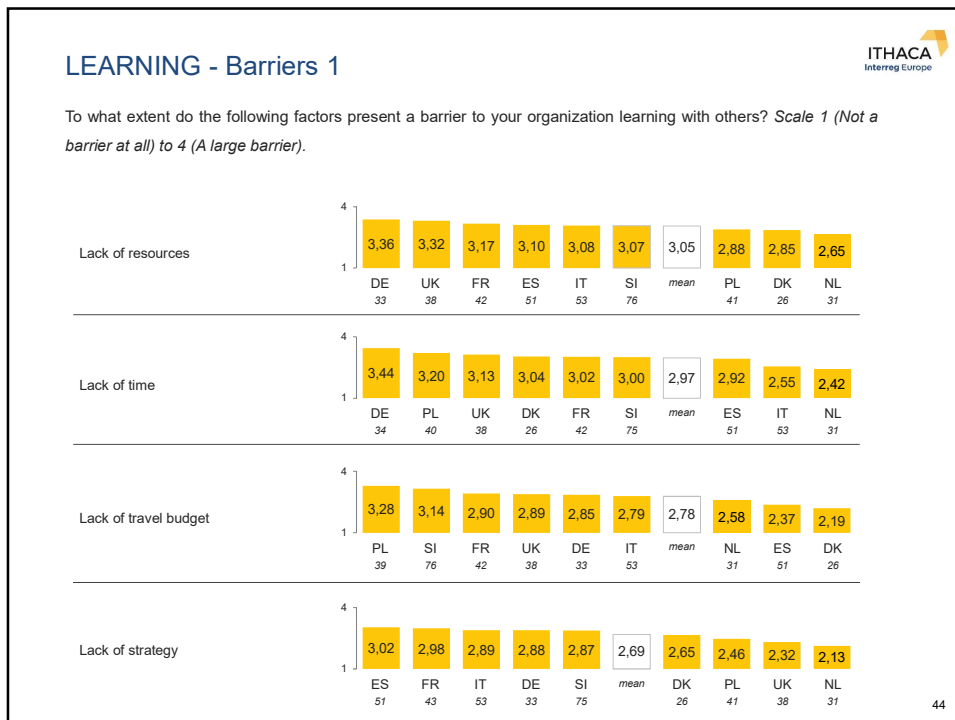

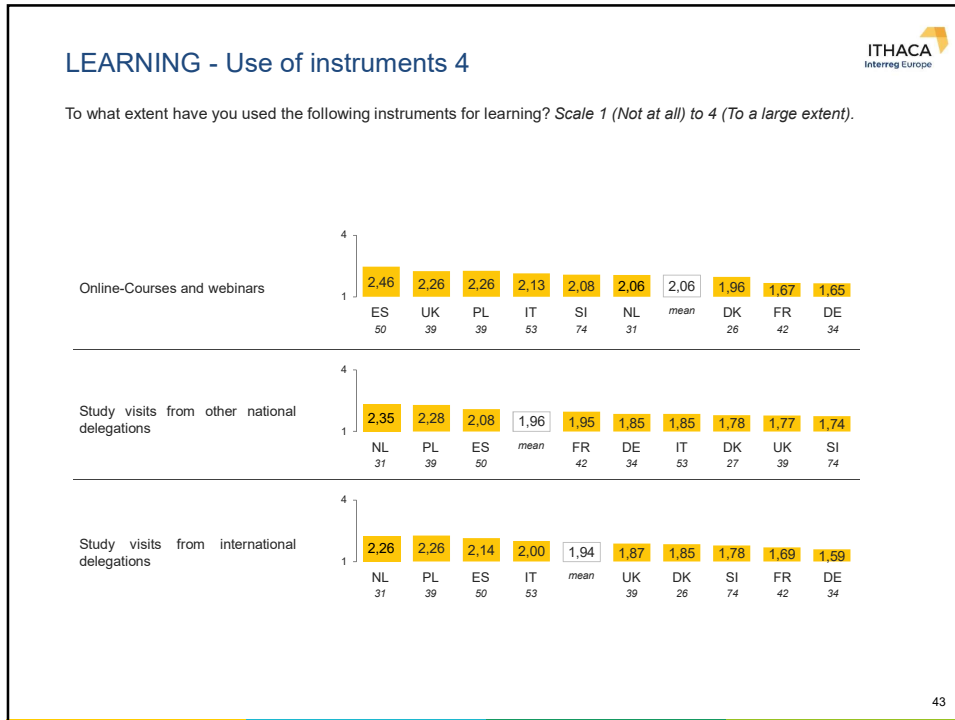

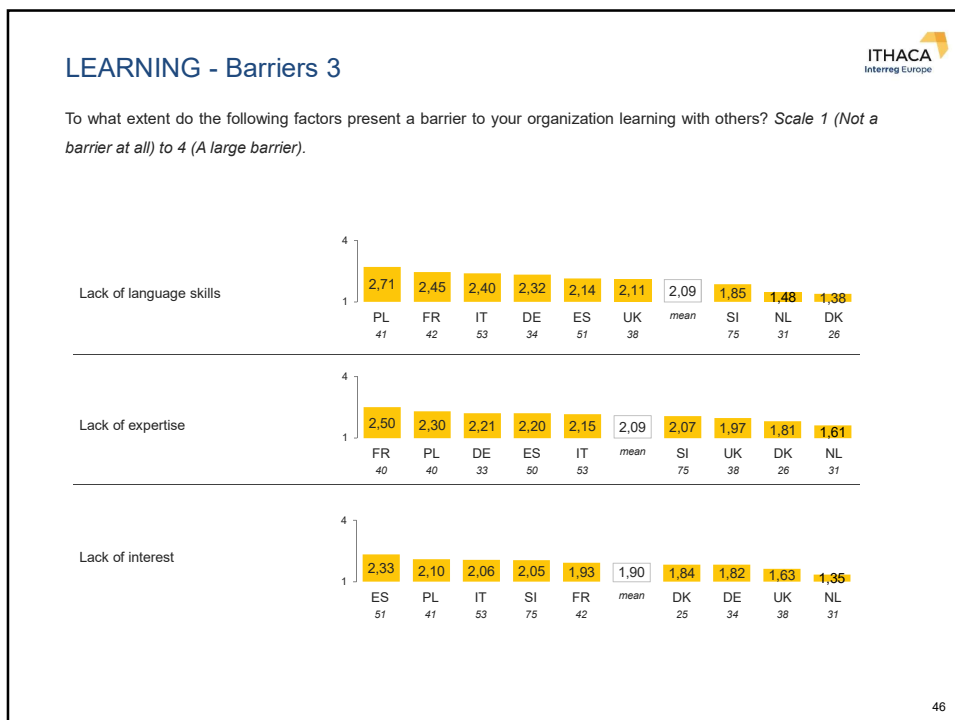

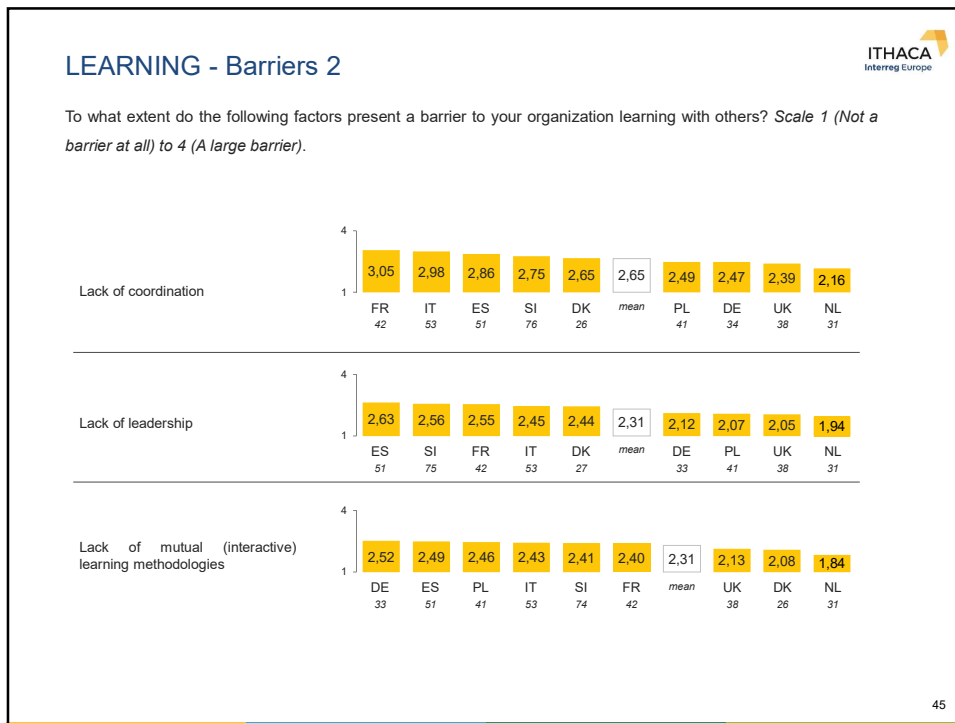

Detailed sample characteristics

COOPERATION PARTNERSHIPS INVOLVEMENT 1

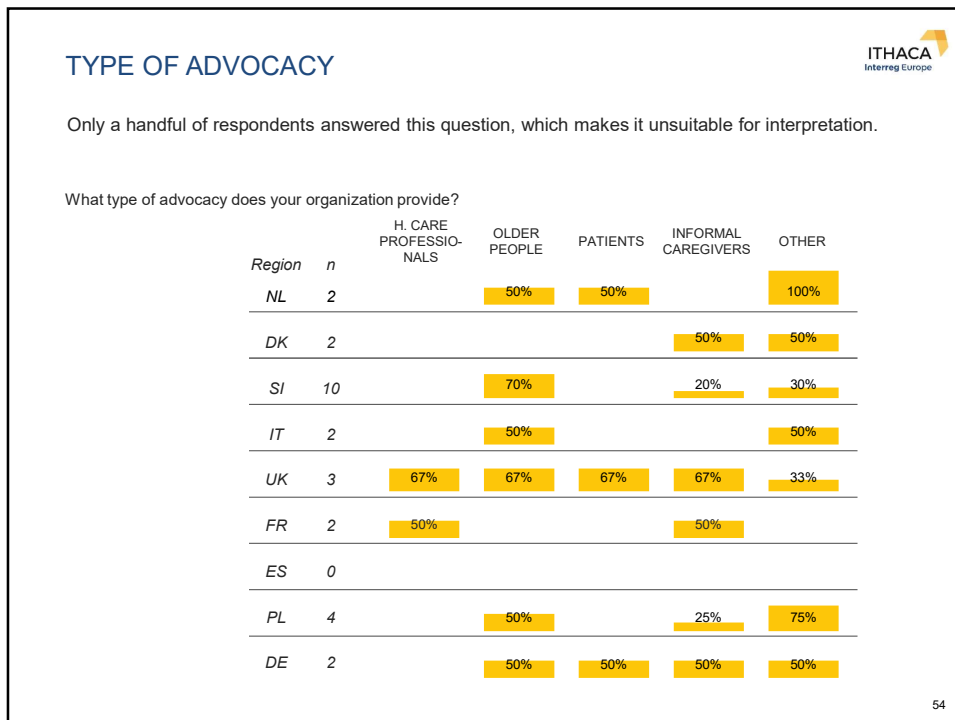

Is your organization in any way involved in any of the following innovation cooperation partnerships (i.e. ecosystems / clusters / triple or quadruple-helix partnerships that stimulate innovative activity by intensive interaction) on smart health and care?

NL	DK	SI
<i>N=45 (87% in at least one partnership)</i>	<i>N=31 (81% in at least one partnership)</i>	<i>N=99 (72% in at least one partnership)</i>
Brabant Region of Smart Health 64%	Welfare Tech 39%	HealthDay.si 32%
Cooperatie Slimmer Leven 2020 47%	Greater Copenhagen Health 29%	SDMI 27%
Proeftuin Dementie 33%	Other 48%	EkoSmart 19%
CIC West-Brabant 20%	None 19%	Tehnološki park Ljubljana 14%
7 Triple helix organisations of Southern Netherlands 13%		NVO 11%
Other 31%		Start up Slovenija 3%
None 13%		Other 16%
		None 28%

48

LEVEL OF PUBLIC AUTHORITY

Although the samples are very small, the results indicate that Slovenian public organizations mostly have national authority, German public organizations have local authority, while Spanish and Polish mostly have regional authority.

What level of authority is your organization?

55

OPERATIONAL FIELDS

Health care and to lesser extent social care are the most common operational fields of respondents in the majority of regions. Exception is Slovenia with the ICT as the most common operational field.

In what fields does your organization operate?

Region	n	HEALTH CARE	SOCIAL CARE	HOUSING	PHARMA	ICT	OTHER
NL	31	65%	58%	29%	6%	19%	29%
DK	27	74%	30%	7%		33%	15%
SI	75	21%	23%	9%	7%	41%	39%
IT	53	38%	23%	6%	6%	13%	47%
UK	39	72%	51%	21%	21%	46%	21%
FR	43	49%	23%	28%	7%	21%	23%
ES	49	49%	10%	6%	16%	27%	39%
PL	42	52%	40%	2%	2%	14%	38%
DE	35	43%	51%	3%		9%	34%

56

SCOPE OF ORGANIZATION

In all countries but Slovenia, most organizations of respondents mainly operate on the regional scope. Local main scope is relatively common amongst Polish and German respondents, and the least common in Spain. Spain is also the most internationally orientated; 36% of Spanish respondents report that their scope is international. In contrast, in Denmark this share is only 7%.

What is the main scope of the organization?

57

NUMBER OF EMPLOYEES

All regions have a noticeable share of organizations with more than 250 employees, the highest share was recorded in Denmark (74%), while in the Netherlands and Slovenia it is the lowest and stands at 29% in both regions. The Netherlands and Slovenia also have the highest share of organizations with less than 10 employees, 39% and 30% respectively.

How many employees does your organization have?

58

Input for “Regional Policy Framework Index”

Survey Question: *Thinking about the current policy framework in your region, to what extent do you agree or disagree with the following statements about regional policy frameworks related to development and use of technology-enabled services for smart health and care within your region?*

Scale: 1 [Don't agree at all] to 5 [Agree completely]

- The region's policy framework provides a lead for legitimating setting-up and implementing initiatives in the fields of smart health and care solutions.
- The region's policy framework influences funding decisions to support initiatives in the field of smart health and care solutions.
- The region's policy framework provides policy guidelines and a legal framework that helps the private and public sectors work together to implement smart health and care services.
- The region's policy framework supports integration of smart health and care services into the publicly-funded health and care system.
- The region's policy framework provides support for developing a clear implementation plan for successful deployment of smart health and care solutions.
- Regional policy makers stimulate innovation cooperation partnership approach to an inclusive engagement strategy that encourages commitment and creates a close cooperation between public authorities, education and research institutions, business, and citizens/patients.
- The region's policy framework explicitly supports transnational knowledge and experience exchange in the field of smart health and care.

Input for “Innovation Support Service Index”

Survey Question: *In your opinion, to what extent are the following support services, for developing and scaling up of smart health and care solutions, provided in your region?*

Scale: 1 [Not at all] to 4 [To a large extent]

- Establish infrastructure which enables development of innovation and knowledge transfer, for example living labs, demonstrators, test sites, show rooms, easily accessible research environments, clinical trials, open source facilities.
- Established knowledge networks, collaboration platforms to support continuous improvement.
- Established public-private partnerships.
- Support for bringing products and services to the market and growing market share.
- Training and further education programmes to health and care professionals and other stakeholders working with age friendly smart health and care solutions.
- Procedural and administrative simplifications.
- Programs for innovation cooperation partnerships.
- Support for the valorisation of research outcomes.
- Support on legal aspects including intellectual property rights, procurement, regulation.

Input for “Development & Use of innovative products & Services Index”

Survey Question: *How would you rate intensity of the occurrence of the following developments in the field of smart health and care in your region?*

Scale: 1 [Very low intensity] to 5 [Very high intensity]

- Development of new ideas related to smart health and care solutions in your region?
- Development of innovative products and services for smart health and care in your region?
- Use of innovative smart health and care products and services in practice on a daily basis in your region.

Spain is also the most internationally orientated; 36% of Spanish respondents report that their scope is international. In contrast, in Denmark this share is only 7%.

What is the main scope of the organization?

Results Summary

Input for „Intro to the theme“

ECOSYSTEM - Usefulness of involvement

In **Germany, UK and the Netherlands** more than half of respondents consider their involvement as very useful. On the other side, only 17% **Polish** and 18% **Slovenian** respondents evaluate their involvement as very useful.

In general, how useful is the involvement in the innovation cooperation partnerships on smart health and care for your organization? In case, you are involved in more innovation cooperation partnerships, please consider the usefulness of the one most relevant for you.

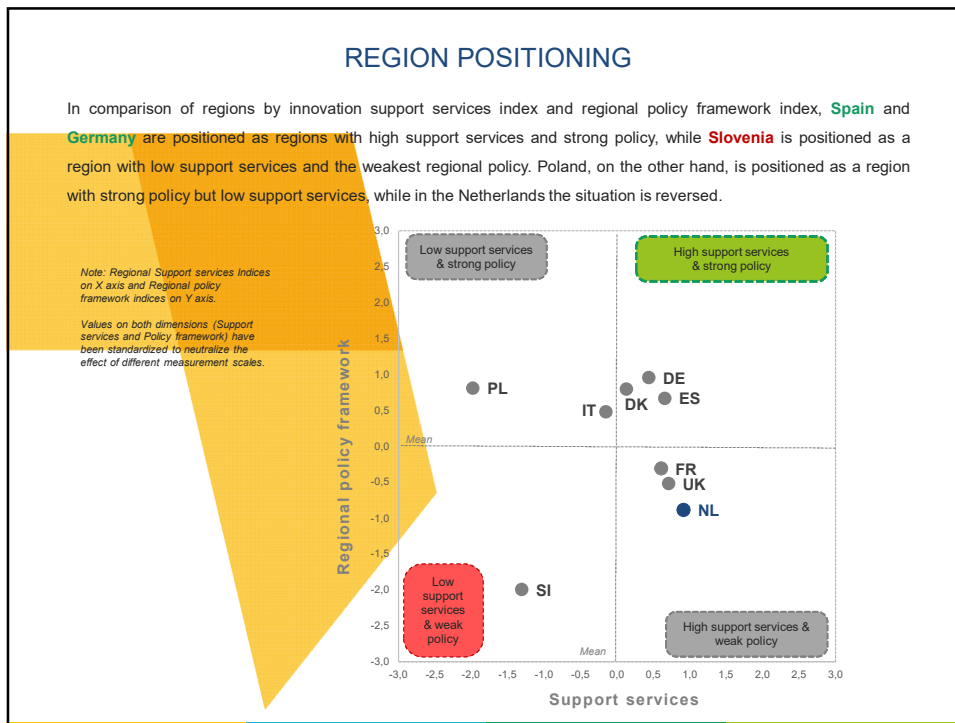

Note: Only participants that are involved in at least one listed cooperation partnership or have indicated „other“ partnership in Q5 were asked this question.

INNOVATION & POLICY INDICES

Composite indices are presented below. The highest average score on innovation support services was recorded in **the Netherlands** and the lowest in **Poland**. According to respondents the development and use of innovative products and services is the highest in France and the Netherlands, and the lowest in Slovenia and Poland. Regional policy framework on the other hand, is rated highly in **Germany, Poland and Denmark**, whereas in **Slovenia** it is distinctively lower.

Note: Composite Regional Indices are calculated as an average of participants' average score on all items within the same theme. Items for Innovation Support Service Index: Q13a to Q13l. Items for Development & Use of innovative products & Services Index: Q15a, Q15b and Q15c. Items for Regional Policy Framework Index: Q19a to Q19g.

NL Highlights

Input for „World cafe“

ECOSYSTEM – Cooperation partnership involvement

Is your organization in any way involved in any of the following innovation cooperation partnerships (i.e. ecosystems / clusters / triple or quadruple-helix partnerships that stimulate innovative activity by intensive interaction) on smart health and care?

Involvement in at least one cooperation partnership:

- % indicated at least one partnership
- % indicated no partnership involvement

NL (N=45)

ECOSYSTEM - Usefulness of involvement

On a scale from 1 (*Not useful at all*) to 4 (*Very useful*), the Netherlands region has the third highest average value amongst the ITHACA regions, with more than a half of respondents (54%) finding the involvement very useful.

In general, how useful is the involvement in the innovation cooperation partnerships on smart health and care for your organization? In case, you are involved in more innovation cooperation partnerships, please consider the usefulness of the one most relevant for you.

Note: Only participants that are involved in at least one listed cooperation partnership or have indicated „other“ partnership in Q5 were asked this question.

INNOVATION - Support services

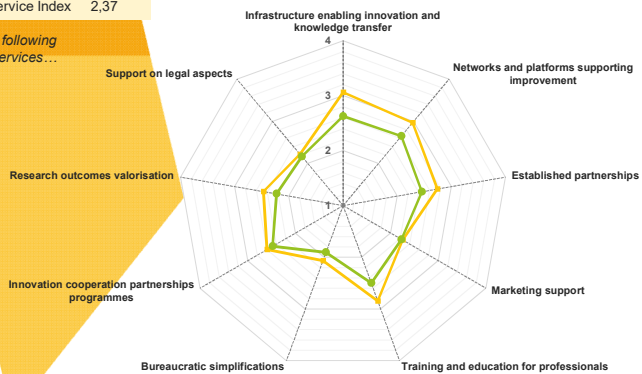

The Netherlands Support Services Index is higher than the average index value of ITHACA regions. The rated extent of services is above the average for all measured aspects. However, *Marketing support* and *Support on legal aspects* are just slightly above the average.

Within the region, *Infrastructure enabling innovation and knowledge transfer* (3,06) has on average the highest rated extent of all Support services items, followed by *Networks and platforms supporting improvement* (2,97), while *Bureaucratic simplifications* (2,06), *Support on legal aspects* (2,22) and *Marketing support* (2,25) have the lowest ratings.

NL Support Services Index	2,59
ITHACA regions Support service Index	2,37

Region provides the following innovation support services...

- NL
- ITHACA regions

Note: Regional index is based on respondents who answered all items within theme (Q13a to Q13j). Global index is a simple average over ITHACA regions, where units are regions.

INNOVATION - Development & use of innovative products & services

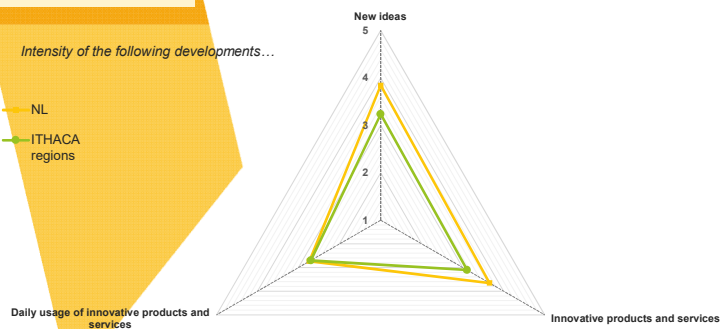

The Netherlands Development & Use of innovative Products & Services Index is higher than the average index value of ITHACA regions. The rated intensities of *New Ideas* and *Innovative products and services* are well above the average, while the intensity for *Daily usage of innovative products and services* is just slightly above the average.

Within the region, *New ideas* (3,84) are rated as the most intensively occurring development in the field, followed by *Innovative products and services* (3,66). The value is rather lower for the intensity of *Daily usage of innovative products and services* (2,73).

NL Development & Use of innovative products & Services Index	3,40
ITHACA regions Development & Use of innovative products & Services Index	3,02

Intensity of the following developments...

- NL
- ITHACA regions

Note: Regional index is based on respondents who answered all items within theme (Q15a to Q15c). Global index is a simple average over ITHACA regions, where units are regions.

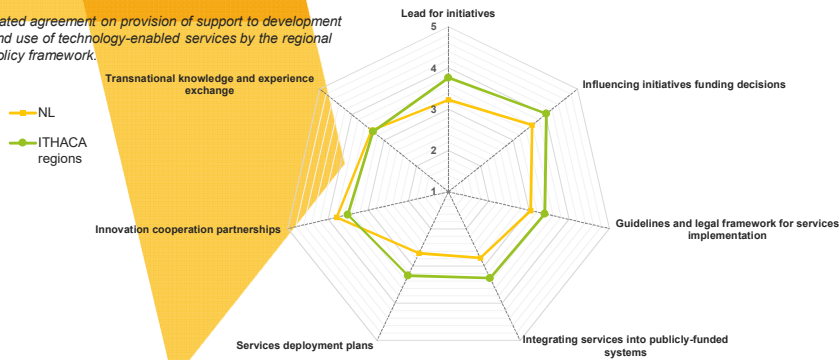

POLICY – Regional Policy Framework

NL Regional Policy Index is somewhat lower than the average index value of ITHACA regions. This is also true for most individual items, except for *Transnational knowledge and experience exchange* and *Innovation cooperation partnerships*, which are similar to and slightly above the ITHACA average, respectively.

Within the region, *Innovation cooperation partnerships* (3,78) has the highest average value among the regional policy framework facets, somewhat distantly followed by *Influencing initiatives funding decisions* (3,59). The lowest average values were recorded for *Services deployment plans* (2,65) and *Integrating services into publicly-funded systems* (2,78).

NL Policy Framework Index	3,22
ITHACA regions Policy Framework Index	3,50

Rated agreement on provision of support to development and use of technology-enabled services by the regional policy framework.

Note: Regional index is based on respondents who answered all items within theme (Q19a to Q19g). Global index is a simple average over ITHACA regions, where units are regions.

LEARNING – Relative importance & use of instruments

In NL the most important and most used instruments in practice from a relative point of view are: **Practice-based learning**, **Internet and social media** and **Books & articles**. None of the instruments has a high relative discrepancy between the importance and use – but Study visits from delegations (national) and Study visits to other regions do have above the average importance and below average use.

Note: Measurement scale for importance and use goes from 1 to 4.

Detailed overview of the results

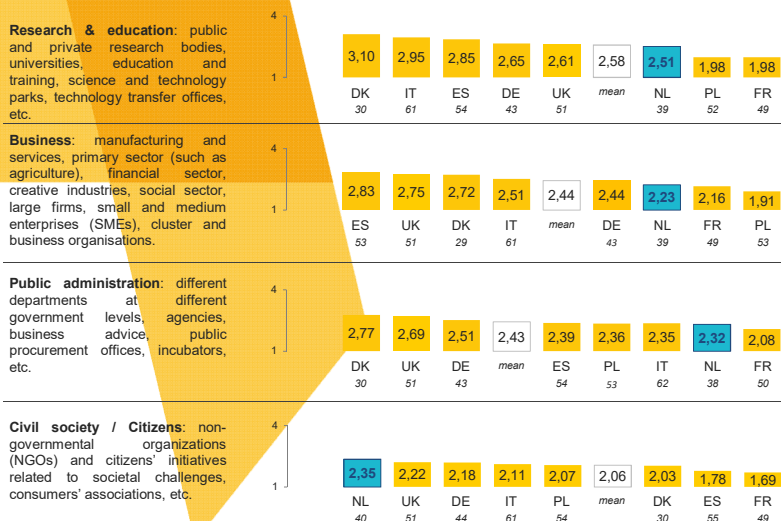

ECOSYSTEM – Regional collaboration

To what extent does your organization collaborate with the following actors in the fields of health and care within your region? Scale 1 (Not at all) to 4 (To a large extent).

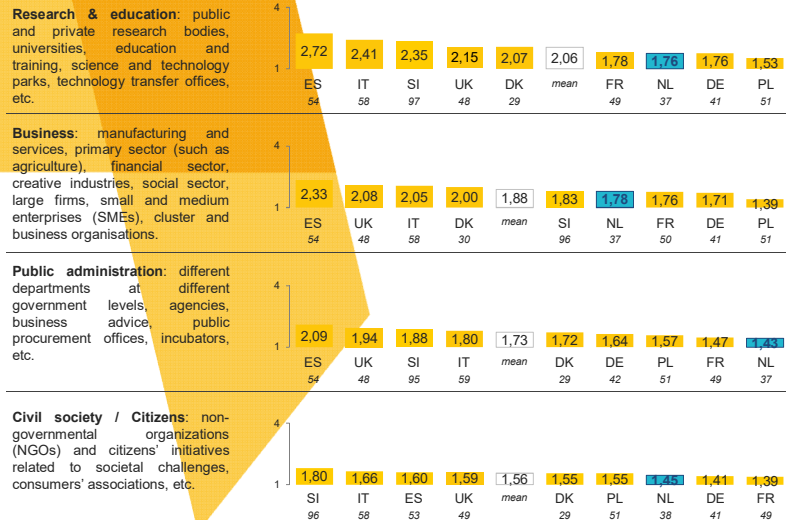

ECOSYSTEM – National collaboration

To what extent does your organization collaborate with the following actors in the fields of health and care within other regions in your country? Scale 1 (Not at all) to 4 (To a large extent).

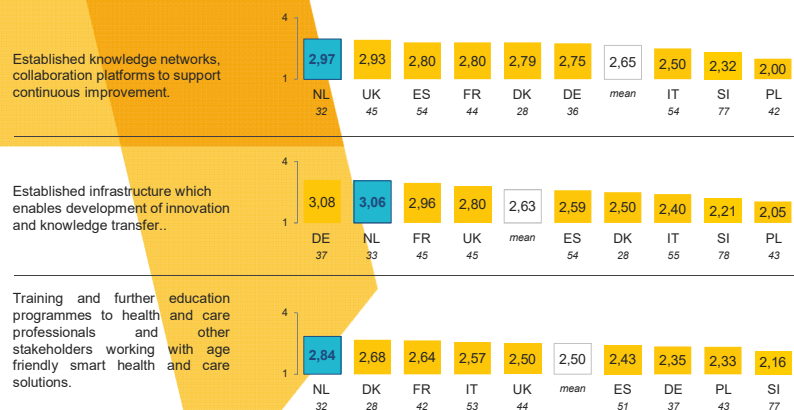

ECOSYSTEM – European collaboration

To what extent does your organization collaborate with the following actors in the fields of health and care within other EU countries? Scale 1 (Not at all) to 4 (To a large extent).

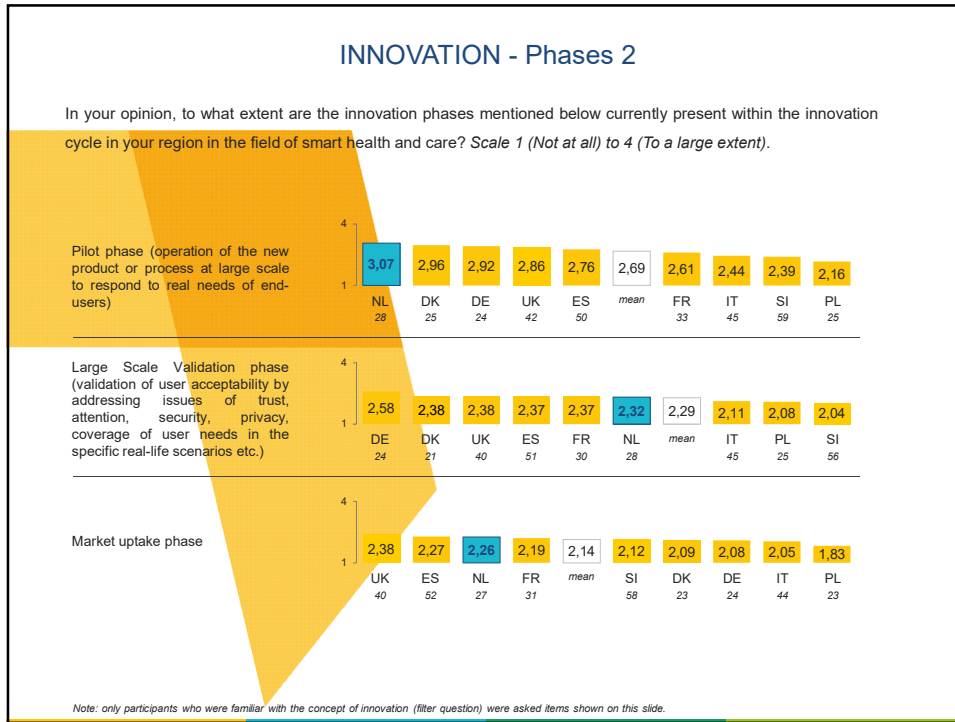

INNOVATION - Support services 1

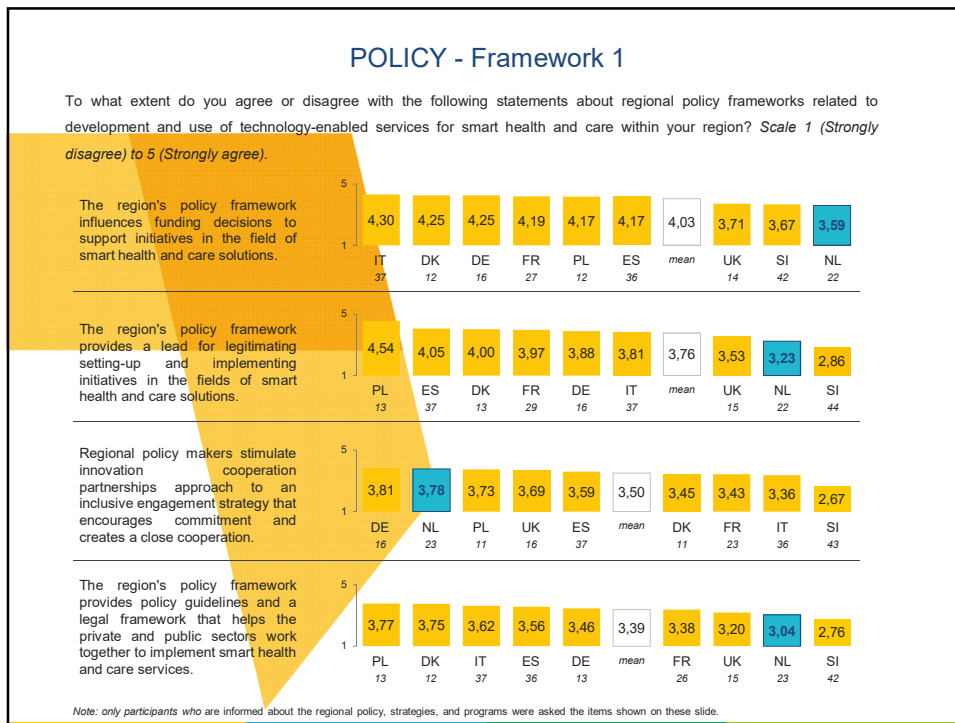

In your opinion, to what extent are the following support services, for developing and scaling up of smart health and care solutions, provided in your region? Scale 1 (Not at all) to 4 (To a large extent).

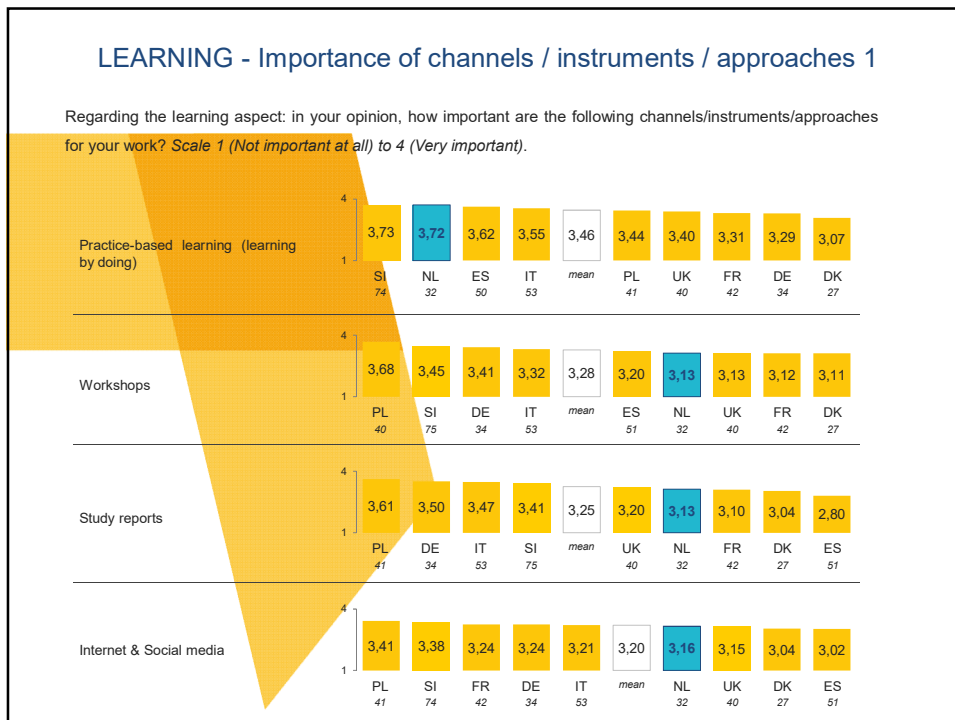

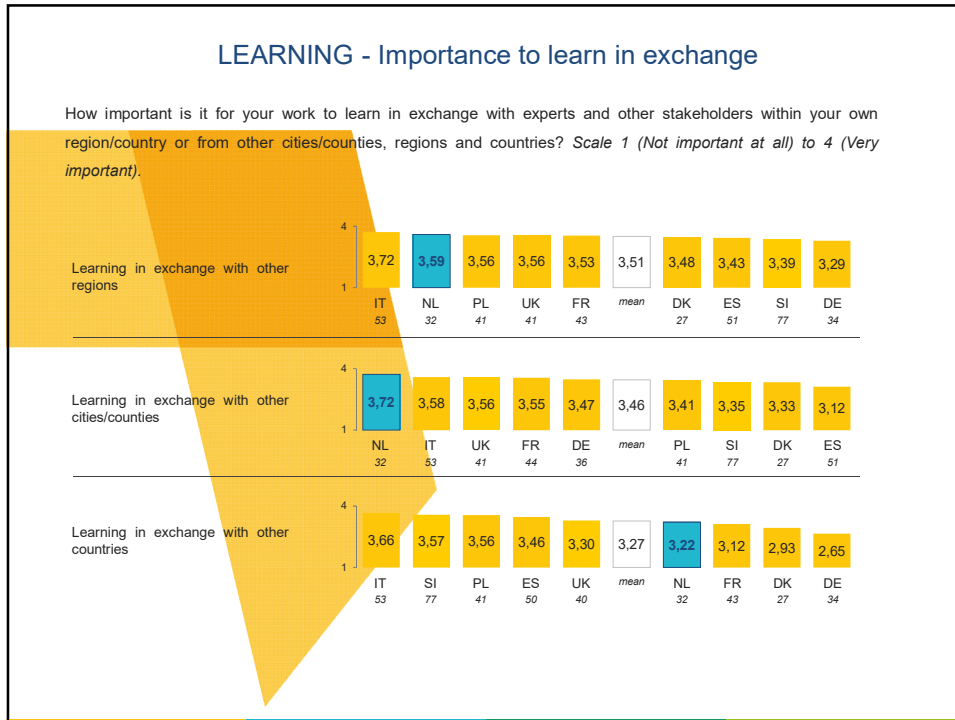

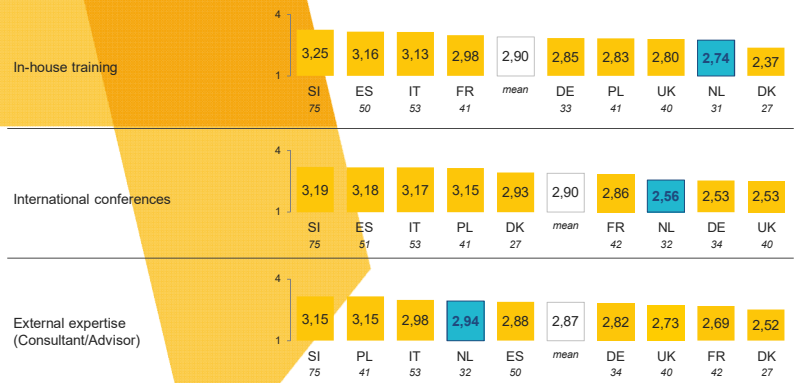

LEARNING - Importance of channels / instruments / approaches 2

Regarding the learning aspect: in your opinion, how important are the following channels/instruments/approaches for your work? Scale 1 (Not important at all) to 4 (Very important).

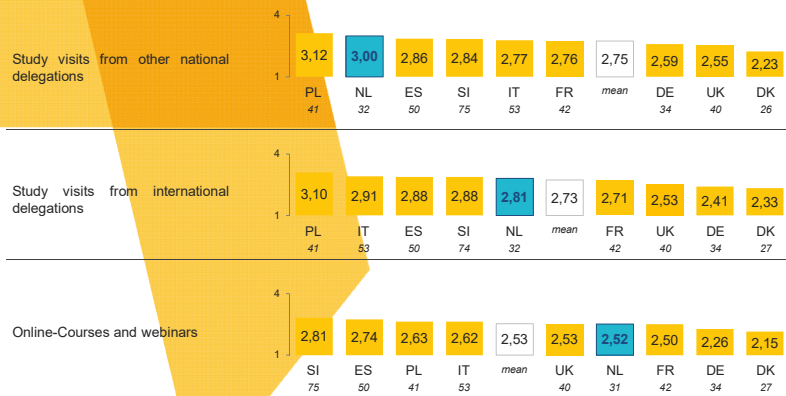

LEARNING - Importance of channels / instruments / approaches 3

Regarding the learning aspect: in your opinion, how important are the following channels/instruments/approaches for your work? Scale 1 (Not important at all) to 4 (Very important).

LEARNING - Importance of channels / instruments / approaches 4

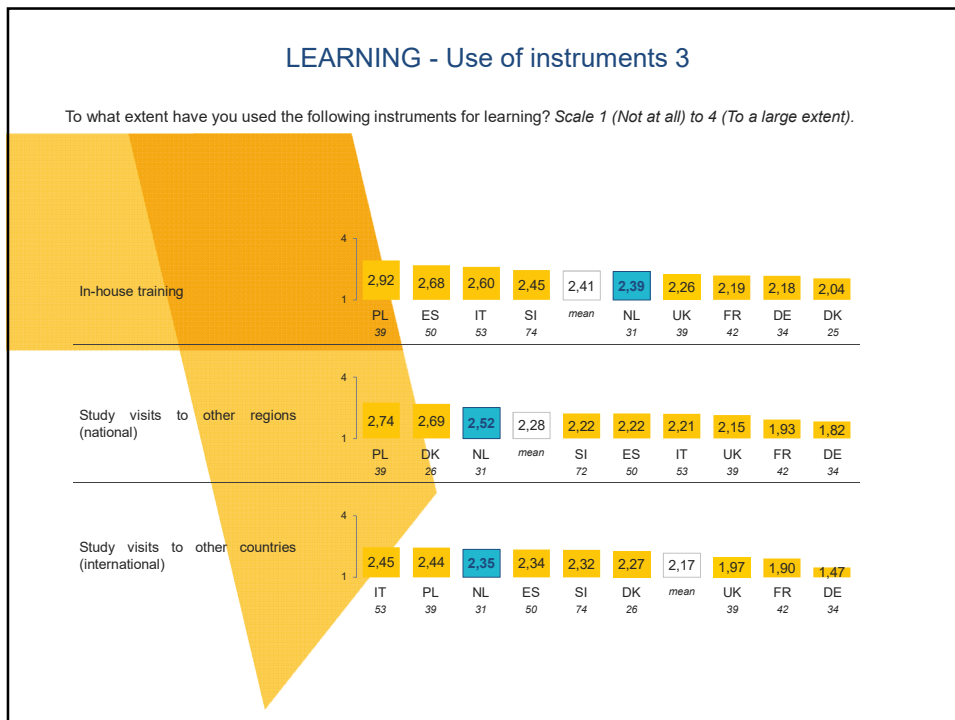

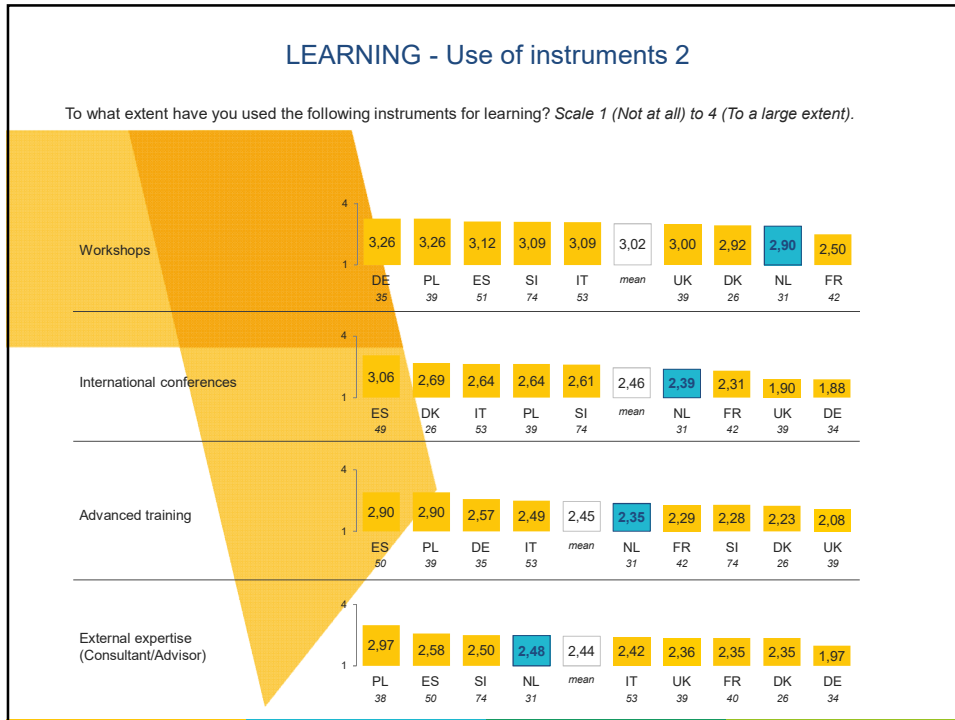

Regarding the learning aspect: in your opinion, how important are the following channels/instruments/approaches for your work? Scale 1 (Not important at all) to 4 (Very important).

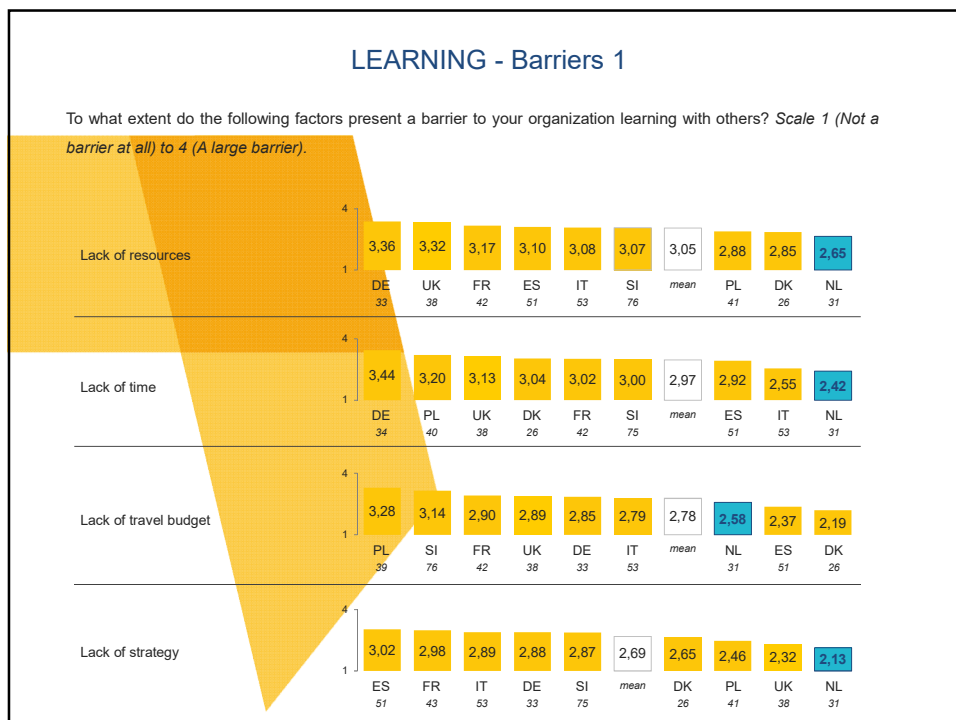

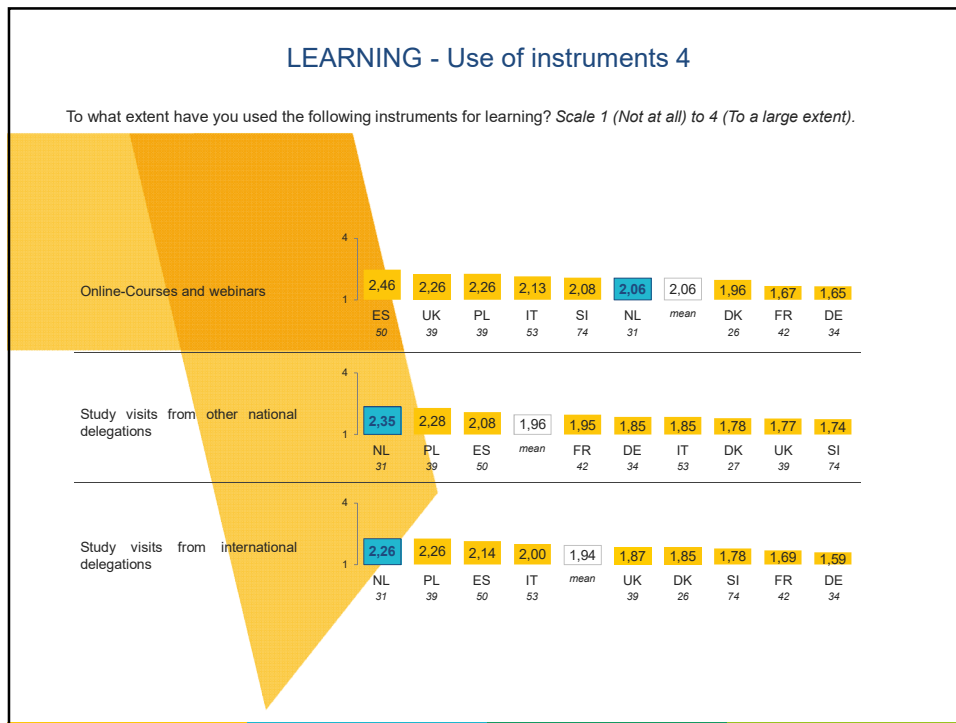

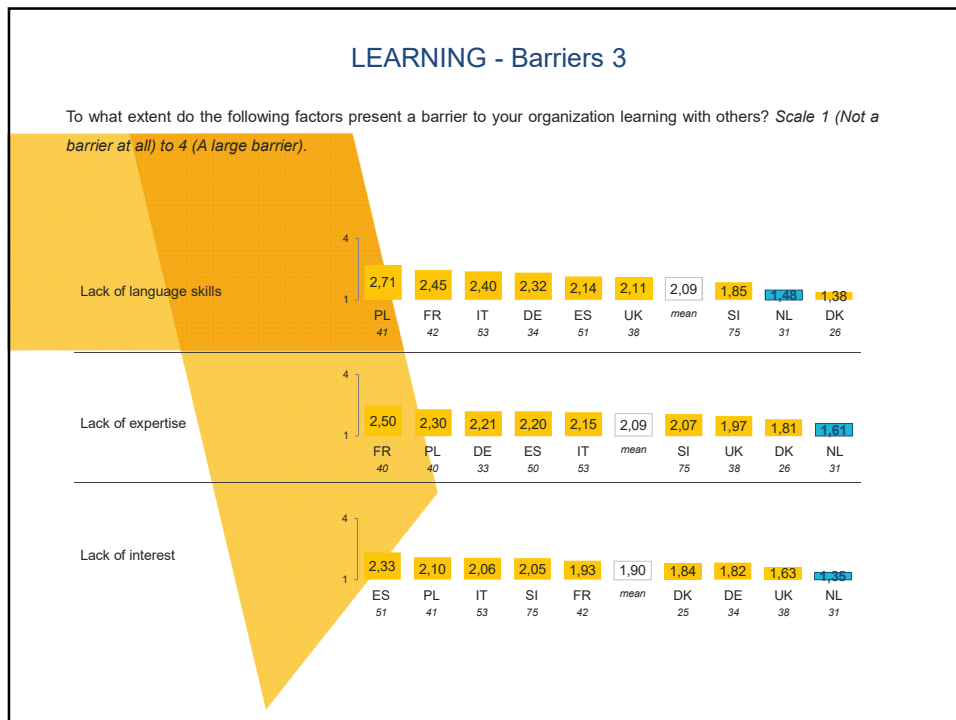

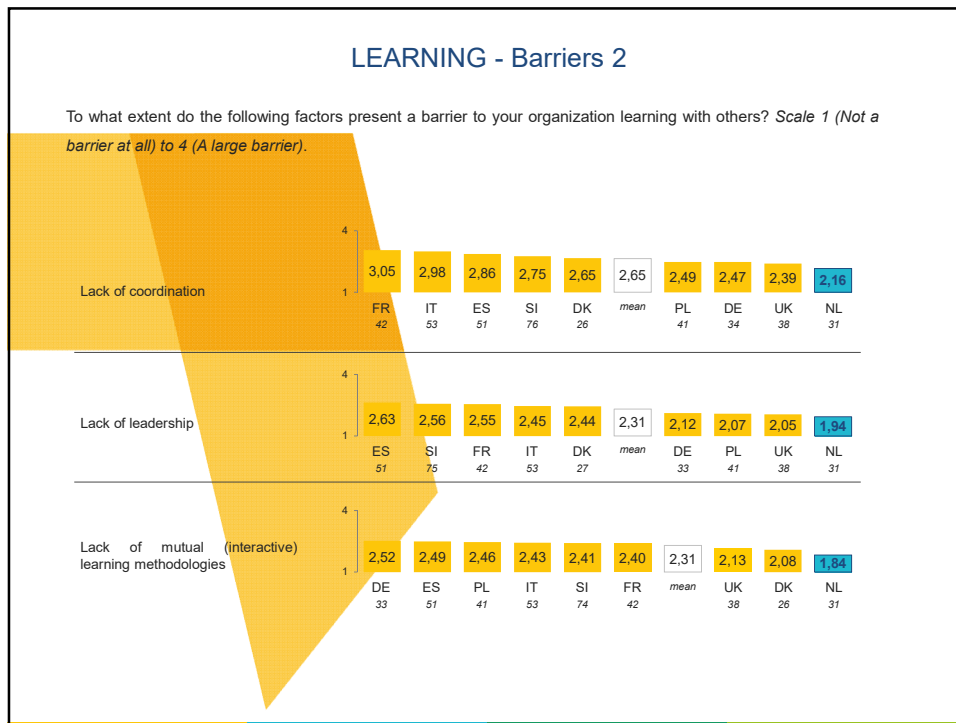

LEARNING - Use of instruments 1

To what extent have you used the following instruments for learning? Scale 1 (Not at all) to 4 (To a large extent).

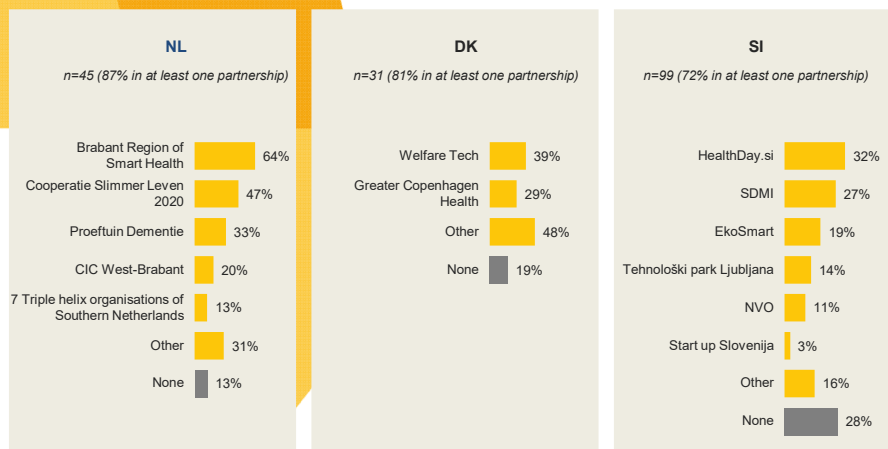

Detailed sample characteristics

COOPERATION PARTNERSHIPS INVOLVEMENT 1

Is your organization in any way involved in any of the following innovation cooperation partnerships (i.e. ecosystems / clusters / triple or quadruple-helix partnerships that stimulate innovative activity by intensive interaction) on smart health and care?

ECOSYSTEM – Cooperation partnership involvement

Is your organization in any way involved in any of the following innovation cooperation partnerships (i.e. ecosystems / clusters / triple or quadruple-helix partnerships that stimulate innovative activity by intensive interaction) on smart health and care?

Involvement in at least one cooperation partnership:

- % indicated at least one partnership
- % indicated no partnership involvement

DK (n=31)

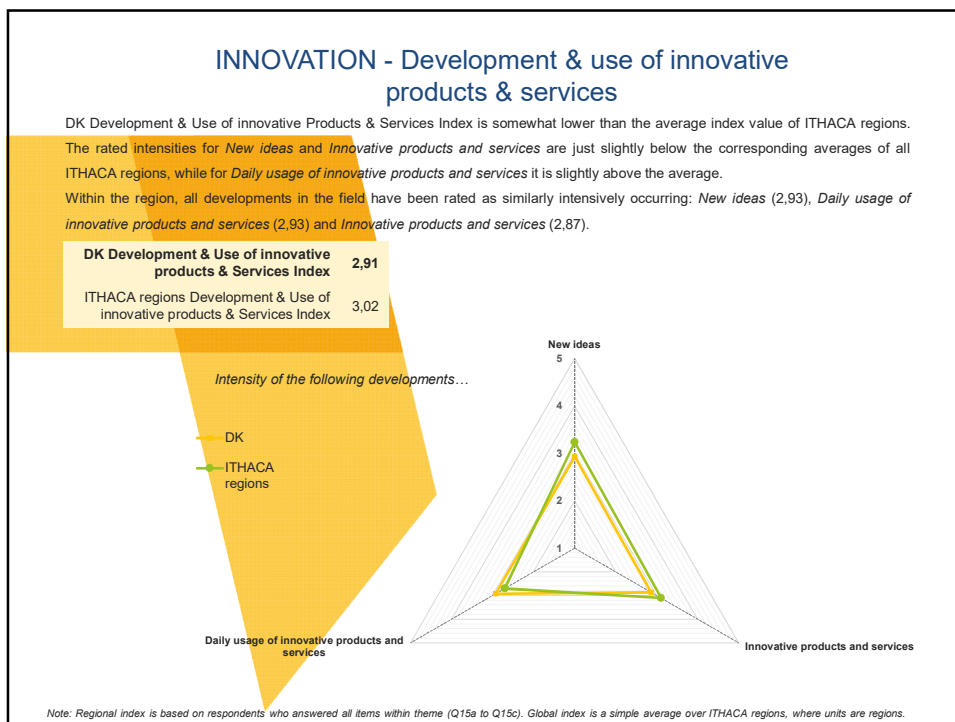

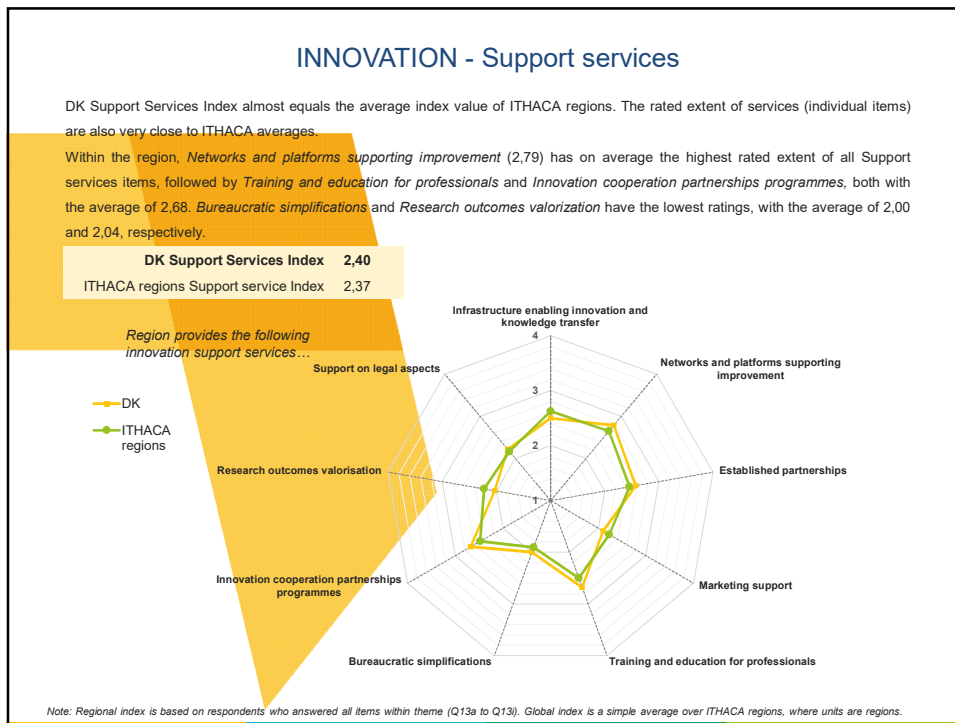

ECOSYSTEM - Usefulness of involvement

On a scale from 1 (Not useful at all) to 4 (Very useful), the DK region has average value below ITHACA average, with only 24% of respondents finding the involvement very useful.

In general, how useful is the involvement in the innovation cooperation partnerships on smart health and care for your organization? In case, you are involved in more innovation cooperation partnerships, please consider the usefulness of the one most relevant for you.

Note: Only participants that are involved in at least one listed cooperation partnership or have indicated „other“ partnership in Q5 were asked this question.

POLICY – Regional Policy Framework

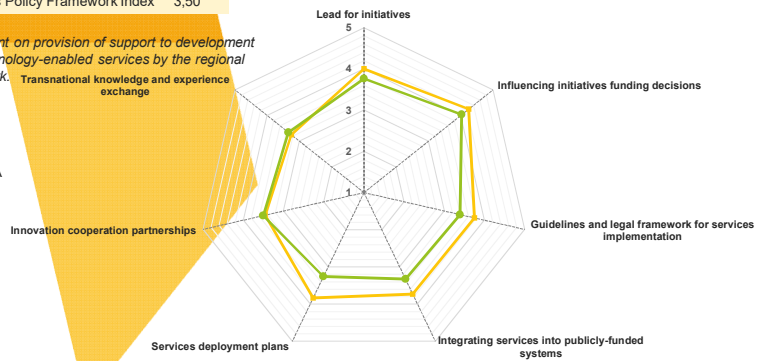

DK Regional Policy Index is higher than the average index value of ITHACA regions. This is also true for most individual items, except for *Transnational knowledge and experience exchange* and *Innovation cooperation partnerships*, which are similar to the ITHACA average.

Within the region, *Influencing initiatives funding decisions* (4,25) has the highest average value among the regional policy framework facets, followed by *Lead for initiatives* (4,00). The lowest average values were recorded for *Innovation cooperation partnerships* (3,45) and *Transnational knowledge and experience exchange* (3,25).

DK Policy Framework Index	3,74
ITHACA regions Policy Framework Index	3,50

Rated agreement on provision of support to development and use of technology-enabled services by the regional policy framework.

— DK
— ITHACA regions

Note: Regional index is based on respondents who answered all items within theme (Q19a to Q19g). Global index is a simple average over ITHACA regions, where units are regions.

LEARNING – Relative importance & use of instruments

In DK the most important and most used instruments in practice from a relative point of view are: **Workshops**, **Practice-based learning**, **Study reports**, **Internet and social media** and **Books and articles**. None of the instruments has a high relative discrepancy between the importance and use – Study visits to other countries is the closest instrument to fall in that category.

Sample sizes for presented instruments and their use/importance vary from 25 to 27.

Note: Measurement scale for importance and use goes from 1 to 4.

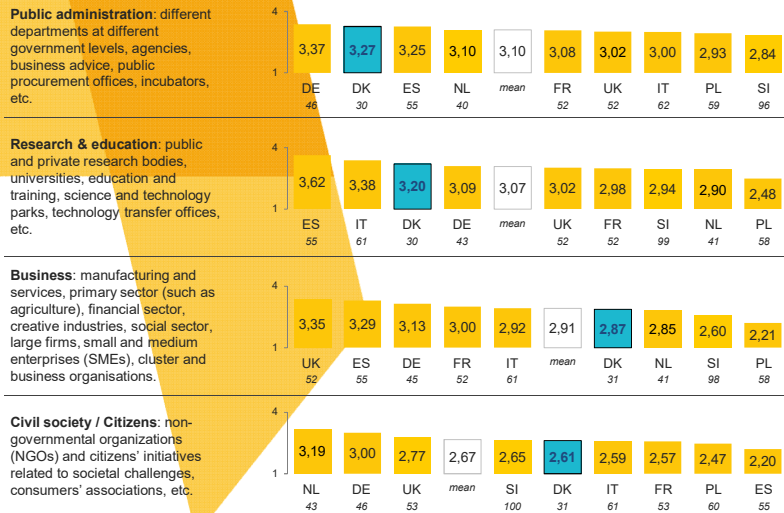

Detailed overview of the results

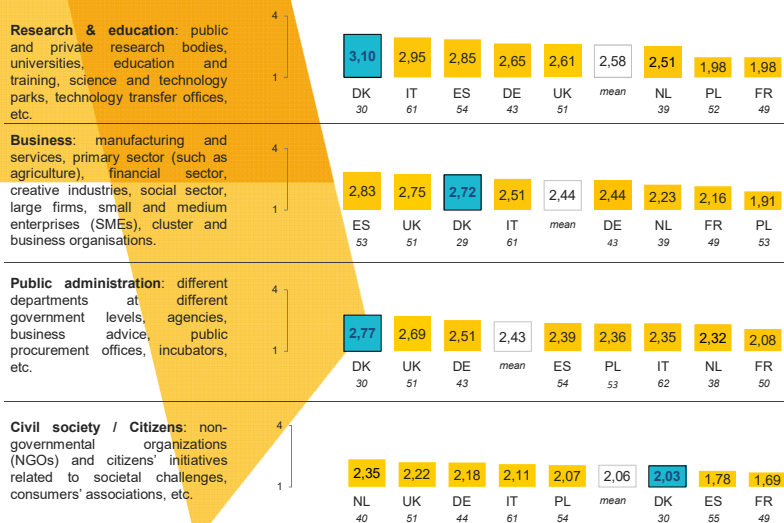

ECOSYSTEM – Regional collaboration

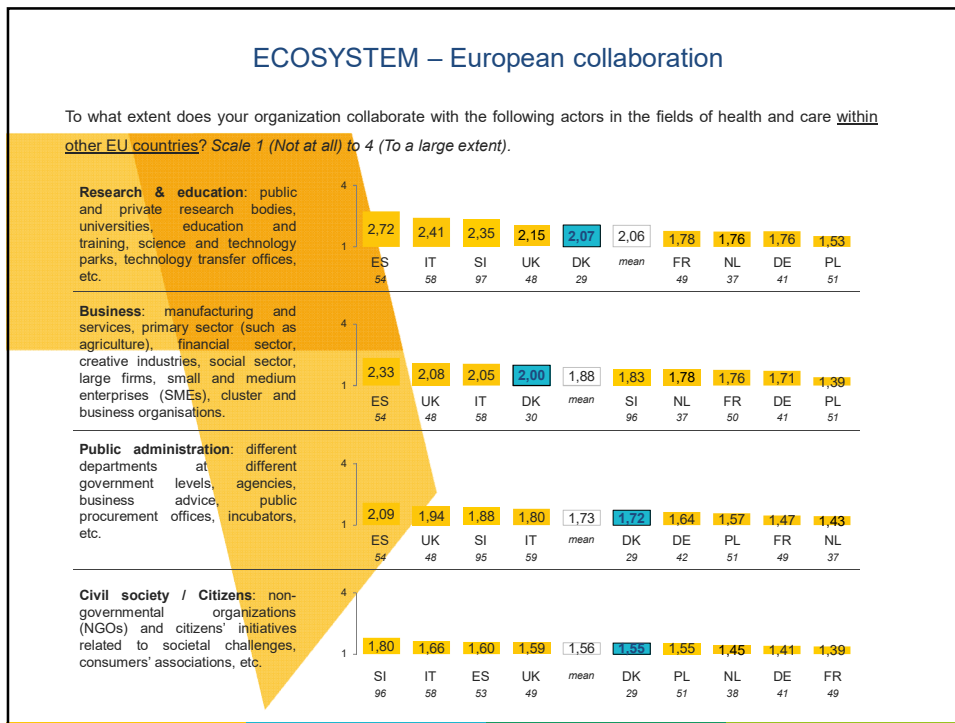

To what extent does your organization collaborate with the following actors in the fields of health and care within your region? Scale 1 (Not at all) to 4 (To a large extent).

ECOSYSTEM – National collaboration

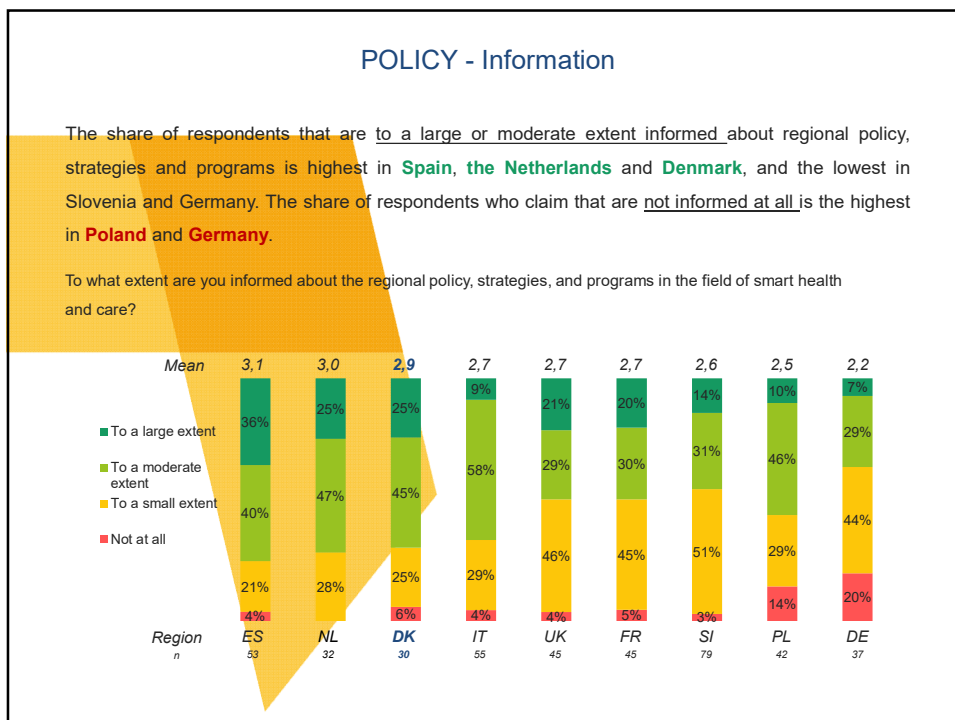

To what extent does your organization collaborate with the following actors in the fields of health and care within other regions in your country? Scale 1 (Not at all) to 4 (To a large extent).

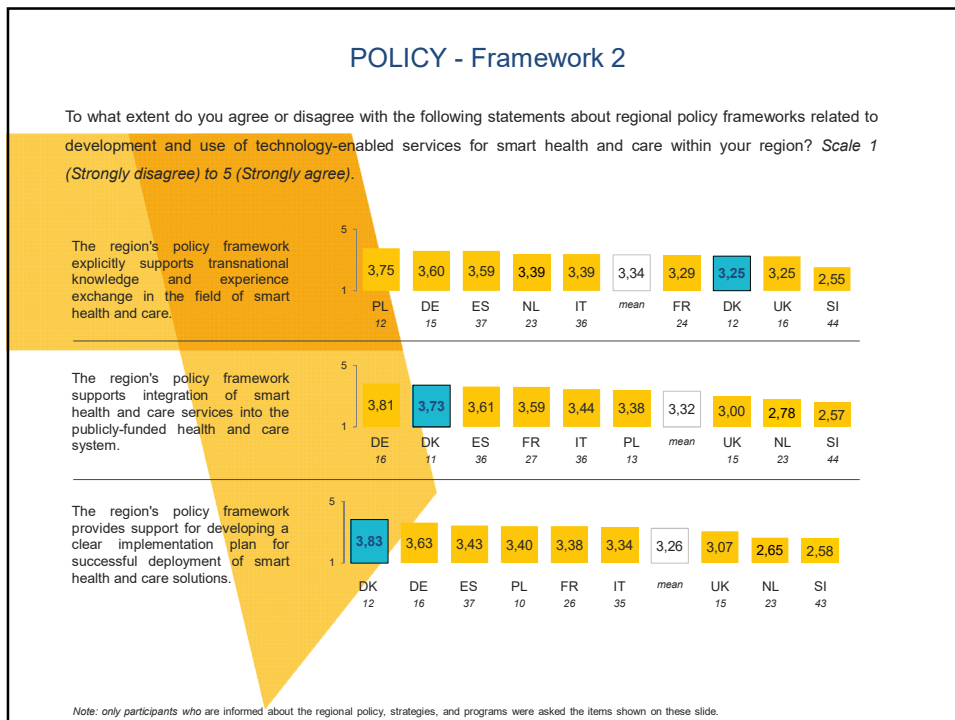

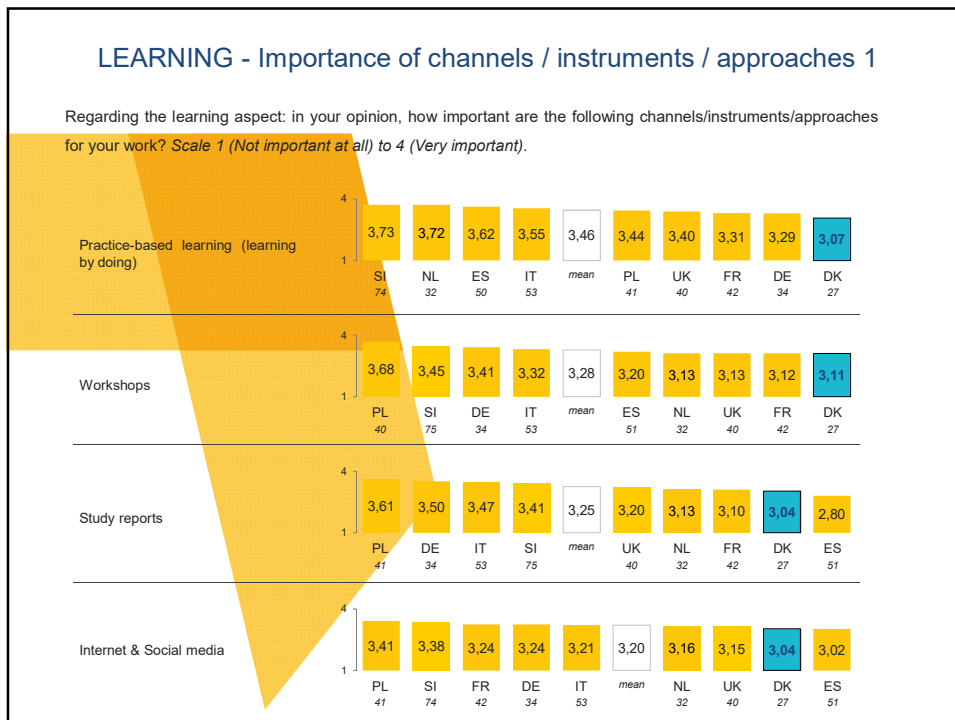

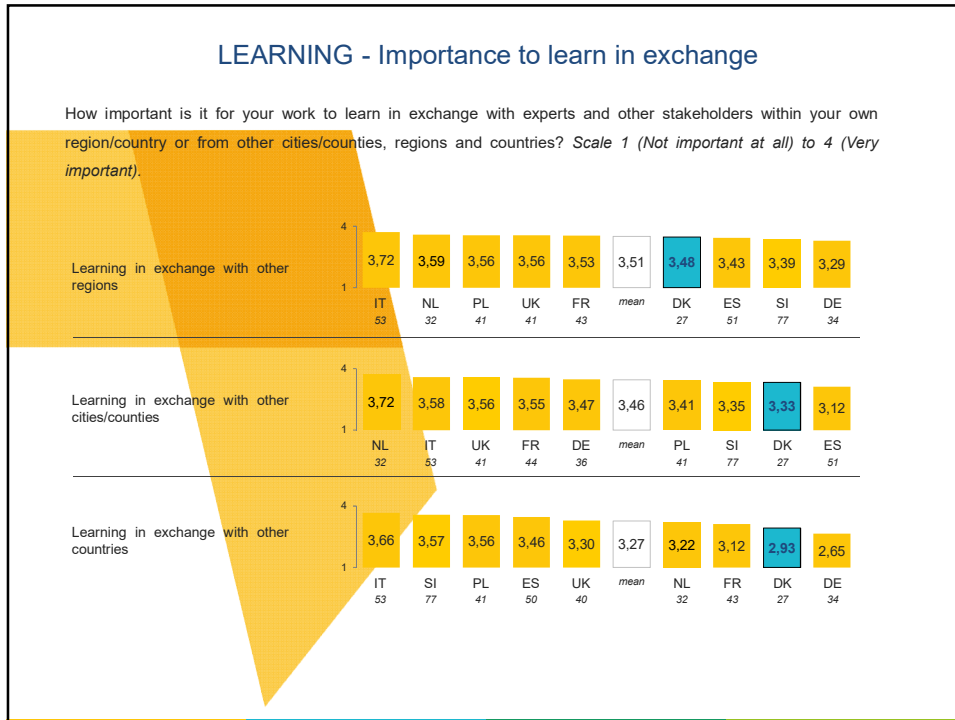

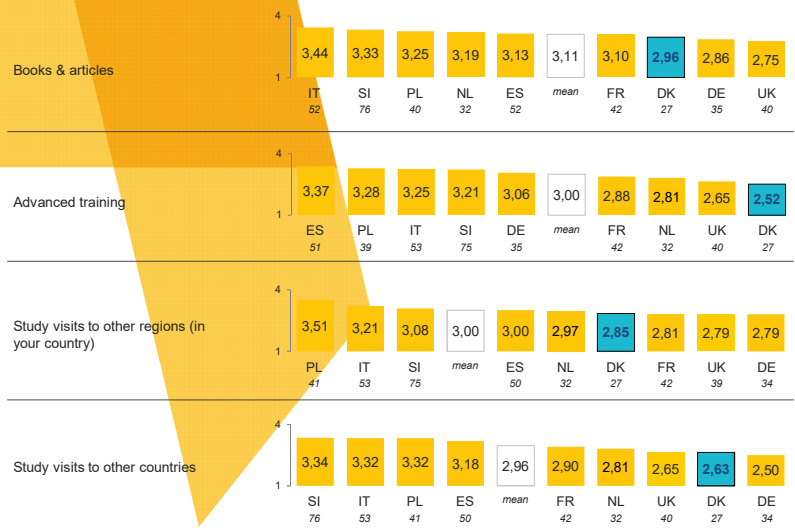

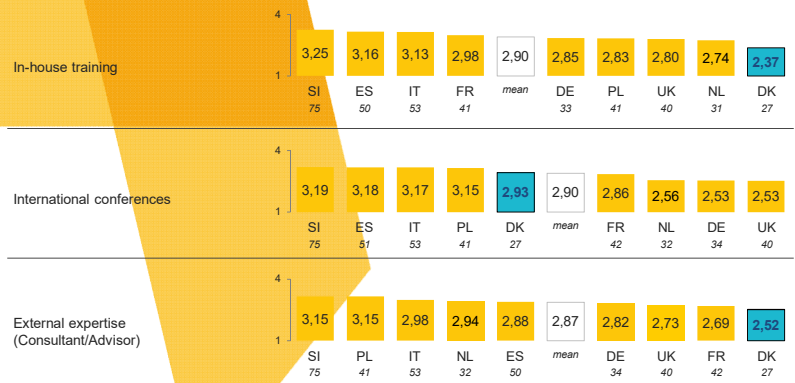

LEARNING - Importance of channels / instruments / approaches 2

Regarding the learning aspect: in your opinion, how important are the following channels/instruments/approaches for your work? Scale 1 (Not important at all) to 4 (Very important).

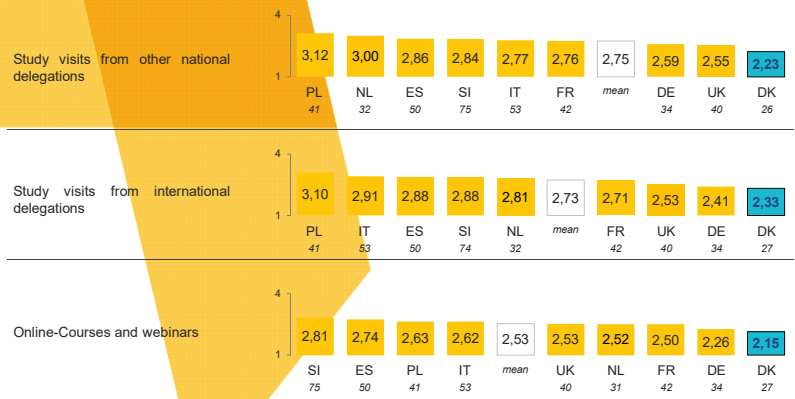

LEARNING - Importance of channels / instruments / approaches 3

Regarding the learning aspect: in your opinion, how important are the following channels/instruments/approaches for your work? Scale 1 (Not important at all) to 4 (Very important).

LEARNING - Importance of channels / instruments / approaches 4

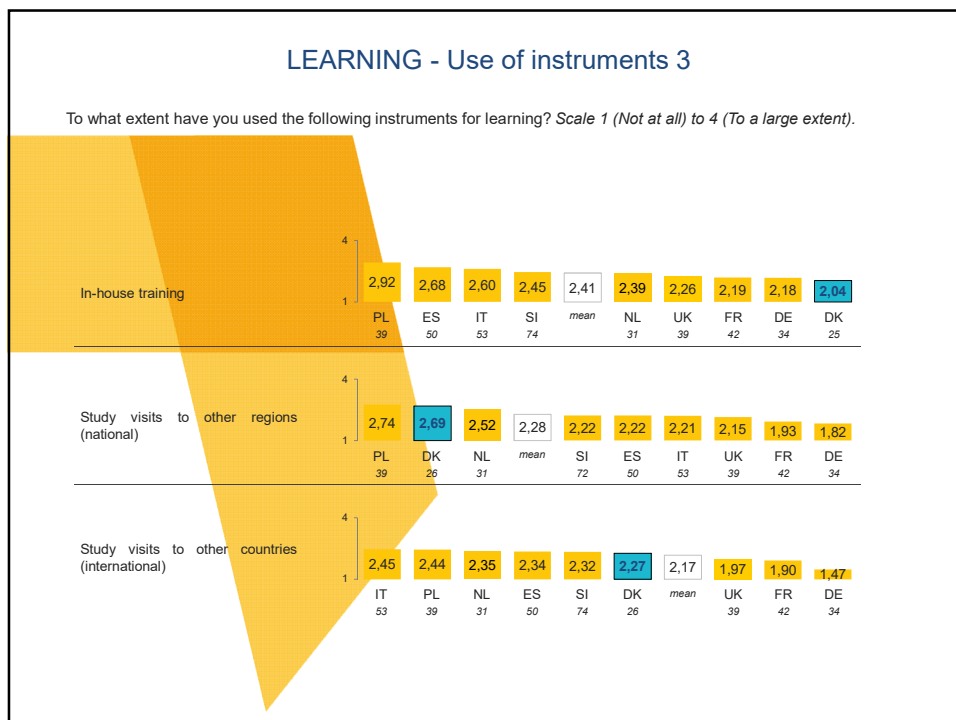

Regarding the learning aspect: in your opinion, how important are the following channels/instruments/approaches for your work? Scale 1 (Not important at all) to 4 (Very important).

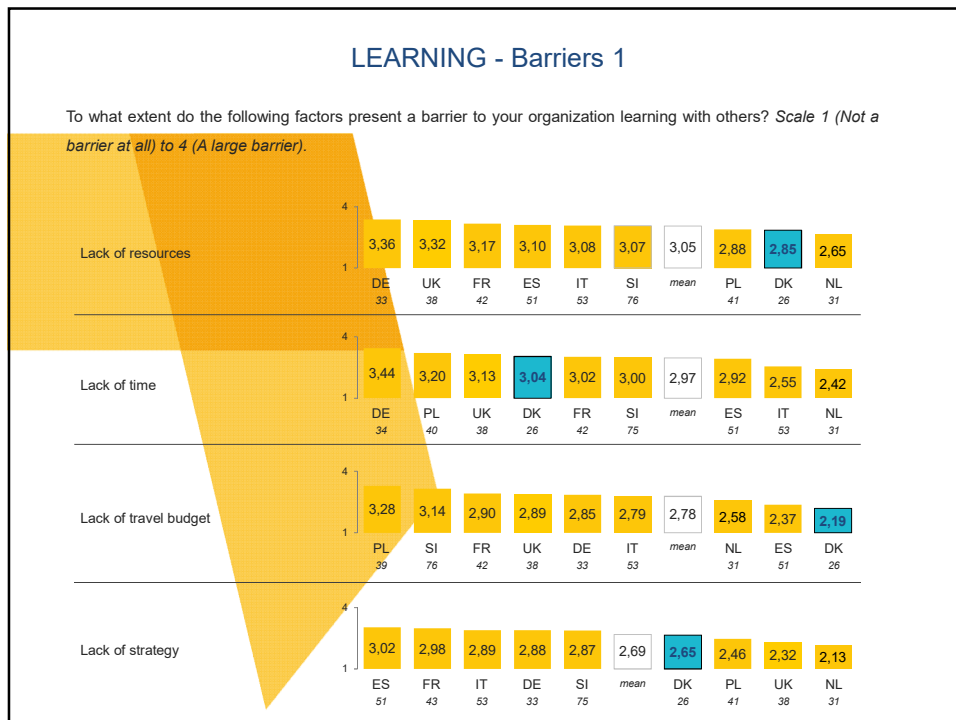

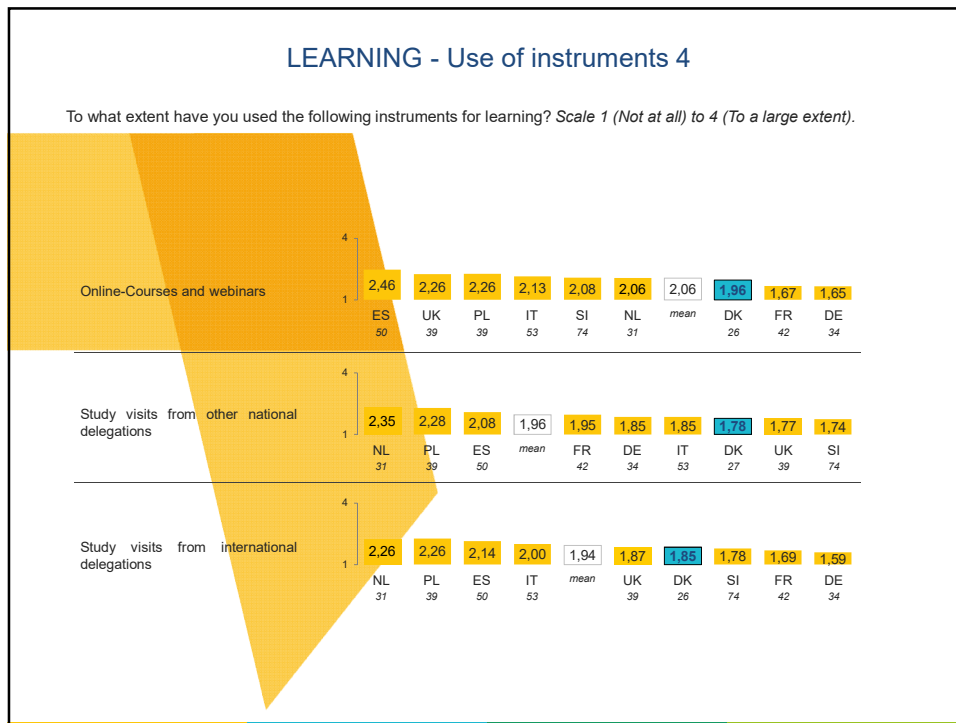

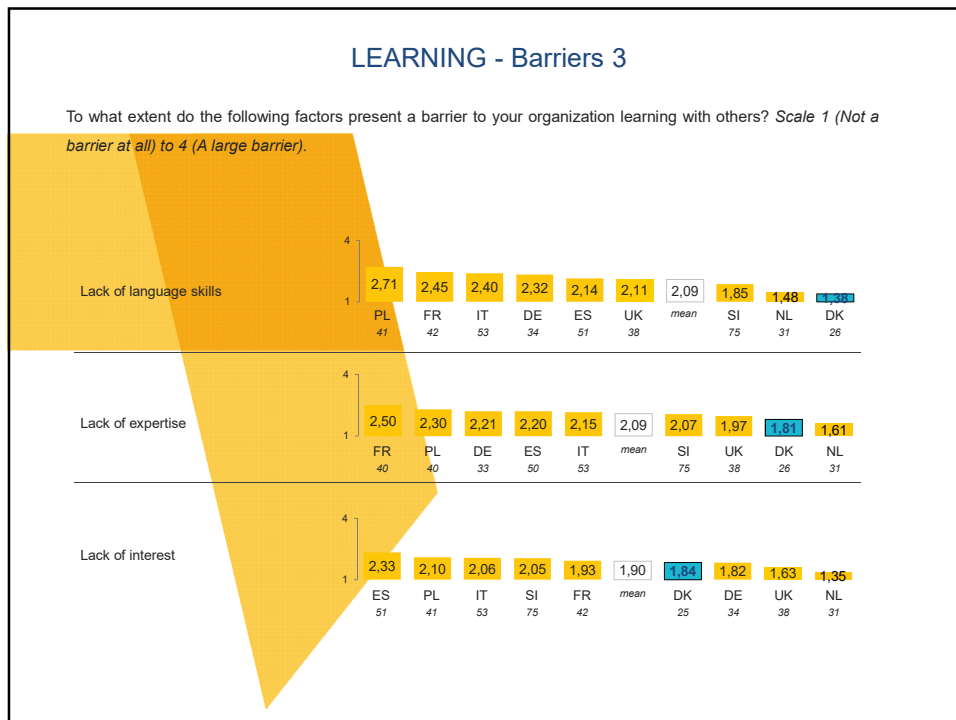

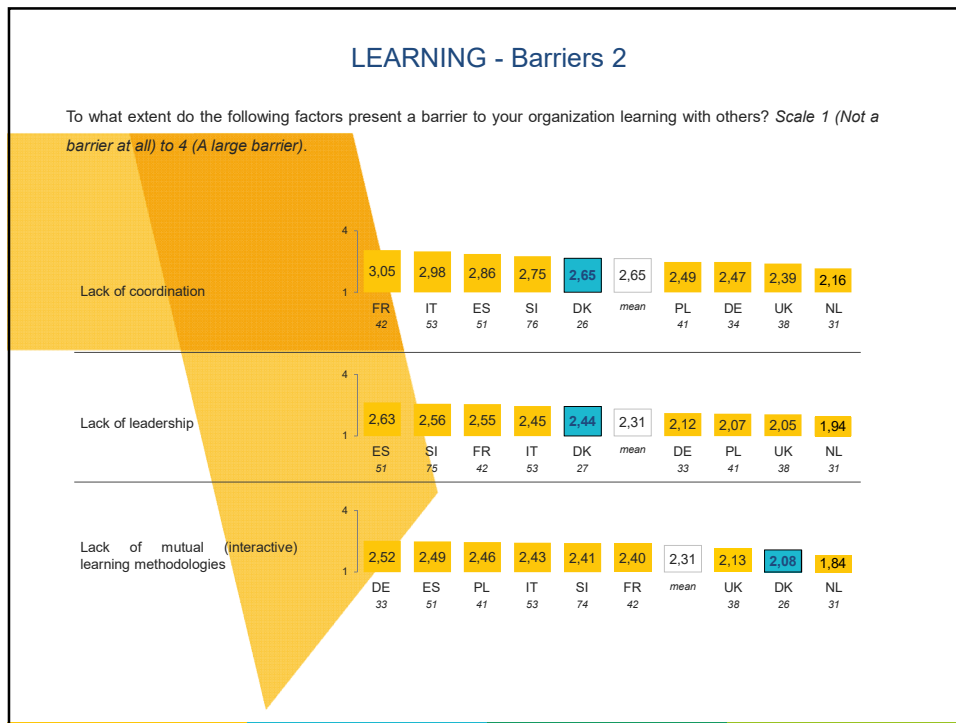

LEARNING - Use of instruments 1

To what extent have you used the following instruments for learning? Scale 1 (Not at all) to 4 (To a large extent).

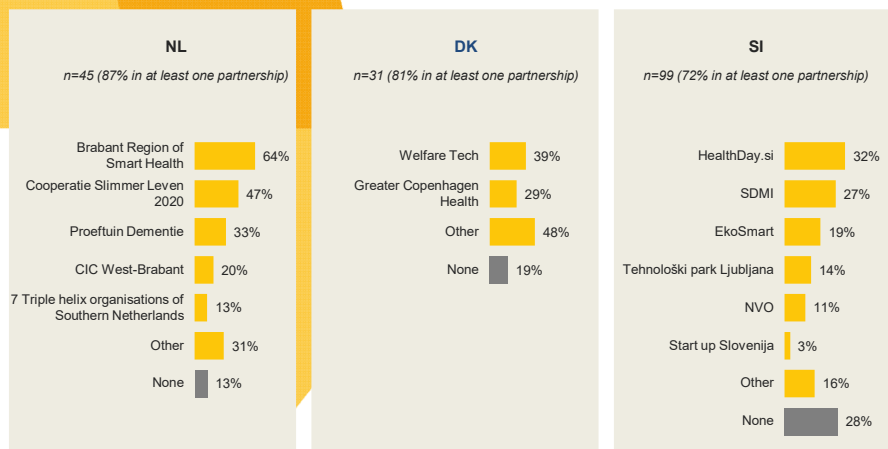

Detailed sample characteristics

COOPERATION PARTNERSHIPS INVOLVEMENT 1

Is your organization in any way involved in any of the following innovation cooperation partnerships (i.e. ecosystems / clusters / triple or quadruple-helix partnerships that stimulate innovative activity by intensive interaction) on smart health and care?

COOPERATION PARTNERSHIPS INVOLVEMENT 2

Is your organization in any way involved in any of the following innovation cooperation partnerships (i.e. ecosystems / clusters / triple or quadruple-helix partnerships that stimulate innovative activity by intensive interaction) on smart health and care?

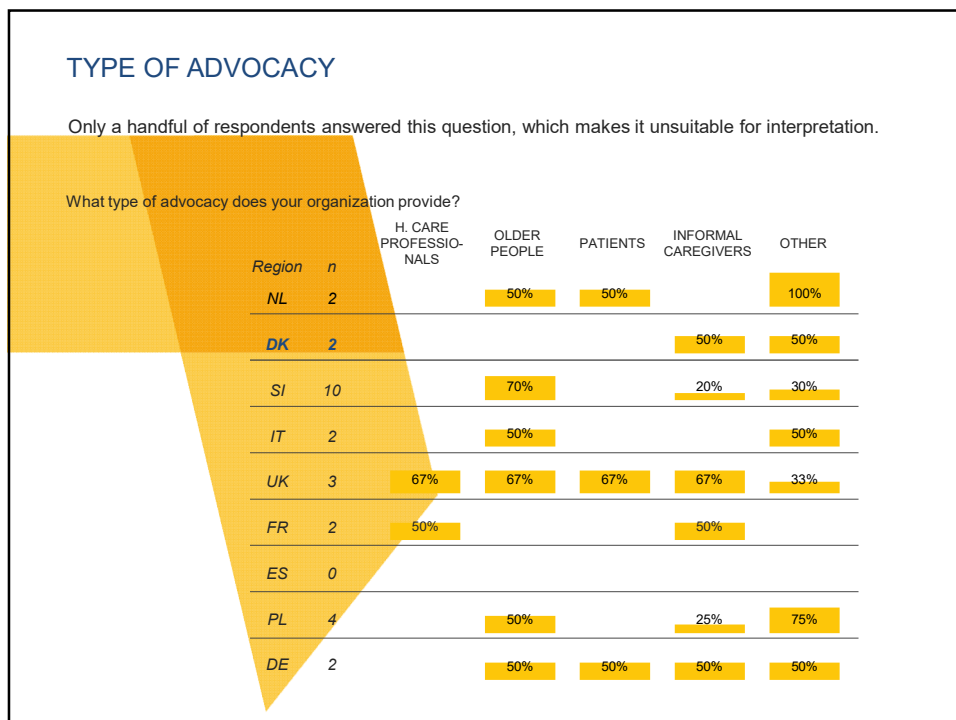

COOPERATION PARTNERSHIPS INVOLVEMENT 3

Is your organization in any way involved in any of the following innovation cooperation partnerships (i.e. ecosystems / clusters / triple or quadruple-helix partnerships that stimulate innovative activity by intensive interaction) on smart health and care?

LEVEL OF PUBLIC AUTHORITY

Although the samples are very small, the results indicate that Slovenian public organizations mostly have national authority, German public organizations have local authority, while Spanish and Polish mostly have regional authority.

What level of authority is your organization?

OPERATIONAL FIELDS

Health care and to lesser extent social care are the most common operational fields of respondents in the majority of regions. Exception is Slovenia with the ICT as the most common operational field.

In what fields does your organization operate?

Region	n	HEALTH CARE	SOCIAL CARE	HOUSING	PHARMA	ICT	OTHER
NL	31	65%	58%	29%	6%	19%	29%
DK	27	74%	30%	7%	0%	33%	15%
SI	75	21%	23%	9%	7%	41%	39%
IT	53	38%	23%	6%	6%	13%	47%
UK	39	72%	51%	21%	21%	46%	21%
FR	43	49%	23%	28%	7%	21%	23%
ES	49	49%	10%	6%	16%	27%	39%
PL	42	52%	40%	2%	2%	14%	38%
DE	35	43%	51%	3%	0%	9%	34%

SCOPE OF ORGANIZATION

In all countries but Slovenia, most organizations of respondents mainly operate on the regional scope. Local main scope is relatively common amongst Polish and German respondents, and the least common in Spain. Spain is also the most internationally orientated; 36% of Spanish respondents report that their scope is international. In contrast, in Denmark this share is only 7%.

What is the main scope of the organization?

NUMBER OF EMPLOYEES

All regions have a noticeable share of organizations with more than 250 employees, the highest share was recorded in Denmark (74%), while in the Netherlands and Slovenia it is the lowest and stands at 29% in both regions. The Netherlands and Slovenia also have the highest share of organizations with less than 10 employees, 39% and 30% respectively.

How many employees does your organization have?

Input for “Regional Policy Framework Index”

Survey Question: *Thinking about the current policy framework in your region, to what extent do you agree or disagree with the following statements about regional policy frameworks related to development and use of technology-enabled services for smart health and care within your region?*

- The region's policy framework provides a lead for legitimating setting-up and implementing initiatives in the fields of smart health and care solutions.
- The region's policy framework influences funding decisions to support initiatives in the field of smart health and care solutions.
- The region's policy framework provides policy guidelines and a legal framework that helps the private and public sectors work together to implement smart health and care services.
- The region's policy framework supports integration of smart health and care services into the publicly-funded health and care system.
- The region's policy framework provides support for developing a clear implementation plan for successful deployment of smart health and care solutions.
- Regional policy makers stimulate innovation cooperation partnership approach to an inclusive engagement strategy that encourages commitment and creates a close cooperation between public authorities, education and research institutions, business, and citizens/patients.
- The region's policy framework explicitly supports transnational knowledge and experience exchange in the field of smart health and care.

Input for “Innovation Support Service Index”

Survey Question: *In your opinion, to what extent are the following support services, for developing and scaling up of smart health and care solutions, provided in your region?*

- Establish infrastructure which enables development of innovation and knowledge transfer, for example living labs, demonstrators, test sites, show rooms, easily accessible research environments, clinical trials, open source facilities.
- Established knowledge networks, collaboration platforms to support continuous improvement.
- Established public-private partnerships.
- Support for bringing products and services to the market and growing market share.
- Training and further education programmes to health and care professionals and other stakeholders working with age friendly smart health and care solutions.
- Procedural and administrative simplifications.
- Programs for innovation cooperation partnerships.
- Support for the valorisation of research outcomes.
- Support on legal aspects including intellectual property rights, procurement, regulation.

Input for “Development & Use of innovative products & Services Index”

Survey Question: *How would you rate intensity of the occurrence of the following developments in the field of smart health and care in your region?*

- Development of new ideas related to smart health and care solutions in your region?
- Development of innovative products and services for smart health and care in your region?
- Use of innovative smart health and care products and services in practice on a daily basis in your region.

Report 3: Slovenia

Sample & Respondents

Input for „Intro to the theme“

TYPE OF ORGANIZATION

Poland has the highest share of respondents from health providing organizations (24%), while the Netherlands and France have the lowest. The share of respondents from private enterprises is the highest in the UK (39%).

What type is your organization?

OPERATIONAL FIELDS

Health care and to lesser extent social care are the most common operational fields of respondents in the majority of regions. Exception is Slovenia with the ICT as the most common operational field.

In what fields does your organization operate?

SCOPE OF ORGANIZATION

In all countries but Slovenia, most organizations of respondents mainly operate on the regional scope. Local main scope is relatively common amongst Polish and German respondents, and the least common in Spain. Spain is also the most internationally orientated; 36% of Spanish respondents report that their scope is international. In contrast, in Denmark this share is only 7%.

What is the main scope of the organization?

Results Summary

Input for „Intro to the theme“

ECOSYSTEM - Usefulness of involvement

In **Germany, UK and the Netherlands** more than half of respondents consider their involvement as **very useful**. On the other side, only 17% **Polish** and 18% **Slovenian** respondents evaluate their involvement as very useful.

In general, how useful is the involvement in the innovation cooperation partnerships on smart health and care for your organization? In case, you are involved in more innovation cooperation partnerships, please consider the usefulness of the one most relevant for you.

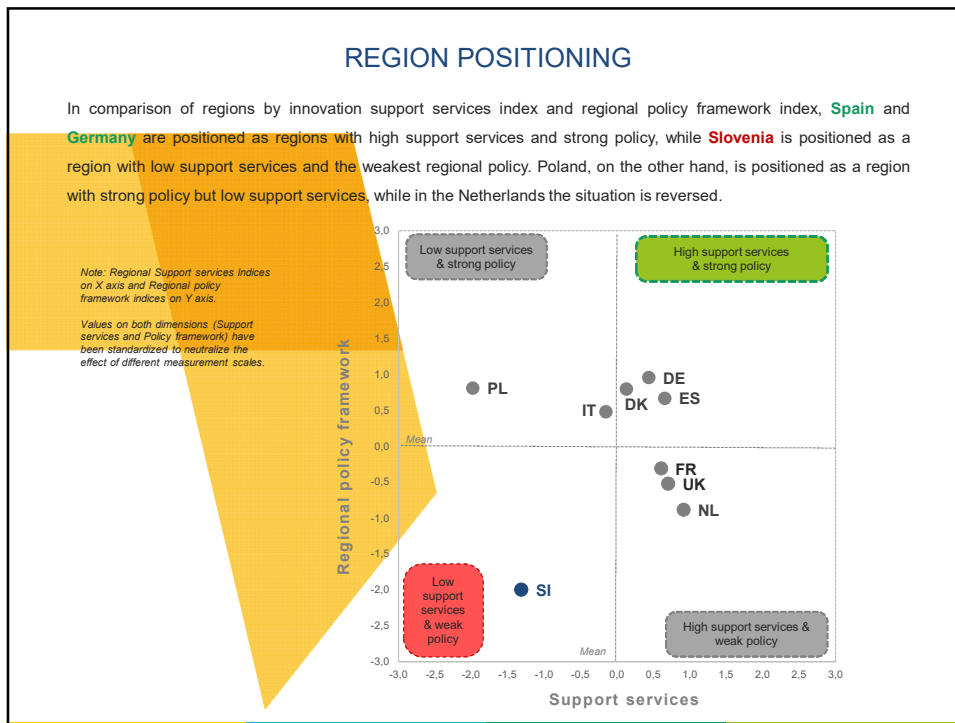

Note: Only participants that are involved in at least one listed cooperation partnership or have indicated „other“ partnership in Q5 were asked this question.

INNOVATION & POLICY INDICES

Composite indices are presented below. The highest average score on **innovation support services** was recorded in **the Netherlands** and the lowest in **Poland**. According to respondents the development and use of innovative products and services is the highest in France and the Netherlands, and the lowest in Slovenia and Poland. **Regional policy framework** on the other hand, is rated highly in **Germany, Poland and Denmark**, whereas in **Slovenia** it is distinctively lower.

Note: Composite Regional Indices are calculated as an average of participants' average score on all items within the same theme. Items for Innovation Support Service Index: Q13a to Q13l. Items for Development & Use of innovative products & Services Index: Q15a, Q15b and Q15c. Items for Regional Policy Framework Index: Q19a to Q19g.

ECOSYSTEM – Cooperation partnership involvement

Is your organization in any way involved in any of the following innovation cooperation partnerships (i.e. ecosystems / clusters / triple or quadruple-helix partnerships that stimulate innovative activity by intensive interaction) on smart health and care?

Involvement in at least one cooperation partnership:

SI (n=99)

ECOSYSTEM - Usefulness of involvement

On a scale from 1 (Not useful at all) to 4 (Very useful), the SI region has the lowest average value amongst the ITHACA regions, with only 18% of respondents finding the involvement very useful.

In general, how useful is the involvement in the innovation cooperation partnerships on smart health and care for your organization? In case, you are involved in more innovation cooperation partnerships, please consider the usefulness of the one most relevant for you.

Note: Only participants that are involved in at least one listed cooperation partnership or have indicated „other“ partnership in Q5 were asked this question.

INNOVATION - Support services

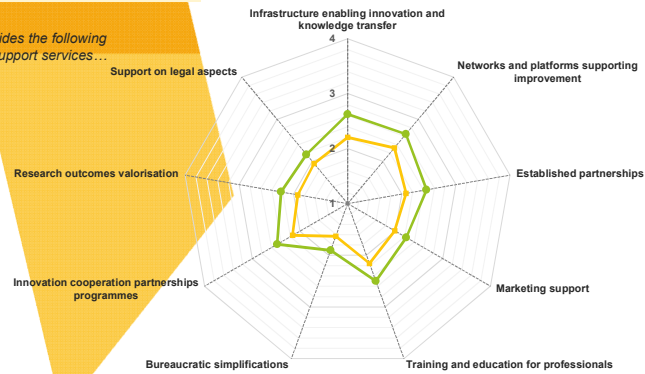

SI Support Services Index is lower than the average index value of ITHACA regions. All individual items are rated below the ITHACA average.

Within the region, *Networks and platforms supporting improvement* (2,32) has on average the highest rated extent of all Support services items, followed by *Infrastructure enabling innovation and knowledge transfer* (2,21), while *Bureaucratic simplifications* have by far the lowest ratings, with the average of 1,63.

SI Support Services Index 2,05
 ITHACA regions Support service Index 2,37

Region provides the following innovation support services...

— SI
 — ITHACA regions

Note: Regional index is based on respondents who answered all items within theme (Q13a to Q13j). Global index is a simple average over ITHACA regions, where units are regions.

INNOVATION - Development & use of innovative products & services

SI Development & Use of innovative Products & Services Index is lower than the average index value of ITHACA regions. The rated intensities of all developments are below the corresponding averages of all ITHACA regions.

Within the region, *New ideas* (2,77) are rated as the most intensively occurring development in the field, followed by *Innovative products and services* (2,60). The value is much lower for the intensity of *Daily usage of innovative products and services* (1,99).

SI Development & Use of innovative products & Services Index 2,46
 ITHACA regions Development & Use of innovative products & Services Index 3,02

Intensity of the following developments...

— SI
 — ITHACA regions

Note: Regional index is based on respondents who answered all items within theme (Q15a to Q15c). Global index is a simple average over ITHACA regions, where units are regions.

POLICY – Regional Policy Framework

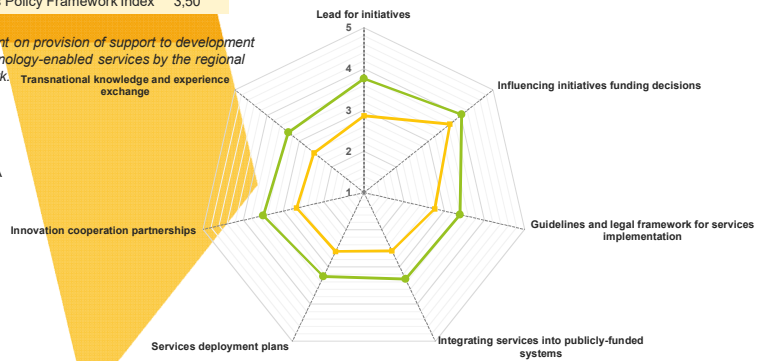

SI Regional Policy Index is profoundly lower than the average index value of ITHACA regions. This is true for all individual items, except for *Influencing initiatives funding decisions*, where the difference is not that profound.

Within the region, *Influencing initiatives funding decisions* (3,67) has the highest average value among the regional policy framework facets, distantly followed by *Lead for initiatives* (2,86). The lowest average values were recorded for *Services deployment plans* (2,58), *Integrating services into publicly-funded systems* (2,57) and *Transnational knowledge and experience exchange* (2,55).

SI Policy Framework Index	2,88
ITHACA regions Policy Framework Index	3,50

Rated agreement on provision of support to development and use of technology-enabled services by the regional policy framework.

— SI
— ITHACA regions

Note: Regional index is based on respondents who answered all items within theme (Q19a to Q19g). Global index is a simple average over ITHACA regions, where units are regions.

LEARNING – Relative importance & use of instruments

In SI the most important and most used instruments in practice from a relative point of view are: **Practice-based learning**, **Workshops**, **Study reports**, **Internet and social media** and **Books and articles**. While **In-house training** and **Study visits to other countries** fall in the category of high importance and low use.

Sample sizes for presented instruments and their use/importance vary from 72 to 76.

Note: Measurement scale for importance and use goes from 1 to 4.

Detailed overview of the results

ECOSYSTEM – Regional collaboration

— ITHACA regions

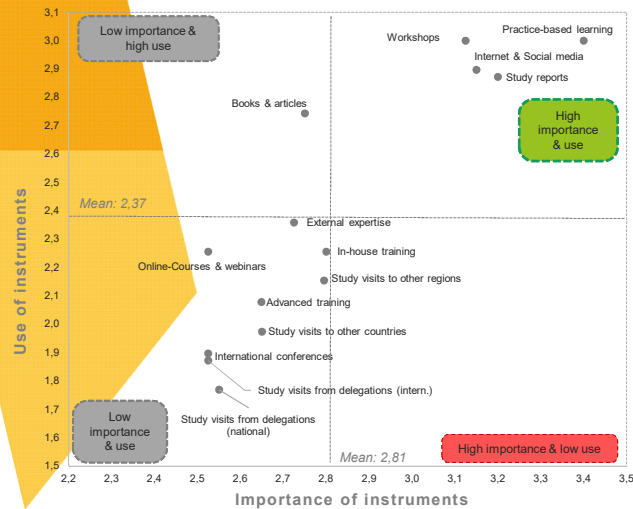

Note: Regional index is based on respondents who answered all items within theme (Q19a to Q19g). Global index is a simple average over ITHACA regions, where units are regions.

LEARNING – Relative importance & use of instruments

In UK the most important and most used instruments in practice from a relative point of view are: **Practice-based learning**, **Study reports**, **Internet and social media** and **Workshops**. None of the instruments has a high relative discrepancy between the importance and use – Study visits to other regions and In-house training are the closest instruments to fall in that category.

Sample sizes for presented instruments and their use/importance vary from 39 to 40.

Note: Measurement scale for importance and use goes from 1 to 4.

Detailed overview of the results

ECOSYSTEM – Regional collaboration

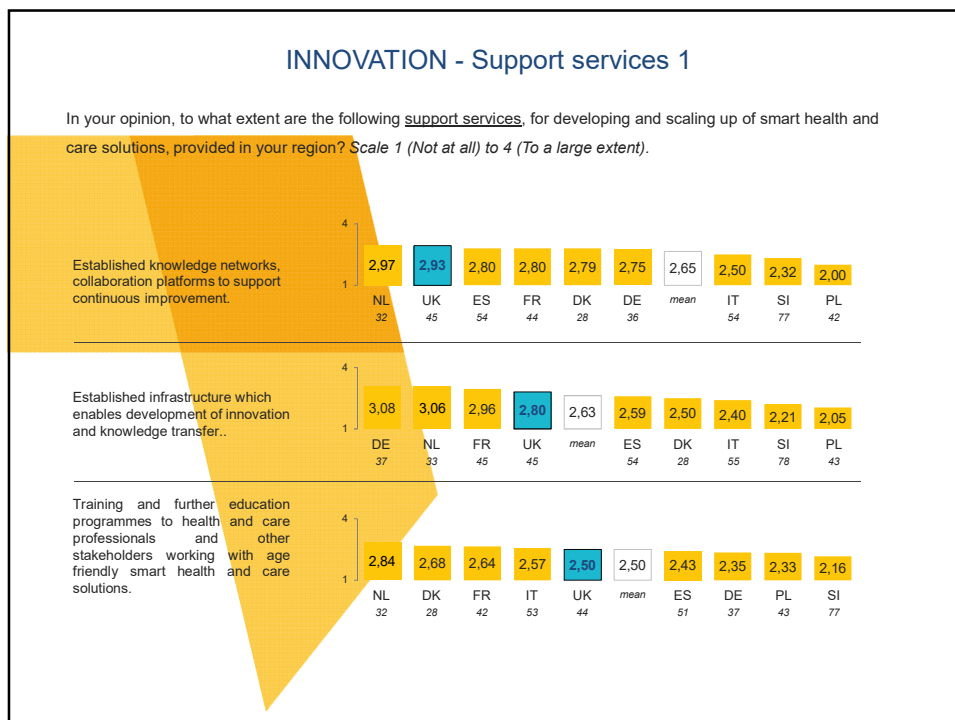

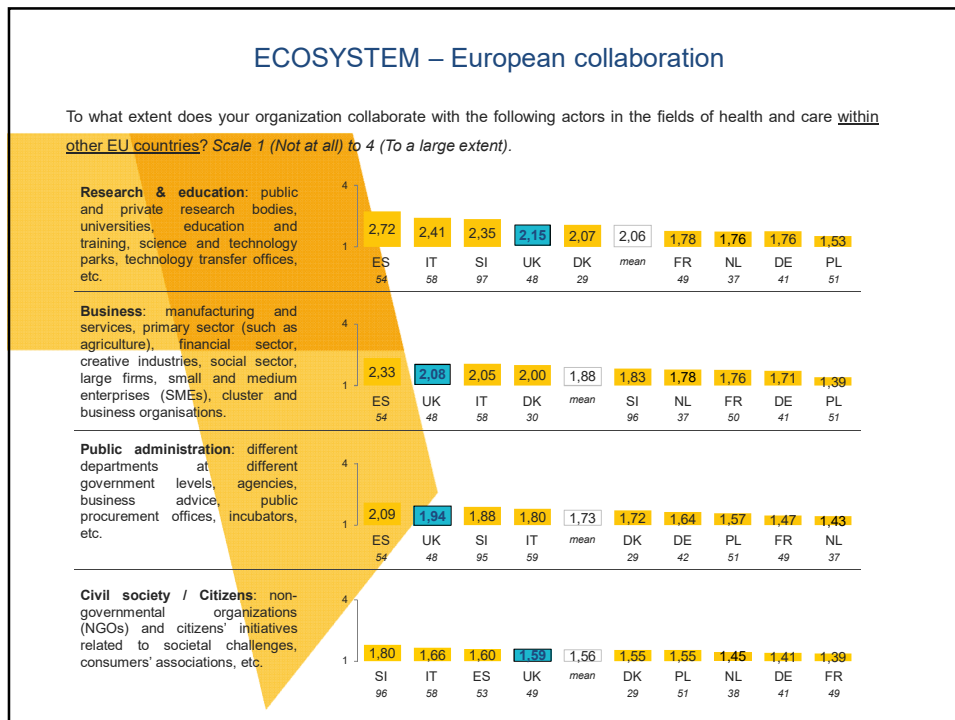

To what extent does your organization collaborate with the following actors in the fields of health and care within your region? Scale 1 (Not at all) to 4 (To a large extent).

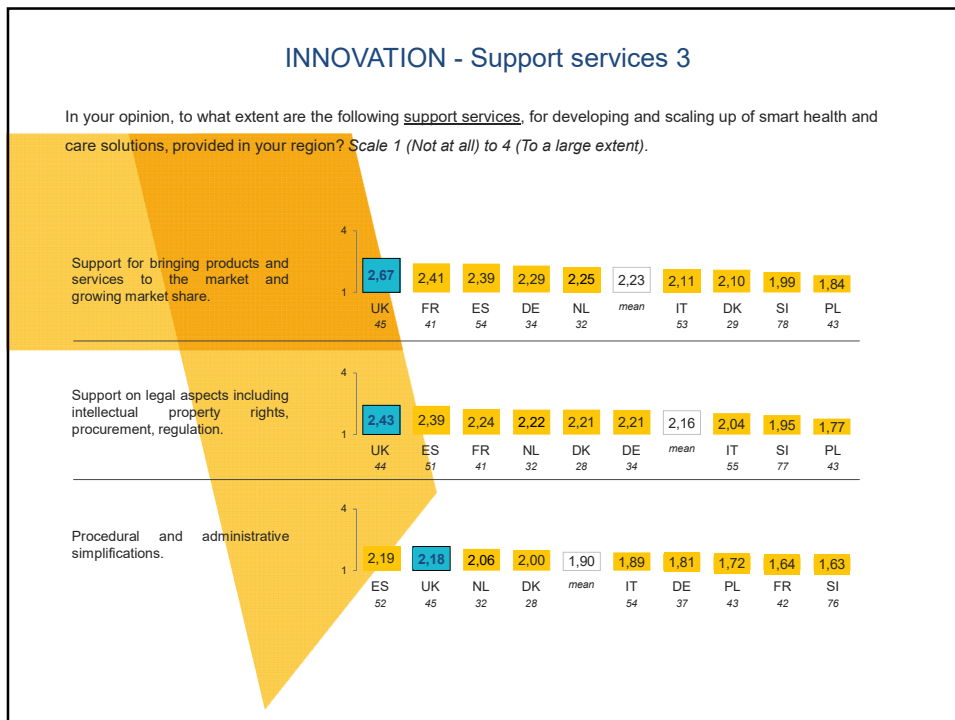

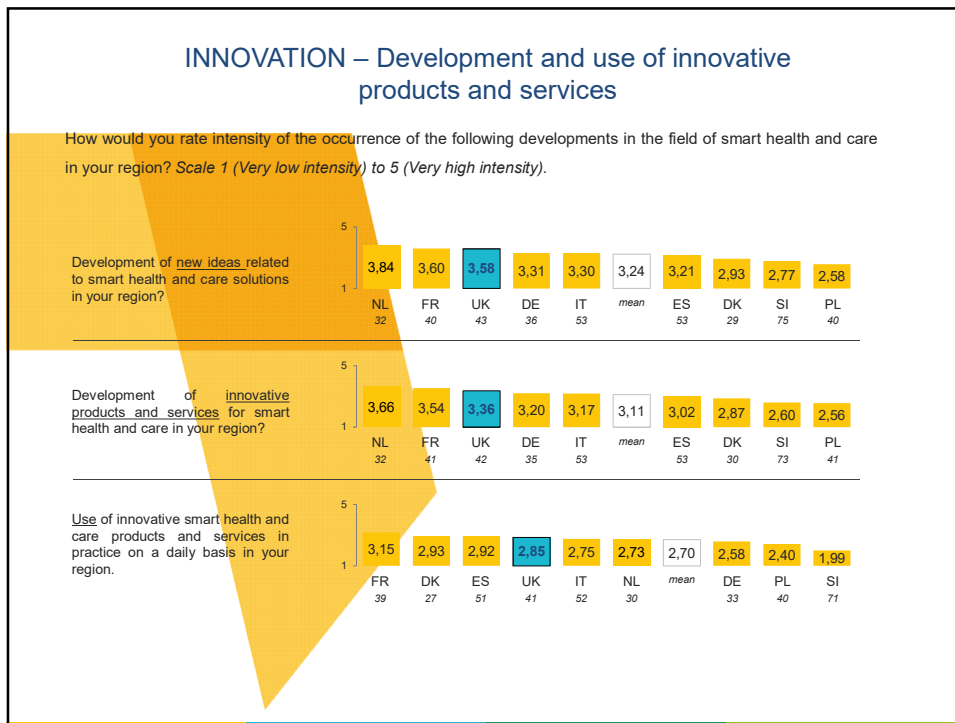

ECOSYSTEM – National collaboration

To what extent does your organization collaborate with the following actors in the fields of health and care within other regions in your country? Scale 1 (Not at all) to 4 (To a large extent).

POLICY - Framework 1

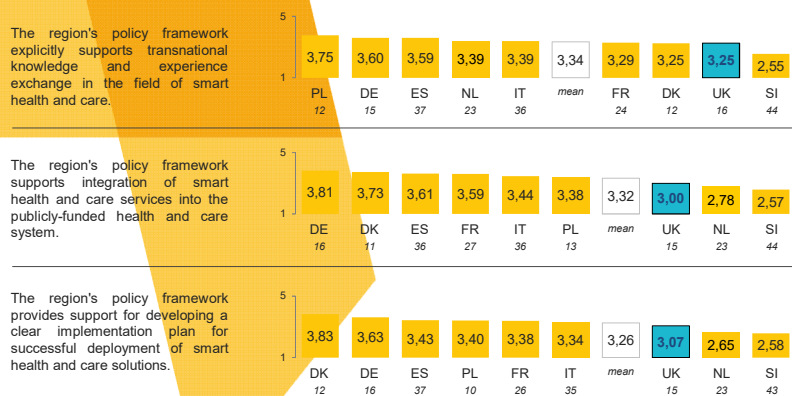

To what extent do you agree or disagree with the following statements about regional policy frameworks related to development and use of technology-enabled services for smart health and care within your region? Scale 1 (Strongly disagree) to 5 (Strongly agree).

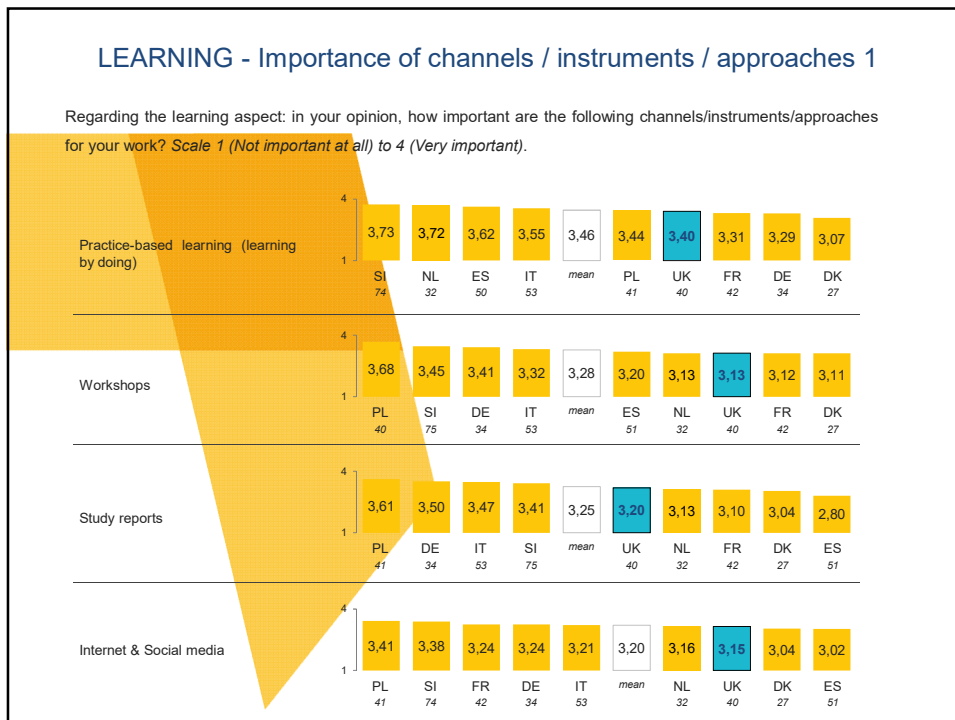

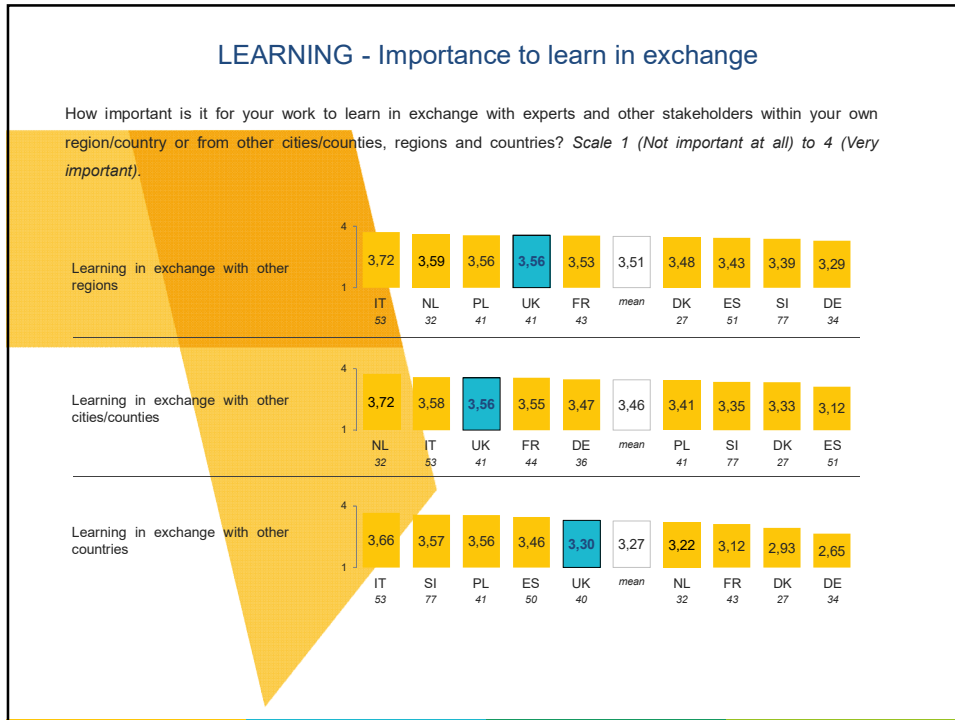

Note: only participants who are informed about the regional policy, strategies, and programs were asked the items shown on these slide.

POLICY - Framework 2

To what extent do you agree or disagree with the following statements about regional policy frameworks related to development and use of technology-enabled services for smart health and care within your region? Scale 1 (Strongly disagree) to 5 (Strongly agree).

Note: only participants who are informed about the regional policy, strategies, and programs were asked the items shown on these slide.

LEARNING - Importance of channels / instruments / approaches 2

Regarding the learning aspect: in your opinion, how important are the following channels/instruments/approaches for your work? Scale 1 (Not important at all) to 4 (Very important).

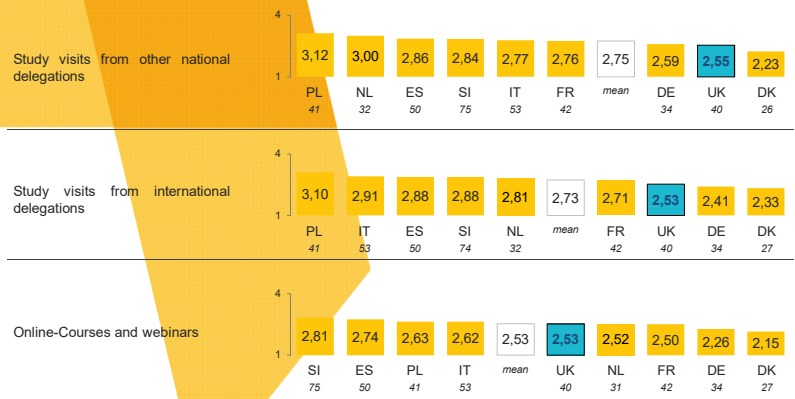

LEARNING - Importance of channels / instruments / approaches 3

Regarding the learning aspect: in your opinion, how important are the following channels/instruments/approaches for your work? Scale 1 (Not important at all) to 4 (Very important).

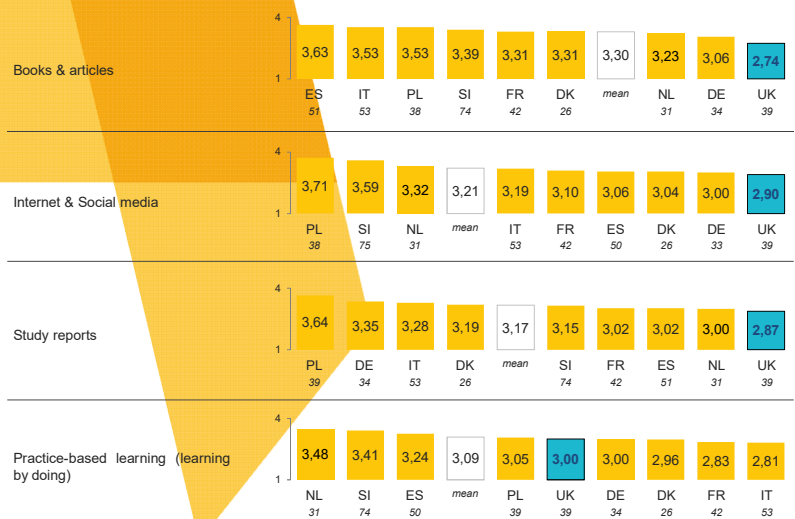

LEARNING - Importance of channels / instruments / approaches 4

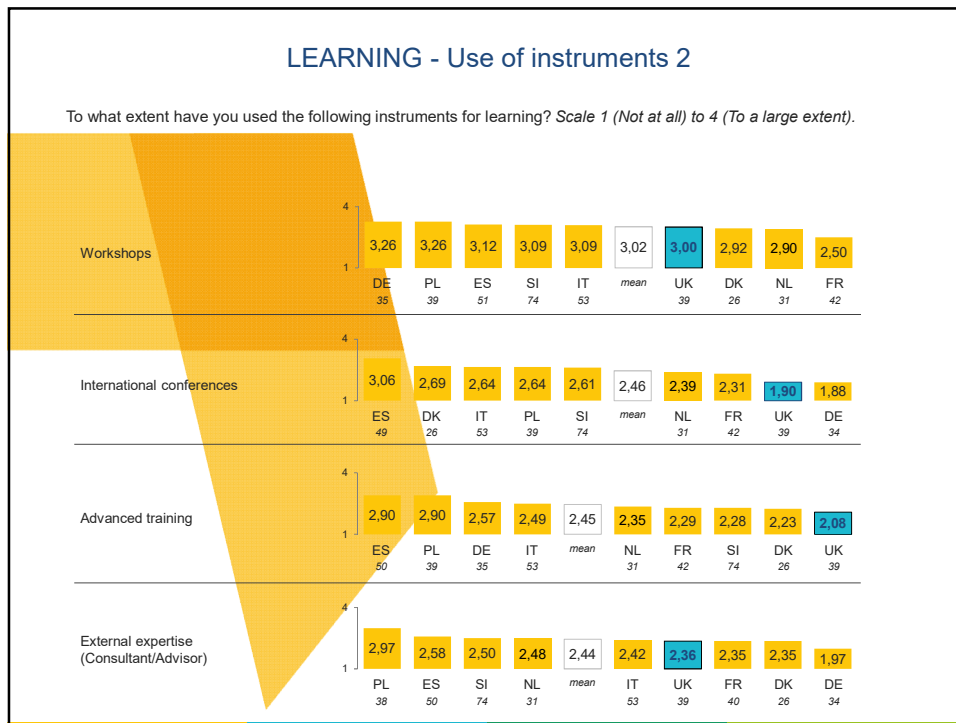

Regarding the learning aspect: in your opinion, how important are the following channels/instruments/approaches for your work? Scale 1 (Not important at all) to 4 (Very important).

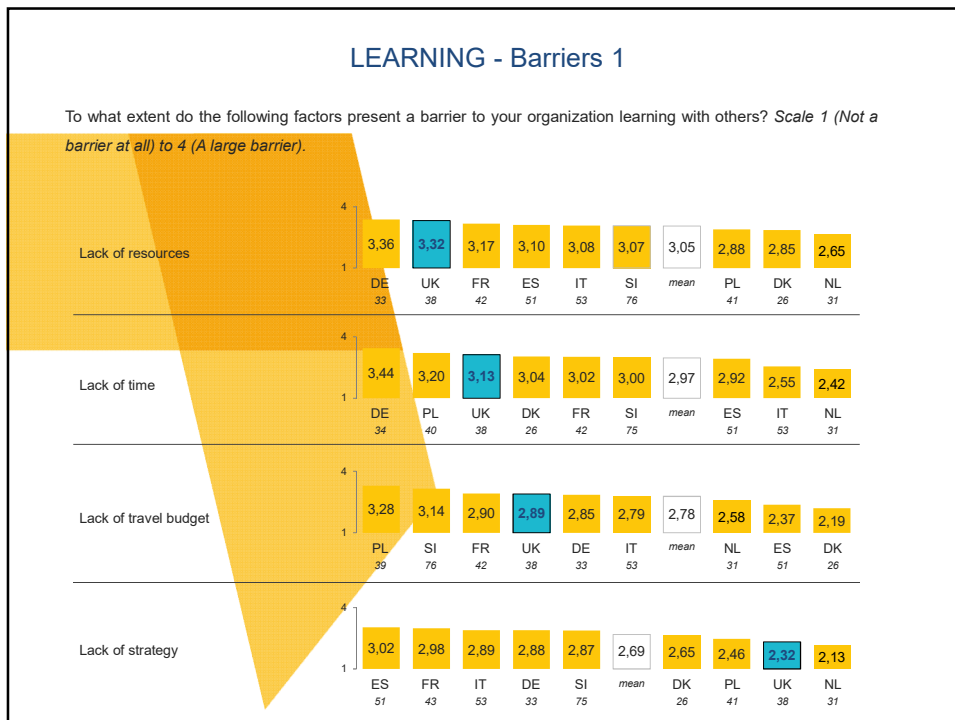

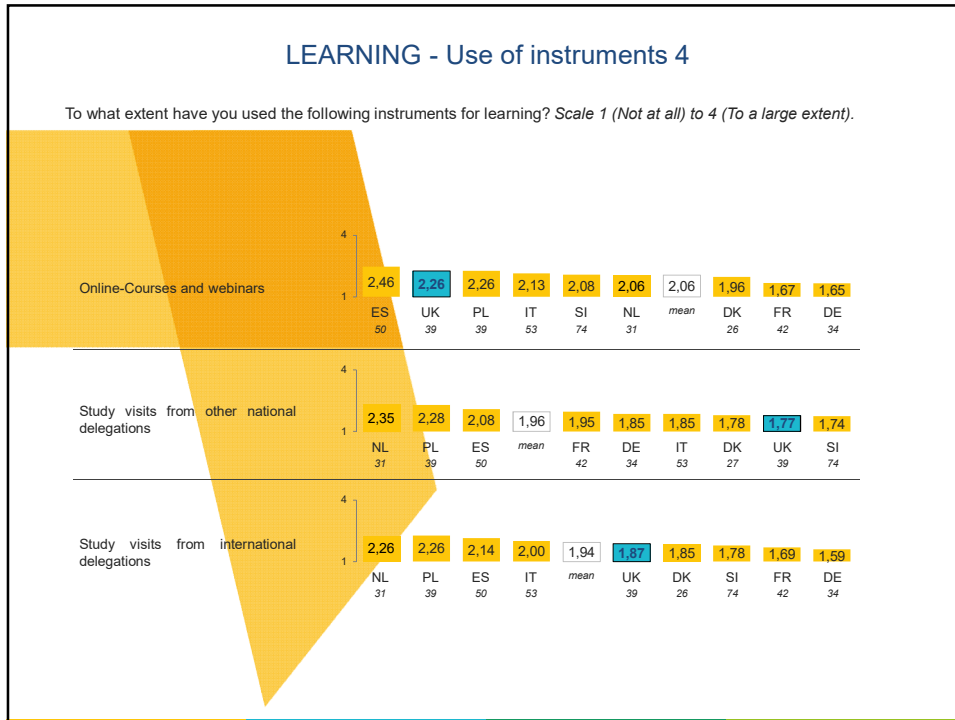

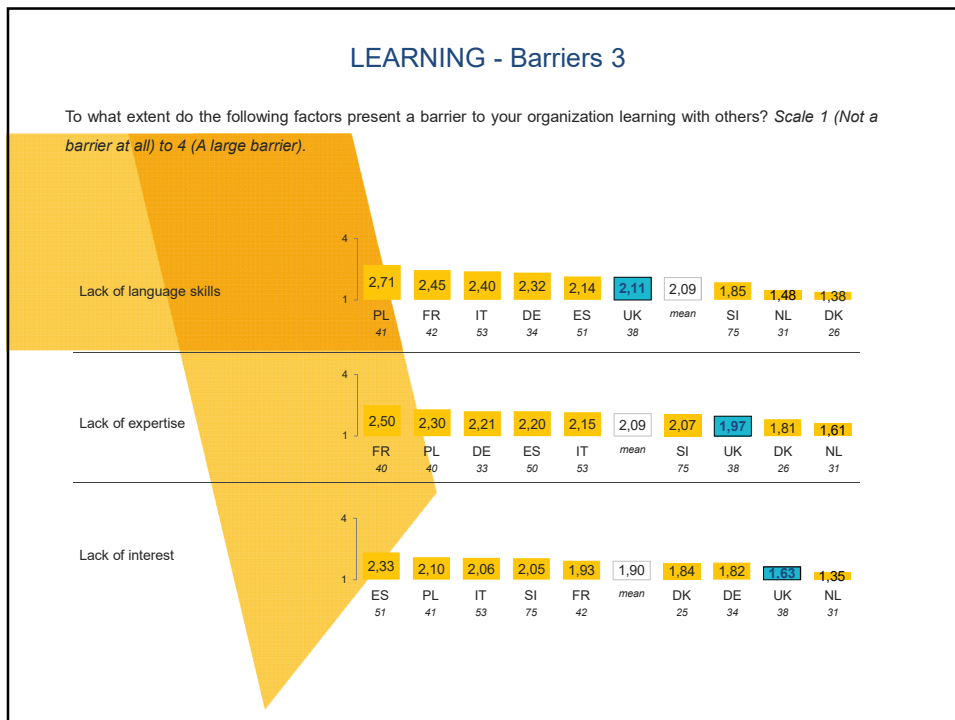

LEARNING - Use of instruments 1

To what extent have you used the following instruments for learning? Scale 1 (Not at all) to 4 (To a large extent).

Detailed sample characteristics

COOPERATION PARTNERSHIPS INVOLVEMENT 1

Is your organization in any way involved in any of the following innovation cooperation partnerships (i.e. ecosystems / clusters / triple or quadruple-helix partnerships that stimulate innovative activity by intensive interaction) on smart health and care?

COOPERATION PARTNERSHIPS INVOLVEMENT 2

Is your organization in any way involved in any of the following innovation cooperation partnerships (i.e. ecosystems / clusters / triple or quadruple-helix partnerships that stimulate innovative activity by intensive interaction) on smart health and care?

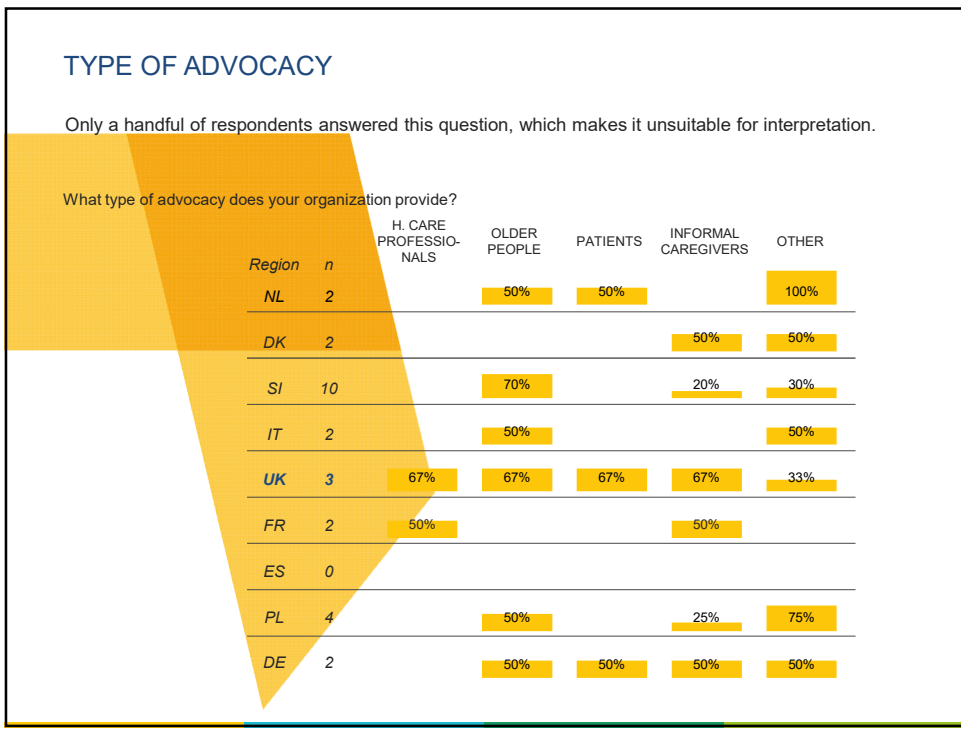

COOPERATION PARTNERSHIPS INVOLVEMENT 3

Is your organization in any way involved in any of the following innovation cooperation partnerships (i.e. ecosystems / clusters / triple or quadruple-helix partnerships that stimulate innovative activity by intensive interaction) on smart health and care?

LEVEL OF PUBLIC AUTHORITY

Although the samples are very small, the results indicate that Slovenian public organizations mostly have national authority, German public organizations have local authority, while Spanish and Polish mostly have regional authority.

What level of authority is your organization?

OPERATIONAL FIELDS

Health care and to lesser extent social care are the most common operational fields of respondents in the majority of regions. Exception is Slovenia with the ICT as the most common operational field.

In what fields does your organization operate?

Region	n	HEALTH CARE	SOCIAL CARE	HOUSING	PHARMA	ICT	OTHER
NL	31	65%	58%	29%	6%	19%	29%
DK	27	74%	30%	7%		33%	15%
SI	75	21%	23%	9%	7%	41%	39%
IT	53	38%	23%	6%	6%	13%	47%
UK	39	72%	51%	21%	21%	46%	21%
FR	43	49%	23%	28%	7%	21%	23%
ES	49	49%	10%	6%	16%	27%	39%
PL	42	52%	40%	2%	2%	14%	38%
DE	35	43%	51%	3%		9%	34%

SCOPE OF ORGANIZATION

In all countries but Slovenia, most organizations of respondents mainly operate on the regional scope. Local main scope is relatively common amongst Polish and German respondents, and the least common in Spain. Spain is also the most internationally orientated; 36% of Spanish respondents report that their scope is international. In contrast, in Denmark this share is only 7%.

What is the main scope of the organization?

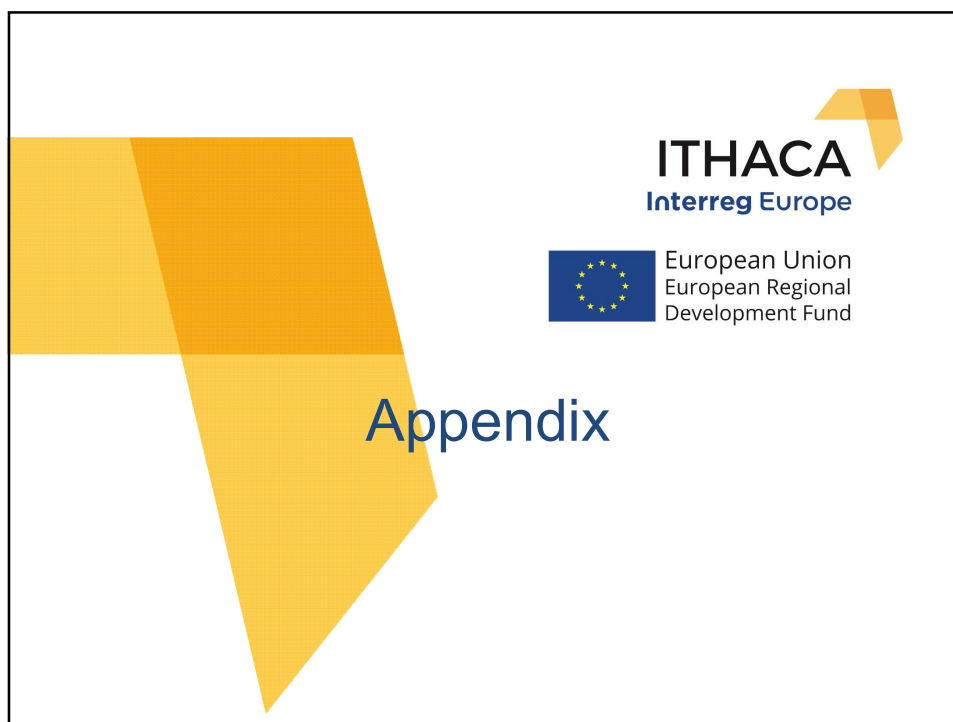

NUMBER OF EMPLOYEES

All regions have a noticeable share of organizations with more than 250 employees, the highest share was recorded in Denmark (74%), while in the Netherlands and Slovenia it is the lowest and stands at 29% in both regions. The Netherlands and Slovenia also have the highest share of organizations with less than 10 employees, 39% and 30% respectively.

How many employees does your organization have?

Input for “Regional Policy Framework Index”

Survey Question: *Thinking about the current policy framework in your region, to what extent do you agree or disagree with the following statements about regional policy frameworks related to development and use of technology-enabled services for smart health and care within your region?*

- The region's policy framework provides a lead for legitimating setting-up and implementing initiatives in the fields of smart health and care solutions.
- The region's policy framework influences funding decisions to support initiatives in the field of smart health and care solutions.
- The region's policy framework provides policy guidelines and a legal framework that helps the private and public sectors work together to implement smart health and care services.
- The region's policy framework supports integration of smart health and care services into the publicly-funded health and care system.
- The region's policy framework provides support for developing a clear implementation plan for successful deployment of smart health and care solutions.
- Regional policy makers stimulate innovation cooperation partnership approach to an inclusive engagement strategy that encourages commitment and creates a close cooperation between public authorities, education and research institutions, business, and citizens/patients.
- The region's policy framework explicitly supports transnational knowledge and experience exchange in the field of smart health and care.

Input for “Innovation Support Service Index”

Survey Question: *In your opinion, to what extent are the following support services, for developing and scaling up of smart health and care solutions, provided in your region?*

- Establish infrastructure which enables development of innovation and knowledge transfer, for example living labs, demonstrators, test sites, show rooms, easily accessible research environments, clinical trials, open source facilities.
- Established knowledge networks, collaboration platforms to support continuous improvement.
- Established public-private partnerships.
- Support for bringing products and services to the market and growing market share.
- Training and further education programmes to health and care professionals and other stakeholders working with age friendly smart health and care solutions.
- Procedural and administrative simplifications.
- Programs for innovation cooperation partnerships.
- Support for the valorisation of research outcomes.
- Support on legal aspects including intellectual property rights, procurement, regulation.

Input for “Development & Use of innovative products & Services Index”

Survey Question: *How would you rate intensity of the occurrence of the following developments in the field of smart health and care in your region?*

- Development of new ideas related to smart health and care solutions in your region?
- Development of innovative products and services for smart health and care in your region?
- Use of innovative smart health and care products and services in practice on a daily basis in your region.

Input for „World cafe“

ECOSYSTEM – Cooperation partnership involvement

Is your organization in any way involved in any of the following innovation cooperation partnerships (i.e. ecosystems / clusters / triple or quadruple-helix partnerships that stimulate innovative activity by intensive interaction) on smart health and care?

Involvement in at least one cooperation partnership:

■ % indicated at least one partnership
■ % indicated no partnership involvement

FR (n=58)

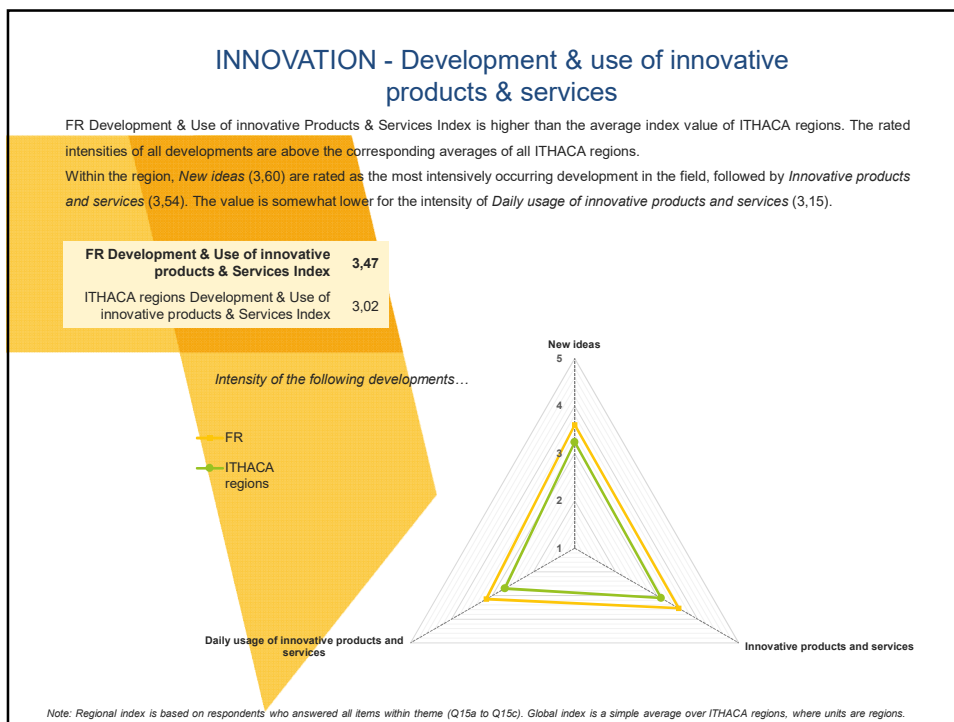

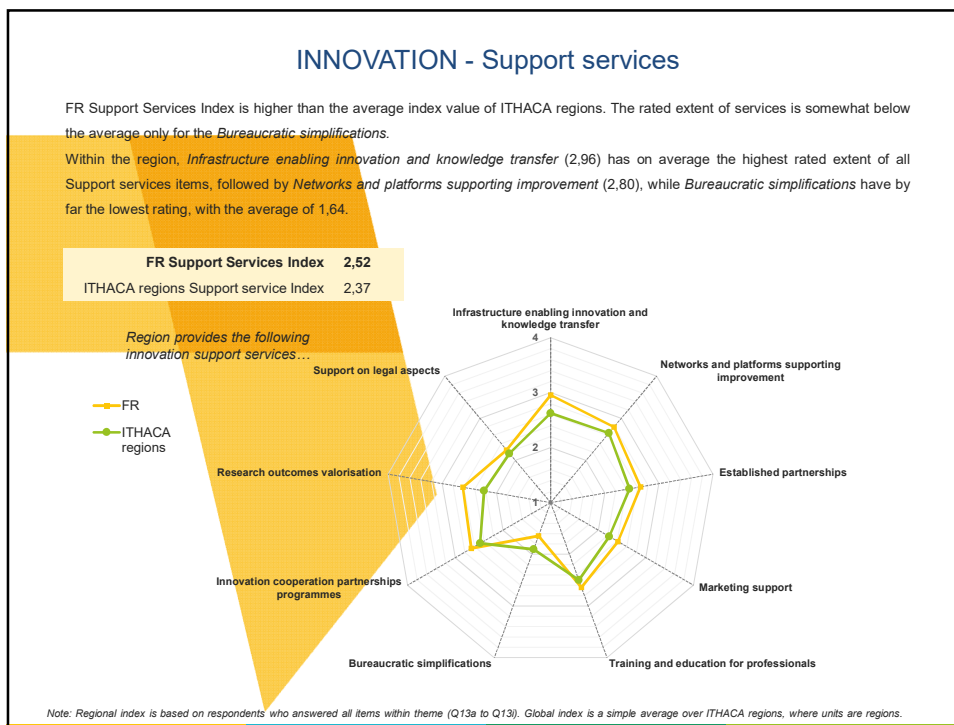

ECOSYSTEM - Usefulness of involvement

On a scale from 1 (Not useful at all) to 4 (Very useful), the FR region average equals the average of ITHACA regions, with 33% of respondents finding the involvement very useful.

In general, how useful is the involvement in the innovation cooperation partnerships on smart health and care for your organization? In case, you are involved in more innovation cooperation partnerships, please consider the usefulness of the one most relevant for you.

Note: Only participants that are involved in at least one listed cooperation partnership or have indicated „other“ partnership in Q5 were asked this question.

POLICY – Regional Policy Framework

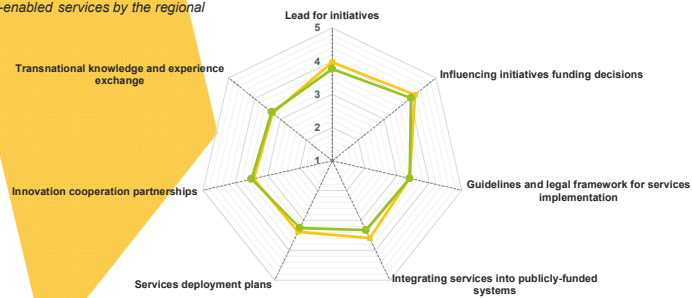

FR Regional Policy Index is somewhat lower than the average index value of ITHACA regions. Averages of individual items are at about the same level as corresponding ITHACA regions averages.

Within the region, *Influencing initiatives funding decisions* (4,19) has the highest average value among the regional policy framework facets, followed by *Lead for initiatives* (3,97). The lowest average values were recorded for *Services deployment plans* and *Guidelines and legal framework for services implementation*, both 3,38, and for *Transnational knowledge and experience exchange* (3,29).

FR Policy Framework Index	3,40
ITHACA regions Policy Framework Index	3,50

Rated agreement on provision of support to development and use of technology-enabled services by the regional policy framework.

FR
ITHACA regions

Note: Regional index is based on respondents who answered all items within theme (Q19a to Q19g). Global index is a simple average over ITHACA regions, where units are regions.

LEARNING – Relative importance & use of instruments

In FR the most important and most used instruments in practice from a relative point of view are: **Practice-based learning**, **Internet and social media**, **Workshops**, **Study reports** and **Books and articles**. In-house training is the only instruments to fall in the category with high relative discrepancy between the importance and use.

Sample sizes for presented instruments and their use/importance vary from 40 to 42.

Note: Measurement scale for importance and use goes from 1 to 4.

Sample & Respondents

Input for „Intro to the theme“

TYPE OF ORGANIZATION

Poland has the highest share of respondents from health providing organizations (24%), while the Netherlands and France have the lowest. The share of respondents from private enterprises is the highest in the UK (39%).

What type is your organization?

OPERATIONAL FIELDS

Health care and to lesser extent social care are the most common operational fields of respondents in the majority of regions. Exception is Slovenia with the ICT as the most common operational field.

In what fields does your organization operate?

SCOPE OF ORGANIZATION

In all countries but Slovenia, most organizations of respondents mainly operate on the regional scope. Local main scope is relatively common amongst Polish and German respondents, and the least common in Spain. Spain is also the most internationally orientated; 36% of Spanish respondents report that their scope is international. In contrast, in Denmark this share is only 7%.

What is the main scope of the organization?

Results Summary

Input for „Intro to the theme“

ECOSYSTEM - Usefulness of involvement

In **Germany, UK and the Netherlands** more than half of respondents consider their involvement as **very useful**. On the other side, only 17% **Polish** and 18% **Slovenian** respondents evaluate their involvement as very useful.

In general, how useful is the involvement in the innovation cooperation partnerships on smart health and care for your organization? In case, you are involved in more innovation cooperation partnerships, please consider the usefulness of the one most relevant for you.

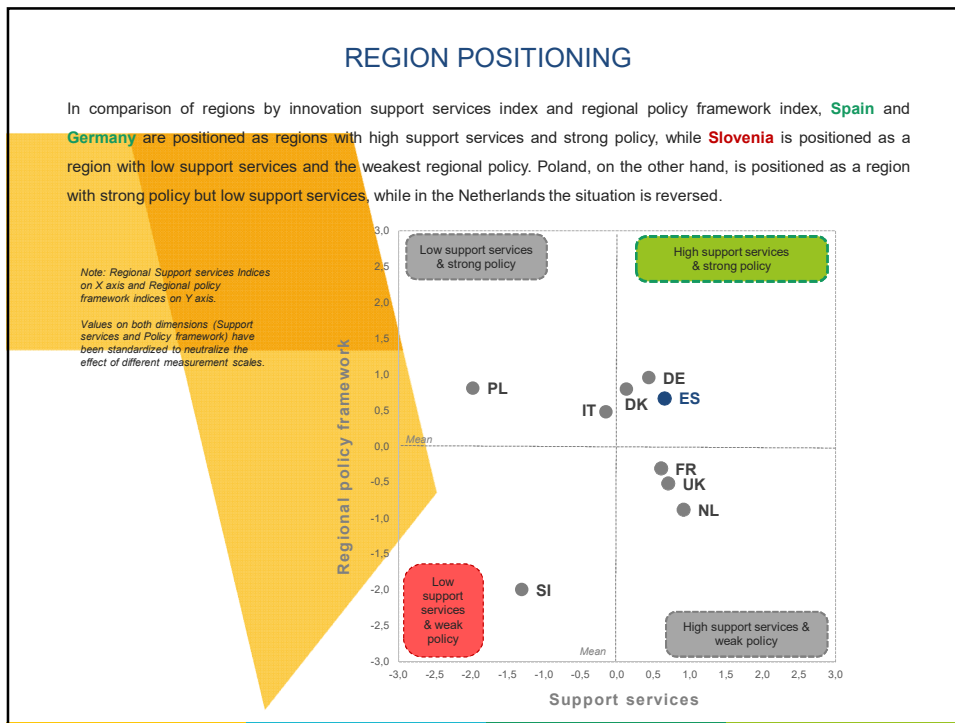

Note: Only participants that are involved in at least one listed cooperation partnership or have indicated „other“ partnership in Q5 were asked this question.

INNOVATION & POLICY INDICES

Composite indices are presented below. The highest average score on **innovation support services** was recorded in **the Netherlands** and the lowest in **Poland**. According to respondents the development and use of innovative products and services is the highest in France and the Netherlands, and the lowest in Slovenia and Poland. **Regional policy framework** on the other hand, is rated highly in **Germany, Poland and Denmark**, whereas in **Slovenia** it is distinctively lower.

Note: Composite Regional Indices are calculated as an average of participants' average score on all items within the same theme. Items for Innovation Support Service Index: Q13a to Q13i. Items for Development & Use of innovative products & Services Index: Q15a, Q15b and Q15c. Items for Regional Policy Framework Index: Q19a to Q19g.

To what extent does your organization collaborate with the following actors in the fields of health and care within other regions in your country? Scale 1 (Not at all) to 4 (To a large extent).

LEARNING - Importance of channels / instruments / approaches 2

Regarding the learning aspect: in your opinion, how important are the following channels/instruments/approaches for your work? Scale 1 (Not important at all) to 4 (Very important).

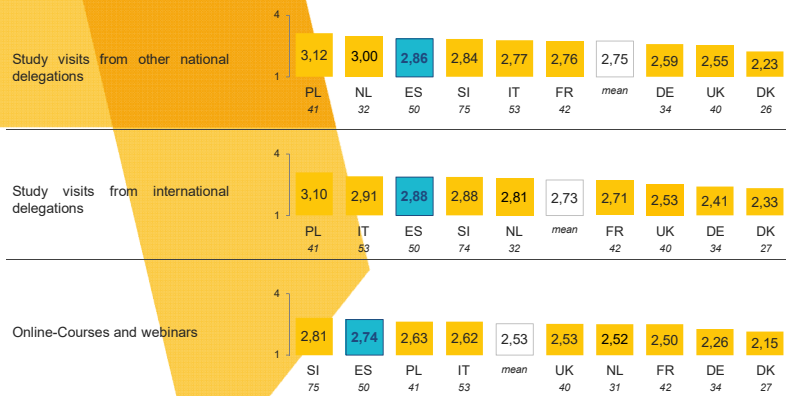

LEARNING - Importance of channels / instruments / approaches 3

Regarding the learning aspect: in your opinion, how important are the following channels/instruments/approaches for your work? Scale 1 (Not important at all) to 4 (Very important).

LEARNING - Importance of channels / instruments / approaches 4

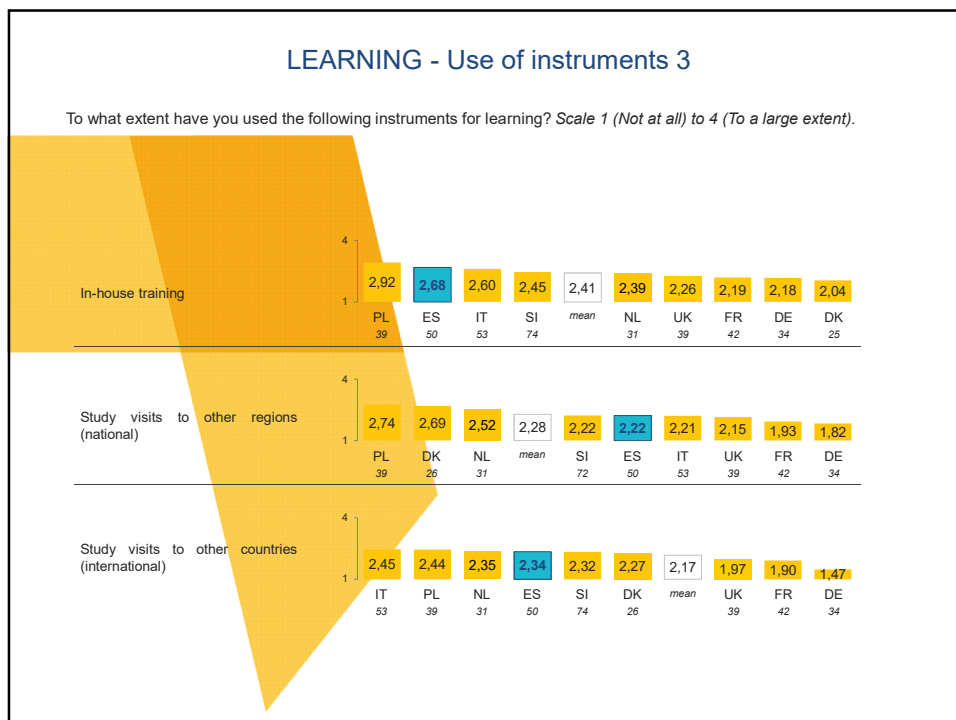

Regarding the learning aspect: in your opinion, how important are the following channels/instruments/approaches for your work? Scale 1 (Not important at all) to 4 (Very important).

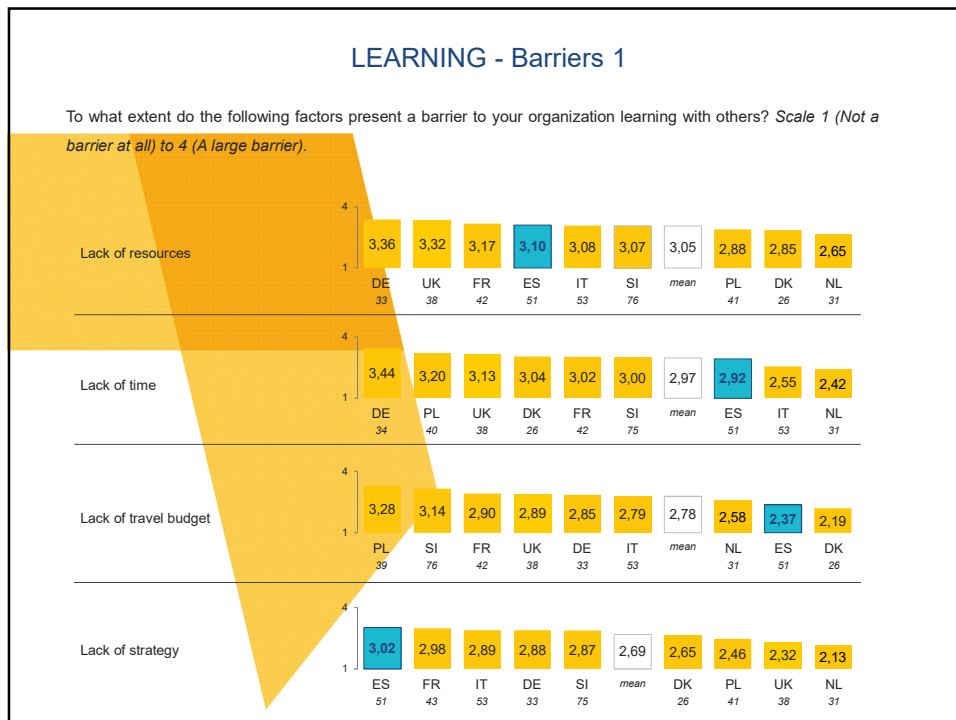

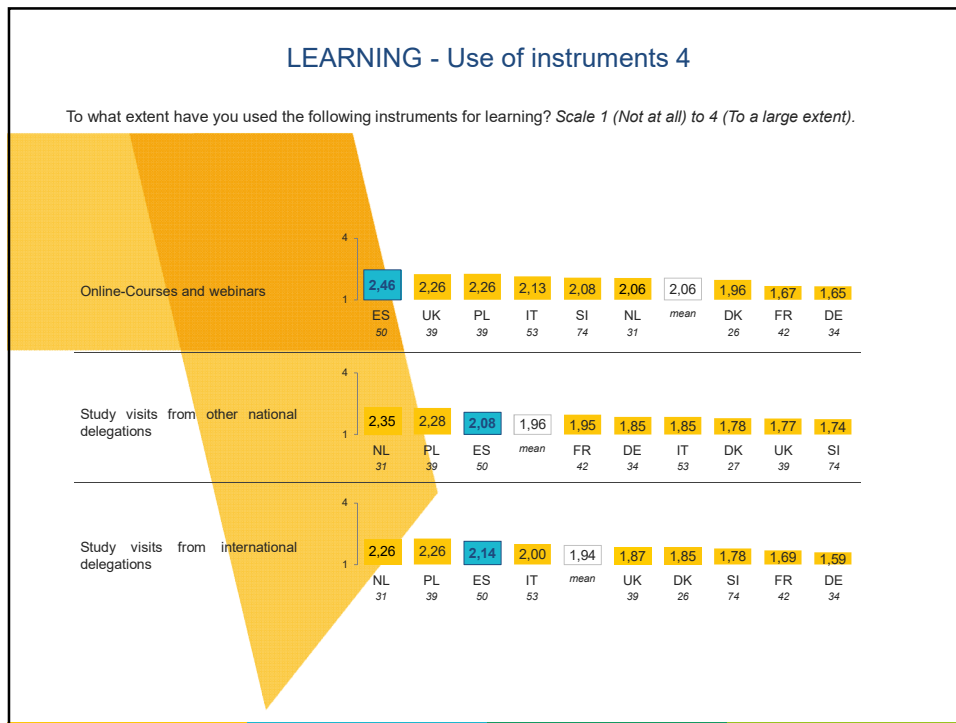

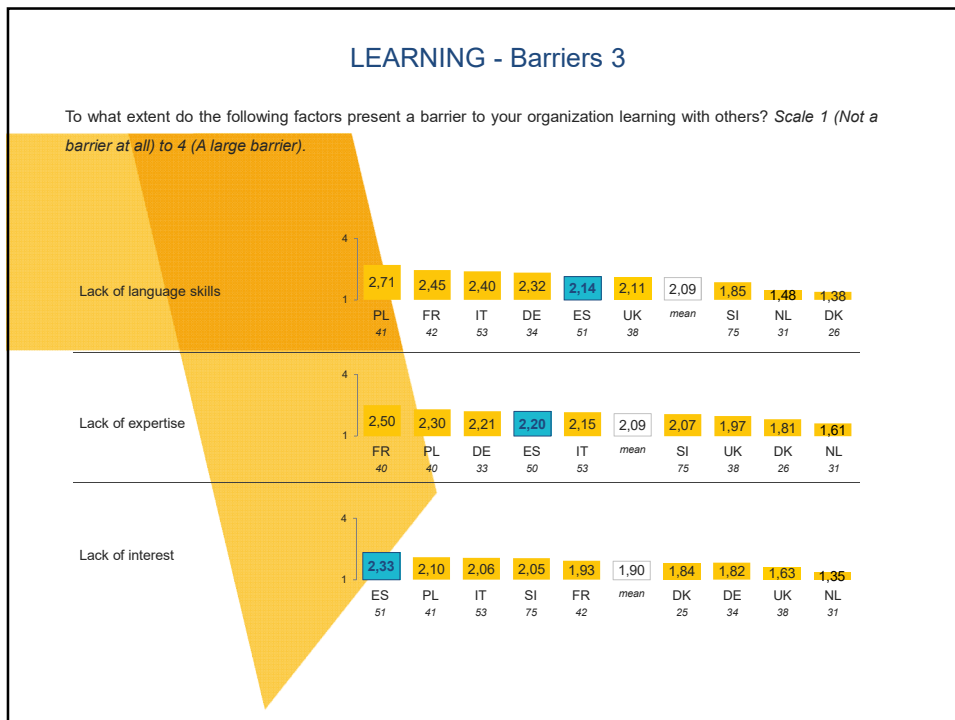

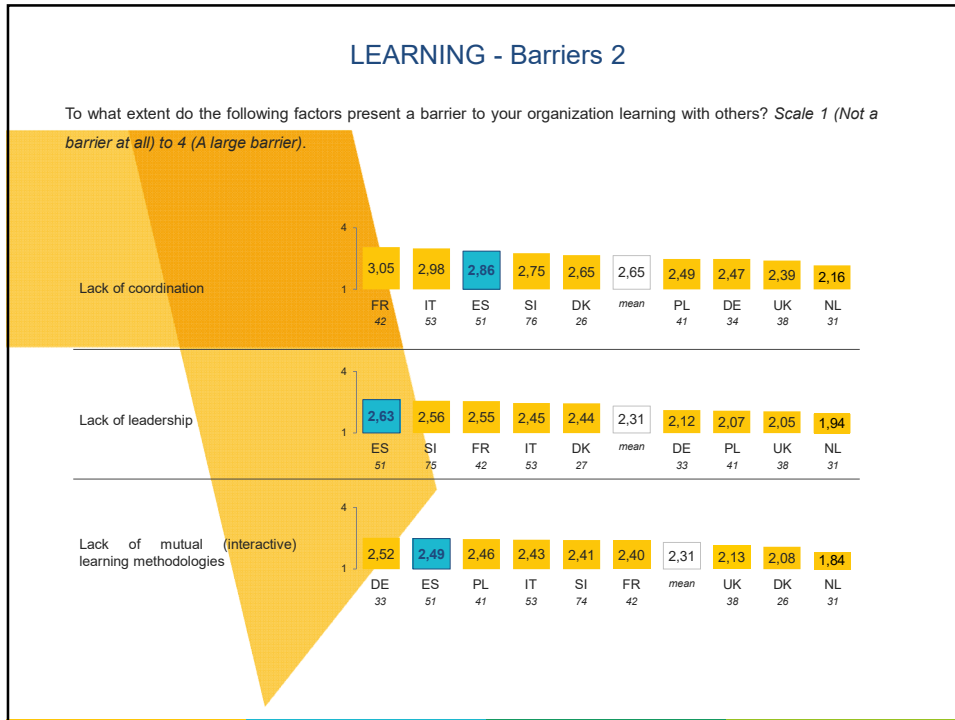

LEARNING - Use of instruments 1

To what extent have you used the following instruments for learning? Scale 1 (Not at all) to 4 (To a large extent).

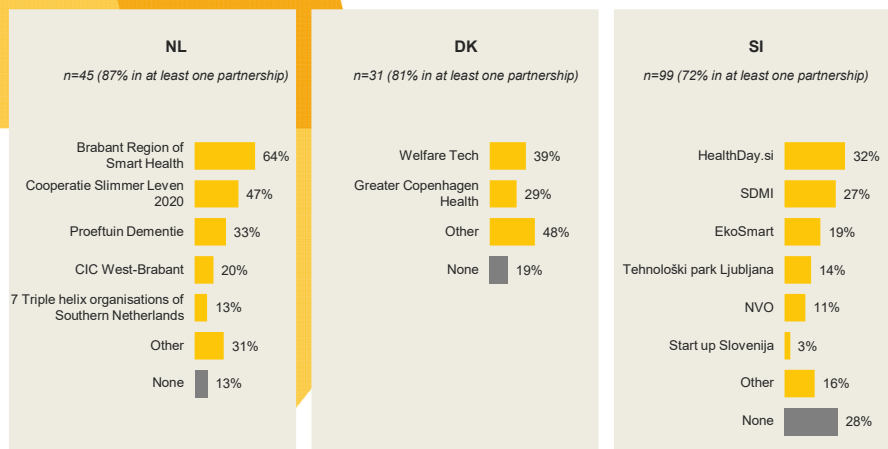

Detailed sample characteristics

COOPERATION PARTNERSHIPS INVOLVEMENT 2

Is your organization in any way involved in any of the following innovation cooperation partnerships (i.e. ecosystems / clusters / triple or quadruple-helix partnerships that stimulate innovative activity by intensive interaction) on smart health and care?

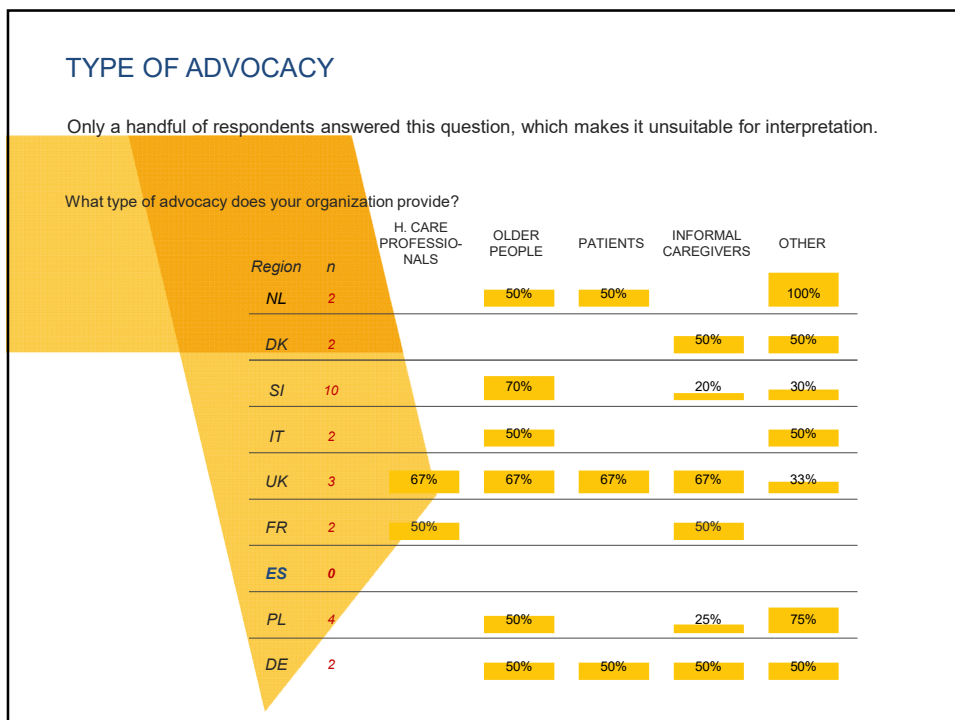

COOPERATION PARTNERSHIPS INVOLVEMENT 3

Is your organization in any way involved in any of the following innovation cooperation partnerships (i.e. ecosystems / clusters / triple or quadruple-helix partnerships that stimulate innovative activity by intensive interaction) on smart health and care?

LEVEL OF PUBLIC AUTHORITY

Although the samples are very small, the results indicate that Slovenian public organizations mostly have national authority, German public organizations have local authority, while Spanish and Polish mostly have regional authority.

What level of authority is your organization?

OPERATIONAL FIELDS

Health care and to lesser extent social care are the most common operational fields of respondents in the majority of regions. Exception is Slovenia with the ICT as the most common operational field.

In what fields does your organization operate?

SCOPE OF ORGANIZATION

In all countries but Slovenia, most organizations of respondents mainly operate on the regional scope. Local main scope is relatively common amongst Polish and German respondents, and the least common in Spain. Spain is also the most internationally orientated; 36% of Spanish respondents report that their scope is international. In contrast, in Denmark this share is only 7%.

What is the main scope of the organization?

NUMBER OF EMPLOYEES

All regions have a noticeable share of organizations with more than 250 employees, the highest share was recorded in Denmark (74%), while in the Netherlands and Slovenia it is the lowest and stands at 29% in both regions. The Netherlands and Slovenia also have the highest share of organizations with less than 10 employees, 39% and 30% respectively.

How many employees does your organization have?

Input for “Regional Policy Framework Index”

Survey Question: *Thinking about the current policy framework in your region, to what extent do you agree or disagree with the following statements about regional policy frameworks related to development and use of technology-enabled services for smart health and care within your region?*

- The region's policy framework provides a lead for legitimating setting-up and implementing initiatives in the fields of smart health and care solutions.
- The region's policy framework influences funding decisions to support initiatives in the field of smart health and care solutions.
- The region's policy framework provides policy guidelines and a legal framework that helps the private and public sectors work together to implement smart health and care services.
- The region's policy framework supports integration of smart health and care services into the publicly-funded health and care system.
- The region's policy framework provides support for developing a clear implementation plan for successful deployment of smart health and care solutions.
- Regional policy makers stimulate innovation cooperation partnership approach to an inclusive engagement strategy that encourages commitment and creates a close cooperation between public authorities, education and research institutions, business, and citizens/patients.
- The region's policy framework explicitly supports transnational knowledge and experience exchange in the field of smart health and care.

Input for “Innovation Support Service Index”

Survey Question: *In your opinion, to what extent are the following support services, for developing and scaling up of smart health and care solutions, provided in your region?*

- Establish infrastructure which enables development of innovation and knowledge transfer, for example living labs, demonstrators, test sites, show rooms, easily accessible research environments, clinical trials, open source facilities.
- Established knowledge networks, collaboration platforms to support continuous improvement.
- Established public-private partnerships.
- Support for bringing products and services to the market and growing market share.
- Training and further education programmes to health and care professionals and other stakeholders working with age friendly smart health and care solutions.
- Procedural and administrative simplifications.
- Programs for innovation cooperation partnerships.
- Support for the valorisation of research outcomes.
- Support on legal aspects including intellectual property rights, procurement, regulation.

Input for “Development & Use of innovative products & Services Index”

Survey Question: *How would you rate intensity of the occurrence of the following developments in the field of smart health and care in your region?*

- Development of new ideas related to smart health and care solutions in your region?
- Development of innovative products and services for smart health and care in your region?
- Use of innovative smart health and care products and services in practice on a daily basis in your region.

DE Highlights

Input for „World cafe“

ECOSYSTEM – Cooperation partnership involvement

Is your organization in any way involved in any of the following innovation cooperation partnerships (i.e. ecosystems / clusters / triple or quadruple-helix partnerships that stimulate innovative activity by intensive interaction) on smart health and care?

Involvement in at least one cooperation partnership:

- % indicated at least one partnership
- % indicated no partnership involvement

DE (n=46)

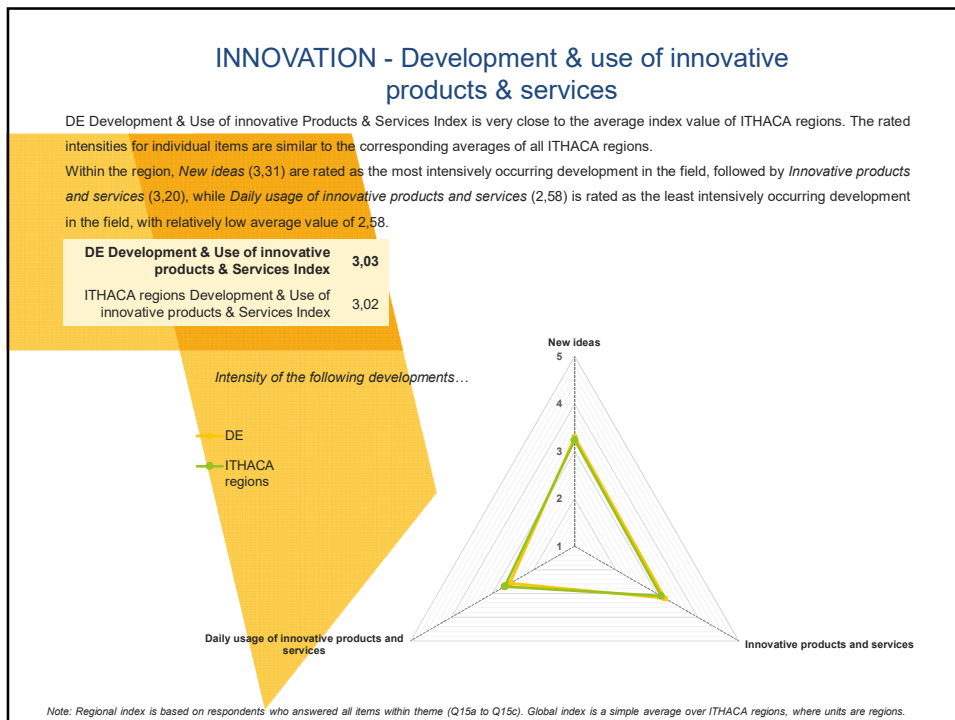

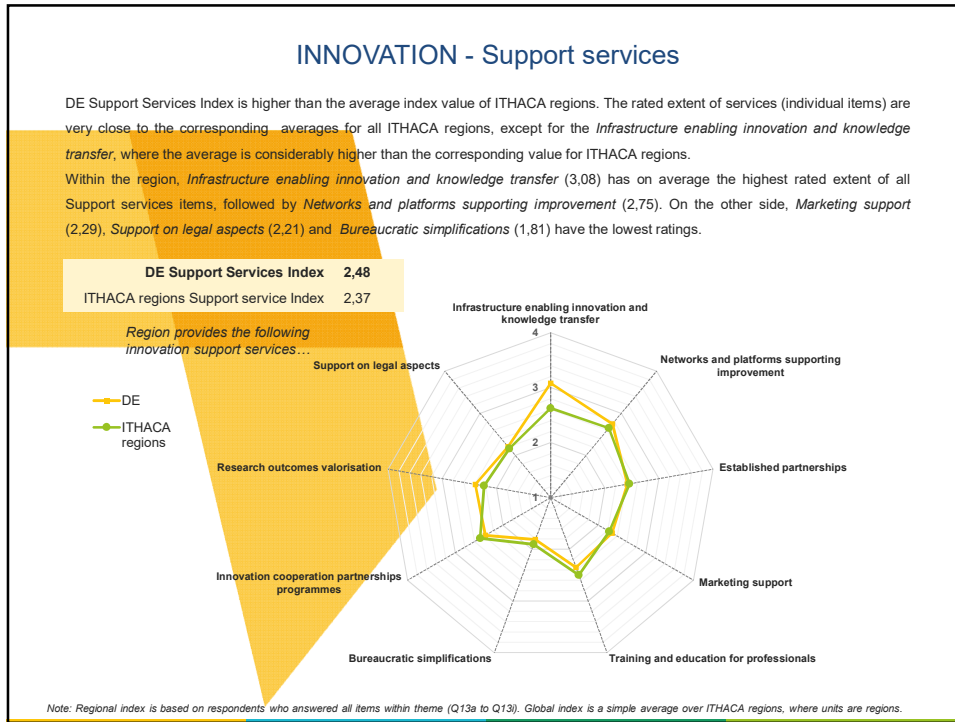

ECOSYSTEM - Usefulness of involvement

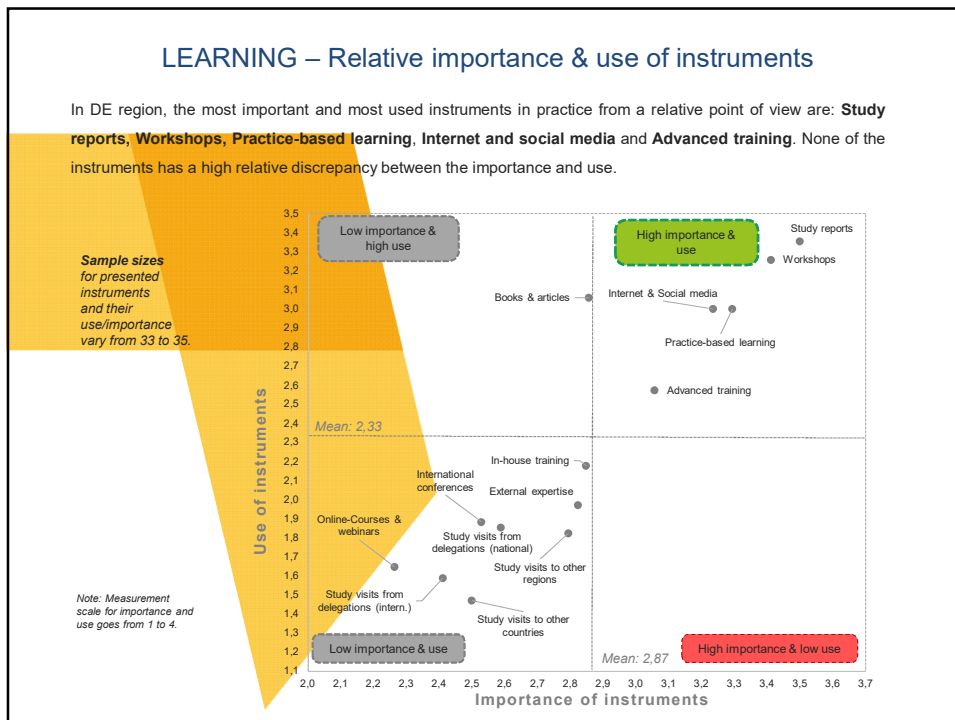

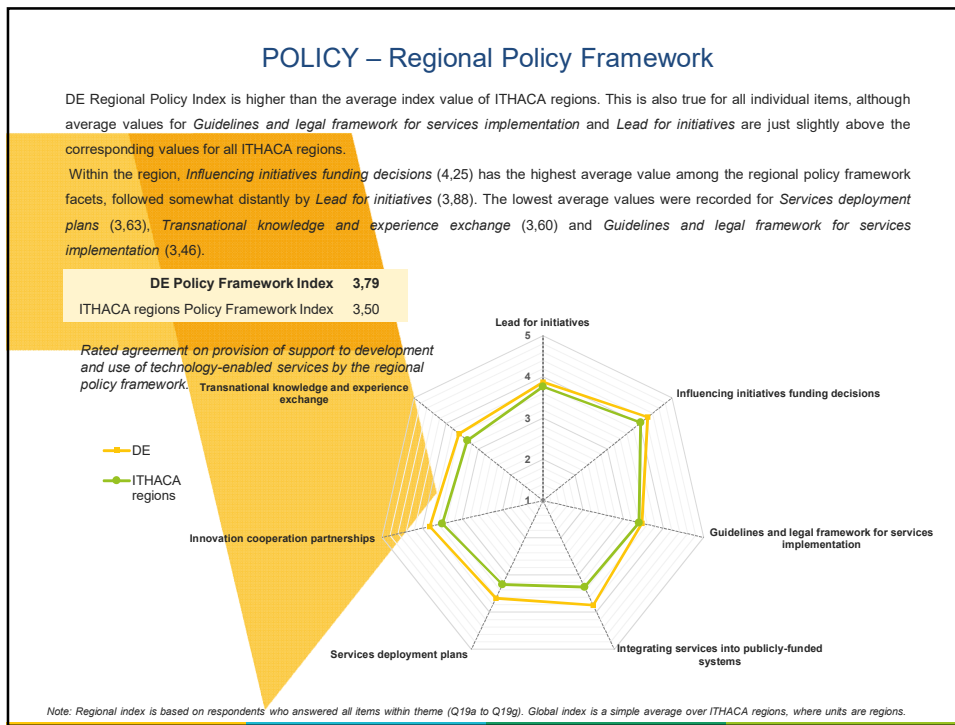

On a scale from 1 (Not useful at all) to 4 (Very useful), DE region has the highest average value amongst the ITHACA regions, with 69% of respondents finding the involvement very useful.

In general, how useful is the involvement in the innovation cooperation partnerships on smart health and care for your organization? In case, you are involved in more innovation cooperation partnerships, please consider the usefulness of the one most relevant for you.

Note: Only participants that are involved in at least one listed cooperation partnership or have indicated „other“ partnership in Q5 were asked this question.

Detailed overview of the results

ECOSYSTEM – Regional collaboration

To what extent does your organization collaborate with the following actors in the fields of health and care within your region? Scale 1 (Not at all) to 4 (To a large extent).

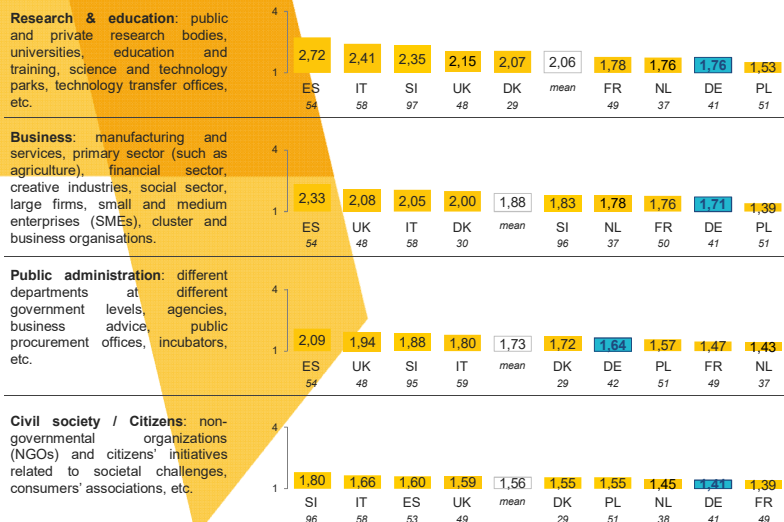

ECOSYSTEM – National collaboration

To what extent does your organization collaborate with the following actors in the fields of health and care within other regions in your country? Scale 1 (Not at all) to 4 (To a large extent).

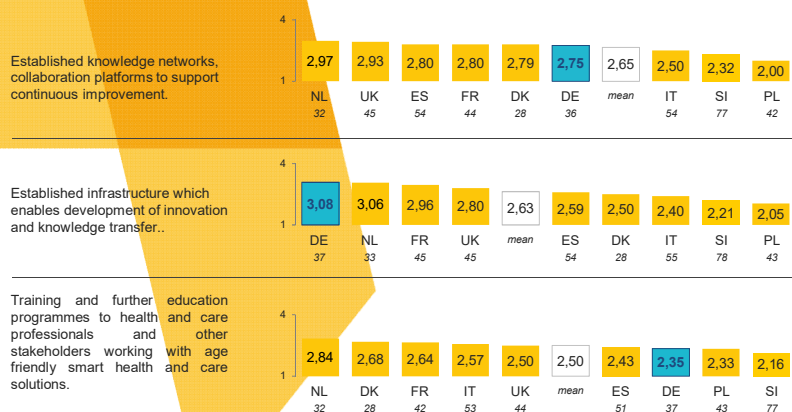

ECOSYSTEM – European collaboration

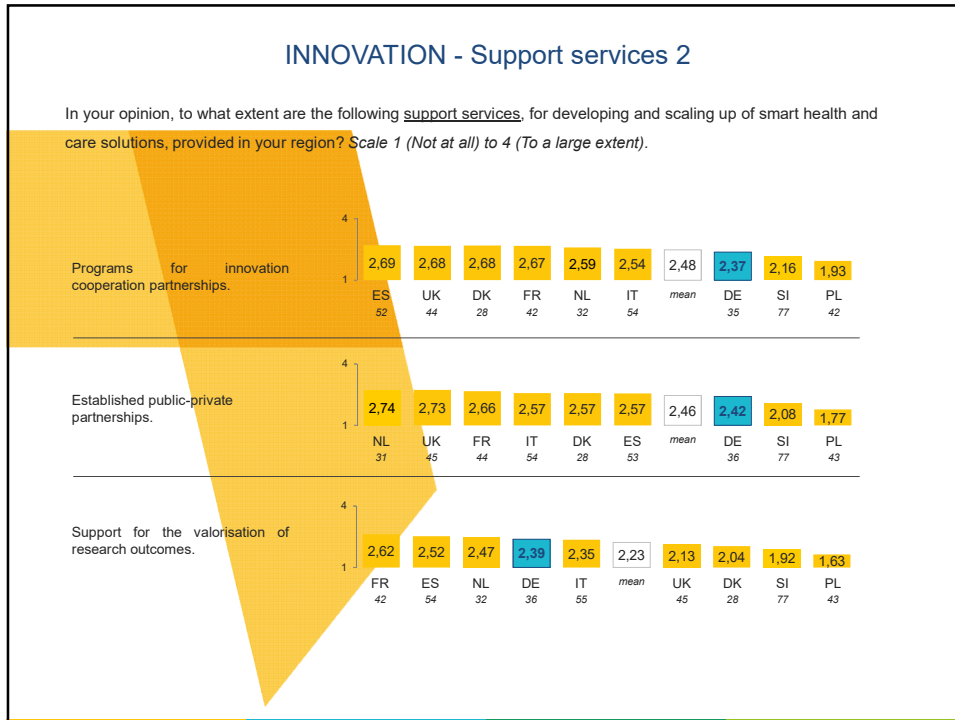

To what extent does your organization collaborate with the following actors in the fields of health and care within other EU countries? Scale 1 (Not at all) to 4 (To a large extent).

INNOVATION - Support services 1

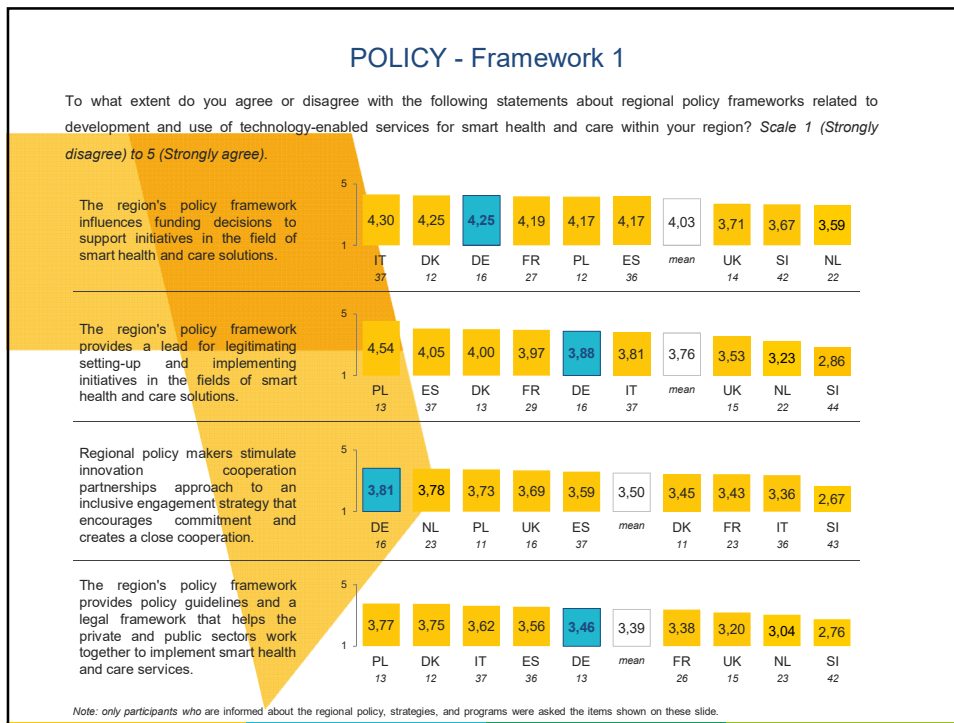

In your opinion, to what extent are the following support services, for developing and scaling up of smart health and care solutions, provided in your region? Scale 1 (Not at all) to 4 (To a large extent).

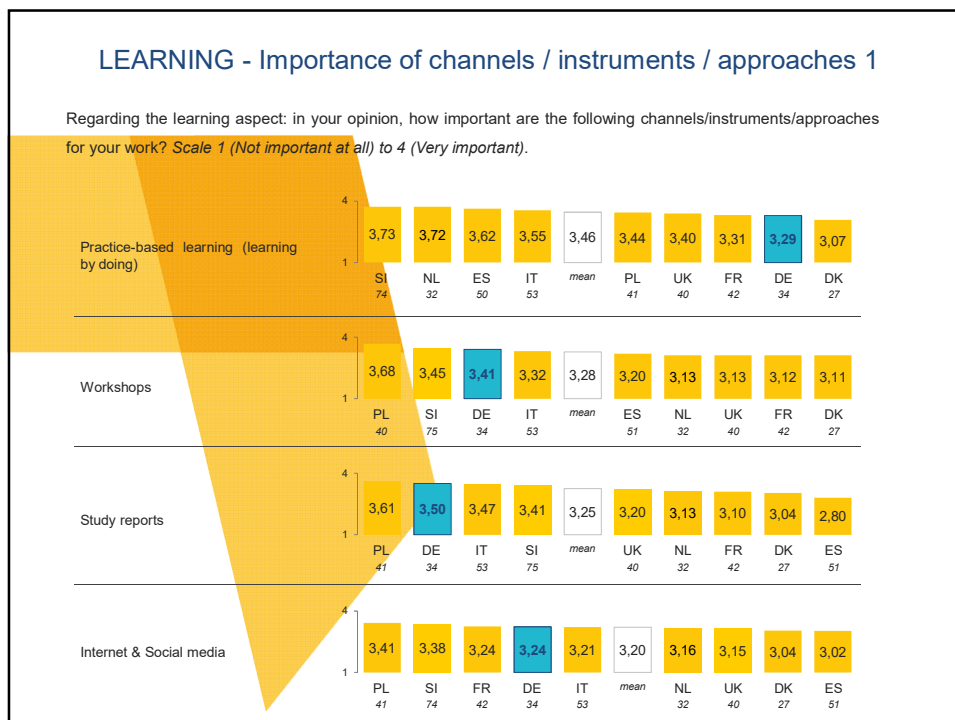

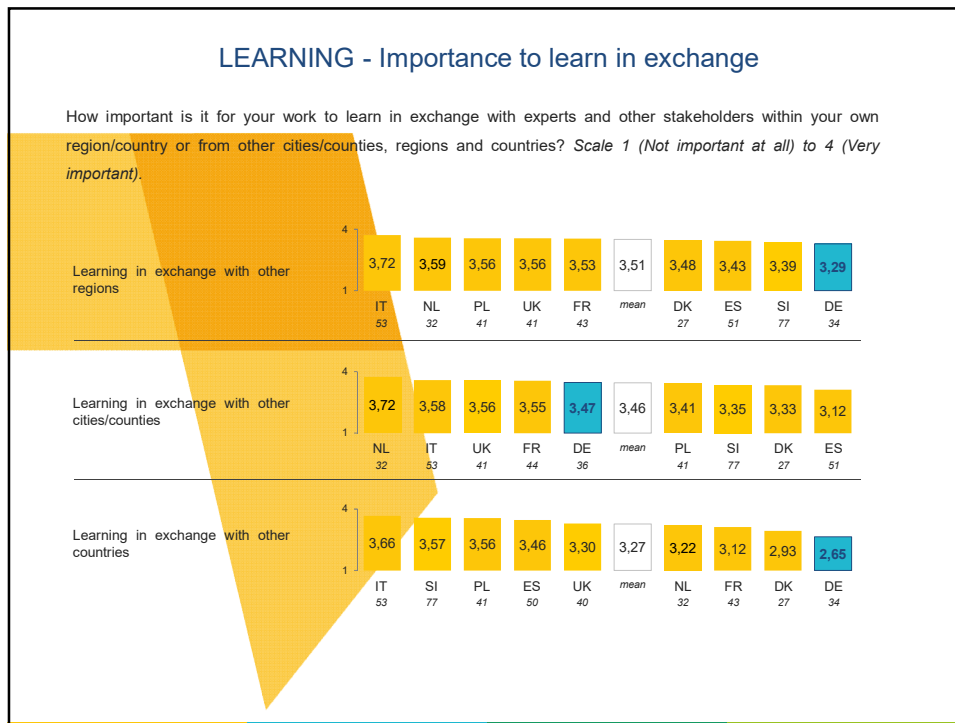

LEARNING - Importance of channels / instruments / approaches 2

Regarding the learning aspect: in your opinion, how important are the following channels/instruments/approaches for your work? Scale 1 (Not important at all) to 4 (Very important).

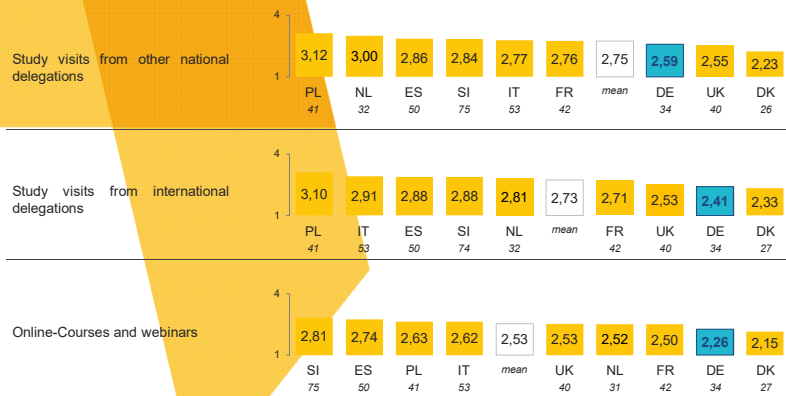

LEARNING - Importance of channels / instruments / approaches 3

Regarding the learning aspect: in your opinion, how important are the following channels/instruments/approaches for your work? Scale 1 (Not important at all) to 4 (Very important).

LEARNING - Importance of channels / instruments / approaches 4

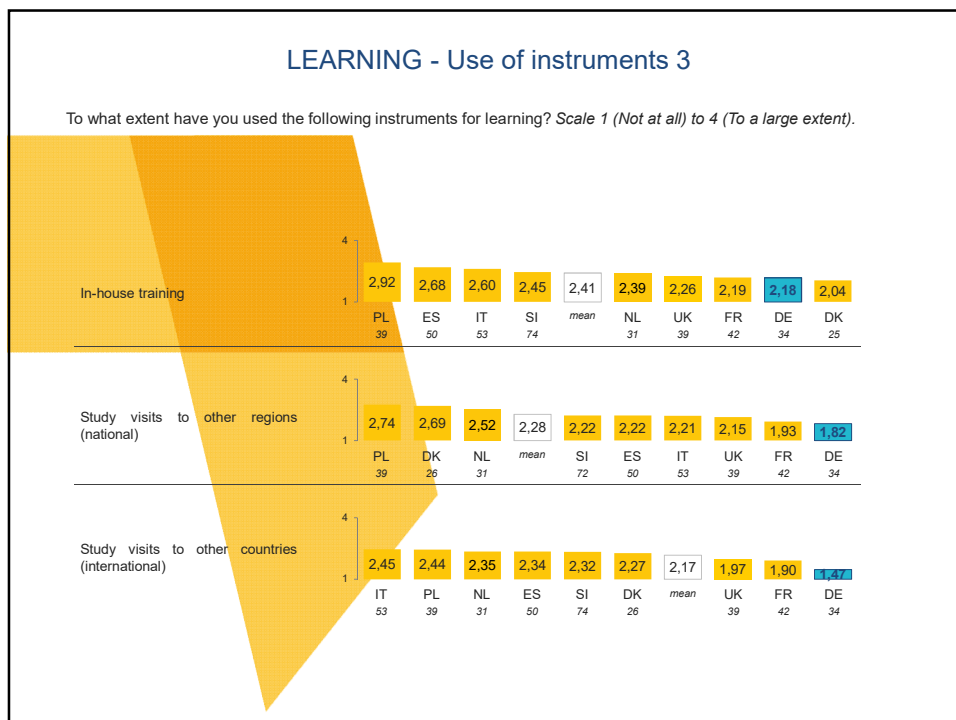

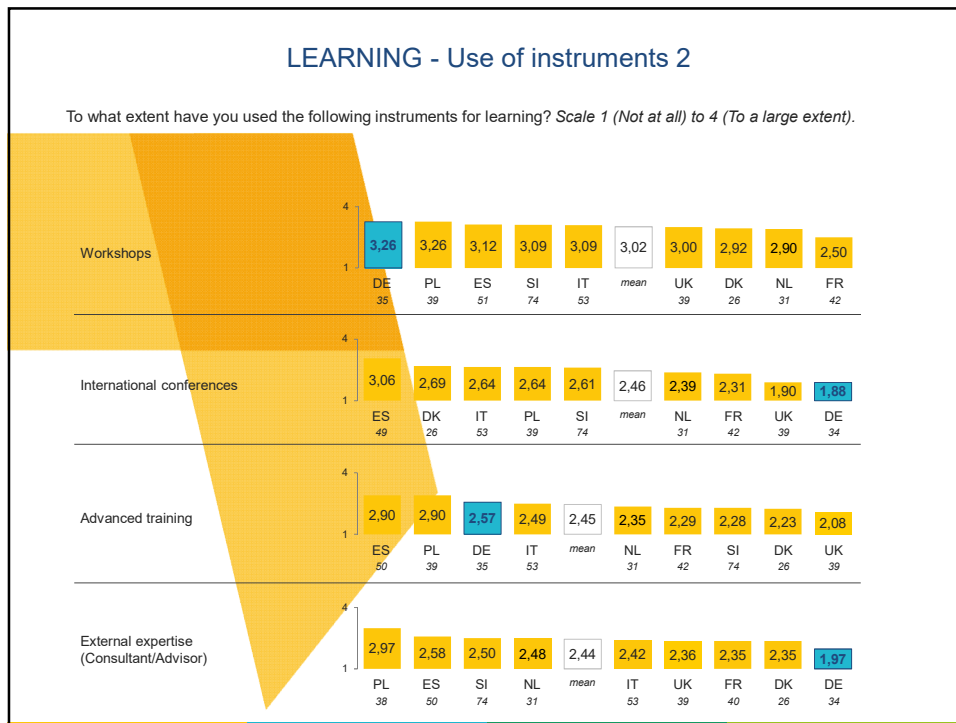

Regarding the learning aspect: in your opinion, how important are the following channels/instruments/approaches for your work? Scale 1 (Not important at all) to 4 (Very important).

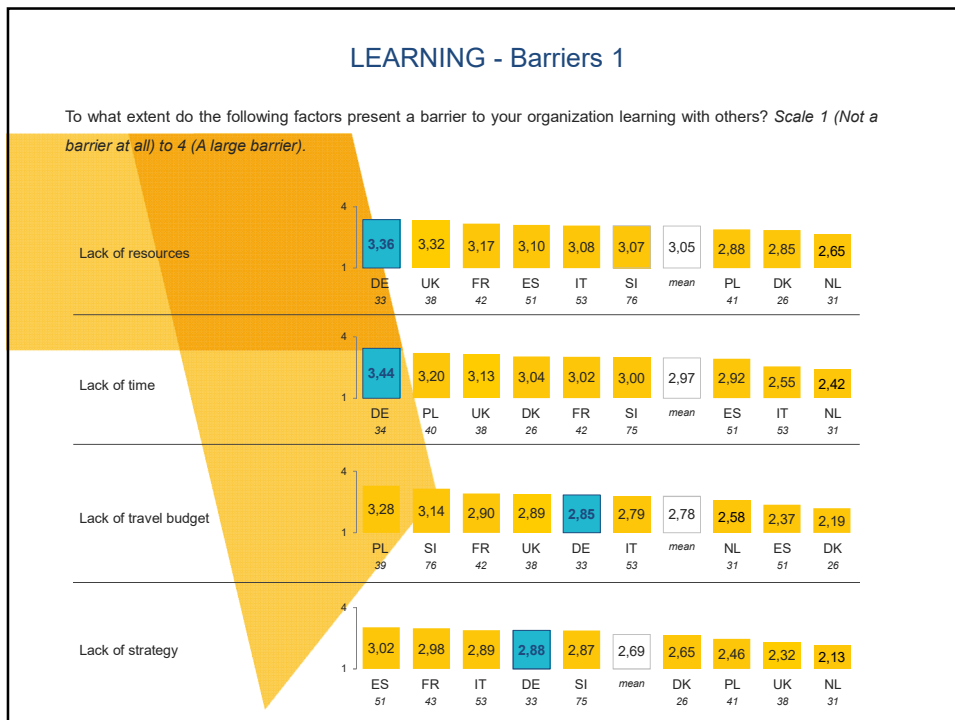

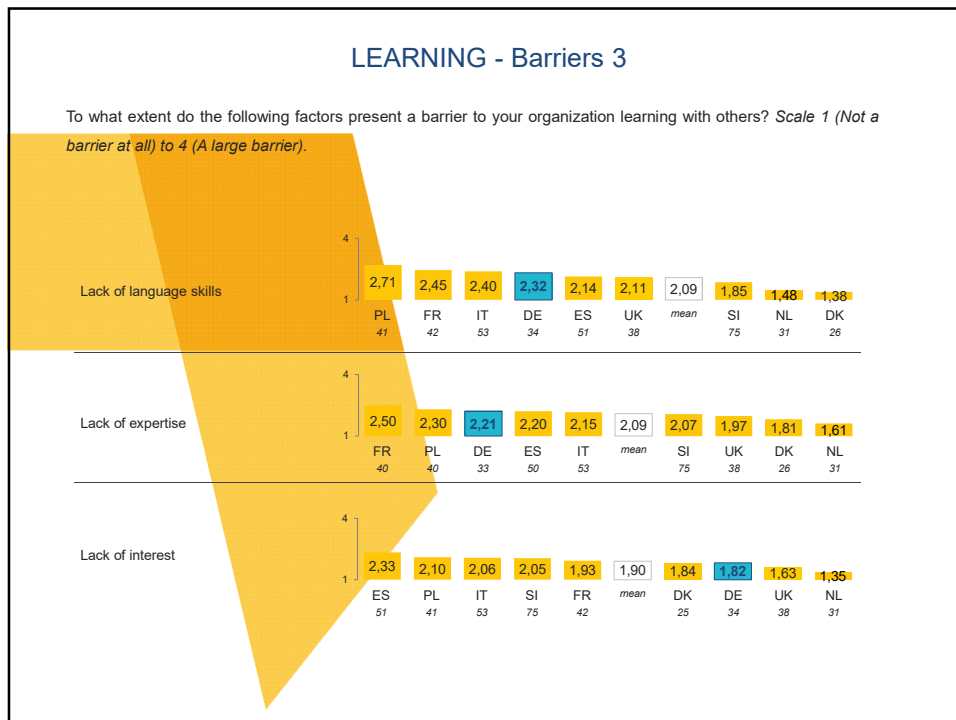

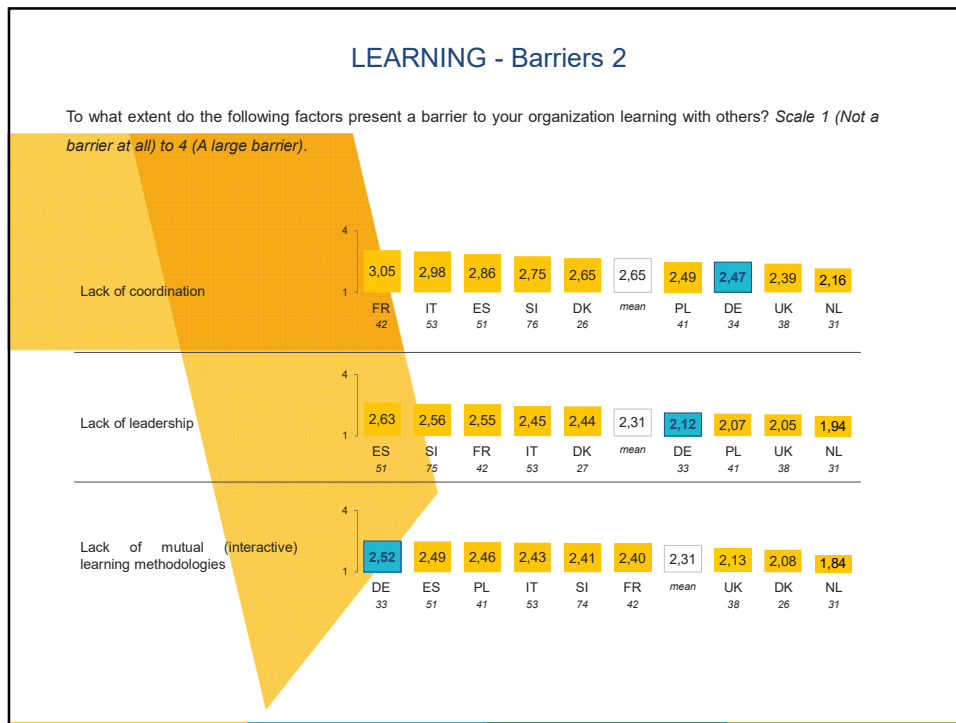

LEARNING - Use of instruments 1

To what extent have you used the following instruments for learning? Scale 1 (Not at all) to 4 (To a large extent).
