CREATURES

Introduction

Within CREATURES WP T2, each partner will set up a Local Action Plan (LAP), inspired by the transnational exchange-learning activities carried out, and aimed to transfer at local level the lesson learnt.

The overall goal is preserving-valorizing PPs' cultural heritage by promoting more 'user-friendly' tourist environments, attractive for Y generations, innovative in the activities, alternative in the spaces, sustainable in the approach, respecting features and priorities of PP's specific needs

Also, the LAP will develop good-quality strategies and explore new spaces for alternative tourist offers, e.g. urban spaces to be regenerated and transformed in 'creative districts' (alternative to the classical Old Towns), where tourists will feel dynamic protagonists of their tourist experience, interacting with local cultural context & material/immaterial heritage.

MCBO followed the instructions and template provided by the Urban Planning Institute of the Republic of Slovenia – UIRS, coordinator of Creature project task. The data was collected through desk analysis and collaboration between MCBO and LSG's members, particularly the Bologna's Tourist Destination.

1. Vision

CREATURES

2. SMART Objectives

Based on the State of the Art Analysis and SWOT analysis conducted within the first work package of the Project, WP T1, the consultation process with local stakeholders, and the Sectoral Analysis, three main objectives to be implemented through the LAP are proposed:

- Objective 1: Enhance the value and the cultural heritage of new localities addressed by the Pilot Action launching 2 new sustainable itineraries within the 2021.
- Objective 2: Improve the tourist offer of the metropolitan territory by boosting experiential and sustainable products in marginal area in the next three years.
- Objective 3: Increase the number of (young) tourists experiencing the CREATURES routes and more in general Bologna Metropole's sustainable tourism products and services, through the cooperation with CCIS sector and the use of digital tools, in the next three years.

Tourist flows has significantly influenced the Bologna's metropolitan economy in recent years (apart from downturn in 2020 due to Covid pandemic): the contributes to the birth of new activities and job opportunities. On the other hand, tourism could generate also negative impacts if left to grow without a guiding strategy. There is need to move toward a more sustainable flows. The Covid-19 crisis highlighted the need to rethink tourism products and offers, towards a more sustainable approach: the overall goal is then to intercept the new opportunities of eco-tourism, looking also at proximity tourism and young people, favoring the strengthening of the capacities of communities in the valorisation of natural and cultural heritage, launching new routes out of the crowd. The new Tourism 5.0 means to offer unique experiences, through the rediscovery of nature, food at KM 0, craftsmanship, community knowledge. A tourism possible only through the cooperation of all the actors of the territory. The spread of new digital tools could contribute in intercepting new targets and tourists. The cultural and creatives industries in this context could play a key role, providing innovative and creative solutions, and catching new business opportunities.

CREATURES

Table 2: SMART Objectives table

2. SMART Objectives							
	Initial objective	Is it specific?	Is it measurable?	Is it Achievable?	Is it relevant?	Is it Timely?	Updated objective
Objective no.1	<i>Enhance the value and the cultural heritage of new localities addressed by the Pilot Action launching 2 new sustainable itineraries</i>	Yes	Yes	Yes	Yes	NO	<i>Enhance the value and the cultural heritage of new localities addressed by the Pilot Action launching 2 new sustainable itineraries within the 2021</i>
Objective no.2	<i>Improve the tourist offer of the territory</i>	No	Yes	Yes	Yes	No	<i>Improve the tourist offer of the metropolitan territory by boosting experiential and sustainable products in marginal area in the next three years</i>
Objective no.3	<i>Increase the number of young tourists using the routes through the cooperation with CCI sector</i>	No	Yes	Yes	Yes	No	<i>Increase the number of (young) tourists experiencing the CREATURES routes and more in general Bologna Metropole's sustainable tourism products and services, through the cooperation with CCIS sector and the use of digital tools, in the next three years</i>

Formulating the objectives, a period of 3 years was set, the timeframe taken into consideration in the Metropolitan Touristic Promotion Strategic lines.

On the other in the definition of the detailed actions and in particular in setting the milestones, it was decided to focus attention on the Creatures implementation timeline.

Name of your Area of intervention	Metropolitan City of Bologna
Country	Italy
Total area in km2	3.702,25 km2
Total inhabitants	1.019.539 (31.12.2020)
Regional (municipal) GDP per capita in EUR.	38.918 €
Unemployment rate	4,4%
Population growth rate	+ 0,3 % (31.12.2019)
Net migration rate	+ 3.091 units (31.12.2019)

CREATURES

The Metropolitan City of Bologna is a territorial body of wide area whose territory coincides with that of the pre-existing province, involving 55 municipalities. It is a wide and complex geographical area where the main regional and national infrastructures are crossing. The industrial development of northern Italy allowed Bologna to become one of the most important manufacturing cities of the area, for machinery and metal products, chemistry and pharmaceutical. Thanks to this result, the city and its surroundings became an important business centre, with an impressive trade fair sector, which has always been attractive for business travellers.

On the other hand, the city of Bologna attracts a wide range of tourists for its cultural and artistic heritage and for its gastronomic products, allowing the city to be labelled as tourist destination so in the last few years the metropolitan area has increased its potentiality as a leisure destination, thanks to its hospitality and attractiveness. In particular, the valorisation of the historical attractions, the increasing flows of tourists heading to cities and towns and also the enhancement of experiences related to food and wine, have played an important role in improving the capabilities of the city in this sector.

The whole area of the Metropolitan City of Bologna, from the plane to the Appennines, has a rich cultural and natural heritage: there are two sites selected by UNESCO (the Chiusa di Cassalecchio di Reno, the oldest hydraulic work in Europe and the Abbey of Santa Cecilia della Croara in San Lazzaro di Savena). Moreover it has been awarded as UNESCO Cities of Music since 2006.

The territory is rich in natural parks and suggestive trails as "Via degli Dei", "Via Mater Dei", "Via della Lana e della Seta", cycle routes (such as EuroVelo 7) and thematic itineraries, which allow the visitor to stay in contact with the nature, the landscape, the historical heritage, and its creativity. All these sites are located throughout the Appennines, the flat lands and the Imolese area.

Each year MCBO develops a strategic plan for the local tourism promotion that aims to redistribute the flows of tourists not only in the capital but also across the entire metropolitan area, in order to enhance Bologna and its surroundings as a unique tourist destination, avoiding dichotomous positions, namely dividing "tourism" from the "rest of the city". With this regard, the operational quality of the welcome and the offer are key elements, meaning that the tourist destination needs to organize services according to the targeted

CREATURES

tourist. Moreover, the overall positive metropolitan dynamic is divided into levels of entrepreneurial vivacity that are rather differentiated between the different sub-area.

The routes object of this Pilot Actions are located in a specific area of the MCBO and they will be part of "Piccola Cassia" itinerary. The new routes will increase the touristic value of the itinerary itself and that of localities crossed by the routes that would be otherwise excluded.

Tourism Route 1: Piccola Cassia – route link Bologna-Bazzano starts in Bologna, Piazza Maggiore, and arrives in Monteveglino and Bazzano.

Tourism Route 2: Bombiana – Porretta Terme connects the ancient path of the "Piccola Cassia" to the main town of the upper Reno valley, "Porretta Terme", in the Tuscan-Emilian Apennines.

More information on the routes context and planning opportunities are available in the Deliverable T.2.3.2 Secotrial Analysis and the draft Deliverable T2.4.2 Pilot Action.

The new routes are thought as to address a specific target of tourist, namely youngsters, through the involvement of specific actors and services linked to the CCIs. CCI businesses along with suppliers and product/service users are contributing to the local competitiveness supporting the development or directly being part of the regional ecosystem based on innovation and co-design, drawing together the path towards a more sustainable, fast-growing innovative and, today, resilient region (one successful example of CCIs tourism product is the "Crinali Festival" experience).
