10 STATIONS WITH STATE-OF-THE-ART TECHNOLOGY AND INTERESTING STORIES AWAIT VISITORS WHO COME TO EXPERIENCE AND GET TO KNOW THE THREE LARGE CARNIVORES THAT LIVE IN SLOVENIA.

If you have not yet tried out augmented or virtual reality, you already have a good enough reason to visit us. This place will inspire you and provide you with new knowledge and a different perspective on bears, wolves and lynx.

MAGICAL FOREST

In the twilight under the canopy you will discover the richness of life, and with the help of modern technology you will experience the world of the big three in a fun way.

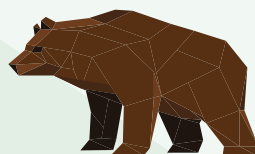

A QUICK COMMUNICATION COURSE

Like humans, large carnivores communicate with each other, only in a different language. With the help of numerous films made by Slovenian researchers and with the help of augmented reality, you will go hunting for the tracks of lynx, wolf and bear and learn the basics of their communication. Why does a lynx pee on a tree and why is there bear hair on a tree? Why is bear excrement sometimes green and sometimes purple?

MIRACLE MIRROR

Skulls hide a lot of interesting things, and they can tell us a lot if we can decipher them. With the help of the miracle mirror, the skulls of the cave bear and the brown bear will follow your movements and reveal something new—for example, why the cave bear became extinct during the last glacial period, but the brown bear did not.

ZVERBOOK

Bears, wolves and lynxes. What do they eat, what are they interested in and where do they roam? Who do they have problems with and who has problems with them? All the information about their lives, the conflicts between people and large carnivores, and interesting personal stories are waiting for you on the interactive Zverbook – almost a real animal social network.

Many other stations, surprises, and attractions await you on your visit!

For groups of 10 or more people, a confirmed reservation is required at least three days before arrival. Please contact tic@pivka-turizem.si or +386(0)30 644 799.

Recommended length of visit: 2 hours
