## 1 Introduction

A project website was created by IDM, in collaboration with Eurac, in order to promote the activities implemented by FACEcamp project partners to create awareness and to disseminate the project results.

From 2018 the project website was online. The website is translated in 3 languages: Italian, German and English.

The link of the website is the following <https://www.facecamp.it/en/>

## 2 Methodology

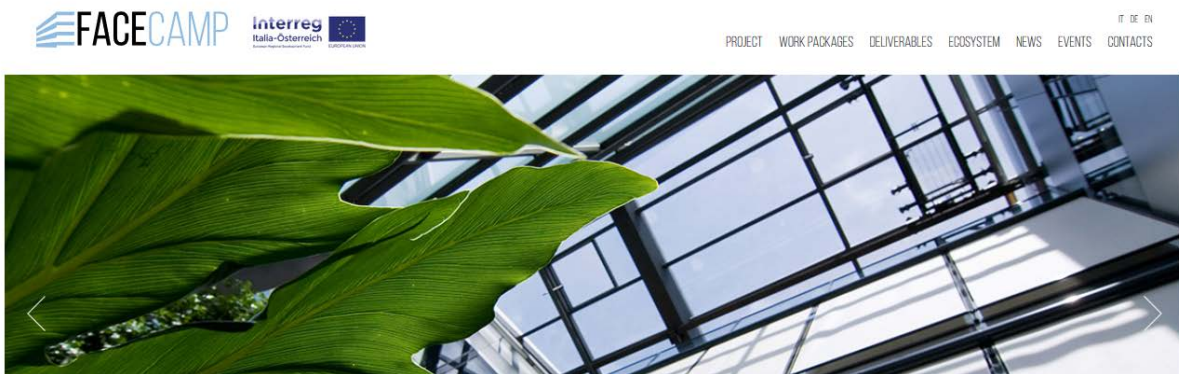

IDM drafted the website structure and then all partners contributed to contents.

The website consists of 7 webpages in each of the three languages.

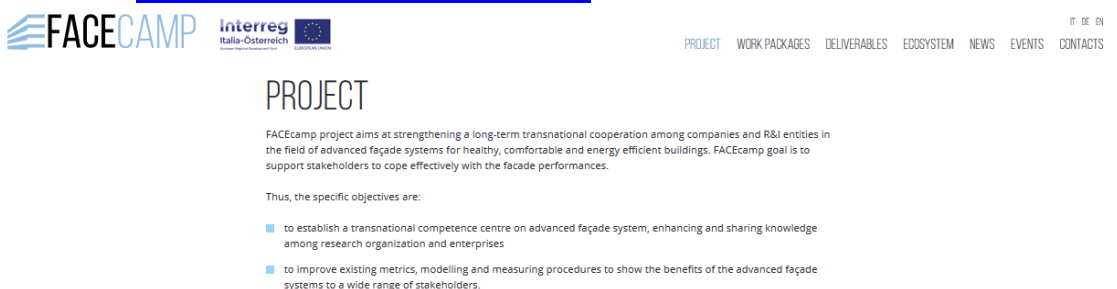

Public events, events attended by project partners, results were published on the website and promoted to the public.

Here below there are some images taken from the project website.
